STATEMENT

OF

ROGER A. PAULEY, MEMBER (ex officio)
UNITED STATES SENTENCING COMMISSION
UNITED STATES DEPARTMENT OF JUSTICE

BEFORE THE
UNITED STATES SENTENCING COMMISSION

CONCERNING

PROPOSED SENTENCING GUIDELINES AMENDMENTS

ON
MARCH 22, 1993
Mr. Chairman and Members of the Commission:

I appreciate the opportunity to appear before you on behalf of the Department of Justice to discuss the sentencing guideline amendments the United States Sentencing Commission has recently proposed. In my statement today, I would like to highlight a few of the most important areas of concern raised by the proposed amendments. The Department has also provided a more comprehensive set of written comments on the amendments.

DEPARTMENT OF JUSTICE PROPOSALS -- COLLATERAL ATTACKS ON PRIOR CONVICTIONS

As the Commission is aware, the Department of Justice proposed amendments addressing several important areas of concern to law enforcement. These areas include increasing the penalties for anabolic steroids and certain other controlled substances, establishing a guideline for computer fraud and abuse, and addressing concerns about firearms sentences. We strongly urge the Commission to consider these, as well as our other, proposals.

One amendment of great importance to the Department and to the justice system involves the problem of collateral attacks on prior convictions as they relate to a defendant's criminal history under the sentencing guidelines, Amendment 57. Adoption of this amendment is extremely important because collateral attacks on prior convictions threaten to undermine the entire sentencing process. For example, one United States Attorney's Office reports that most career offenders in that district attack
prior convictions at sentencing and thereby delay the sentencing process. In some cases poorly documented prior State convictions that may have occurred years before must be considered by the federal sentencing court. Delving into the validity of facially valid prior convictions is overly burdensome to the sentencing process, which ought not be used as a substitute for appeals or habeas corpus. Except to the extent the Constitution or a statute requires otherwise, a defendant should be precluded from raising the alleged invalidity of prior convictions at sentencing.

The problem arises because the current commentary to guideline §4A1.2 states: "The Commission leaves for court determination the issue of whether a defendant may collaterally attack at sentencing a prior conviction." United States Sentencing Commission, Guidelines Manual (Nov. 1992). This language has been interpreted in some circuits as providing sentencing courts with discretion to inquire into the validity of prior convictions. United States v. Canales, 960 F.2d 1311 (5th Cir. 1992); United States v. Jakobetz, 955 F.2d 786, 805 (2d Cir. 1992) (dicta); United States v. Cornoq, 945 F.2d 1504, 1511 (11th Cir. 1991); but see United States v. Roman, 960 F.2d 130 (11th Cir. 1992), opinion vacated and petition for rehearing en banc granted, 968 F.2d 11 (11th Cir. 1992). These courts have reached this result despite the contrary inference arguably arising from the Commission's commentary that sentences resulting from convictions that a defendant shows to have been previously
ruled constitutionally invalid are not to be counted.
Application Note 6, §4A1.2.

The proposed amendment would delete the problematic language in the commentary to guideline §4A1.2 and clarify that the Commission does not intend to confer any right to attack collaterally at sentencing a prior conviction or sentence. The amendment recognizes, however, that other law may grant defendants the right to the collateral attack of prior convictions, e.g., 21 U.S.C. §851. This recognition obviously also includes any constitutional protection defendants may enjoy. See United States v. Vea-Gonzales, No. 91-30469 (9th Cir. February 22, 1993).

We urge the Commission to adopt Amendment 57 with one modification. We believe that the amendment (developed by the Commission staff) would be improved if it did not include the first sentence: "Whether a defendant at sentencing may collaterally attack a prior conviction or sentence is a procedural matter for court determination." This sentence, which is similar to the one that has led to the problematic court holdings, is likely to cause confusion and may be construed as inconsistent in part with the second sentence.

ACQUITTED CONDUCT (Amendments 1, 34, and 35)

The Department strenuously opposes the various published proposals to change the definition of relevant conduct in guideline §1B1.3 so that acquitted conduct may no longer be
considered in determining the guideline range. This change would constitute a dramatic departure from the constitutional standards courts have historically applied in both pre-guideline and guidelines cases and would reverse a long line of well-settled appellate decisions which permit judges to rely on evidence of a defendant's conduct relating to charges on which the defendant was acquitted at trial. It is also at odds with the Commission's fundamental commitment to a modified real offense system by preventing the court from sentencing the defendant on the basis of conduct which the court finds by a preponderance of evidence to have actually occurred.

Most courts of appeals have held that the Constitution does not preclude the use of acquitted conduct for sentencing purposes. United States v. Mocciola, 891 F.2d 13, 16-17 (1st Cir. 1989); United States v. Rodriguez-Gonzalez, 899 F.2d 177, 180-182 (2d Cir.), cert. denied, 111 S. Ct. 127 (1990); United States v. Ryan, 866 F.2d 604, 608-609 (3d Cir. 1989); United States v. Isom, 886 F.2d 736 (4th Cir. 1989); United States v. Juarez-Ortega, 866 F.2d 747, 749 (5th Cir. 1989); United States v. Duncan, 918 F.2d 647, 652 (6th Cir. 1990), cert. denied, 111 S. Ct. 2055 (1991); United States v. Ponner, 920 F.2d 1330, 1332-1333 (7th Cir. 1990); United States v. Dawn, 897 F.2d 1444, 1449-1450 (8th Cir.), cert. denied, 111 S. Ct. 389 (1990); United States v. Averi, 922 F.2d 765 (11th Cir., 1991). These rulings are consistent with Supreme Court decisions allowing acquitted conduct to be introduced in evidence at a defendant's
subsequent trial, *Dowling v. United States*, 493 U.S. 342 (1990), and allowing civil forfeiture notwithstanding acquittal on the same charges underlying the forfeiture. *United States v. 89 Firearms*, 465 U.S. 354 (1984). The broader rules of evidence admissible at sentencing, as compared to trial, also militate against a bar to using acquitted conduct for sentencing purposes. There is surely no unfairness in sentencing a defendant based on additional evidence, e.g., obtained from a search whose fruits could not be admitted at trial, that clearly shows that the defendant engaged in the conduct at issue.

There are, moreover, additional reasons why changing the present rules with respect to acquitted conduct would be unwise. First, the change would lead to an undue increase in litigation. Frequently, the effect of an acquittal is unclear because the basis of the jury's verdict cannot be definitively established. For example, suppose a defendant and a confederate are charged with selling drugs and the defendant with using a firearm during and in relation to that crime (18 U.S.C. §924(c)). The defendant is convicted of the drug charge but acquitted of the firearms offense. Should that mean that the defendant can assert the acquittal to successfully resist the government's attempt to apply the enhancement in guideline §2D1.1 for possessing the firearm? Not necessarily. The proof at trial may have been weak as to whether the firearm belonged to the defendant or to the confederate, also present in the room. The doubt may have been sufficient to cause the acquittal, but, if that was the basis
therefore, not to preclude an enhancement under the guidelines. In other cases, the verdicts may simply be inconsistent, for example, a case in which the defendant is convicted of aggravated bank robbery (18 U.S.C. §2113(d)) for placing life in jeopardy by using a firearm, but acquitted under 18 U.S.C. §924(c) for using the firearm to commit the robbery. Based on anecdotal information from the United States Attorneys, it is our belief that the number of inconsistent verdicts, particularly in drug and fraud prosecutions, is growing. In each of these situations, if the Commission were to bar the use of acquitted conduct in determining the guideline range, difficult litigation would arise over the effect of the acquittal -- an increased burden on the already highly complex sentencing process that we think is unjustified and that many courts, we suspect, would not welcome.

Second, a limitation on the use of acquitted conduct would likely lead to unwarranted charging and sentencing disparity, contrary to the goal of the Sentencing Reform Act, and would encourage more trials and sentencing hearings. Under the proposal, the court would remain obligated to consider conduct not charged in the indictment but within the ambit of relevant conduct, but could not consider that same conduct if it had been charged and resulted in acquittal. Often, the decision whether to bring a charge that later results in acquittal will be a close one, on which reasonable prosecutors would reach conflicting judgments. If the rule on acquitted conduct were changed as proposed, these reasonable but opposing charging decisions by
prosecutors would produce markedly different sentences. Moreover, the change would create a temptation for prosecutors to decline to bring charges that they fear could result in acquittal and wait to bring supporting facts to the court's attention at sentencing. Likewise, defendants, who are encouraged under the current definition of relevant conduct to enter pleas when charged with several counts with similar offenses will, if the proposed amendment is adopted, have a strong incentive to go to trial to try to defeat one or more of the multiple counts, thereby increasing the number of trials in the hard-pressed justice system.

For all of these reasons, we strongly urge the Commission to reject the superficially appealing but unsound proposals to limit the use of acquitted conduct.

LIMITATIONS ON THE IMPACT OF CONTROLLED SUBSTANCE QUANTITY ON OFFENSE LEVEL DETERMINATIONS (Amendments 8, 9, 39, 48, and 60)

The Commission has proposed several amendments aimed at limiting the impact of drug quantity on the determination of offense levels. While drug quantity may not be a perfect measure of harm, it reflects both the scope of the activity in which a defendant is involved and the resulting harm to society and, therefore, should be retained as an important measure of the appropriate sentence. Moreover, the Commission has decreased the impact of drug quantity on sentencing in large part with its 1992 amendment of the relevant conduct guideline. The effect of this
amendment in many cases is a narrower range of conduct for which a defendant is liable for sentencing guideline purposes -- that is, a smaller quantity of drugs -- than the scope of the conspiracy in which the defendant is involved.

While we believe that drug quantity is an important factor in sentencing and urge the Commission to make no amendments in this regard until it can determine the effect of the recent relevant conduct amendments, we recognize that the Commission may wish to address the view of critics that drug quantity as it now affects the determination of sentence still plays too great a role. Should the Commission determine that an amendment addressing drug quantity is needed, we would not oppose the adoption of a narrower version of Amendment 8.

Amendment 8 amends the drug trafficking guideline, §2D1.1, to provide that if a defendant qualifies for a mitigating role adjustment, the base offense level shall not be greater than level 32. It also amends the mitigating role guideline, §3B1.2, to describe more specifically the characteristics of a defendant subject to a mitigating role adjustment in sentence. Amendment 8, which places the cap at a level sufficient to accommodate a 10-year mandatory minimum sentence, would be acceptable to the Department if the following conditions are met.

(1) The proposed cap on the sentence should apply only to minimal, but not minor, participants. Providing an extra benefit to offenders at the highest offense levels should be limited to the least culpable among this group.
(2) If the Commission adopts the level 32 cap for minimal participants, it is essential that it also approve Amendment 60. This amendment, proposed by the Department, precludes a role reduction for drug defendants whose relevant conduct subject to the drug-trafficking guideline consists only of drug quantities in their actual possession. For example, a person who transports two kilograms of crack cocaine for a large drug enterprise trafficking in much greater quantities should not receive the benefit of a role reduction if his relevant conduct is limited to the two kilograms. Such a defendant's participation is not minor or minimal when viewed in light of his relevant conduct, which itself reflects a reduction for the defendant's role in the joint activity.

By barring a role reduction for such offenders, Amendment 60 would also prevent application of the level 32 cap. Thus, offenders who possess controlled substances in such large quantities that their offense level is above level 32 on the basis of the amounts they actually possess would neither receive a mitigating role reduction nor benefit from the proposed cap. This result is appropriate for offenders entrusted by drug organizations with large quantities of controlled substances. We recommend adoption of proposed amendment 60 rather than proposed Application Notes 6 and 7 in Amendment 8 to deal with this issue since
amendment 60 is clearer and more comprehensive in its approach.

Even if the Commission does not adopt the proposed cap for minor or minimal participants, it should adopt Amendment 60 since the principle that a defendant does not play a minor or minimal role when his relevant conduct is limited to the drugs in his possession is an important one under the current drug guideline scheme. One technical correction needed is that, as printed, amendment 60 incorrectly amends guideline §2B1.2, rather than §3B1.2.

(3) Another condition for our acquiescing to the adoption of Amendment 8 is that the Commission bar a defendant from receiving a mitigating role adjustment if he possessed or had ready access to a firearm or other dangerous weapon or if he engaged in assultive or violent behavior. In addition, the mitigating role adjustment should be precluded for an offender who directed or induced another participant in this regard. Amendment 8 establishes this preclusion in a more limited form -- only for those who possess or have ready access to a firearm or who direct or induce another participant to possess a firearm.

(4) The final condition is that the Commission retain current Application Notes 2 and 4, which Amendment 8 proposes to delete from the commentary to guideline §3B1.2. Note 2 states the Commission's intent that the downward adjustment for a minimal participant be used infrequently.
Deletion of this language will be taken as a signal that the Commission intends a broadened application of the role reduction guideline, despite the more direct description of mitigating role that is proposed. Likewise, the Commission should preserve existing Application Note 4, which ordinarily bars a role reduction for a defendant who has received a lower offense level by virtue of being convicted of an offense significantly less serious than warranted by his actual criminal conduct.

Amendment 8, as modified, would address the concern that drug quantity drives sentencing to too great an extent while avoiding unnecessary and radical changes in the guidelines. We oppose Amendments 9, 39, and 48, which contain a number of objectionable features. The most notable is that Amendments 9 and 39 create a cap of level 36 for drug quantity applicable to all offenders, regardless of their role in the offense. Drug traffickers would have no disincentive to deal in huge quantities of drugs since they could do so with impunity for the excess above level 36 amounts. Amendment 39 also makes further adjustments to the drug quantity table that are problematic in their relationship with mandatory minimum provisions. Under the amendment aimed at reducing sentences, amounts that would require imposition of a mandatory minimum would fall in a range that barely accommodates the mandatory minimum. By placing the guideline maximum at a level very close to the mandatory minimum, this scheme provides the courts with little discretion to set the
sentence within a reasonable range in recognition of factors not specified in the guidelines or to take into account the range of drug quantities subject to the same offense level. It also precludes reduction for mitigating role in the offense or acceptance of responsibility for those defendants whose drug quantities are at or just above the mandatory minimum amounts.

We are also particularly troubled by the proposed role-in-the-offense adjustments in Amendments 9, 39, and 48. For example, Amendment 9 proposes a 4-level reduction for a defendant who did not own or sell drugs, did not exercise decision-making authority, did not finance the operation, and did not use relevant special skills. The effect of this proposal would be an automatic reduction for drug couriers, regardless of the measure of their relevant conduct. Drug couriers are essential to the operation of a drug-trafficking organization and play a central, rather than a minimal, role in the offense. The amendment is also contrary to Amendment 60, discussed earlier, which denies a mitigating role adjustment to defendants whose relevant conduct consists of the drugs in their actual possession. In addition, Amendment 39's proposed 6-level decrease for "significantly minimal" participants would lead to endless litigation over the differences between "significantly minimal" and "minimal" participants and would invite disparity. Creating another level of role in the offense is a complication the guidelines do not need. Finally, the proposed caps below level 32 in Amendment 48 for minor and minimal participants trafficking in substances
subject to mandatory minimum sentences are unacceptable. Our willingness to accept any cap is limited to its being set no lower than level 32 -- which is consistent with the 10-year mandatory minimum.

We favor Amendment 39's proposed increases in guideline §2D1.1 for the use of a firearm or other weapon and the defendant's leadership role in a large organization and believe that these increases would have validity under the current structure of guideline §2D1.1.

**DRUG MIXTURES (Amendments 10 and 49)**

Amendments 10 and 49 would amend the commentary to guideline §2D1.1 to address uningestible portions of drug mixtures. Amendment 10 would exclude for sentencing purposes "uningestible, unmarketable portions," while Amendment 49 would exclude "portions of a mixture that are uningestible or unmarketable." Both proposals would exclude materials that have to be separated from the controlled substance before the controlled substance can be used.

We do not object to the concept of excluding uningestible, unmarketable portions of a drug mixture but believe there is a need for clarification and further amendment. First, the opening statement of Application Note 1 provides that a mixture or substance for purposes of guideline §2D1.1 "has the same meaning as in 21 U.S.C. §841." The Commission is not in a position to make this assertion and then to provide a guideline definition
that the courts may or may not accept for purposes of application to the statute. The courts, for purposes of applying statutory penalties, may not agree with the Commission's determination of what portions of a mixture should be included or excluded. The Commission is in a position only to dictate the application of the sentencing guidelines, not the statutory penalties. This sentence should be deleted.

Next, the use of a suitcase to which cocaine is bonded, for example, reflects a sophisticated means to avoid detection. The Commission should provide a guideline enhancement to reflect this added culpability. An increase would provide uniformity in recognizing the added culpability of sophisticated means but would not make the sentence dependent upon the weight of the substance used in this endeavor.

In addition, the amendment should clearly provide that the exclusion applies only to drug mixtures which are both uningestible and unmarketable. If a mixture containing uningestible portions is, nevertheless, marketable under the expectation that the purchaser will perform a simple function to extract the controlled substance for use, the entire weight should be included. In this regard, the direction to exclude portions that have been separated from the controlled substance before use is inconsistent with the "uningestible, unmarketable" language and should be deleted. Similarly, portions that are not marketable, for example, because of their need for refrigeration,
should be included if they can be ingested. We recommend the following commentary to address these concerns:

This exclusion applies only to mixtures which are both uningestible and unmarketable. Therefore, if a mixture is marketable but is not ingestible because, for example, of adulterants or other components of the mixture, the entire mixture will, nevertheless, be included for sentencing purposes.

We also recommend the addition of commentary to recognize that the weight of the controlled substance may be determined by extrapolating from the weight of a sample of the mixture from which the controlled substance has been extracted. Without this language, the courts may incorrectly infer a requirement that the entire quantity of the controlled substance be extracted -- an approach that would be overly burdensome to the Drug Enforcement Administration, which has to perform some extractions with the use of harmful solvents. Moreover, the commentary should state that once the controlled substance is extracted, it need not be in "pure" form. We suggest the addition of the following commentary:

In calculating the sentencing weight of the controlled substance, the court may extrapolate the total quantity of the controlled substance based on the quantity extracted from a sample of the mixture. After exclusion of the uningestible, unmarketable portions, the substance included in the sentencing weight need not be the "pure" controlled
substance. Rather, any substances that are normally included with marketed mixtures of the controlled substance, and that were, therefore, likely to have been with the controlled substance before it was combined with the portions to be excluded, are included in the "mixture" for sentencing purposes.

Finally, we recommend specifying that LSD on blotter paper, sugar cubes, or other similar "carriers" are examples of mixtures not subject to the exclusion of uningestible and unmarketable portions. This amendment would prevent defense arguments that the amendment in question encompasses such LSD cases.

**MONEY LAUNDERING (Amendment 20)**

The Commission has proposed a sweeping amendment of the money laundering guidelines, §§2S1.1 through 2S1.4. The amendments would substantially lower the penalties for many money laundering offenses, even very pernicious ones, and send a dangerous signal that money laundering is merely an inconsequential extension of the unlawful activity that produces the dirty funds. This message is at odds with actions by Congress, which has treated money laundering as a serious offense that is wholly distinct from the underlying unlawful activity. Moreover, money laundering, subject to a 10- or 20-year penalty depending upon the offender's intent, is an offense that threatens our nation's financial institutions and, therefore, our economic well-being, by involving these institutions in
transactions rooted in unlawful conduct. The Department vigorously opposes the proposed amendments.

The amendment of guideline §2S1.1 would reduce the offense level for many money laundering offenses to a level equivalent to, or slightly above, the level applicable to a fraud offense involving the amount of money laundered. That is, money laundering would be treated in a manner generally consistent with fraud. This decrease would apply to both money laundering related to white collar offenses and money laundering related to a myriad of other serious offenses, such as arms violations, murder for hire, and other violent crimes. In many cases the amendment would also reduce the offense level for money laundering related to drug trafficking, which now starts at level 23 or 26, under guideline §2S1.1, and 22, under guideline §2S1.2, and increases depending on the amount of funds laundered. The only cases generally spared from reduction are those in which the money launderer committed the underlying unlawful activity and the offense level for that activity is equal to or greater than the currently applicable money laundering offense level.

