U.S. Sentencing Commission Preliminary Crack Cocaine Retroactivity Data Report

Introduction

As part of its ongoing mission, the United States Sentencing Commission provides Congress, the judiciary, the executive branch, and the general public with data extracted and analyzed from sentencing documents submitted by courts to the Commission.¹ Data is reported on an annual basis in the Commission's *Annual Report and Sourcebook of Federal Sentencing Statistics*.²

The Commission also reports preliminary data for an on-going fiscal year in order to provide real-time analysis of sentencing practices in the federal courts. Since 2005, the Commission has published a series of Quarterly Reports that are similar in format and methodology to tables and figures produced in the *Sourcebook of Federal Sentencing Statistics* or in the Commission's *Final Report on the Impact of the United States v. Booker on Federal Sentencing.*³ The Quarterly Reports contain cumulative data for the on-going fiscal year (i.e., data from the start of the fiscal year through the most current quarter).

This report is another in the Commission's efforts to provide analysis of federal sentencing practices. It provides data concerning recent court decisions considering motions to reduce the length of imprisonment for certain offenders convicted prior to November 1, 2007 of offenses involving crack cocaine.

On May 1, 2007, pursuant to 28 U.S.C. § 994(a) and (p), the Commission submitted to Congress amendments to the federal sentencing guidelines that became effective on November 1, 2007. One of those amendments, Amendment 706, modified the drug quantity thresholds in the Drug Quantity Table of §2D2.1 so as to assign, for crack cocaine offenses, base offense levels corresponding to guideline ranges that include the statutory mandatory minimum penalties. Crack cocaine offenses for quantities above and below the mandatory minimum threshold quantities similarly were adjusted downward by two levels. The amendment also included a mechanism to determine a combined base offense level in an offense involving crack cocaine and other controlled substances.

On December 11, 2007, the Commission voted to approve Amendment 713 which amended §1B1.10 of the guidelines to include Amendment 706, as amended by Amendment 711, in the list of amendments that apply retroactively. The Commission voted to make Amendment 713 effective on March 1, 2008. As a result, some incarcerated offenders are eligible to receive a reduction in their sentence under 18 U.S.C. § 3582(c)(2) pursuant to Amendment 706.

¹ In each felony or Class A misdemeanor case sentenced in federal court, sentencing courts are required to submit the following documents to the Commission: the Judgment and Commitment Order, the Statement of Reasons, the plea agreement (if applicable), the indictment or other charging document, and the presentence report. See 28 U.S.C. § 994(w).

² See the Commission's website, www.ussc.gov, for electronic copies of the 1995-2006 *Annual Report* and *Sourcebook of Federal Sentencing Statistics*.

³ See www.ussc.gov/bf.htm for an electronic copy of the Commission's *Final Report on the Impact of United States* v. Booker on Federal Sentencing.

This report provides information on all cases reported to the Commission in which the court considered a motion to reduce a sentence under 18 U.S.C. § 3582(c)(2) for an offender convicted of an offense involving crack cocaine. Users of this information are cautioned that the data are preliminary only and subject to change as the Commission receives, analyzes, and reports on additional cases.

In particular, the reader is cautioned with respect to drawing conclusions based on data concerning the denial of motions for sentence reduction pursuant to the crack cocaine amendment, as the judicial districts are employing various methods to prioritize the review of these motions. For example, in many districts, contested motions have not been decided by the court. Consequently, the data the Commission has received to date concerning cases in which the motion for a sentence reduction was denied may not be representative of the decisions that ultimately may be made in all districts or the nation as a whole.

¹The 171 offenders represented in this column are those whom the Commission previously identified as eligible to seek a sentence reduction but whose petition for a reduction was denied by the court. Of the remaining 401 cases in which the court denied the request for a sentence reduction, 278 were excluded from this analysis because the offender was not previously identified as eligible to seek a sentence reduction for one or more reasons (*see* "Analysis of the Impact of the Crack Cocaine Amendment If Made Retroactive" (October 3, 2007) *available at* www.ussc.gov). Of the remaining 123 cases, 27 were excluded from this analysis because the offender had been identified as released or projected to be released prior to November 1, 2007 and so was excluded from the Commission's prior analysis of eligible offenders, 34 were excluded from this analysis because the offender was not sentenced for a drug offense, 55 were excluded from this analysis because crack cocaine was not involved in the offense, and seven were excluded from this analysis because the reason for the court's decision cannot yet be determined.

¹Of the 3,647 cases, 30 were excluded from this analysis because the case cannot be matched with an original case in the Commission's records and 570 were excluded from this analysis because the court denied the motion for a sentence reduction. Of the remaining 3,047 cases, 664 were excluded from this analysis because the offender was sentenced to time served and the resulting term of imprisonment could not be determined from the records received by the Commission.