In our view, the motivation for the suggested change in large part relates to "receipt and deposit" cases -- that is, cases in which the money laundering conduct is limited to depositing the proceeds of unlawful activity in a financial institution account identifiable to the person who committed the underlying offense. We believe that these cases are but a small
segment of the universe of money laundering and that recent
caselaw developments, as well as internal Department of Justice
prosecution guidelines, have cured many of the problems of the
past. The overall approach of the money laundering sentencing
guidelines should not be revised because of these cases, nor do
we believe that other cases that have been cited as non-serious
money laundering dictate sweeping amendments. However, we
acknowledge that "receipt and deposit" cases, when correctly
identified, may more appropriately be sentenced at a different
level.

To this end, we have recently submitted a proposal that
would carve out "receipt and deposit" cases from current
treatment under guidelines §2S1.1 and 2S1.2 (copy attached).
Under our proposal money laundering offenses for which the
underlying activity did not involve controlled substances, a
crime of violence, firearms, or certain other offenses would be
sentenced at 8 levels above the level established by the fraud
table in guideline §2F1.1 corresponding to the value of the
funds. The proposal specifies further conditions: the money
laundering conduct must have been limited to the deposit of non-
currency proceeds into a domestic financial institution account
that is clearly identifiable as belonging to the person who
committed the specified unlawful activity. The principal reason
for the limitation to "non-currency" proceeds is that currency is
the most dangerous form of proceeds from the standpoint of
enforcement of the money laundering laws since, once deposited
into an account with other funds, there is no ability to trace it back to the specified unlawful activity which generated it. Our proposed treatment of this class of cases is identical to the Commission's proposal relating to the class of cases subject to the most lenient treatment. However, our proposal preserves current offense levels for cases which do not fall within the exception, such as cases that involve further money laundering conduct. Thus, our proposal reduces the "shock" to the system that a wholesale, and unnecessary, revision of the money laundering guidelines would bring. We urge you to consider our proposed amendment, as well as the appendix to this statement, which sets forth more fully the reasons for our opposition to the proposed money laundering amendments.

The appendix also highlights our concerns regarding the proposed amendment of guidelines §§2S1.3 and 2S1.4, addressing transaction reporting and currency and monetary instrument reporting. The Department had submitted a proposal to harmonize disparate treatment of the various offenses that fall within these guidelines. The Commission's proposal, while it brings about harmony, produces substantial and inappropriate reductions in offense levels. Reporting requirements relating to financial transactions and the movement of currency and monetary instruments are critical to curbing money laundering and enabling investigators to trace unlawful proceeds. Proposals to reduce sentences in this area should be rejected as inconsistent with
the goal of deterrence of both reporting offenses and money laundering in general.

SUBSTANTIAL ASSISTANCE MOTIONS (Amendments 24, 31, and 47)

The Commission has proposed several amendments to policy statement §5K1.1 to eliminate the prerequisite of a government motion for departure below the applicable guideline range to reflect a defendant's substantial assistance in the investigation or prosecution of others. In addition, the Commission has invited comment whether to eliminate the requirement of a government motion in the case of a first offender, where no violence was associated with the offense.

We strongly oppose these amendments. Even if one agreed with the concept of allowing a defense motion over the objection of the prosecutor, amending the existing policy statement would be a mistake. As the Commission knows, Congress has provided by statute that a government motion to reduce a sentence based on cooperation is required for situations in which the cooperation occurs after sentence is imposed (Rule 35, F. R. Crim. P.) and where reduction would mean lowering the sentence below a mandatory minimum (18 U.S.C. §3553). It is difficult to imagine that Congress could have intended a system in which a government motion is required in these circumstances but not in the situation currently addressed by policy statement §5K1.1. Thus, in our view, the appropriate forum to consider this issue is Congress, not this Commission, since the Commission's policy
statement requiring a government motion is consistent with the Congressional scheme.

Moreover, on the merits the published proposals are unsound. For one thing, they will result in increased numbers of (if not indeed routine) requests by defendants for reduction in sentence and can, therefore, be expected unduly to burden the courts. Defense attorneys will feel pressured by future claims of ineffective assistance of counsel to file such motions and will accordingly argue for reduction in many unwarranted cases. In addition, no one disputes that the prosecutor is in the best position to determine whether a defendant has provided substantial assistance in investigating or prosecuting others. This is reflected by the fact that, under the terms of the proposed amendments, the court would still have to give substantial weight to the government's evaluation of the defendant's conduct from the standpoint of substantial assistance. In addition, we point out that the government has an incentive to seek substantial assistance reductions where warranted in order to encourage defendants to cooperate. It is not in prosecutors' long range interests to fail to file such motions where justified by the facts.

Although the current policy statement properly limits reduction of sentence based on a defendant's substantial assistance to cases in which the government has filed a substantial assistance motion, the prosecutor's discretion in filing such motions is not unlimited. The Supreme Court held in
Wade v. United States, 112 S.Ct. 1840 (1992), that federal district courts "have authority to review a prosecutor's refusal to file a substantial-assistance motion and to grant a remedy if they find that the refusal was based on an unconstitutional motive ... say, because of the defendant's race or religion." Id. at 1843-1844.

For all these reasons, we strongly urge the Commission to reject the proposed amendments to policy statement §5K1.1.

FRAUD AND THEFT (Amendments 5, 6, 7, 37, 38, 45, and 65)

The Commission has requested comments on whether adjustments should be made to the loss tables in the fraud and theft guidelines, and whether the loss tables provide appropriate and adequate punishment for the loss categories included. Several alternative approaches are provided for consideration.

A major change proposed in Amendment 5 would delete the "more than minimal planning" adjustment from the fraud and theft guidelines and the use of "sophisticated means" from the tax guidelines and replace them with a two-level increase in the loss tables. As we have stated in the past, the Department opposes elimination of "more than minimal planning" from the fraud and theft guidelines. In our experience, the extent of planning is an important indication of the seriousness of a crime. Particularly if a defendant is caught early in a fraud scheme before substantial losses are amassed, it may be impossible to establish a significant loss from the fraud, but eminently
feasible to show the extent of "planning". Losses are also extremely difficult to document in complex schemes to defraud and are thus unaccounted for in many cases because of defendants' successful efforts to hide the scope of illegal activity.

If the Commission decides to eliminate the enhancement for "more than minimal planning," the Department strongly favors the proposal to increase by two levels the base offense level of the fraud and theft guidelines. We would not oppose a related two-level decrease if the defendant proved the offense constituted a single, opportunistic act that did not involve "more than minimal planning".

We have substantial concerns about the proposed gradual increase in offense levels in the loss tables to replace "more than minimal planning". Since the proposed two-level adjustment for "more than minimal planning" does not actually occur until the losses are greater than $40,000, the proposal effectively lowers by two levels (in the $2,000 to $5,000 range) and one level (in the $5,000 to $40,000 range) the offense levels for many crimes in which the "more than minimal planning" adjustment had been previously applied, such as crimes which may have been discovered early and did not have a large dollar amount assigned to them, and those many "smaller" crimes that did involve "more than minimal planning".

In addition, we fail to see the logic of eliminating from the tax guidelines the use of "sophisticated means" to avoid discovery of the nature or extent of the fraud. We view the use
of offshore bank accounts, shell corporations, etc., as factors which can be easily identified and which greatly increase the seriousness of the crime and defendants' culpability warranting increased punishment. Rather than being eliminated, the use of "sophisticated means" should be retained in the tax guidelines and added to the fraud and theft guidelines.

The Department supports the proposal to increase the loss tables for the offense levels with "extremely high loss amounts". As we have testified before, this change is absolutely necessary to reflect Congressional intent in raising the maximum sentences for a number of fraud and theft offenses. We also favor making the increases in offense levels steeper as the amount of loss increases.

We also recommend that the offense level for fraud be calculated on the basis of the higher of the amount of gain or loss resulting from the offense. In many of the Department's fraud cases, there is no dollar loss associated with the crime, but there is a gain to the defendant, which should be considered in the calculation of the offense level.

In our experience, the use of dollar loss as a primary indicator of the seriousness of the offense often underestimates the extent of the crime and the damage to individuals and society. Defendants can do great harm without creating large dollar losses, and the same monetary loss to a bank or an elderly pensioner has a vastly different impact. There are numerous cases in which there is no dollar loss associated with the crime,
such as those involving false identification documents and fraud cases charging mislabeling, loan fraud, and other types of misrepresentations.

In many other cases it is difficult to quantify the losses. In food, drug, and medical fraud cases, monetary losses often do not reflect the potentially significant negative health risks caused by defendants such as pharmacists who distribute outdated, unapproved or ineffective drugs, or veterinarians who distribute drugs that leave harmful residue in food. In other cases losses may be impossible to prove, such as fraudulent schemes which involve poor records or an obscure paper trial but may affect many victims. Therefore, we strongly support the addition of specific offense characteristics to reflect harm other than dollar losses. The types of harm identified by the Commission in proposed Amendment 7 are appropriate and should be further refined and adopted. A general statement as in proposed Amendment 6 that an upward departure may be warranted if the sentence understates the actual harm, by itself, is not sufficient.

The guidelines do not adequately reflect the seriousness of fraud affecting multiple victims, such as telemarketing fraud. Rather than eliminating the enhancement in the fraud and theft guidelines proposed in Amendment 5 for cases involving more than one victim, we recommend adding specific offense characteristics that would increase the offense levels as the number of victims increases. This change recognizes the increased societal harm
that occurs when numerous people are victimized, and the significantly heavier burden on the criminal justice system in investigating and prosecuting the crime and establishing restitution for victims, as well as on business and commerce, such as in telemarketing cases, when large numbers of people resolve never to trust a telemarketer, legitimate or otherwise.

The Commission has asked for comments in Amendments 37 and 65 on whether the fraud guidelines should be amended to include the risk of loss as a factor in determining the guideline range when the amount of risk is greater than the amount of the actual or intended loss. The Department believes this proposal is a good idea to cover fraudulent loan application cases and other cases such as, for example, defendants who, in their role as individual sureties on government contracts, use fraudulent assets as security for payment and performance bonds, and thus present a substantial risk of loss if the government is forced to collect against the bonds for a contractor's default. Increasing the emphasis on risk of loss is also of crucial importance in environmental cases. The risk of loss should also encompass risks to the public health caused by schemes to market drugs, medical devices and foods which are capable of causing serious harm.

The Department strongly opposes lower sentences for defendants who did not personally profit from the crime as proposed in Amendment 38. Fraud is frequently made possible and prolonged by people participating in it if only to keep their
jobs. Downward departures for them are unwarranted. If a person decides to engage in criminal activity, he or she should not benefit at sentencing merely because the government is unable to identify the monetary incentive that led the defendant to commit the crime. The proposed amendment would lead to litigation over the wages and benefits of employees to learn if they profited financially from the offense, hardly a fit subject for a sentencing hearing.

**TAX OFFENSES (Amendments 21 and 41)**

We have not addressed in our testimony today the proposed changes to the tax guidelines, on which a representative of the Internal Revenue Service will be testifying. The Department supports the IRS's approach, and we have submitted a fairly extensive analysis of the proposed tax amendments in our written comments. However, if the Commission has any questions for the Department about the proposed tax guideline amendments, we are prepared to respond in writing to the Commission's inquiries.

**DEPARTURES FOR A COMBINATION OF OFFENDER CHARACTERISTICS**  
(Amendment 29)

Amendment 29 addresses offender characteristics that the Sentencing Commission has identified as not ordinarily relevant to determining whether a sentence should be outside the guidelines. Such factors include age, education, employment record, family ties, and military record. See United States
Sentencing Commission, Guidelines Manual, Chapter Five, Part H (Nov. 1992). The amendment proposes that such factors, although not ordinarily relevant to departure, may, nevertheless, be considered if they, "alone or in combination, are present to an unusual degree and are important to the sentencing purposes in the particular case." Since the factors enumerated may currently be considered as grounds for departure in extraordinary cases, the real impact of the proposal relates to cases in which the factors in question are present in combination with other factors. That is, the amendment proposes that factors the Commission has already identified as ordinarily irrelevant to departure become the basis for departure because of their cumulative effect.

We strongly oppose this amendment because it could seriously erode the goal of the Sentencing Reform Act of 1984 of reducing unwarranted sentencing disparity. The Commission has wisely identified a group of factors that likely would bring about a great deal of disparity if ordinarily relied on as bases for departure. For example, one sentencing judge may determine that a defendant's recent graduation from a university is a basis for a downward departure to a probationary sentence while another judge may find that a similar defendant's university degree and future opportunities render his unlawful conduct more blameworthy and, therefore, inconsistent with downward departure. Under the current policy statement education is not ordinarily a ground for departure, and both defendants would be subject to the same
More importantly, both defendants would be subject to the same guideline range as an offender not fortunate enough to have received a higher education. However, the proposed amendment would allow the judge intent on departure to take into account such factors as the defendant's young age, his strong family ties, and some other factor, such as prior public service work -- in combination with his recent university graduation -- to order a downward departure even though no single factor would have provided a basis for it.

In short, the amendment invites disparity of exactly the sort the Sentencing Reform Act instructs the Commission to avoid: favorable treatment for offenders with higher socio-economic status. See 28 U.S.C. §994(d). The proposed "combination of factors" basis for departure is but a thinly veiled disguise for this favorable treatment. If the Commission addresses the effect of a combination of factors at all, it should adopt a contrary amendment to dispel the notion that a combination of irrelevant factors can somehow become relevant.
APPENDIX

Money Laundering is an international crime which has reached epidemic proportions. In 1990, the G-7's Financial Action Task Force (FATF) estimated the United States' share of international drug proceeds to be $100 billion; other estimates put this figure at closer to $200 billion. The Federal Bureau of Investigation estimates that when drug money laundering is combined with other major types of money laundering, the figure for money laundered in the United States annually may be as high as $300 billion. The money laundering statutes were drafted with the intention of reaching the flow of proceeds from this whole spectrum of illegal activity, from narcotics offenses to white collar crime, to terrorism, organized crime and environmental crime.

Because this is the first time that the Commission has reviewed the money laundering guidelines, we believe that a full explanation of the consequences of the pending proposal is appropriate, in light of the drastic effect the proposal would have on sentences in money laundering prosecutions. The Commission's proposal (Amendment 20) would markedly reduce the base offense levels for laundering of white collar crime proceeds, in even its most pernicious forms, as well as for professional drug money launderers.¹

¹While most of our discussion focuses on the non-narcotic area, it is important to note that the proposed amendment could significantly reduce sentences for some professional drug money launderers, who usually are not involved in the underlying drug offenses and therefore would not be sentenced under §2S1.1(a)(1) of the proposed amendment. This is the case in several of the recent Operation Polar Cap prosecutions. Such cases are the kind of offenses that § 1956 was aimed at, and are the cases which arguably should merit the strongest punishment under the guidelines.
The principal law enforcement agencies fighting money laundering -- the Federal Bureau of Investigation, the Drug Enforcement Administration, the Customs Service, the Internal Revenue Service, and the Postal Service, as well as the Financial Crimes Enforcement Network -- are in agreement that the United States has, proportionally, the worst money laundering problem in the world. The United States money laundering problem and response go beyond drugs to non-narcotic and white collar crime offenses. Indeed, the United States leads the international law enforcement community in enforcement of all types of money laundering. Primarily through its participation in the FATF, the United States has emphasized to the domestic and international financial community the critical need for comprehensive money laundering enforcement, and has been in the forefront of an initiative to broaden the scope of anti-money laundering programs to include the proceeds of non-narcotic as well as narcotic offenses. Many other countries have anti-money laundering laws, but they often do not prohibit the laundering of proceeds of non-narcotic related crimes. Our initiative to broaden the scope of money laundering enforcement would be severely impacted by the message that our domestic enforcement aimed at white collar criminals is in retreat.

The Department of Justice strongly opposes Amendment 20. However, we acknowledge that a modification of the current

2There are presently 103 predicate crimes constituting "specified unlawful activity." Of these, only ten are narcotic related.
guidelines may be appropriate to address a small class of money laundering cases popularly known as "receipt and deposit" cases, which seem to be the area of greatest concern under the current guidelines. Accordingly, the Department, by letter of March 2, 1993, forwarded to the Commission a proposed alternative amendment (also set forth as an attachment hereto), which we believe addresses this class of cases. We urge the Commission to adopt our alternative approach, rather than to completely rewrite the current guidelines, as proposed in Amendment 20.

The Department of Justice opposes the published proposal, drafted by the Commission Staff's Working Group on Money Laundering ("Staff"), on fundamental philosophical grounds. Our fundamental difference lies in the interpretation of the Congressional intent giving rise to the money laundering statutes. In our view, Congress created the money laundering statutes, set the maximum penalty at 20 years, and created the avenue of forfeiture, not merely to deal with what the Staff casts as "facilitating" activity, but to remedy completely separate conduct requiring severe punishment:

The purposes of S. 2683, the Money Laundering Crimes Act of 1986, are: To create a Federal offense against money laundering; to authorize forfeiture of the profits earned by launderers; to encourage financial institutions to come forward with information about money launderers without fear of civil liability; to provide Federal law enforcement agencies with additional tools to investigate money laundering; and to enhance the penalties under existing law in order to further deter the growth of money laundering.

S. Rep. No. 433, 99th Cong., 2d Sess. 1 (1986). Congress said, in essence, that criminals are to be punished routinely for their
underlying criminal conduct, but if they further attempt to have use of their proceeds, they should expect to be punished even more severely, as a separate and distinct crime has been committed.

Moreover, contrary to the more lenient treatment for white collar criminals proposed in the Staff amendment, Congress did not create two money laundering statutes, one with harsh consequences for those who launder narcotic proceeds and one more lenient for white collar criminals. Congress created one statute, with penalties for the launderers of profit of specific white collar offenses as severe as those imposed on narcotic money launderers.\(^3\) Over time Congress has added to the list of non-narcotic specified unlawful activity, has never subtracted, and continues to reach out for ways to strengthen money laundering enforcement in the white collar arena.\(^4\) Indeed, this is in part a response to law enforcement reports which suggest that organized crime and drug trafficking organizations are inserting their narcotics proceeds into "legitimate" businesses

---

\(^3\)The present Sentencing Guidelines set the base offense level for § 1956 money laundering with the intent to promote specified unlawful activity at 23, and at 20 for all other intents. By contrast, the proposed amendment would drop the base offense level for non-narcotics related money laundering to 8 plus the number of offense levels from the table in §2F1.1 (Fraud or Deceit) corresponding to the value of the funds.

\(^4\)As recently as October 1992, Congress added food stamp fraud, violations of the Foreign Corrupt Practices Act, and theft from the mail to the list of specified unlawful activity, and also amended § 1956 (and by reference, § 1957) to include transactions which involve the proceeds of kidnapping, robbery, extortion and bank fraud offenses which occur outside the United States.
and layering their assets with proceeds of subsequent white collar offenses, rendering the nature of the funds virtually indistinguishable as narcotics or non-narcotics related proceeds.

The theoretical basis for the Commission's proposed amendments was set forth in an October 1992 Staff Report, which stated that the Commission's initial decision to set high base offense levels for money laundering "was presumably based on the general conclusion that 18 U.S.C. §1956 would apply only to relatively serious offenses." See Staff of the Sentencing Commission, Report on Information Gathering and Initial Findings, at 17 (October 14, 1992) (Money Laundering Working Group) (hereinafter referred to as "Staff Report I"). According to the Staff report, the Commission, at that time "did not have the benefit of settled judicial interpretations of key terms because the applicable statutes had only recently been enacted . . . these statutes are very broad, and it appears they may be being applied somewhat differently than the Commission anticipated." Staff Report I at 16. Although the first part of this statement may be true, the now-settled judicial interpretations of the key terms, however broad, do not justify the arbitrary distinctions in money laundering conduct set forth in the proposed amendment nor the wholesale dismantling of the money laundering penalties to address anomalous fact patterns.\(^5\)

\(^5\)Among the arbitrary distinctions drawn in the proposed amendment is the identification of "sophisticated" money laundering. The most pernicious forms of money laundering are accomplished by relatively unsophisticated means. For example, recent raids on the Cali Cartel, in Colombia, resulted in the
The Staff's philosophical view, evidenced by its use of language in Staff Report I, a subsequent report dated November 10, 1992, and in the Commentary to the proposed amendment, is that only §1956 concealment and promotion cast as reinvestment in future specified unlawful activity (SUA) are "actual" money laundering. All other statutory bases for prosecution are denigrated by the Staff proposal, which would provide little punishment beyond that imposed for the underlying offense.  

Indeed, in an ambitious attempt to merge the present §2S1.1 (which applies to §1956) and §2S1.2 (which applies to §1957), the proposal sets one level for money laundering and purports to provide enhancement for the §1956 intents. However, only two of the four §1956 intents are included -- promotion and concealment -- the rest of the 20-year offense is ignored. In addition, discovery of bags full of postal money orders. Another seriously damaging method of money laundering is the use of electronic transfers. Neither of these methods can be said to be particularly "sophisticated." Moreover, we contend that the Commission Staff's attempt to define "sophisticated" will have to be modified in each amendment cycle.

In addition, depending on the outcome of another proposed amendment -- to the fraud guideline (§2F1.1) -- which would delete the 2-point enhancement for "more than minimal planning" in favor of a new fraud table which factors in planning, the money laundering base offense levels may end up equal to an underlying fraud offense. If "more than minimal planning" is not incorporated into the table, "8 plus the number of offense levels from the table" is in many cases the same as the §2F1.1 fraud offense level, because as presently drafted, the 2-point enhancement is unavailable to the money laundering calculation.

The four basic intents set forth in 18 U.S.C. § 1956 are:

(A)(i) with the intent to promote the carrying on of specified unlawful activity; or
the proposal enhances punishment for §1956(a)(2) (international transportation of illegal proceeds out of the country), but ignores the plain language or the statute which prohibits transportation in or out of the country.

The Department of Justice contends, therefore, that the proposal draws contours around §1956 -- with this and other distinctions that are merely arbitrary -- in a manner which Congress did not intend and which ignores the methodology of money laundering.

In our view, the basis for the Staff's conclusions is the flawed view that money laundering is "simply incidental" to the underlying offense which gives rise to the profit laundered. Staff Report I at 1. This view is based, we believe, on a misconstruction of the concept of "merger." By way of example, the classic merger problem is illustrated in United States v. Johnson, 971 F.2d 562 (10th Cir. 1992), a case in which money laundering charges were brought relating to the wire transfer of money from fraud victims to the defendant. The same wire transfers which gave rise to the money laundering charges also

(ii) with intent to engage in conduct constituting a violation of section 7201 or 7206 of the Internal Revenue Code of 1986; or

(B) knowing that the transaction is designed in whole or in part --

(i) to conceal or disguise the nature, the location, the source, the ownership, or the control of proceeds of specified unlawful activity; or

(ii) to avoid a transaction reporting requirement under State or Federal Law.
formed the basis for wire fraud offenses which were charged substantively and as specified unlawful conduct. The Tenth Circuit held that the wire transfer of the money from victim to defendant was merely the completion of the underlying offense, and could not form the basis for money laundering charges, since the funds do not take on the character of "proceeds" until they are received by the defendant. 8

It is our position that at the time the Staff reports were drafted, much of the charged conduct 9 which gave rise to its conclusion that money laundering is "incidental to" the underlying conduct consisted of "merged" transactions, which are now properly addressed in the case law and the Department of Justice prosecution guidelines. To the extent that we can agree that any financial transactions are "incidental to" the underlying offense, it is only in this category of "merged" transactions, which the case law makes clear do not constitute money laundering. To the extent that the Staff reports go further to suggest that all subsequent transactions in illegal proceeds are "incidental to" the underlying conduct, this conclusion is simply wrong.

8 The Court in Johnson noted the distinction between the wire transfer scenario and the case where a defendant first obtained the funds and then deposited them himself. The court noted that the latter transaction would clearly have violated § 1957. This issue is discussed further, infra.

9 The statistical, rather than analytical nature of the case analysis provided in the Staff reports does not reflect information necessary for proper analysis of the merger issue.
For example, Staff Report I cites three cases in support of its conclusion that the courts of appeals are interpreting the statutory requirement "intent to promote" in an overbroad manner. See Staff Report I at 9. One case cited, United States v. Johnson, is discussed above, and does not support the Staff's conclusion that judicial interpretation of "intent to promote" is overbroad. To the contrary, in finding that loan payments permitted the illegal enterprise to continue to maintain office space, the court also found, as discussed above, that only transactions subsequent to the crediting of wire transfers to the defendant's bank account could properly be charged as "reinvested" profit. 971 F.2d at 570.

Similarly, in United States v. Skinner, 946 F.2d 176 (2d Cir. 1991), another case cited in Staff Report I, the intent to promote was supported by defendant's transfer of drug proceeds to her supplier, in what amounted to payment on a line of credit. Although the facts of Skinner are somewhat anomalous, in that the defendant was paying for the very first in a series of contemplated shipments of drugs, it is clear that all later transfers of drug proceeds to her supplier for additional shipments would unquestionably qualify as reinvestment promotion in the manner contemplated by both Congress and the Commission.

The third and last case cited in Staff Report I, United States v. Montoya, 945 F.2d 1068 (9th Cir. 1991), is a case which is intended to fall within the exception the Department of Justice herein proposes. In Montoya, a California state senator
was charged with promoting his acceptance of bribes based on his deposit of a check into his personal bank account. The Ninth Circuit held that this deposit promoted the carrying on of specified unlawful activity -- the bribe -- because "Montoya could not have made use of the funds without depositing the check." 945 F.2d at 1076. No other indicia of money laundering activity were found to be present. By virtue of the Court's interpretation of the conduct as promotion, in this case, the defendant was subject to the harshest of the sentencing guidelines. As set forth below, the Department of Justice's alternative amendment proposes to draw an exception for promotion cases such as Montoya, as well as other types of fact patterns more typically charged under 18 U.S.C. §1957, where there are no further indicia of money laundering activity beyond the deposit of the proceeds and where certain other elements are present. The excepted group of cases is treated in the Department of Justice alternative proposal at the base offense level proposed by the Staff.

In our view, a large portion of the fact patterns which are the focus of the Staff's proposed amendment have, since the time of its initial study, already been addressed and remedied. That is to say, a portion of the fact patterns examined fall into the "merger" category addressed by cases such as United States v. Johnson, and these cases can no longer be charged as a matter of law.
To provide uniform application in charging transactions chronologically close to the underlying conduct, the Department of Justice instituted internal prosecution guidelines, which took effect on October 1, 1992. The guidelines state, in pertinent part:

Cases Involving Financial Crimes: In any case where the conduct to be charged as "specified unlawful activity" under §§1956 and 1957 consists primarily of one or more financial or fraud offenses, and where the financial and money laundering offenses are so closely connected with each other that there is no clear delineation between the underlying financial crime and the money laundering offense, no indictment or complaint may be filed without prior consultation with the Money Laundering Section [of the Criminal Division].

We believe that the internal guidelines, and the developments in case law in the past year relating to white collar based money laundering, have already eliminated a large portion of the problems addressed by the Staff. However, the Staff reports also take issue with fact patterns commonly described as "receipt and deposit," as exemplified by the Montoya case.

In "receipt and deposit" cases, the funds received by the defendant arrive in the form of a check and once received are subsequently deposited into a bank account. This is a correct application of the money laundering statute. However, the Staff's analysis appears to take the view that such cases reflect transactions which are easier to trace and should not, therefore, be sentenced in the same category as other types of cases. This
conclusion is acceptable only in certain cases where no further
indicia of money laundering are present, as explained below.

Most disturbing is the Staff's focus on the "receipt and
deposit" fact patterns as justification for wholesale revision to
the guidelines. We are willing to address "receipt and deposit"
cases, by carving out an exception which leaves undisturbed the
sentencing levels of "heartland" money laundering cases; we
oppose most strongly the notion that all money laundering cases
should be affected by what we believe to be a small subsection of
fact patterns.

The Staff's position, briefly stated, is that "incidental"
money laundering, including deposit of criminal profit into
readily identifiable bank accounts, creates "little additional
harm to society beyond that reflected in the underlying offense."
Staff Report I at 1. The Department of Justice, joined by the
Treasury Department, takes issue with this view, because the
insertion of criminal profit into the banking stream, in and of
itself, causes harm to society. Moreover, prosecution of
offenses committed at what is in the law enforcement community
referred to as "the placement stage" is critical, because the
first placement of funds creates the most serious potential harm.
Once money is inserted into the banking stream, it can be moved,
concealed and/or reinvested with far less chance of detection.

The Treasury Department's Financial Crimes Enforcement
Network (FinCEN), in a July 1992 report entitled "An Assessment
of Narcotics Related Money Laundering" (hereinafter referred to
as the "FinCEN Report"), stated that the "placement stage" was the point at which the money laundering process is most vulnerable. Although the report focuses primarily on narcotics and currency, these observations have general application, including the emphasis placed on the danger of permitting lauders to move through the placement stage and into the "layering stage":

In the layering stage, the launderer attempts to separate the proceeds from their illicit origin as much as possible by moving them through a complex series of financial transactions. The launderer hopes thereby to make the connection more difficult, if not impossible, to trace. With the placement stage completed successfully, the proceeds have been converted to a non-cash form and can therefore be more easily and rapidly manipulated. There are obviously a large number of options available for the launderer; however, the amount of layering used will usually depend on how quickly the profits need to return to their owner and on the "visibility" of original placement activity.

FinCEN Report at 23.

Among the options available to the launderer, once the illicit funds are placed into the banking stream, is use of the electronic communication network of banks to move the funds. This is the most serious danger in permitting the launderer -- whether his profit originates in narcotic-related or non-narcotic activity -- to insert his profit into the banking stream:

The use of wire transfers is probably the most important technique used for layering illicit funds in terms of both the volume of money that can be moved and the extent to which transfers occur. The technique is preferred because launderers can get funds to their destination rapidly. Size of the transfer is usually not a constraint. The United States does not restrict the amounts that may be transferred electronically into or out of the country, nor does it require reporting of transactions between accounts or financial
institutions. After the funds have been transferred several times, especially when done successively, tracing them back to the source is difficult. Transferring the funds through foreign countries electronically adds a further complication in that there are often no means for law enforcement to follow the trail quickly through the maze of foreign banking laws and regulations.

FinCEN Report at 24. None of this activity is possible until funds are inserted into the banking system. We contend, therefore, that dismissing the placement stage as "mere deposit" and concluding that deposit causes no harm to society is a serious mistake.

Even assuming, arguendo, that money laundering fact patterns demonstrate variant levels of conduct, we view it as illogical to set the level for all money laundering at the lowest possible level, as opposed to the approach in the present guideline, which focuses on high levels, in recognition of Congressional intent in the creation of a 20-year offense. The Staff justifies its recommendation to lower the levels on a statistical analysis of approximately 200 cases. Their analysis of this limited sample, even if accepted, reflects only 25 percent of the cases to be within the category it classifies as less serious cases. Lowering the base levels in all cases, based on 25 percent of the cases, is unjustified even on the assumption (which we dispute) that the Staff's statistical sampling is valid.

First, the statistical basis is questionable. The methodology for selection of cases is defendants actually sentenced under §2S1.1 and §2S1.2, in fiscal year 1991. However, in our view examination of reported cases or, for that matter,
indicted cases is insufficient. To be fair, the universe of cases under examination must include cases where plea negotiations resulted in pre-indictment resolution of these charging issues, as well as situations in which the early exercise of discretion (even at the investigative stage) reflects the recognition of the issues presented by the Staff.\textsuperscript{10}

Second, the 200 or so cases presented (in a statistical rather than analytical format) are not capable of interpretation of relevant facts. Both analyses must be performed to conclude that limits on the exercise of prosecutorial discretion are warranted.

Enforcement in the white collar money laundering area is relatively new, with many of the cases only now reaching the level of appellate review. However, the Criminal Division of the Justice Department has consulted in cases whose facts reveal that money laundering in white collar cases is no less pernicious nor unsophisticated than in the narcotic area.

In a case recently indicted in New England, the defendant set up an elaborate pyramid of fraudulent bank loans, constantly reinvesting the proceeds of successive false loan applications

\textsuperscript{10}We strongly take issue with the suggestion that any component of the Department of Justice has a policy of threatening money laundering prosecution in order to coerce pleas. Where the possibility of money laundering prosecution is discussed in the course of plea negotiations, all such discussions are grounded on the good faith belief that such prosecution has basis in fact and law. Department of Justice policy, under what is commonly called "The Thornburgh Memo," dictates charging decisions and plea bargaining practices consistent with the "most serious readily provable offense." See "Principles of Federal Prosecution," USAM 9-27.000. See also Bordenkircher v. Hayes, 434 U.S. 357 (1978)
into repayment on prior loans. The Government has charged money
laundering under a promotion theory, alleging that the continuous
reinvestment of proceeds permitted the defendant to build a
larger and larger fund of illicit profit -- ultimately the
defendant caused transfers totalling millions of dollars and
seriously endangered the health of a savings bank -- and
permitted him to keep increasing the fund with each successive
loan, without detection, by satisfying the prior bad loans.
Clearly this is a case requiring severe punishment, not merely
based on the sum of all its pieces -- the fraudulent loans.
Rather, the punishment should reflect the severity of the money
laundering scheme which both nourished and obscured the
operation.

Similarly, in a recently indicted case in the southwest, a
real estate developer and his attorney are charged with
defrauding the Federal Deposit Insurance Corporation (a judgment
creditor by reason of the previous failure of a savings and loan)
by transferring real estate belonging to the developer into his
girlfriend's name, in anticipation of bankruptcy, and moving the
funds through the use of various escrow accounts and cashier's
checks to conceal its origin. Clearly, this activity, as well,
goes well beyond the scope of activity "incidental to the
underlying crime," and is activity Congress intended to reach
with punishment beyond that of the underlying crime.

It is not true, therefore, that the money laundering
statutes are "being applied somewhat differently than the
Commission anticipated" or to suggest that most white collar money laundering is merely a fragment of the underlying crime. Although the Staff may be able to cite anomalous fact patterns which reflect a variance of application, we believe that the recently promulgated money laundering guidelines evidence the Department's commitment to uniform application, particularly in the area of financial crimes.

In contrast to the pending proposal, the Department's alternative proposes to leave undisturbed the offense level for money laundering, except in certain cases defined by a strict set of parameters. The elements of the parameters are:

1) The specified unlawful activity did not involve a matter of national security or munitions control, a risk of serious bodily injury or death, a crime of violence, a controlled substance or precursor chemical, or a firearm or explosive: The lower guideline range is not available to defendants who launder the proceeds of these serious crimes. We do not view this limitation as controversial, in that it relates to a serious class of offenses.

2) The money laundering conduct was limited to deposit: We have drawn a bright line at the point of deposit, because we seek to address only that portion of the Staff's concerns which relates to fact patterns where the completion of the underlying offense and the commencement of money laundering are blurred -- no more, no less. That is to say, we do not agree with the Staff's suggestion that money laundering is a "facilitation"
crime or that it is merely a method for the final accomplishment of profit. Money laundering is a wholly separate crime.

This bright line approach also reflects our concern with a critical misunderstanding with respect to concealment. The defense bar has argued that any number of subsequent transfers should be given more lenient treatment, so long as they involve bank accounts which clearly relate to the defendant. This is more a tracing/forfeiture concept, and ignores all but the "fictitious names" theory of concealment.

3) Deposit into an account which is clearly identifiable as belonging to the person(s) who committed the specified unlawful activity: The Staff reports acknowledge that concealment, particularly through the use of fictitious names or nominee accounts, is the most egregious form of money laundering. There is insufficient recognition, however, of other pernicious forms of concealment employed by some defendants who use their own bank accounts. All forms of concealment must be ineligible for the exception. This issue is best explained by illustration:

In a recent case in the Northern District of Florida, the lead defendant pleaded guilty to concealing the movement of illegal proceeds through the fraudulent use of "consulting fees" to mask the transfer of the illegitimate profit. Co-defendants pleaded guilty to fraudulently obtaining public contracts (despite an earlier debarment of the lead defendant) through the use of nominee companies. The lead defendant received his profits from these contracts by creating a sham consulting
company in his wife's name and the fiction of "consulting fees." Although each transfer in the series could be traced to the defendant, the creation of the fictitious services was designed to conceal his ownership of the funds from the time they were received by companies covertly under his control and to provide a false "legitimate" cover for his illegal activities.

Similarly, in a case recently indicted in a midwestern district, the concealment charged relates to the creation of false "legitimate" business transactions to mask an illegal drug operation. In that case, the defendant had been enjoined from selling certain chemicals because the volume and manner in which he sold them indicated that they were being used for illicit purposes. He evaded the injunction and continued to sell the chemicals by fraudulently representing that his company had been sold to a family member. The fictitious "sale" of the business, and monthly payments made pursuant to the sham sale agreement, were designed to give an aura of legitimacy to payments of profit for illegally distributed precursor chemicals. The transactions were designed to conceal the defendant's ownership of the funds from the time they were received by the company covertly under his control.

In both cases, the defendants argue that there was no money laundering because the funds involved in the transactions in which the defendants engaged could be traced to their possession. This argument overlooks the case law which holds that concealment is not limited to the use of fictitious names and nominee
accounts. See, e.g., United States v. Lovett, 964 F.2d 1029 (10th Cir. 1992) (defendant's purchase of an automobile for the purpose of inducing his brother's silence was sufficient to establish concealment); United States v. Edgmon, 952 F.2d 1206 (10th Cir. 1991), cert. denied, 1992 U.S. LEXIS 4643 (1992) (son passes proceeds to father, who uses the funds to purchase land in his own name, then borrows against the property and passes loan proceeds back to son).

Thus, transferring money in the defendant's own name is not necessarily benign nor non-concealing, and the use of his own name should not open the door to an unlimited number of transfers. The exception we propose only extends to fact patterns where the first transfer after receipt (i.e., deposit) converts the funds to a more liquid form, completely available for use. The exception should only be available to defendants who: (1) deposit checks into the account of the person who committed the underlying offense, and (2) engage in no further transactions which constitute money laundering offenses.

4) Non-currency: We expect that some will take issue with our limitation of the exception to non-currency. It will be argued that the "mere deposit" of currency is the same as "mere deposit" of a check. Currency cases are different for the following reasons:

a) currency is the genesis of all money laundering enforcement, equivalent to the paramount concern with narcotics-related cases;

b) the problems relating to currency have induced the development of an entire body of statutes and regulations
which address the problem, prosecuted and administered with
great vigor by the Departments of Justice and Treasury;

c) numerous studies on the public record (most notably the
FinCEN Report, referenced above) discuss the critical nature
of the "placement stage" of currency. The goal of
laundering currency is to get it into the banking stream and
financial community, both to make it appear legitimate and
because once it is placed in the financial system, it is
normally "gone" -- wire transferred to places unknown and
untraceable as proceeds;

d) although the Department of Justice does not encourage
charging concealment based solely on the use of currency, we
do acknowledge the "self-concealing" nature of currency and
the problems attendant thereto. Although bank records might
otherwise permit tracing of the defendant's ownership of the
funds (the Staff's purported concern), there is no ability
to trace currency back to the specified unlawful activity;
and

e) there can be no question of merger where currency has
been received. Unlike checks, which must ultimately be
negotiated at a financial institution before the underlying
funds can be accessed, currency is already in a useable
form, and any subsequent use of the currency is a completely
separate transaction after it is received.

5) The use of a domestic financial institution: We
believe, consistent with the Staff reports, that the use of
foreign banks and foreign bank accounts is an offense
characteristic undeserving of lenient treatment.

6) First-party money launderer: The exception is limited
to offenders who deposit their own proceeds; it is not intended
to extend to the "professional money launderer" (a third
party).\textsuperscript{11} Again, this is to ensure that the exception only

\textsuperscript{11}The Commentary to our proposed alternative discusses the
third-party depositor, such as a spouse, who, knowing that the
funds were derived from unlawful activity, willfully deposits the
funds into the banking stream, but does so using an account
identifiable as belonging to the person(s) who committed the
specified unlawful activity. If the individual engages in no
further money laundering conduct \textit{(i.e.,} all subsequent transactions
applies to the small-time offender who commits a crime (which, if all other elements of the exception are established, will likely be the gravamen of the offense) and puts the money in the bank. If the defendant induces a third party to deposit the money into an account not belonging to the defendant, a layer of concealment (a nominee account) has been added and the defendant should not be entitled to the exception. Moreover, the defendant has involved another individual in his scheme. However innocent the third party might be, this does not entitle the original offender to more lenient treatment. Similarly, the third party with knowledge sufficient to establish money laundering is not entitled to lenient treatment if that person knowingly agreed to lend his or her identity to unlawfully derived funds.

Put in terms of the Staff's expressed concerns, the exception is only available to those who deposit the funds "incidental to" the underlying offense. This, by definition, does not include the third party who, with knowledge sufficient to establish money laundering, joins in after the underlying offense is complete, for the purpose of giving his or her name to the proceeds.

Do not indicate an intent which would violate § 1956; are "for legitimate purposes" in amounts under $10,000, and therefore do not violate § 1957; and do not violate Title 31 currency reporting requirement) and all the other elements of the exception are present, such an individual is eligible for the lower offense level.

Similarly, in the corporate setting, an employee who, for the benefit of a corporate defendant, causes the corporation to deposit ill-gotten gains into an account clearly identifiable as belonging to the corporation, will be eligible for the exception.
In conclusion, therefore, if the Commission believes that there has been a sufficient showing to warrant a change in the guidelines to address the small category of cases identified as problematic, we believe that the Department's proposed amendment is far preferable to the pending proposal. Rather than a wholesale restructuring of the guidelines to address a limited number of cases, the Department's proposal addresses the problem directly by adding a special instruction to be followed in these cases. Further, our proposal retains the present guideline levels which properly reflect the serious nature of money laundering offenses, while allowing for a lower guideline level in the limited category of less egregious cases.

The Proposed Amendments to §§2S1.3, 2S1.4

Finally, we wish to address the proposed amendments to §2S1.3 and §2S1.4, relating to currency reporting requirements. Published along with the Commission's proposal is an alternative amendment previously submitted by the Department of Justice. The structures of the two proposals are similar with respect to harmonizing the guidelines treatment of violations involving various currency transaction reports required by law (i.e., the Currency Transaction Report (CTR), the Currency and Monetary Instrument Report (CMIR), and IRS Form 8300), because the three types of reports are similar in purpose, and comparable violations involving currency reporting should be treated similarly. The proposals disagree, however, on the issue of appropriate base offense levels.
Under the current guidelines, the base offense level is 13 for CTR (reports by financial institutions of currency transactions in excess of $10,000) and Form 8300 (reports filed by trades and businesses) violations, when either is coupled with structuring and/or misrepresentation (5 where there is no such additional act). The base offense level is 9 for CMIR offenses (reports of transportation of currency in excess of $10,000 in or out of the United States).  

Section 2S1.4 was created in 1991 in order to treat CMIR offenses differently:

This amendment creates an additional offense guideline (§2S1.4) for offenses involving Currency and Monetary Instrument Reports (CMIR). Currently, such offenses are covered by §2S1.3, which deals with all currency transaction reporting requirements. CMIR violations are committed by individuals who, when entering or leaving the country, knowingly conceal $10,000 or more in cash or bearer instruments on their persons or in their personal effects and knowingly fail to file the report required by the U.S. Customs Service. Such criminal conduct is sufficiently different from the other offenses covered by §2S1.3 to merit treatment in a separate guideline.

However, the separate treatment was aimed at the following circumstance, which was deemed to be peculiar to border crossing offenses. At the time of the 1991 amendment, there was a split in the Circuits over how to apply §2S1.3 in the CMIR context, because the usual fact pattern involved a failure to file a CMIR and a negative response to the routine inquiry of the Customs official as to whether there was something to declare. Some of the Circuits held that the negative response was part and parcel

---

12 Both sections call for an enhancement of 4 levels where the defendant "knew or believed the funds were criminally derived."
of the non-filing (therefore, a base offense level of 5); other
Circuits held that the negative response was a misrepresentation
(therefore, a base offense level of 13). The amendment was
intended to resolve the dispute by creating a separate guideline
(§2S1.4) setting the base level at 9.

We have proposed that the CTR, Form 8300, and CMIR offenses
be brought back under one heading in the Sentencing Guidelines (a
proposed new guideline is attached hereto), setting the base
offense level at 9 for willful failure to file, and preserving
the base offense level of 13 for structuring or filing a form
containing a material misrepresentation or false statement. An
application note is proposed to resolve the CMIR issue, which
sets the base level at 9 for the mere denial of reportable
assets, in response to routine questioning at a border crossing.
The level 5 would remain to cover all other willful violations of
regulations (no change).

We believe that the Staff's proposal to lower the penalties
overall signals a serious retreat in the area of currency
enforcement -- an area too closely linked with narcotics
trafficking to merit more lenient treatment at this time.
Currency has traditionally been, and continues to be, the medium
of narcotics profit. For all the reasons set forth above with
respect to currency enforcement, we find the arguments put forth
by the Staff to be unpersuasive. Therefore, we respectfully oppose the Commission's proposed amendments.

Attachments
Section 2S1.1 is amended by redesignating subsection (c) as subsection (d) and inserting the following after subsection (b):

"(c) Special Instruction for Certain Forms of Money Laundering

(1) Notwithstanding subsections (a) and (b), the offense level shall be a plus the number of offense levels from the table in §2F1.1 corresponding to the value of the funds if—

(A) the defendant was convicted under 18 U.S.C. §1956(a)(1)(A)(i), (a)(2)(A), or (a)(3)(A);

(B) the specified unlawful activity did not involve a matter of national security or munitions control, a risk of serious bodily injury or death, a crime of violence, a controlled substance or precursor chemical, a firearm, or an explosive; and

(C) the money laundering conduct was limited to the deposit of non-currency proceeds of specified unlawful activity into a domestic financial institution account that is clearly identifiable as belonging to the person(s) who committed the specified unlawful activity."

The Commentary to §2S1.1 is amended by inserting the following at the end thereof:
"The lower offense level provided by the special instruction in subsection (c) is reserved for offenses which meet the specified criteria. First, the count of conviction for money laundering must have been for a violation of 18 U.S.C. §1956(a)(1)(A)(i), (a)(2)(A), or (a)(3)(A), relating to an intent to promote specified unlawful activity. If the defendant was also convicted under one of the other provisions of section 1956 for the same conduct, the reduced offense level provided by subsection (c) does not apply. Next, the underlying unlawful activity must not have involved a matter of national security or munitions control, a risk of serious bodily injury or death, a crime of violence, a controlled substance or precursor chemical, firearm, or an explosive. Finally, the money laundering conduct must have been limited to the deposit of non-currency proceeds into a domestic financial institution account, and the account must be clearly identifiable as belonging to the person(s) who committed the specified unlawful activity. For example, a defendant who deposits a check constituting the proceeds of his or her spouse's specified unlawful activity into the spouse's account would qualify for the reduced offense level of subsection (c) if all the other limitations are present.

The term "money laundering conduct" as used in subsection (c)(1)(C) is not limited to the conduct comprising the offense of conviction but includes transactions which are part of the same course of conduct or common scheme or plan as the offense of conviction and which themselves independently
establish any money laundering offense. The withdrawal of proceeds does not constitute money laundering conduct unless carried out in a manner that would violate a money laundering statute (see, e.g., 18 U.S.C. §1957 regarding withdrawals and other transactions in an amount over $10,000). Therefore, the withdrawal of the proceeds for legitimate purposes, such as the payment of living expenses, in a manner that does not constitute money laundering conduct is consistent with application of the reduced offense level of subsection (c). However, if there are indicia of further money laundering activity by the defendant involving the proceeds deposited into the account, the higher offense levels provided in subsections (a) and (b) apply.

Section 2S1.2 is amended by redesignating subsection (c) as subsection (d) and inserting the following after subsection (b):

"(c) Special Instruction for Certain Forms of Money Laundering

(1) Notwithstanding subsections (a) and (b), the offense level shall be 8 plus the number of offense levels from the table in §2F1.1 corresponding to the value of the funds if--

(A) the specified unlawful activity did not involve a matter of national security or munitions control, a risk of serious bodily injury or death, a crime of violence, a
controlled substance or precursor chemical, a firearm, or an explosive; and

(B) the money laundering conduct was limited to the deposit of non-currency proceeds of specified unlawful activity into a domestic financial institution account that is clearly identifiable as belonging to the person(s) who committed the specified unlawful activity."

The Commentary to §2S1.2 is amended by inserting the following at the end thereof:

"The lower offense level provided by the special instruction in subsection (c) is reserved for offenses which meet the specified criteria. First, the underlying unlawful activity must not have involved a matter of national security or munitions control, a risk of serious bodily injury or death, a crime of violence, a controlled substance or precursor chemical, a firearm, or an explosive. Next, the money laundering conduct must have been limited to the deposit of non-currency proceeds into a domestic financial institution account, and the account must be clearly identifiable as belonging to the person(s) who committed the specified unlawful activity. For example, a defendant who deposits a check constituting the proceeds of his or her spouse's specified unlawful activity into the spouse's
account would qualify for the reduced offense level of subsection (c) if all the other limitations are present.

The term "money laundering conduct" as used in subsection (c)(1)(B) is not limited to the conduct comprising the offense of conviction but includes transactions which are part of the same course of conduct or common scheme or plan as the offense of conviction and which themselves independently establish any money laundering offense. The withdrawal of proceeds does not constitute money laundering conduct unless carried out in a manner that would violate a money laundering statute (see, e.g., 18 U.S.C. §1957 regarding withdrawals and other transactions in an amount over $10,000). Therefore, the withdrawal of the proceeds for legitimate purposes, such as the payment of living expenses, in a manner that does not constitute money laundering conduct is consistent with application of the reduced offense level of subsection (c). However, if there are indicia of further money laundering activity by the defendant involving the proceeds deposited into the account, the higher offense levels provided in subsections (a) and (b) apply."
Proposed Guideline (Changes appear in bold.):

§2S1.3. Failure to Report Monetary Transactions; Structuring Transactions to Evade Reporting Requirements

(a) Base Offense Level:

(1) 13, if the defendant:

(A) structured transactions to evade reporting requirements; or

(B) knowingly filed, or caused another to file, a report containing materially false statements; or

(2) 9, for a willful failure to file; or

(3) 5, otherwise.

(b) Specific Offense Characteristics

(1) If the defendant knew or believed that the funds were criminally derived property, increase by 4 levels. If the resulting offense level is less than level 13, increase to level 13.

(2) If the defendant knew or believed that the funds were intended to be used to promote criminal activity, increase by 4 levels. If the resulting offense level is less than level 13, increase to level 13.

(3) If the base offense level is from (a)(1) or (a)(2) above and the value of the funds exceeded $100,000, increase the offense level as specified in §2S1.1(b)(2).

(c) Special Instruction for Fines -- Organizations

Commentary

5322, 5324. For additional statutory provision(s), see Appendix A (Statutory Index).

* * * * *

Background:

* * * * *

A base offense level of 13 is provided for those offenses where the defendant either structured the transaction to evade reporting requirements or knowingly filed, or caused another to file, a report containing materially false statements. A base offense level of 9 is provided for willful failure to file the required reports, and for the mere denial of reportable assets in response to routine questioning at a border crossing. A lower alternative of 5 is provided in all other cases.

§2S1.4 IS DELETED

§2T1.3. Fraud and False Statements Under Penalty of Perjury

* * * * *

Statutory Provision: 26 U.S.C. § 7206(1), (3), (4), and (5) (except in connection with a return required under 26 U.S.C. § 6050I). For additional statutory provision(s), see Appendix A (Statutory Index).

§2T1.4. Aiding, Assisting, Procuring, Counseling, or Advising Tax Fraud

* * * * *

Honorable William W. Wilkins, Jr.
Chairman
United States Sentencing Commission
One Columbus Circle, N.E.
Suite 2-500, South Lobby
Washington, D.C. 20002-8002

Dear Judge Wilkins:

The following sets forth additional comments of the Department of Justice, beyond those included in our written testimony for presentation before the Sentencing Commission at the hearing on March 22, regarding published proposed amendments to the sentencing guidelines.

TAX OFFENSES (Amendments 5, 21, 41, 42 and 43)

The Department has two main objectives with regard to the tax guidelines during the 1993 guideline amendment cycle: (1) an increase in the offense levels for tax offenses to alleviate the detrimental impact on criminal tax cases of the 1992 amendments to the Sentencing Table (Chapter 5, Part A); and (2) simplification of the Chapter 2, Part T guidelines, including a single definition of "tax loss". The 1993 amendment package contains three proposals which impact on these objectives -- proposed Amendments 5 and 21 (Commission proposals) and proposed Amendment 41 (developed by the Internal Revenue Service (IRS)). We favor the proposal of the IRS. However, with some modifications, our objectives could be met by the Commission's proposals.

The recent changes in the Sentencing Table drastically affect the Federal Tax Enforcement Program. Unlike other statutory requirements, the provisions of the Internal Revenue Code touch virtually every individual and business in the country. In order to encourage compliance with the internal revenue laws by all taxpayers, criminal tax prosecutions must be directed at all income, occupations, businesses, and geographic locations. However, because of limited resources, only a small number of tax violations can be prosecuted. The great majority of these prosecutions must result in sentences of some form of incarceration, even if only for short periods of time, in order to deter those in all categories of tax offenders from violating the internal revenue laws. The recent changes to the Sentencing...
Table could result in a significant number of tax violators not being sentenced to terms of imprisonment and, thus, greatly reduce or entirely eliminate the deterrent value of tax prosecutions.

In addition to problems posed by the changes to the Sentencing Table, we continue to experience problems in the courts in determining the "tax loss" for sentencing purposes. Since the advent of the guidelines, the core of sentencing in criminal tax cases has been the concept of "tax loss." However, rather than a single definition, "tax loss" is defined differently in various provisions of Chapter 2, Part T of the guidelines. These variations in the definition of "tax loss", as well as cross-references between the definitions within the guidelines, have caused confusion and difficulties in application of the tax guidelines. 1

1 Difficulty in applying the concept of "tax loss" has arisen in a number of different contexts. Areas of confusion involving "tax loss" include: (1) whether the determination of base offense level under §2T1.3 requires proof of an "actual tax loss" (compare United States v. Schmidt, 935 F.2d 1440, 1450-1451 (4th Cir. 1991) with United States v. Hirschfeld, 964 F.2d 318, 324-325 (4th Cir. 1992); see also, United States v. Telemague, 934 F.2d 169 (8th Cir. 1991); United States v. Krause, 786 F.Supp. 1151, 1152-1158 (E.D.N.Y. 1992)); (2) language in §2T1.3, which, on its face, requires that "the offense was committed in order to facilitate evasion of a tax" in order to use the tax loss table (see United States v. Krause, 786 F.Supp. at 1156-1157); (3) in Spies-evasion prosecutions under 26 U.S.C. §7201, refusing to use the tax loss as defined in §2T1.3 (i.e., 28% of greater of understatement of gross income and taxable income) on the ground that there is no "understatement" where no return is filed (United States v. Warren L. Pickett, (W.D. Pa. 1991) (unreported district court decision)); (4) in Klein-conspiracy prosecutions, construing the "as applicable" language contained in §2T1.9(a)(1) to mean that the Government must show that either §2T1.1 or §2T1.3 is applicable to the offense in order to use "tax loss" in calculating base offense level, rather than utilizing the alternative base offense level of 10 pursuant to §2T1.9(a)(2) (United States v. Schmidt, 935 F.2d at 1450-1451); and, (5) in cases involving previously assessed, but unpaid, taxes, whether "tax loss" means the assessed tax or only the "hidden assets" which form the basis for the false statement involved (compare United States v. Brimberry, 961 F.2d 1286, 1292 (7th Cir. 1992) (unambiguous, explicit definition of "tax loss" under §2T1.3 and §2T1.1 as the amount of tax owed to the Government) with United States v. David W. Maestas, (D. N.M. 1991) (unreported district court determination finding tax loss to be only what Government could not execute against because of defendant's concealment rather than greater amount defendant either evaded or attempted to evade).
We endorse the IRS proposal as the best available option to obtain our objectives. The IRS-proposed amendments to the tax offense guidelines comprehensively address both of these problems. 2

The IRS proposal shifts the focus of the sentencing scheme from one primarily designed to punish according to the magnitude of the loss caused by the violator to one designed both to punish and to draw tax violators back into the system. The proposal attempts to accomplish this by setting minimum offense levels for virtually all significant criminal tax offenses. The offense level is then increased by specific amounts for tax losses over $10,000. The minimum offense levels are not arbitrary, but were selected because they would insure some form of incarceration under the current Sentencing Table for the great majority of tax violators and, at the same time, make it possible for most violators to qualify for a probationary sentence by accepting responsibility. The intent is to use the guidelines to encourage convicted tax violators to accept responsibility for their violations and to do so by filing required tax returns and paying all due taxes and penalties. In this way, the guidelines will not only punish those who violate the internal revenue laws but will also encourage their return to the self-reporting tax system. At the same time, the guidelines should go far toward eliminating any possibility that an unrepentant taxpayer will be able to make a mockery of the system by receiving a sentence of probation without being required to file tax returns and pay all taxes due.

Concededly, this is a novel approach and one which differs from the approach used in sentencing under the Fraud and Theft Tables, as well as from the approach currently used in sentencing tax offenses. Tax fraud, however, is different from other forms of fraud and theft directed against the government. Virtually everyone in the country comes in contact with the internal revenue laws in one form or another. Consequently, almost anyone has the opportunity to cheat the government out of tax revenue. Deterrence, therefore, takes on added importance in the tax area. Moreover, a defendant who has engaged in some form of fraud against or theft from the government generally does not owe any continuing duty to the government. A tax violator, on the other hand, will normally owe a continuing duty of filing returns and paying taxes. Getting that violator back into the system by encouraging the filing of returns and the payment of taxes significantly increases the chances that the defendant will comply with those duties in the future. To the extent the tax

2 The proposal also provides a new guideline to cover violations of the omnibus clause of 26 U.S.C. §7212(a).
sentencing scheme can be utilized to achieve that objective, differences in the sentencing schemes are clearly justified.

The IRS proposal also provides for both a comprehensive definition of tax loss and a significant consolidation of the tax guidelines. This aspect of the proposal should not only reduce definitional confusion, but also facilitate practical use of the tax guidelines by consolidating redundant language and reducing the requisite "flipping around" within the tax guidelines depending on the statute involved.

Tax loss computations should be simpler and more uniform under this approach. Defining "tax loss" to be the loss that was the object of the evasion or fraud, and explaining that the amount of loss that would have resulted had the scheme or fraud succeeded is properly considered the amount of loss that was the object of the scheme or fraud, should eliminate those cases where defendants attempt to downplay the seriousness of their violations by arguing that they did not really intend to cause a tax loss or a tax loss of the magnitude that could have resulted from the successful completion of the scheme. In addition, explicitly stating, as does the IRS proposal, that the success or failure of a tax evasion or fraud scheme is irrelevant to the calculation of "tax loss" will eliminate windfalls to those defendants whose schemes are discovered prior to the time the government has suffered any actual loss. Moreover, the proposal anticipates and eliminates the need for future amendment of the definition by providing in its examples for use of the "applicable tax rate," rather a specified rate (i.e., 28% (or 34% for corporations) as is now the case, in calculating the "tax loss".

We do believe, however, that two changes in the IRS proposal are advisable. First, we recommend that the tax loss definition contained in the first three sentences of Application Note 1 be moved to guideline language. This should insure that there are no questions as to the meaning of the "tax loss" term used in the guidelines. Second, we recommend that the top range of the "tax loss" specific offense characteristic increase in the IRS proposed §2T1.1(b)(1) be enlarged to include several additional specific ranges of tax loss beyond $800,000. The inclusion of additional ranges at the upper end of the "tax loss" scale is consistent not only with the existing guideline framework, which includes, at §2T4.1, seven additional specific tax loss ranges beyond $800,000 but also with proposals to enhance the top-level ranges in other loss-based areas of the guidelines as well. We are increasingly seeing massive tax fraud schemes, particularly in the motor fuel excise tax priority enforcement area, involving multi-million dollar tax losses. We believe that the IRS's top range of $800,000 does not extend far enough.
The Commission's proposed Amendments 5 and 21 are not acceptable in their present form. However, with appropriate modification, they could provide the basis for an acceptable solution. For example, the Commission's proposed Amendment 5 provides loss table modifications and elimination of the "more than minimal planning" specific offense characteristic for the robbery and fraud guidelines. Correspondingly, the Commission proposes a conforming modification to the tax loss table in §2T4.1 which produces higher offense levels for lower tax losses. Standing alone, the conforming modification of the tax loss table is acceptable to the Department. The change serves to alleviate the detrimental impact of the 1992 amendments on criminal tax cases.

The unacceptable aspect of the Commission's proposal is the elimination of the "sophisticated means" specific offense adjustment in the tax guidelines. The proposal states that the elimination of this specific offense characteristic is consistent with the proposed elimination of "more than minimal planning" in the robbery and theft guidelines. Quite simply, we believe that "sophisticated means" is something more than "more than minimal planning" and is an appropriate specific offense characteristic to differentiate more sophisticated schemes from garden-variety tax cases. By eliminating it, we lose some ability to distinguish between less serious and more serious offenses in a manner inconsistent with other existing and proposed guidelines. For example, the proposed elimination, for consistency sake, of the "sophisticated means" adjustment in tax cases is utterly inconsistent with the Commission's proposal for a "sophisticated efforts" adjustment in its proposed money laundering changes. Moreover, the elimination of the "sophisticated means" enhancement in tax cases will mean that the use of foreign bank accounts will no longer enhance sentences in tax cases, although it may well enhance sentences in fraud cases pursuant to §2F1.1(b)(5) (minimum offense level of 12 if fraud "offense involved use of foreign bank accounts or transactions to conceal the true nature or extent of the fraudulent conduct"). The impact of this proposal will be felt especially in our non-tax loss driven cases, which often are quite sophisticated and difficult to unravel. These cases will be sentenced at the alternative offense level (currently ranging between level 5 and level 10 for the most frequently prosecuted tax violations), rather than the level determined by the amount of the "tax loss", without the possibility of an enhancement for sophisticated means or something similar.

The Commission's proposed Amendment 21 is its attempt to address the issues of simplification and consolidation within the tax guidelines, including a unified tax loss definition. However, the proposal is a diluted version of a proposal it made last year, which the Department supported with suggested modifications. Not only is this year's proposal substantially...
weaker than last year's effort, but it also reflects few of the suggestions which the Department made during the last amendment cycle. The Commission's consolidated "tax loss" definition does contain the welcome change (also found in the IRS's proposal) that tax loss is the amount that would have resulted had the offense been successfully completed. However, we prefer that the formulation contain, as does the IRS's proposal, a further statement that success or failure of a scheme is irrelevant to tax loss determinations. We also do not understand why the Commission, in that part of its amendment directed to calculation of the tax loss, changed from the "applicable tax rate" language of last year's proposal to the specific percentage amounts (i.e., 28% and 34%) in this year's proposal. As we have earlier noted, use of "applicable tax rate" should give a closer approximation of "tax loss" if tax rates change and should be less difficult to administer.

With respect to the determination of tax loss, we are concerned that the rebuttable presumptions set forth in the Commission's proposal are not sufficient to cover the range of tax cases (e.g., improper refund claim where income is over-reported) and would suggest, in lieu thereof, that the six examples contained in the IRS's proposed Amendment 41 for loss calculations be substituted. These six examples better cover the universe of criminal tax situations than does the Commission's proposal. Substitution of the examples from the IRS proposal also alleviates the problem in the Commission's proposal whereby a defendant, in a failure-to-file return situation, can control the amount of loss through the payment of the taxes prior to sentencing. This blatantly favors more well-off taxpayers and undermines the guidelines' purpose of sentencing uniformity.

As a related change, we would suggest that the Commission consider renumbering the tax guidelines to eliminate the gaps that will ensue from the deletion of §2T1.2, §2T1.3, and §2T1.5.

The proposed change to §2T1.4, involving the creation of one two-level specific offense characteristic by combining the specific offense characteristics now found at §2T1.4(b)(1) and §2T1.4(b)(2) will adversely affect some of our cases, but the number of cases affected will be small and we can accept the proposed amendment. While combining two of the current specific offense characteristics, the Commission's proposal is careful to continue to limit the inapplicability of the §3B1.3 (Abuse of Position of Trust or Use of Special Skill) adjustment to only the second prong of the proposed specific offense characteristic (two-level adjustment if the defendant was in the business of preparing or assisting in the preparation of tax returns). In this way, the §3B1.3 adjustment will continue to be available when the defendant committed the offense as part of a pattern or scheme from which the defendant derived a substantial portion of his income.
The Commission's proposal also seeks to clarify the circumstances under which the specific offense characteristics of §2T1.9 apply and the relationship between the loss calculation under §2T1.4 and §2T1.9. We have no objections to these proposals, but believe that some other changes are necessary.

First, we would recommend that the Commission delete the phrase "as applicable" from §2T1.9(a)(1). That phrase has caused confusion as sentencing courts have struggled to determine whether §2T1.1 (Tax Evasion) or §2T1.3 (Fraud and False Statements Under Penalty of Perjury) applies. In some situations, the view has been expressed that neither guideline applies and use of a base offense level of 10 is appropriate.

In fact, use of the phrase "as applicable" is inappropriate as neither of the offenses covered by §2T1.1 (26 U.S.C. §7201) and §2T1.3 (26 U.S.C. §7203) (or §2T1.4 (26 U.S.C. §7206(2)) as proposed in the Commission's proposed amendment) is applicable to the type of conspiracy covered by §2T1.9. That guideline covers conspiracies to defraud the United States by impeding and impairing the Internal Revenue Service. The object of such a conspiracy is not the violation of a particular statutory provision, such as 26 U.S.C. §7201, 26 U.S.C. §7203, or 26 U.S.C. §7206(2). (Indeed, if the object of a conspiracy is to violate a particular provision of the Internal Revenue Code, sentence is properly imposed under §2T1.1.) Consequently, to direct a court to determine whether §2T1.1, §2T1.3, or §2T1.4 applies is to require it to engage in a hopeless exercise. The most a sentencing court should be directed to do is to select a guideline which covers conduct most nearly approximating the harm which would have resulted had the conspirators succeeded in impeding and impairing the Internal Revenue Service. Language should be added to the commentary to §2T1.9 to guide the sentencing court in this regard. The deletion of the "as applicable" language and the insertion of additional commentary language will make clear that a court is not required to find that any particular guideline applies in order to refer to a guideline for calculation of the base offense level under §2T1.9.

We also suggest that the phrase "fraudulent tax schemes" be added to proposed Commentary Application Note 4 after "the marketing of fraudulent tax shelters." Not all fraudulent tax schemes are tax shelters and "schemes", in our view, is a broader and more appropriate term.

NEGOTIATED AMOUNTS OF CONTROLLED SUBSTANCES (Amendment 12)

We oppose Amendment 12, which would amend the commentary to guideline §2D1.1 to provide that where the defendant "was not reasonably capable of producing, or otherwise did not intend to produce" (emphasis added) the negotiated amount, the court should exclude the amount that falls within this description from the
guideline calculation. The current language excludes amounts the defendant "did not intent to produce and was not reasonable capable of producing." (Emphasis added.) If a defendant was reasonably capable of producing a quantity under negotiation, this quantity should be included. His claim of lack of intent should not prevail over evidence of the amount negotiated and the defendant's capability of producing that amount. Likewise, a defendant's lack of ability to produce an amount at the moment of negotiation should not block inclusion of that negotiated amount if there is sufficient evidence of intent to produce it.

POSSESSION OF FIREARMS IN A SCHOOL ZONE OR FEDERAL FACILITY
(AMENDMENT 19)

The Commission has requested comment on the adequacy of the offense levels under guideline §2K2.5 for the possession or discharge of firearms in a school zone or a federal facility. By letter of November 30, 1992, the Department specifically sought increases in this guideline.

Under guideline §2K2.5 the base offense level is 6, with a 2-level enhancement for the unlawful possession of a firearm in a school zone or a federal court facility. This offense level may result in a sentence that is not commensurate with the offender's activities since offense level 8 allows for a sentence of "straight" probation. There simply is no legitimate reason for a person convicted under the school zone statute, 18 U.S.C. §922(q), to have a firearm on school property since the statute provides numerous exceptions from application of the prohibition. Moreover, possession of a firearm in a federal facility, particularly a court facility, is a dangerous offense, given the threat to our system of justice such possession poses.

We recommend that the Commission include additional specific offense characteristics, such as an increase if the firearm (or other weapon in the case of possession in a federal facility) is brandished, discharged, or otherwise used. An enhancement should be included if the firearm is loaded or the offender is also in possession of ammunition in a school zone or federal facility. Under these circumstances the unlawful weapon possession presents increased danger. These enhancements are more effective than grounds for departure (as recognized in Application Note 4) and would assure stiffer sentences for offenders who present an increased danger to children and government personnel.

The Commission has also requested comment on the manner in which guideline §2K2.5 addresses the statutory requirement that the violation of the school-zone statute result in a consecutive sentence. We believe that Application Note 3 does not reflect the statutory mandate of consecutive sentencing. See 18 U.S.C. §924(a)(4). A defendant convicted of both the school-zone provision and the offense of being a felon in possession of a
firearm would face the same sentencing guideline range as a defendant convicted only of the second offense. Under the application note the judge would simply determine which portion of the sentence to allocate to the school-zone provision as a "consecutive sentence." This approach is a contrived one that meets neither the letter nor spirit of the statutory mandate.

STANDARDS FOR ACCEPTANCE OF PLEA AGREEMENTS (Amendments 25 and 36)

The Department strongly opposes these amendments which would add commentary to guideline §6B1.2 recommending that the government disclose to the defendant during plea discussions (option 1) or prior to a rule 11 colloquy (option 2) information known to the government that is relevant to the application of the guidelines. This proposal seems to be little more than a poorly disguised attempt to use plea negotiations to discover the details of the government's case.

This proposal would place a great burden on the system to make sure the defendant can correctly determine what his sentence will be. It would likely engender a plethora of litigation of claims by defendants that the government did not "fully" disclose relevant information in its possession. The amendments also raise the additional issue of the nature and scope of information the government should disclose; for example, whether information pertaining to an ongoing investigation would need to be disclosed that might subsequently result in the defendant's loss calculation being increased. Moreover, the defendant will already have access to the pertinent information through normal discovery.

Requiring that defendants be able to calculate a probable sentence invites additional litigation as to whether the sentence was correctly predicted and additional collateral attacks on plea voluntariness.

CARJACKING (Amendment 26)

Amendment 26 invites comments on the appropriate guideline for the recently enacted federal carjacking statute. We believe that guideline §2B3.1 should be made applicable to carjacking. This guideline, aimed at robbery in general, incorporates factors relevant to carjacking, such as bodily injury, abduction, and the nature of the use of a firearm. (The defendant must possess a firearm for the statute to apply). In addition, a cross-reference to the murder guideline, §2A1.1, should be added for cases in which death results. We also support increases in the theft guidelines for offenses involving stolen vehicles to reflect the increase in the maximum imposable sentence from five to ten years' imprisonment.
CRIMINAL ENTERPRISE AND RACKETEERING

BRIbery AND GRATUITIES (Amendment 27(G))

We recommend against this proposal to merge the two guidelines for bribery and gratuities affecting employee benefit plans and labor unions, respectively. The proposal carries the risk that persons applying the merged guideline will confuse the different specific offense characteristics for the two existing guidelines (§§ 2E5.1 and 2E5.6). The gratuity offenses for the two predicate crimes in the merged guideline section also differ substantially as to the elements of proof.

Section 2E5.1 increases the base offense level by two levels with respect to defendants who are fiduciaries of benefit plans. Section 2E5.6 has no similar increase for fiduciaries of labor organizations. The two types of organizations are frequently confused when the benefit plan is sponsored by a labor organization. The confusion would be compounded by the cross-application of the proposed guideline to reporting crimes which facilitate or conceal a bribe or gratuity involving a benefit plan (§2E5.3(a)(2)) or a labor organization (§2E5.5(a)(2)).

The gratuity portions of the union-related crime at §2E5.6 are offenses which proscribe the payment and receipt of things of value by persons holding particular positions described in the statute and do not require that the payment or receipt be tied to the recipient's actions, duties or decisions as an officer or employee of a labor organization or as a labor representative of employees. 29 U.S.C. §186(a)(1), (a)(2) and (b)(1). On the other hand, the benefit plan-related gratuity requires that the thing of value be received "because of" the recipient's actions, decisions or duties in relation to a benefit plan matter. 18 U.S.C. §1954.

In the event that the proposal is adopted over our objection, the discussion of "graft," which applies only to the section 1954 gratuities, should be omitted from the Commentary. That is, the paragraph in §2E5.1 captioned "Background" would be further amended by deleting the following clause:

... as opposed to graft, where the prohibited payment is given because of a person's actions, duties, or decisions without a prior understanding that the recipient's performance will be directly influenced by the gift.

THEFT (Amendment 27(H))

This amendment consolidates guideline §§2E5.2 and 2E5.4 for theft from benefit plans and labor unions, respectively, into the larceny guideline at §2B1.1. However, it fails to carry the "Application Note" in the consolidated sections to the larceny
guideline's Commentary. Instead, the proposed amendment transfers the Application Note's instruction to apply the adjustment for abuse of position of trust (§3B1.3) in the case of benefit plan fiduciaries and union officials to the Commentary in §3B1.3 as an "illustration." No other crimes are "illustrated" in such manner in §3B1.3. However, §2B1.1 already includes an enhancement based on harm to a "financial institution" which is defined in Application Note 9 as including unions and organizations providing "pension, disability, or other benefits... to large numbers of persons." The application notes for abuse of benefit plan and labor union positions of trust are more likely to be found and heeded in §2B1.1.

Therefore, we recommend that each "Application Note" in the Commentary to §§2E5.2 and 2E5.4 be transferred to the Commentary of §2B1.1 as new "Application Note 14."

We further recommend that the statutory citation for these frequently used statutes, whose guidelines are being deleted from Part 2E, be listed in the Commentary to §2B1.1 following the term "Statutory Provisions:" by inserting "664," after the term "659," and by inserting "29 U.S.C. §501(c)" after the term "2317."

REPORTING CRIMES (Amendment 27(I))

This proposed amendment consolidates the two guidelines for reporting crimes involving employee benefit plans and labor organizations into a single guideline. However, the proposals fail to amend the cross-references in §2E5.3(a)(2) and to preserve the cross-reference in §2E5.5(a)(2) for reporting crimes which facilitate or conceal a theft or embezzlement or an offense involving a bribe or gratuity. The proposals also fail to amend Appendix A (Statutory Index).

Therefore, we recommend that §2E5.3(a)(2) be amended to read as follows:

If the offense was committed to facilitate or conceal a theft or embezzlement, apply §2B1.1. If the offense was committed to facilitate or conceal an offense involving a bribe or gratuity pertaining to an employee benefit plan or labor organization, apply §2E5.1 and §2E5.6 as applicable.

Appendix A (Statutory Index) should be amended at the line beginning "18 U.S.C. § 1027," "29 U.S.C. § 439," and "29 U.S.C. § 461" by deleting "2E5.5" and inserting "2E5.3" at the end of each line.

**ADDITIONAL PROPOSALS (Amendments 27(I))**

Appendix A (Statutory Index) does not currently list crimes which are analogous to the labor racketeering offenses described above.

The misdemeanor for the willful failure to maintain records and file reports required by the Employee Retirement Income Security Act (ERISA) which is codified at 29 U.S.C. §1131 is not listed in Appendix A. We believe that the offense should be consolidated within the proposed record keeping and reporting guideline at §2E5.3, as amended.

Moreover, the misdemeanor for the willful deprivation of a union member's right to democratic participation in the affairs of a labor organization by means of actual or threatened violence (29 U.S.C. §530) is not included in Appendix A. However, the analogous misdemeanor for the willful deprivation of employee benefit plan participants' rights by means of actual or threatened violence (29 U.S.C. §1141) is assigned by Appendix A to guideline §2B3.2 (extortion by force or threat of injury).

Therefore, we recommend that Appendix A (Statutory Index) be amended before the line beginning "29 U.S.C. § 1141" by inserting the following two new lines: "29 U.S.C. § 530" followed by "2B3.2" and "29 U.S.C. § 1131" followed by "2E5.3."

**CONFORMING AMENDMENTS - FRAUD AND THEFT (Amendment 28(G))**

This amendment attempts to make the definition of loss in the theft guideline consistent with the language currently in the fraud guidelines. The Department has found that issues related to recovery under §2F1.1, particularly in the area of consumer fraud, which were made relevant by the 1991 changes to the commentary, are more difficult to resolve than the basic question of how much was spent for the fraudulent item. That is, when consumers purchase fraudulent products (juice with sugar and undeclared chemicals in it, cars with turned-back odometers, drugs not made in conformity with regulatory requirements), it is easy to determine what the cost of the item was. However, determining the "loss" now that credit for value received is granted raises difficult issues regarding the value of something that is not what it is supposed to be, and is generally something for which there is no market (these products exist only due to fraud). Thus, in deciding whether to conform guideline 2B to 2F, the Commission should not assume that 2F is easy to apply in its current form. It is not. Therefore, we do not support the
proposed consolidation and urge the Commission to further evaluate the appropriateness of the current approach for determining loss.

ANTITRUST OFFENSES (Amendment 28(I))

The Commission has requested comments on several conforming changes pertaining to the interaction of Chapter Two (offense conduct) and Chapter Eight (organizations). It proposes to amend guideline §2Rl.1 so that both individual and organizational complementary bidders would be assigned a volume of commerce equal to the greater of the affected volume of commerce done by the individual or organization or the largest contract on which a complementary bid was submitted. While the Department has no objection to the general thrust of this amendment -- imputing a volume of commerce to individual complementary bidders in the same manner that a volume of commerce is assigned to organizational complementary bidders -- we do believe that the proposal can and should be improved.

The language adopted by the Commission in 1991 to impute a volume of commerce to complementary organizational bidders has a possible hole in its coverage. While the usual form of a bid-rigging conspiracy is for one company to submit a winning bid while others submit complementary bids, there are also conspiracies in which one or more companies agree with the selected winning bidder not to submit bids at all. An agreement not to submit a bid has the same anti-competitive effect and is every bit as unlawful as an agreement to submit an artificially high or low bid. The Commission discusses both types of bid-rigging agreements in identical terms in Application Note 6 to §2Rl.1. The language in the guideline, however, only explicitly addresses cases in which an organization "submitted" one or more complementary bids. While there is every reason to apply the same rule concerning imputed volumes of commerce to agreements not to submit bids -- and while the Department is prepared to argue based on Application Note 6 that the Commission intended that both complementary bidders and defendants that agreed not to bid be treated in the same manner -- the current language, which would be used again in the proposed amendment to §2Rl.1(b)(2), should be clarified on this point. The proposed amendment should also be revised to conform to the language used in the first sentence of the paragraph to which it is being added and which provides that the volume of commerce attributable to an individual participant in a conspiracy is the volume of commerce done by him "or his principal" in the goods or services affected by the violation.

Therefore, we recommend that the language of the proposed amendment to §2Rl.1 be amended to read:
"In a bid-rigging case in which an individual participant or his principal, or an organization, submitted one or more complementary bids or agreed not to submit one or more bids, use as the individual's or the organization's volume of commerce the greater of (A) the volume of commerce done by the individual or his principal, or by the organization, in the goods or services that were affected by the violation, or (B) the largest contract on which the individual or his principal, or the organization, submitted a complementary bid or agreed not to bid in connection with the bid-rigging conspiracy.".

This issue should also be addressed in Application Note 6. The note will need to be amended in some manner -- even if the Commission does no more than adopt the language that it has proposed -- inasmuch as it currently states that complementary bidders have a zero volume of commerce with no mention of the attribution rules that the Commission has already promulgated for organizations and proposes to expand to individuals. For example, a new third sentence could be added to Application Note 6—whether or not the new guideline language we suggest above is adopted by the Commission—as follows: "For this reason, the Commission has adopted rules that impute to individuals and organizations a volume of commerce equal to the largest contract on which an individual or his principal, or an organization, submitted a complementary bid or agreed not to submit a bid."

Finally, should the Commission agree to address this issue either through new guideline language or new commentary (or, preferably, both), and assuming that the Commission agrees that it intended its 1991 change regarding organizational complementary bidders to apply to agreements not to bid as well, the Commission should state explicitly that any 1993 changes in this area as they relate to organizations are clarifying rather than substantive in nature. Otherwise, we will face a two-year period during which organizational defendants that agreed not to submit bids will argue that they have a zero volume of commerce and no $100,000 minimum fine.

FIRST OFFENDERS (Amendment 32)

Amendment 32 invites comment on whether the Commission should promulgate an amendment that would allow a court to impose a sentence other than imprisonment in the case of a first offender convicted of a non-violent or otherwise non-serious offense, either by creating a new ground for departure or by increasing the number of offense levels in Zone A of Criminal History Category I.

We strenuously object to this amendment. First, the Commission just last year considered alternatives to incarceration at great length and made adjustments to the
guidelines. Further change at this time is unwarranted since the effect of last year's amendments, which became effective only a few months ago, cannot be assessed.

On the merits, the proposal is extremely troublesome. It would lead to a great deal of disparity in sentencing if handled by way of departure. If implemented through additional offense levels added to Zone A, the maximum terms of imprisonment would have to decline in order to avoid excessive ranges. See 28 U.S.C. §994(b)(2), which establishes ranges in which the maximum may not exceed the minimum by more than the greater of 25 percent or six months. Offenses the Commission had previously identified as more serious than Zone A offenses would have reduced ranges for all offenders in order to address concerns regarding first offenders. The Commission just lowered the terms of imprisonment for offense levels 7 and 8.

Finally, the effect of this amendment, like amendment 52 discussed below, would be to provide favorable treatment to white-collar offenders. Its impact on antitrust violators would be significant since it would undercut the increased offense levels for antitrust offenses established in 1991. The amendment would also have a negative impact on tax law enforcement since the vast majority of tax cases involve first offenders. The effect on federal tax enforcement, which depends to a great extent on the deterrent effect of imprisonment for tax violators in order to insure compliance with the internal revenue laws, would be devastating.

COCAINE BASE/POWDERED COCAINE QUANTITIES (Amendment 40)

The notion that offenses involving equal quantities of cocaine base and powdered cocaine should be subject to the same penalties, as suggested in Amendment 40, ignores the original basis for the distinction in the law currently. Congress established different quantities for a number of particularly dangerous controlled substances, including cocaine base and powered cocaine, on the understanding that quantities of some substances posed greater risks than equal amounts of other substances, whether based on dosage unit, addictive qualities, or other factors. Whether Congress arrived at the best possible ratio in all cases is subject to debate and study. However, we see no greater basis, without significantly further study, to equate cocaine base and powered cocaine than to equate other distinct substances.

The suggestion that racial disparity resulting from the current scheme should be a basis for equating cocaine base and powdered cocaine quantities under the guidelines is inconsistent with the statutory mandate that the Commission assure the neutrality of the guidelines on racial grounds. 28 U.S.C. §994(d). Under the current scheme racial neutrality is achieved
because offenders of all racial groups who unlawfully traffick in cocaine base face the same guideline range, all else being equal. The view that guidelines for different offenses should be compared on the basis of racial impact would mean that any time one racial group engaged in a particular type of offense in disproportionate numbers, as compared to a related offense, the guidelines should be adjusted to address this so-called racial disparity, regardless of the relative seriousness of the two offenses. Thus, if whites had a propensity to commit burglary of a residence (base offense level 17) and blacks to commit burglary of other structures (base offense level 12) in disproportionate numbers, the offense levels for the two offenses would have to be harmonized to rid the system of this form of perceived disparity, despite the added danger one offense poses over the other. The guidelines would cease to become neutral as to the race of the offender.

Finally, a guideline change to equate cocaine base and powdered cocaine, without a corresponding statutory change, would cause the guidelines to be superseded by relevant mandatory minima in many cases. If these changes were made only for offense levels above or below the relevant mandatory minima, as suggested in the request for comment, the guidelines would produce great cliffs.

GROUPING RULES (Amendments 42 and 43)

These amendments to the grouping rules were proposed by the Internal Revenue Service and are designed to alleviate the problem of so-called "free" crimes in the sentencing calculus. In the tax area, this situation most often arises when tax crimes are grouped with drug violations. If the income giving rise to the tax violation is generated by drug activity and exceeds $10,000 in any one year (which it usually does), there is a two-level specific offense characteristic increase in the offense level for the tax violation and the offenses are grouped under §3D1.2(c). If the offense level for the drug offense exceeds that for the tax violation, the offense level for the tax violation has no effect on the ultimate sentence. The IRS proposed Amendment 42 has two alternative ways of dealing with this problem. We support the proposed amendment and prefer the first option, which would increase the offense level of the group two levels in all cases such as the one outlined above. The second option would affect only money laundering and drug violations.

Proposed Amendment 43 would insure that any offense, including, of course, tax offenses, would always have a definite effect on the final offense level calculation. It would do this by amending §3D1.4 to provide that groups which are nine or more levels less serious than the most serious group would be assigned one-half unit, rather than be totally disregarded, as is
current the case under §3D1.4. We also favor this proposed amendment.

LSD CARRIERS (Amendment 50)

This amendment would exclude from mixtures or substances containing LSD the carrier substance, such as blotter paper. We oppose this amendment as inconsistent with the statutory scheme. If the Commission adopted this amendment, many offenders would face mandatory minimum sentences that far exceeded the sentence that would otherwise apply under the guidelines, since the mandatory minimum would be based on the weight of both the LSD and the carrier. See Chapman v. United States, 111 S. Ct. 1919 (1991). The current approach of including the carrier substance is appropriate since the carrier medium is a necessity of retail distribution.

COCAINE BASE DEFINITION (Amendment 51)

Amendment 51 excludes from the term "cocaine base" any form of the substance other than what is commonly referred to as "crack." Most courts have agreed that chemical composition, rather than physical form, determines the identity of cocaine base for statutory purposes. There is no basis for a different definition under the guidelines. Establishing one would only bring about inconsistency with mandatory minimum provisions of law.

REQUIRED PROBATION (Amendment 52)

This amendment would require a sentence of probation without confinement conditions if the applicable guideline range were in Zone A, unless the court made a finding that a sentence of imprisonment were required to achieve the purposes of sentencing set forth in the Sentencing Reform Act. If the defendant were in Zone B, the amendment would require the court to impose the minimum confinement condition permitted unless the court made a finding that a greater confinement condition were required to achieve these purposes.

We vehemently object to this amendment. First, as explained with regard to amendment 32, the Commission just last year considered alternatives to incarceration at great length and made adjustments to the guidelines. Moreover, the proposal is unwise on the merits. The sentencing Reform Act did not aim to eliminate all judicial discretion, but rather provided for sentencing ranges within which judges could exercise their discretion. Discretion within these ranges allows judges to take into account a variety of factors of importance to the sentencing process but, since limited to a given range, the discretion necessarily is exercised in a manner that serves the purposes of reasonable uniformity in sentencing. An amendment which
eliminates this last measure of discretion is not consistent with the goals of sentencing reform.

The amendment would have the effect of keeping white-collar defendants out of prison since many white-collar offenses are subject to low offense levels. Tax and some antitrust offenders would particularly benefit from this proposal. In fact, the proposal would substantially increase the likelihood that the majority of tax violators would not serve any time in confinement. The threat of imprisonment can be a powerful deterrent for white-collar offenders. The Commission should not thwart this important goal.

CAREER OFFENDERS (Amendment 55)

Amendment 55 would eliminate the current table in the career offender guideline, §4B1.1, that places the guideline sentence at or near the statutory maximum, and would provide instead that a career offender be sentenced at the top of the applicable guideline range for Criminal History Category VI for the offense level that otherwise applies. The effect of this amendment would be to substitute the highest guideline sentence applicable to a particular offense level for a sentence close to the statutory maximum for the offense.

We strenuously object to this amendment because it violates the statutory directive that a career offender be sentenced "at or near the maximum term authorized." 28 U.S.C. §994(h). As the Commission recognizes in the commentary to the career offender guideline, the relevant legislative history reflects that "the maximum term authorized" means the statutory maximum. S. Rep. No. 225, 98th Cong., 1st Sess. 175 (1983). The Commission should reject this amendment as inconsistent with the Sentencing Reform Act.

RETROACTIVITY (Amendment 56)

Amendment 56 would include last year's amendment to the guideline on acceptance of responsibility, §3E1.1, which provides a third level of reduction in certain circumstances, in the retroactivity policy statement, §1B1.10. Providing for the retroactive application of this amendment can be expected to result in a flood of defense motions for reduced sentence. The courts would then have to consider the nature of the defendant's acceptance of responsibility to determine whether the added requirements of guideline §3E1.1 for the third level of reduction had been met. The factual information necessary for this determination may be old or unavailable. Providing for the retroactivity of the third level of acceptance of responsibility could be truly disastrous for the courts.
We also oppose the proposed amendment of the retroactivity policy statement to authorize the courts to sentence retroactively for reduction in ranges even when an amendment is not specifically listed in the policy statement. This proposal would also cause a flood of unfounded motions for reduced sentence. It would have the effect of making it very difficult for the Commission ever to reduce a guideline range because of the opportunity such a reduction would provide to defendants to seek reduced sentences.

Sincerely,

Roger A. Pauley
Member (ex officio)
United States Sentencing Commission
March 16, 1993

Suite 2-500, South Lobby
Washington, DC 20002-8002

Re: Proposed Sentencing Guideline Amendments for Public Comment - 1993 Amendment Cycle

Dear Mr. Courlander:

I am writing on behalf of the Criminal Law Committee of the Federal Bar Association's Philadelphia Chapter. Our Committee consists of federal criminal law practitioners in the Eastern District of Pennsylvania. The Committee has reviewed the proposed guideline amendments for public comment published in the December 31, 1992 edition of the Federal Register. This letter constitutes our comments on the proposed amendments. The Committee has not undertaken to comment on all of the proposed amendments. Rather, we have selected only a few on which to submit comments. They are as follows:

1. Amendment No. 20 - Money Laundering.

The Committee strongly supports the proposed amendment to U.S.S.G. §§ 2S1.1 through 2S1.4 applicable to money laundering offenses. The amendment would tie the base offense level for money laundering violations more closely to the underlying conduct that is the source of the illegal proceeds.

This represents a significant improvement in the money laundering guidelines. Our Committee is aware of cases in this District and elsewhere in which the money laundering guidelines have allowed the government to obtain a
significantly higher guideline sentencing range than the underlying offense would yield simply by adding a violation of 18 U.S.C. §§ 1956 or 1957 to the indictment. An example in our District is United States v. Brian M. Maier, Criminal No. 91- 00235, (E.D. Pa.). This was a fairly simple fraud scheme in which the "loss" within the meaning of U.S.S.G. § 2F1.1 was between $40,000 and $70,000. The total offense level for the mail fraud offense was 13, which yielded a guideline prison range of 12-18 months. However, by adding a violation of 18 U.S.C. § 1957, based solely on the defendant's removal of some of the fraud proceeds from the bank account into which they had been deposited, the government successfully increased the total offense level to 19 and the corresponding guideline prison range to 30-37 months. The Commission's October 14, 1992 Working Group Report on Money Laundering has apparently identified numerous other examples nationwide of this form of "count manipulation." The money laundering charges in these cases often involve "monetary transactions" normally not thought of as sophisticated "money laundering."

With the government's increasing emphasis on forfeiture, the number of cases in which violations of 18 U.S.C. §§ 1956 and 1957 are added to fraud and other charges will only increase. This is because violations of 18 U.S.C. §§ 1956 and 1957 are among those for which civil and criminal forfeitures are authorized under 18 U.S.C. §§ 981 and 982, even though forfeiture may not be available as a remedy for the underlying offense.

Proposed Amendment No. 20 is a significant step toward elimination of the unfair treatment that can result from manipulation of money laundering charges. One concern we have arises from proposed § 2S1.1(a). This provision requires that in non-drug cases the greater of the following base offense levels be applied: (a) the offense level for the underlying offense from which the funds were derived; or (b) eight plus the number of offense levels from the table in § 2F1.1 corresponding to the value of the funds. The offense level for fraud offenses is six. Thus, in fraud cases in which the government adds a money laundering charge, the base offense level under § 2S1.1(a) will always be two levels higher (i.e., the difference between eight and six), simply because the government has added the money laundering charge.

The Committee believes this is inappropriate. In many ordinary fraud cases, the conduct giving rise to a violation of 18 U.S.C. §§ 1956 or 1957 does not, in any meaningful way, make the defendant more culpable or deserving of punishment than the defendant who happens not engage in a "monetary transaction" within the meaning of §§ 1956 and 1957. Accordingly, the Committee recommends that § 2S1.1(a)(3) be changed to read: "six
plus the number of offense levels..." instead of "eight plus the number of offense levels...". Offenses involving relatively sophisticated "monetary transactions" can properly be dealt with through the specific offense characteristics set forth in proposed § 2S1.1(b).

2. Amendment No. 5 - Fraud, Theft and Tax - More than Minimal Planning/Use of Sophisticated Means.

This amendment would eliminate "more than minimal planning" as a specific offense characteristic under §§ 2B1.1(b)(5), 2B1.2(b)(4)(B) and 2F1.1(b)(2) and use of "sophisticated means...to impede discovery of the nature or extent of the offense" as a specific offense characteristic in tax cases under §§ 2T1.1-2T1.4. Instead, the amendment would modify the loss tables under the applicable guidelines to incorporate gradually an increase for "more than minimal planning" and use of "sophisticated means."

The Committee strongly opposes this approach. The underlying premise apparently is that offenses involving a certain amount of "loss" necessarily involve these specific offense characteristics. Therefore, they should be uniformly applied through appropriate increases in the loss tables. Thus, for example, offenses involving a "loss" in excess of $40,000 will have offense levels two levels higher than under the 1992 guidelines.

The Committee believes this premise is seriously flawed. Monetary "loss" does not measure in any meaningful way the degree of planning or sophistication involved in a particular offense. A theft or fraud involving a loss of $100,000 can often be as simple as a similar offense involving only a few thousand dollars. Good examples are cases in the Eastern District of Pennsylvania in which the government prosecutes relatives of deceased Social Security beneficiaries for receiving and cashing social security checks after the payee's death. These cases usually involve little or no planning. The relative is often surprised to learn that the government continues forwarding Social Security checks, even after the payee's death. The theft continues, and the "loss" increases, as long as the government continues to forward the checks and the relative cashes them. The amounts can often exceed $40,000. Nevertheless, few would argue seriously that such offenses involve any significant degree of planning or sophistication. There are countless other examples of theft and fraud offenses in which the "loss" may be relatively high and the degree of planning relatively low.

For this reason, the Committee believes the preferred approach to these specific offense characteristics is one
suggested in the "additional issues for comment" accompanying Amendment No. 5. Specifically, the Committee recommends that the Commission change the specific offense characteristic from "more than minimal planning" to one of "extensive or sophisticated planning." This approach would tend to eliminate a disparity which the Committee believes now exists. Section 1B1.1's emphasis on "repeated acts," along with the examples given in Application Note 1, have led courts to conclude that the "more than minimal planning adjustment" has a relatively low threshold. As a result, individuals engaged in elaborate and sophisticated fraud schemes receive the same treatment as the individual whose planning may be "more than minimal," but is far from extensive or sophisticated. A guideline that defines the planning necessary to establish the enhancement as "extensive or sophisticated planning" would still require subjective interpretation by the courts. However, such an approach would more fairly differentiate those defendants who deserve an upward adjustment based on the degree of planning from those who do not.

The Commission should, at the very least, eliminate the references to "repeated acts." Individuals who engage in repeated acts of fraud or theft are adequately dealt with through increases in the loss tables, because repeated acts almost always result in higher loss.

3. Amendment No. 23 - U.S.S.G. § 3B1.3 - Abuse of Position of Trust.

This amendment would change this role in the offense adjustment to "abuse of position of special trust." The definition of "special trust" makes clear that the two-level upward adjustment in offense level is intended only for individuals in positions of "public or private trust characterized by professional or managerial discretion." The definition further clarifies that the adjustment is not intended for employees whose responsibilities are primarily ministerial in nature.

This amendment would substantially improve the operation of this guideline. Under the current guideline, the two-level upward adjustment has been applied, even when the abuse of trust involved is little more than a breach of an employee's fiduciary duty to the employer. A good example is *United States v. Milligan*, 958 F.2d 345 (11th Cir. 1992), in which the court upheld the application of § 3B1.3 to a United States Post Office window clerk convicted of misappropriation and embezzlement of postal funds. The Committee strongly recommends that this adjustment apply only to individuals, who, because of their higher level positions, have significantly more responsibility than the ordinary employee. The amendment goes a long way
towards accomplishing this objective, and the Committee therefore strongly supports it.

The Committee believes amendment 24 is a step in the right direction in that it would allow the district court to make the ultimate determination, in a limited number of cases, of whether or not a defendant has provided substantial assistance in the investigation or prosecution of another person warranting a downward departure. However, the Commission should go further by allowing the district court to make this determination, regardless of whether or not the defendant is a non-violent first offender. Accordingly, the Committee prefers the recommendations by the American Bar Association in proposed Amendment No. 31 and the legislative sub-committee of the Federal Defenders in proposed Amendment No. 47.

Following the Supreme Court’s decision in Wade v United States, 112 S. Ct. 1840 (1992), defendants have very limited opportunity to challenge the government’s refusal to file a substantial assistance motion under § 5K1.1. The Committee maintains that, as with all other determinations under the guidelines, the district court, not the government, should make the final determination on whether or not a defendant has provided substantial assistance. As a practical matter, the government will, in most cases, be highly influential in the district court’s determination. In those cases where the parties disagree, defendants should be entitled to their day in court, just as they are now on the many factual and legal disputes arising under the guidelines. Access to a judicial determination of the issue should not turn on the defendant’s criminal history or offense characteristics.

The government would still be protected in two ways. First, as is mentioned above, it will likely be the most influential voice on the substantial assistance question at sentencing. Second, it can appeal an adverse determination.

Finally, this issue implicates very directly the appearance of justice. Under the current regime, both defendants and the public-at-large can legitimately question the fairness of a sentencing system that allows the defendant’s adversary to make unilaterally such an important determination in the sentencing process. Elimination of the requirement for the government motion would solve this problem (at least to the extent mandatory minimums are not involved) by making the substantial assistance determination no different than any other sentencing determination, that is, one ultimately for the district court.
5. Amendment Nos. 8-10, 50 - Drug Offenses.

Amendment No. 8 would provide a ceiling of offense level 32 in the drug trafficking guideline (§ 2D1.1) for defendants who qualify for a mitigating role adjustment under § 3B1.2. Additionally, it would revise the commentary to § 3B1.2 to describe more clearly cases in which the mitigating role adjustment is warranted.

These amendments constitute much needed reforms. As the Commission's synopsis of the proposed amendment suggests, existing drug guidelines have tended to overpunish certain lower level defendants in jointly undertaken activity because the sentence is driven primarily by the quantity of drugs involved in the offense. This problem has been particularly acute in the Eastern District of Pennsylvania, which has seen an increased emphasis in recent years on what are referred to as "neighborhood" drug cases. These have consisted of as many as thirty or forty defendants in one indictment. Typically, certain lower level participants have been sentenced on the basis of extremely high drug quantities because of the manner in which the relevant conduct guideline (§ 1B1.3) has been applied.

The proposed revisions to the commentary to § 3B1.2 (along with prior clarifications of the relevant conduct guideline) will improve the situation. They will help clarify the participants in jointly undertaken activity for whom the mitigating role adjustment is intended. The absence of more expansive commentary and the emphasis upon the defendant's lack of knowledge or understanding of the scope and structure of the enterprise have caused district courts to be unduly restrictive in their application of the mitigating role adjustment. The Committee strongly endorses the Commission's identification of the non-exhaustive list of characteristics identified in proposed Application Note 5 that are ordinarily associated with the mitigating role.

With regard to Application Note 7 pertaining to transporters of contraband, the Committee opposes option 3. This would prohibit any mitigating role adjustment for that quantity of contraband the defendant transported. This seems unfair to the defendant who, on the facts of a particular case, might otherwise have a strong claim that he or she qualifies for the mitigating role adjustment. As for options one and two, the Committee prefers option one because it is more flexible and easier to understand.

The Committee also endorses Amendment 9, which would restore the upper limit of the drug quantity table to level 36. Prior increases in the upper limit to level 42 reflected an undue
emphasis on quantity in determining the overall sentence. Moreover, the Committee recommends that the Commission consider further reductions in the quantity table’s upper limit, along with an increased emphasis on specific aggravating offense characteristics such as the ones identified in Amendment 9.

Finally, the Committee endorses proposed amendments 10 and 50 pertaining to the definition of "mixture or substance" under § 2D1.1, Application Note 1, and the appropriate method of determining the relevant quantity in cases involving LSD.

6. Amendment No. 2 - Use of Guidelines Manual in Effect on Date of Sentencing (§ 1B1.11).

This amendment reinforces the Commission’s so-called "one book rule," and extends it to multiple count cases in which the effective date of guideline revision(s) occur between offenses of conviction. The Committee opposes this amendment. The "one book rule," in our view, violates the Sentencing Reform Act. Specifically, section 3553 of Title 18, United States Code, requires the sentencing court to apply the guidelines "in effect on the date the defendant is sentenced." If the application of a particular guideline in effect on the day of sentencing would violate the ex post facto clause of the United States Constitution, then the district court must resort to the guideline in effect at the commission of the offense. It does not follow, however, that the entire guidelines manual in effect at the time of the offense must also be applied. Rather, under Section 3553, the court must continue to apply all other guidelines in effect at the time of sentencing, as long as their application does not violate the ex post facto clause.

7. Amendments 29 - Specific Offender Characteristics

The Committee strongly supports this proposed amendment by the Criminal Law Committee of the Judicial Conference of the United States. It would reinforce an important point. While a particular offender characteristic may ordinarily be irrelevant in determining whether a sentence should be outside the applicable guideline range, the presence of such a characteristic to an extraordinary degree (and therefore to a degree not adequately taken into consideration by the Sentencing Commission) is an appropriate reason for departure from the guidelines.

More importantly, the amendment would clarify that even though any one offender characteristic may not be present to a degree sufficient to support a departure, two or more characteristics may be present in combination to an extent that warrants a departure. This is consistent with the language of 18 U.S.C. § 3553(b), which contemplates departures based upon an
aggravating or mitigating "circumstance." Moreover, the proposed amendment will better enable district courts to accomplish the statutory sentencing goals identified in section 3553(a).

Amendment 32 calls for the Commission to invite comment on whether it should promulgate an amendment that would allow a court to impose a sentence other than imprisonment in the case of a first offender convicted of a non-violent or otherwise non-serious offense and, if so, whether this should be accomplished either by: (A) providing an additional ground for departure in Chapter 5, Part K; or, (B) increasing the number of offense levels in Zone A in criminal history category 1. The Committee endorses such an amendment. There are still far too many cases involving such offenders where the guidelines require a sentence of imprisonment. The Committee believes that the recent amendments increasing the number of offense levels in Zone A in Criminal History Category I from six to eight constituted a significant improvement. However, the Commission should undertake to identify through a separate ground for departure in Chapter 5, Part K, the relevant factors that would support departures for first-time, non-violent offenders.

Thank you for the opportunity to comment on these important sentencing issues.

Very truly yours,

James M. Becker

     Co-Chairs
My name is John S. Beresford. I am a recently retired psychiatrist residing in Toronto, Canada, and a U.S. citizen. One of my projects in retirement has been a non-profit organization that aims to help the children of parents sentenced to imprisonment for possession of illicit drugs. During my inquiries I have met with instances where families have been broken up, both parents sentenced to imprisonment, and dependent children left in foster care with no prospects of seeing the parents released for periods of 10, 20 and up to 40 years. There are obviously serious repercussions to a child’s development and subsequently to societal attitudes and behavior when pre-teen and teen-aged children are left to deal with the emotional problem caused by the loss of a previously secure environment and parenting, with the incarceration of both parents for not just short but protracted periods of time. (See below)

The organization I have helped to found looks for people to assist the dependents of prisoners, their function being to serve as go-betweens in such very difficult matters as escort-visitng at institutions perhaps 1000 miles away. Officials at the John Howard Society here in Toronto have been encouraging, seeing that there are no statistics and no follow-up on children from double-incarceration families.

In the United States the focus has been on the dependents of families where the parents have been sentenced to prison for illicit drug possession. For various reasons the worst cases turn out to be those where the involvement has been with LSD. This presentation is limited to concerns that arise in connection with the sentencing provisions that apply to the LSD-offender. The contention is that as the present sentencing provisions stand, the law is administered unfairly. As will be explained below, the carrier-weight provision, through an oversight, deprives an LSD-offender of his (and her) liberty through the operation of arbitrary and capricious factors. Moreover, the length of sentence-terms imposed under the carrier-weight provision is unreasonably harsh compared with the length of prison sentence imposed when the substance LSD is distributed in a powder form or by some method that does not involve the use of blotting paper. Further, there is anecdotal evidence which suggests that arrests for trafficking in LSD lead to charges against both parents of a two-parent family more often than is the case where a stimulant or narcotic drug is the substance involved. In short, the child of the LSD-offender is particularly at risk for losing contact with two parents for excessively long (and arbitrarily determined) periods of time.
A. FACTORS RELATED TO INCALCULABLE WEIGHT

In questioning the logic of the carrier-weight provision, attention has to be given to the particular mode of distribution that applies to LSD, namely the blotting paper route. Slips of blotting paper are frequently impregnated with drops of LSD, each circle on the paper "carrying" a certain dose, conventionally 100 micrograms. By the decision of Congress, individuals are liable to be penalized for possession of the "carrier" paper as well as the substance "carried" where LSD is the substance involved. What Congress did not stipulate, however, due no doubt to a failure to take into account the nature of this method of distributing LSD, was that offenders should be punished for possessing or trafficking in not only a precise amount of LSD but an imprecise amount of moisture and perhaps other contaminants that can result from handling blotting paper strips under varied and unpredictable conditions.

1. Moisture and adulterants: I am drawing your attention to the fact that laboratory determinations of the weight of blotting paper, LSD, atmospheric water, sweat and other substances that have been deposited and absorbed as a result of handling are likely to vary from laboratory to laboratory, and conceivably by substantial amounts. Each major city in the U.S., I am told, has a laboratory where the weight of an illicit substance (and its carrier) can be determined. Please consider this. A laboratory in a coastal area, such as Maine, where the climate is moist, is liable to register a weight of a given slip of blotting paper in excess of the weight that would have been registered if this same slip of paper had been weighed in a dry environment, say in the State of Nevada. Therefore, a judge in sentencing a convicted individual will find himself unwittingly imposing a sentence based on calculations not provided for by Congress and -- again unwittingly -- acting arbitrarily.

In addition to the incalculable factor of absorbed moisture, due to the fact that blotting paper is inherently a highly absorbent substance, there is the matter of sweat gland and other impurities which have been deposited in varying amounts during the process of handling. There is reason to suppose that some of this non-paper and non-LSD material may derive from the agent who has effected an arrest. In that case, a prison sentence term can be in part determined by a factor that has nothing whatever to do with the person of the prisoner who has been arrested.

2. Arbitrariness arising from non-standard paper size: Under the recent Supreme Court decision bearing on the carrier weight issue, an opinion was given that the carrier weight provision relating to LSD offences was not unconstitutional. It was said to be Congress' intention to punish LSD offenders severely. While accepting this decision, it is possible to object that judges are being drawn into pronouncing arbitrary sentences with regard to the width of the border surrounding any particular sample of blotting paper treated with LSD in a manner Congress did not specify. It is not as if strips of blotting paper come in standard sizes, like, say, playing cards. It appears there are grounds for instructing judges to take into account only that weight of blotting paper that does conform to some standard set of dimensions, and to disregard the weight of paper that might constitute an extravagantly wide margin. But of course there is no such standard size, and no instruction given to the technician
beresford

at a laboratory to trim a sample to a particular size.

I believe the Commission has the right to recommend that judges not be put in the position of imposing sentences that have been erroneously determined, outside the stated intention of Congress, with regard to either:

(a) extraneous moisture and other unspecified substances, or
(b) non-standard margin size, or both.

B. HARSHNESS OF PUNISHMENT

This will be well known to members of the Commission already, but is worth inserting here as a reminder. The question of undue harshness arises from the disparity between the sentence mandated for an LSD-related offence where LSD has been distributed in powder or some other form and when the same weight of LSD has been distributed in the form in which it is "carried" on heavy blotting paper. Among the cases that have come to my attention is that of a 35 year old woman sentenced for the possession of 16 slips of blotting paper impregnated with a total of 1600 "doses" of LSD. For a fairly serious offence of this kind the sentence might ordinarily have been a 5 year prison term. Because of the weight of the paper serving as "carrier," the actual term to which she was sentenced was 24 years. A Federal prisoner, she is eligible to no parole. This individual commented to me, in a letter, that she had calculated the weight of cocaine she would have had to have in her possession to draw a comparable sentence. The figure she arrived at was 150 kilograms. It is understood that the Commission may have reservations about the extent to which it can intervene, if it should wish to intervene, in the matter of instructing judges with regard to the carrier weight provision. Nevertheless, I submit that in view of the extraordinary disparity between LSD sentences and sentences for crimes involving other drugs, and the presumption that the disparity may be attributed to the effect of the carrier weight provision, and the understanding that the carrier weight regulations contain built-in means for improper sentencing, outside the stated intentions of Congress, the Commission may wish to declare a moratorium on carrier-weight sentencing. That decision would be justified on the basis that no one at present can tell what proportion of a carrier weight sentence is within the bounds stipulated by Congress, and how much falls outside. A moratorium would relieve judges of the burden of making capricious decisions, pending a clarification of the issue by Congress.

C. THE PROBLEM OF DOUBLE-PARENT SENTENCING

The argument here likewise falls outside the scope with which the Commission is concerned directly, but is worth inserting to complete the picture. The issue has greater sociological and psychological consequences than legal ones. From my own research in practice and from anecdotal evidence supplied by colleagues it appears that so-called psychedelic drugs, among which LSD is included, provide for a higher conviction rate of two members of a family, wife and husband or parents living common-law, than illicit drugs belonging to the narcotic or stimulant classes, for example cocaine. The pattern of trafficking in LSD may differ from the pattern
characteristic of other illicit drug distribution. The individual involved in LSD distribution is evidently not so likely to be involved for money. There are no big profits in the LSD trade, in contrast to the case with cocaine and opiates. The LSD user is rather more likely to be involved in a friends-and-family network. This does not mitigate the offence. But it does render the offenders more liable to be arrested along with their marriage partners and so come to concern our organization. In the case of the woman mentioned about who is serving a 24 year prison term for possession with intent to sell of 16 blotter strips of LSD, the husband was sentenced to 40 years for the same offence. The couple have left two children behind, 11 and 13, who are among those we have been trying to help. Abolition of the carrier weight provision would make a large difference in this type of case.

D. RETROACTIVE REVIEW

Common sense and a concern for justice indicates the need for a system of review boards to consider the cases of those prisoners who currently are serving terms for LSD offences that have been determined by the carrier weight provision. A further element of arbitrariness and capriciousness would be perpetrated if future sentences were not based on this provision while past cases were allowed to stand without review. It is submitted that individuals who have completed the length of sentence that would have been imposed without the influence of the carrier weight provision but whose sentences continue because of the provision be entitled to release. There are, it has been estimated, tens of thousands of prisoners in the U.S. who would be entitled to release under this condition.

E. SUMMARY

On the grounds stated it is submitted that the Commission consider a recommendation to Congress which would eliminate the carrier weight provision as it applies to LSD. Too many elements of the arbitrary and capricious are inherent in the provision to make it fair that judges should be subject to its requirements. Citizens have the right to not be subject to a law which, however innocently, cannot fail to result in inequity. The LSD offender is particularly vulnerable to multiple arrest of family members, owing to the "non-commercial" nature of the trade in LSD. Tragic consequences fall to the lot of children in such cases. Should the Commission decide in favor of this recommendation, it follows naturally that a system of review boards be established for the case of those already serving sentences.

John S. Beresford, M.D.
United States Sentencing Commission
One Columbus Circle, N.E.
Suite 2-500
Washington, D.C. 20002-8002

Honorable Commissioners

My son, a first time offender who was 19 years old at the time of his arrest, is now in Sheridan Federal Correctional Institution and is about to turn 22. He has 8.5 years remaining on his sentence. He was convicted of possessing LSD.

The LSD was on blotter paper, resulting in a sentence 8 years longer than would have been given for having the same number of doses in crystal form. Had the drug been on sugar cubes the sentence would have been twice as long again.

Imposing different lengths of sentences to different first time offenders for possessing the same number of doses of LSD is clearly not in keeping with the precepts of our judicial system.

Because mandatory minimum sentences have removed the judges ability to recognize and rectify inequities in sentencing, my son and many like him, are receiving unfair, unjust and disparate sentences in which the punishment does not fit the crime.

I beg you to correct this situation by supporting proposal #50.

Public Information
U.S. Sentencing Commission
One Columbus Circle, NE
Suite 2-500, South Lobby
Washington, D.C. 20002

Dear Commissioners:

On behalf of the 13,300 members of Families Against Mandatory Minimums (FAMM), I urge you to adopt the following proposed amendments: 8, 9, 10, 11, 12, 25, 29, 31, 35 (option 1), 39, 40, 50, 51, 52, 56.

Each of these amendments would result in fairer sentencing for nonviolent, offenders. FAMM also supports many of the Issues for Comment offered in the proposed amendments.

Issue for Comment #13: We have received many letters from inmates whose offense level was raised due to the artificially low price set by the undercover agents. 2D1.1 should be amended to correct this abuse.

Issue for Comment #24: The Court should definitely be allowed to present its own motion for substantial assistance 5K1.1, regardless of whether the Government presents such a motion. This departure should not be limited to first offenders only. Substantial assistance is currently granted to multiple offenders by the Government in order to catch lower level offenders. Why should the Government be the only body able to offer that motion to first or multiple offenders? Amendment 31 correctly addresses this question.

Issue for Comment #32: Nonviolent, first offenders, should be considered for alternatives to incarceration. This should be accomplished by increasing the number of offense levels in Criminal History Category I.

I commend the Sentencing Commission for considering so many sensible amendments to the guidelines. I hope the Commission will keep in mind that the American public wants justice to make sense. It doesn’t make sense to sentence someone for offenses acquitted; it doesn’t make sense to distinguish between crack and powder cocaine when one must have powder cocaine in order to make crack, and it is racially discriminatory; it doesn’t make sense to sentence someone for undigestible compounds; ultimately, it doesn’t make sense to pack our prisons for years with nonviolent, offender.

Sincerely,

Julie Stewart
President
STATEMENT OF

NKECHI TAIFA
LEGISLATIVE COUNSEL

ON BEHALF OF

THE AMERICAN CIVIL LIBERTIES UNION

BEFORE THE

UNITED STATES SENTENCING COMMISSION

ON

PROPOSED GUIDELINE AMENDMENTS FOR PUBLIC COMMENT

MARCH 22, 1993
The American Civil Liberties Union (ACLU) appreciates this opportunity to comment upon several proposed amendments to the guidelines, policy statements, and commentary in the Guidelines Manual.

The American Civil Liberties Union is a nonpartisan organization of over 275,000 members dedicated to the defense and enhancement of civil liberties. Because protection of the Bill of Rights stands at the core of our mission, we have a particular interest in ensuring that due process and equal protection of the law, as well as the right of freedom of association and freedom from disproportionate punishment, are upheld wherever threatened.

The principal purpose of the United States Sentencing Commission (Commission) "is to establish sentencing policies and practices for the federal criminal justice system that will assure the ends of justice by promulgating detailed guidelines prescribing the appropriate sentences for offenders convicted of federal crimes." United States Sentencing Commission, Guidelines Manual, § 3E1.1 (Nov. 1992), p. 1.

The Sentencing Reform Act of 1984 (Title II of the Comprehensive Crime Control Act of 1984), provides for the development of guidelines that will further the basic purpose of criminal punishment: deterrence, incapacitation, just punishment, and rehabilitation. The Act delegates broad authority to the Commission to review and rationalize the federal sentencing process.

As part of its statutory mission to monitor sentencing
practices in the federal courts, the Commission underscored the dynamism of the guideline-writing process, describing it as "evolutionary", with the expectation and anticipation that "continuing search, experience, and analysis will result in modifications and revisions to the guidelines ..." Id. p.2.

The Executive Branch and the Congress have increasingly responded to public pressure to "get tough on crime" through enacting legislation that creates new federal criminal offenses. Thus, emerging criminal law is not just in the purview of state courts -- now federal courts have broader jurisdiction. This trend of federalizing criminal law has decreased access to the federal courts for civil cases (especially civil rights cases) and has created a patchwork quilt of laws for which punishment is often inconsistent and, in our view, extreme. It is incumbent that this Commission not simply rationalize federal crime policies which, for the most part, have been sensationalized, but rather ensure that civil liberties are not compromised in the process.

Our comments will be specifically directed in support of drug trafficking amendments which seek to achieve consistency in drug sentencing (amendments 10, 49, 50); in favor of eradicating the distinction between powder and crack cocaine (amendments 40, 51); in opposition to increased sentences for "gang-related crime" (amendment 66); and in opposition to imposing a guideline level for the recently enacted carjacking statute (amendment 26).

Although the focus of our comments is narrowed for the purpose of this testimony, we are also in general agreement with the
concepts embodied in the following proposed amendments to the
guidelines:

Amendment 25, 36: recommendation that the government disclose
to the defendant information relevant to the application of the
guidelines prior to the entry of a guilty plea;

Amendments 24, 29, 30, 31, 47: language clarifying and
increasing the court's ability to depart tailored to individual
circumstances and offender characteristics;

Amendments 1, 35: prohibiting use of acquitted conduct in
determining guideline offense level;

Amendments 32, 52: imposition of sentences other than
imprisonment;

Amendment 56: retroactivity of amended guideline range and
ability to reduce a sentence not listed if consistent with the
purposes of sentencing.

DISCUSSION

Drug Trafficking: Amendments 10, 49, 50.

With respect to the category of drug trafficking, we support
a number of closely related amendments which seek to ensure
consistency in drug sentencing. Amendment 10 resolves the split
among circuits by providing that the term "mixture or substance"
does not include uningestible, unmarketable portions of drug
mixture. Amendment 49 clarifies that the weight used to determine
the offense level should not include the weight of substances
involved in the manufacturing process or substances to which the
drug is bonded. Amendment 50 separates the weight of the carrier from the actual weight of LSD to determine offense level.

Because a defendant's sentence pursuant to the guidelines is calibrated to the specific weight of the substance, it is essential that the substance be appropriately defined. To include noningestible portions of a substance in the calculation of drug quantity for sentencing purposes would be unjust. A differential effect would occur solely based on the weight of different carriers. There has been no showing, however, that the extra weight is related to increased culpability.

In Chapman v. United States, 111 S. Ct. 1919 (1991) the Court acknowledged that the sentences for selling a specific quantity of LSD could differ by over 2000 percent solely on the method of marketing: that is, the sentence for the sale of LSD in liquid form -- the least diluted form -- would be 10 - 16 months. However, since LSD is more widely distributed using a blotter paper carrier or on sugar cubes, the weight of the substance significantly increases as the result of the introduction of such uningestible and unmarketable components. Thus, the sentences of the people at the lower end of the chain of distribution who handle the drug in a more diluted form skyrocket: with blotter paper, the weight of the substance triples and the sentence would increase to 63 - 78 months; with sugar cubes, the weight would spiral tremendously and the penalty would leap to 188 - 235 months. The ACLU maintains that such a sentence, being disproportionate to the crime, is unconscionable and constitutionally suspect.
Pursuant to the sentencing guidelines, the penalty for distributing exactly the same amount of drugs -- 100 doses -- could range from 10 months to almost 20 years, causing the defendant to receive 19 additional years simply because of the manner of delivery of the drug. Ironically, it is typically the drug kingpin who is able to sell the drug in liquid form -- the purest form, thus receiving the lighter sentence. The people at the lower end of the drug trafficking scheme, who are usually young and poor, would unfairly be made to bare the brunt of punishment for participation in the drug economy.

Although the majority in the Chapman case held that such an arbitrary scheme of punishment was not violative of the Constitution, the dissent correctly observed that the ruling "will necessarily produce sentences so anomalous that they will undermine the very uniformity that Congress sought to achieve when it adopted the Sentencing Guidelines." If we want a consistent and rational sentencing scheme that sends unambiguous messages to drug dealers, such sentencing disparity must be corrected wherever it appears in the drug laws. The adoption of these amendments would be a first step towards the implementation of a rational drug sentencing scheme which carries on the mission of the Sentencing Reform Act - - the elimination of unwarranted sentencing disparity.

Amendment 51 clarifies that the term "cocaine base" means

"crack." Amendment 40 asks for comment regarding whether the Commission should ask Congress to modify or eliminate the provisions that distinguish between the punishment for powder and crack cocaine at the quantity ratio of 100 to 1.\textsuperscript{2} The ACLU supports these amendments.

Pursuant to this Commission's preliminary report detailing statistics of race and drug types, a disproportionate impact by race is clearly demonstrated. The Commission's final sample consisted of 4122 cases filed between April 1 and July 31, 1992, and is representative of all drug cases received for FY 1992. With respect to cocaine base (crack) and cocaine powder, the study concluded that 92.6\% of Black defendants were sentenced for crack as compared with 4.7\% of White defendants. On the other hand, 45.2\% White defendants were sentenced for cocaine as compared with 29.7\% Black. With respect to simple possession only, 100.0\% of the defendants sentenced for crack were Black, as compared with 0.0 of Whites. As for simple possession of cocaine, 61.8\% sentenced were White, as compared with 20.6\% Black. See U.S. Sentencing Commission, Monitoring Data Files, April 1 - July 31, 1992. These statistics raise grave concerns as to the racial distinctions between the punishment for powder and crack cocaine established by the 100 to 1 quantity ratio.

The available evidence indicates that cocaine base is used

\begin{footnote}
\textsuperscript{2} One gram of cocaine base (crack) carries the same penalty as 100 grams of cocaine powder for the purpose of determining an individual's base offense level under the Sentencing Guidelines.
\end{footnote}
principally by African Americans, while cocaine powder is used primarily by Caucasians. The overwhelming number of prosecutions in this country are for crack rather than cocaine powder, with the result being a vast disproportionate number of African Americans prosecuted for use of crack. The resulting disparate sentencing scheme dramatically impacts in a negative fashion on African Americans, who are subject to long mandatory minimum sentences for simple possession of small amounts of cocaine base while those first time offenders convicted of possession of a much larger amount of cocaine powder are subject to minimal sentences.

For example, an offender with no prior record must be sentenced to five years for possession of five grams of crack. In contrast, a defendant convicted of first possession of 4.9 grams of crack or any amount of heroin or other controlled substance is by statute subject to a maximum sentence of one year. The much harsher treatment of a form of cocaine more likely to be possessed by Blacks than that meted out for possession of another form of cocaine that is likely to be used by Whites, implicates fundamental equal protection concerns.

Although the five year minimum for possession of five grams of crack does not explicitly establish a classification based on race, the usage of crack is overwhelmingly attributed to Blacks, while powder is primarily used by Whites. There is no medical/scientific distinction between these forms of cocaine, and no objective scientific data to suggest that crack is more
addictive than powder. Thus, it would appear that the statute's grossly disproportionate treatment of cocaine base does establish a de facto classification based on race or, at the least, represents a facially neutral statute applied in a racially discriminatory manner. See Yick Wo v. Hopkins, 118 U.S. 356 (1886).

In 1988, the state of Minnesota enacted a law that increased the penalty for possession of crack. While the possession of three grams of powder cocaine carried a penalty of five years in prison and/or a fine of $10,000, under the new law possession of three grams of crack cocaine carried a penalty of twenty years in prison and/or a $250,000 fine. In challenging the constitutionality of the law, statistics were presented to the court which showed that 92.3% of all persons convicted of possession of crack in 1988 were Black, while 85.1% of all persons convicted of possession of powder cocaine in that year were White. In finding for the defendants, the court ruled that the statute violated the equal protection clause of the 14th amendment as well as a comparable provision of the Minnesota constitution. Minnesota v. Russell, Hennepin County District Court, December 27, 1990.

On appeal, the Minnesota Supreme Court upheld the lower court's decision and invalidated the disproportionate treatment of cocaine base and cocaine powder under the equal protection clause.

---

provisions of the State constitution. *State v. Russell*, 477 N.W. 886 (Minn. 1991). In examining the distinction between crack and powder, the Court stated that an intermediate level review was appropriate "where the challenged classification appears to impose a substantially disproportionate burden on the very class of persons whose history inspired equal protection." *Id.* at 889. The court then held that equal protection was violated because of the "lack of a genuine and substantial" basis for the distinction, rejecting the State's argument that the crack/cocaine classification served to facilitate prosecution of "street level" dealers or that such disparate treatment was necessary because of the alleged more addictive and dangerous nature of cocaine base.

With the exception of the Minnesota Supreme Court, all courts to date have rejected unconstitutionality arguments advanced by critics of the distinction in sentencing between crack and powder cocaine. Although the 8th Circuit in *U.S. v. Simmons*⁴ declared the 100-to-1 sentencing ratio rationally related to Congress' objective of protecting public welfare and several circuits have made similar rulings, creating a separate set of tougher sentences for low income people of color is unjust, regardless of federal court interpretations. It is instructive to note, however, that the court in *Simmons* stated that it was "bound by precedent" to reject arguments that the sentencing scheme was constitutionally

disproportionate. It stated that were it writing from a "clean slate", it might have accepted as valid that the 100:1 ratio constituted disproportionate punishment. Id. at 767.

The ACLU submits that Congress' decision to distinguish between cocaine powder and cocaine base is arbitrary and irrational and the substantially higher term for possession of crack discriminates on the basis of race in violation of the due process clause, the equal protection clause and the Eighth Amendment's prohibition against cruel and unusual punishment. Gang-related Crime: Amendment 66

The Commission requests comment on two issues: 1) whether the guidelines should provide for a 4-level enhancement for felonies committed by a member of, on behalf of, or in association with a criminal gang; and 2) whether a "criminal gang" should be defined as a group, club, organization, or association of five or more persons whose members engage, or have engaged within the past five years, in a continuing series of crimes of violence and/or serious drug offenses.

We all want to reduce crime in urban communities, but adding years to a convicted defendant's felony sentence for membership in a "criminal gang" is the wrong way to achieve results.

a. Violation of First Amendment Right to Free Association

The First Amendment guarantees freedom of association. It protects expression and association without regard to the race, creed, or political or religious affiliation of the members of the
group or to the truth, popularity, or social utility of the ideas and beliefs which are offered. *NAACP v. Button*, 371 U.S. 415 (1963). It is not accurate to assume that every single member of every "gang" is involved in criminal or drug-related activities. The motivations for joining a gang are complex and often involve issues of acceptance, trust, and responsibility. It is incorrect to classify away a whole segment of our youth because of their economic circumstances, their color, and/or where they live.

The mixture of criminal and non-criminal activities resulting from gangs demands more exacting governmental definition. For example, *NAACP v. Claiborne Hardware Co.*, 458 U.S. 886, 916 (1986) discusses the mixture of criminal and non-criminal activities as follows:

No federal rule of law restricts a State from imposing tort liability for business losses that are caused by violence and by threats of violence. When such conduct occurs in the context of constitutionally protected activity, however, "precision of regulation" is demanded. Specifically, the presence of activity protected by the First Amendment imposes restraints on the grounds that may give rise to damages liability and on the persons who may be held accountable for those damages ... Moreover, in *Noto v. U.S.* the Court emphasized that this intent must be judged "according to the strictest law," for "otherwise there is a danger that one in sympathy with the legitimate aims of such an organization, but not specifically intending to accomplish them by resort to violence, might be punished for his adherence to lawful and constitutionally protected purposes, because of other unprotected purposes which he does not necessarily share."

*Id.* at 919, quoting *Noto*, 367 U.S. 290 at 299-300.

b. **Vague Definition of Criminal Gang**

An additional infirmity in the proposed amendment is its vagueness of terms. As our courts consistently recognize, vague
language not only deprives potential offenders of notice with regard to unlawful conduct, its effect is to open the door to arbitrary police enforcement. Under the proposed amendment, this problem is particularly acute with regard to the definition of "criminal gang". For example, the suggested language fails to specify how it is to be ascertained who a "gang member" is. Also, just what is the definition of a "serious drug offense"?

It is insufficient to define a "criminal gang" as "a group, club, organization, or association of five or more persons whose members engage, or have engaged within the past five years, in a continuing series of crimes of violence and/or serious drug offenses." The absence of standards for making such a determination of guilt is repugnant to both our criminal justice system and to the values inherent in a free democracy.

Moreover, the definition of "criminal gang" is simultaneously too inclusive and too exclusive. The statute may be used against peaceful striking workers, whose peers may have been involved in violent activities. On the other hand, the law would not apply to inside traders or S & L swindlers, who nevertheless are engaged in "criminal" behavior (because the definition specifies violent or drug crimes). Like the crack/powder distinction, this sentencing change will be used against poor people of color while allowing wealthy, White criminals to escape enhanced penalties. Ominously, the vague definition is broad enough to include other political and union "gangs" who may be fighting for social change.

c. Inability to Ascertained Membership
Prosecutors cannot determine, with any accuracy, whether or not a defendant is or was a member of a gang, and thus subject to the penalty enhancement. The L.A. County district attorney released a report on gangs in May 1992. In the report, it was alleged that half of all Black males in the region, between the ages of 21 and 24, were involved in gang activity. According to the police, only 8.5% of Latino men and one half of 1% of Caucasian men in that age group show up in the gang database. Critics of the police in the Black community argue that African American men are being categorized as gang members because of their race, class, neighborhood, and/or the clothes that they wear, not as a result of their conduct.

In *Farber v. Rochford*, 407 F. Supp. 529 (1975), the District Court in Illinois ruled that an anti-loitering city ordinance targeting specific segments of the population was unconstitutional. The ordinance targeted people "known to be" drunkards, prostitutes, etc. The court ridiculed this language at length -- who would "know," the community, the police, the people themselves?

> Reputation and general knowledge have no certain relation whatsoever to actual condition ... The law enforcement authorities are entitled to punish acts, but not reputation. This law is unconstitutional, as it seeks to punish an individual for what he is reputed to be, regardless of what he actually is.

.Id., at 532, quoting *People v. Belcastro*, 356 Ill. 144 (1934).

Moreover, vagueness of statutory language gives police officers uncontrolled power to arbitrarily select individuals for arrest and jeopardizes the rights of members of unpopular or
controversial groups. See also Papachristou v. City of Jacksonville, 405 U.S. 156 (1972); Grayned v. Rockford, 408 U.S. 104 (1972).

It is not possible for the police or prosecutors to know with any certainty whether an individual on trial is a member of a gang, whether he or she is peripheral or central to alleged criminal activities, or whether the person just "hangs out" with gang members.

It has been our experience that vague laws vesting broad discretion in police officers have inevitably resulted in sweeping within their enforcement large numbers of law-abiding persons who are not the targets of the legislative bodies that pass these laws. This clearly was the result of the efforts of the Chicago Police Department in the early 1980's when as many as a quarter of a million Chicagoans a year were swept off the streets in an effort to stop gang activity. The ACLU successfully attacked those arrests in federal court.

The thousands of persons from communities of color who contacted the ACLU to complain about the "sweep arrests" of the 1980's were decent, law-abiding people whose only "crime" was to be young, a person of color, and being present in gang-infested neighborhoods.

Finally, we are particularly concerned with the potential effect of these vague provisions. Vague statutes are typically applied in a discriminatory manner, and have an overwhelmingly detrimental effect upon the poor and upon communities of color.
Because we will all be the losers if the rights guaranteed by our Constitution are eviscerated in the midst of combating crime, we oppose the proposed amendment and recommend its complete rejection by the Commission.

**Carjacking: Amendment 26**

Towards the end of the 102nd Congress, Congress approved a bill making armed carjacking a federal crime punishable by up to 15 years in prison or a life sentence if death occurs. Although vehicular theft is a serious problem, prior to the death of Maryland resident Pam Basu, carjacking was not a federal crime. After her death, however, a full scale assault on carjacking became a national priority. Carjacking, however, is simply a new name for an old crime -- robbery. Carjacking represents a tiny percentage of either auto theft or armed robbery, the two crime categories that most police departments issue it under. It is much more frequent in cities than in suburbs. A few notorious cases have occurred in the suburbs, however, and motorists died, and suddenly an old crime became a national priority with a new federal law.

Billy Davis, spokesperson for the Chicago Police Department stated, "We don't even like to say carjacking... it's robbery and its been going on for a long time. There's a lot of hype going on right now." _New York Times_, 12-9-92, "Carjacking: New Name for Old Crime." Deputy Inspector Charles DeRienzo of the New York City Police Department's Auto Crime Division agreed: "It's a crime that has been happening for many many years. But carjacking is a name that just rolls off the tongue and sounds good." _Id._
In most states, penalties of up to 10, 20 and more years of imprisonment often apply to crimes of armed robbery or armed assault. Pursuant to the sentencing guidelines, robbery has a base offense level of 20; i.e. from 33 - 87 months. If a firearm was discharged, a seven level increase is mandated, i.e. 70 - 162 months, with other level increases dependent upon the specific offense characteristics. In conclusion, carjacking is nothing more than robbery, armed or otherwise, and sufficient penalties exist for such crimes.

Conclusion

We request that this Commission adopt those amendments which seek to eliminate distinctions which undermine concepts of due process and equal protection and reject those amendments which abridge fundamental constitutional rights. We implore the Commission to perform its task of revising guidelines to recognize that the "war" on drugs and crime need not be a "war" on the Bill of Rights.

We thank the Commission for this opportunity to comment.
VIA FEDERAL EXPRESS

March 17, 1993

Ms. Teri Goldstein
United States Sentencing Commission
Suite 3-500
One Columbus Circle N.E.
Washington, D.C. 20002

Dear Ms. Goldstein:

My name is Michael Stepanian. I have practiced criminal law in San Francisco since 1966. The majority of my cases are in federal court in California and other United States District Courts around the country.

I am a past-president of the Criminal Trial Lawyers Association of Northern California, previously a member of the Board of Directors of California Attorneys for Criminal Justice, have been Chairman of the Board of the Haight Ashbury Free Clinics for 15 years, am on the Advisory Board of the Drug Policy Foundation, and am a member of the Criminal Justice Act Panel in the Northern District of California.

I have been married for 20 years, and have two children.
My remarks to your Commission will focus specifically on the attached material, which was prepared with the guidance of Lois Franco, Criminal Justice Consultant. I will speak generally to the Commission about my practical experiences concerning the application of the guidelines in the day-to-day practice in our federal courts.

Sincerely,

[Signature]
Re: COMMENTS ON SELECTED PARAGRAPHS FROM THE PROPOSED CHANGES TO THE SENTENCING GUIDELINES

Amendment Number 10 - Drug Trafficking (2D1.1): Resolves split among circuits by providing that term "mixture or substance" does not include uningestible, unmarketable portions of drug mixture.

The use of the uningestible or unmarketable portions of drug mixtures has concerned never resulted in guidelines calculations which have seemed just or fair. The Synopsis of the amendment seems to address the rationale for the recommended modification adequately. The severity of old law cases was determined by use of a combination of purity of the substance as determined by DEA or other lab reports, and for illicit drugs other than opiates, cocaine and marijuana, the number of dosage units which would result from that "100% equivalency" amount. While the quantity of substance which officially was considered to be the equivalent of a "dosage unit" often was different than what was commonly considered to be a "dosage unit" by the end users, there was at least some factual basis and proportionality to the severity categories. In this old calculation, the unusable or uningestible quantities were not to be used.

Probation Officers were to reflect their calculations in the sentencing reports, or lab reports were to be referred to as the factual basis for the determination of the quantity of drug involved. The present, and hopefully soon to be amended, guideline leaves too much room for unwarranted disparity, and for the imposition of sentences which too often seem to over-reach what the true severity of the offense is. The amendment proposed would seem to minimize the obvious problems with the present guideline.

I also would, for the same reasons, strongly endorse the adoption of the changes proposed in Amendments 49 and 50, as proposed by the Legislative Subcommittee of the Federal Defenders. Although the present guidelines/ Application Note 11 states that "for controlled substances marked with an asterisk, the weight per unit shown is the weight of the actual controlled substance, and not generally the weight of the mixture or substance containing the controlled substance. . . ." (emphasis added), the proposed Amendment 56—would make clear that the medium or mixture substance is not to be used.
Amendment 12 - Drug Trafficking (2D1.1): clarifies quantity of controlled substances to be considered when amount is under negotiation: I would strongly endorse the modification proposed. The "puffery" involved in drug transactions to gain the attention of the buyer is a common phenomenon and unnecessarily skews the levels of sanctions upward when the defendant never intended or was not capable of producing the amounts discussed. Where there is evidence and the Court makes findings that the defendant was incapable of or otherwise did not intend to produce the quantity discussed during negotiations, it is only reasonable, and again, just, that the only quantity of drugs which the defendant was reasonably capable of producing and/or intended to produce, comprise the scope of the offense and that the offense conduct be rated as such.

This is related also to ..... 

Amendment 13 - Drug Trafficking (2D1.1): an issue for comment addressing the calculation of the weight under negotiation in reverse sting operations: The "puffery" on both sides in these situations is legend. While one would wonder why defendants being offered something that is "too good to be true" in terms of costs for illicit substances being offered don't get smart, the reverse sting operations continue to be wildly successful. It has long been obvious that in these operations, the agents involved are very aware of what the "threshold" quantities are, and ever urge their target to buy in to larger quantities than what often was initially intended by the target (soon to be defendant). It also is not uncommon for the "deal" to result in agreements that, because the target wasn't prepared to provide larger amounts of money for the larger quantities of drugs, a staggered distribution and payment plan is "agreed" upon, to "help" the target out.

I would suggest that a reasonably equitable way to address what amounts to be a disparate handling of these cases could be to either 1) rate the offense on the basis of the amount of substance that the defendant intended to purchase when the contact was initially made, or 2) to rate the offense on the basis of how much of the substance would have been purchased, using the "going rate" as compared to the artificially low rate, for the substance in question. That would reduce the motivation for the DEA or other agents to push quantities beyond what the target intended, or would at least equalize the handling of the offender once caught. Games probably would result from this approach as well, but at least there would be some opportunity for the offense to be rated more similarly to what the rating would have been, based on the offender's intent.

Amendment 56 - Retroactivity of Amended Guideline Range (1B1.11) - adds Acceptance of Responsibility amendment to list of potential retroactive application;
also revises policy statement to allow court to reduce a sentence for amendments not on the list if consistent with the purposes of sentencing: What a wonderfully logical proposal. With all the guideline changes, not very many reduce the level of sanctions that have been imposed under previous guidelines. Where it is "consistent with the purposes of sentencing" the courts should have the prerogative and authority to take action to modify sentences which have been favorably affected by the subsequent changes. There would be precious few of these, and would serve to promote a feeling that the system is responsive in a favorable manner, rather than only adversely.
TESTIMONY ON PROPOSED AMENDMENTS TO 
§§ 2S1.1 THROUGH 2S1.4 OF THE 
SENTENCING GUIDELINES

DAVID O. STEWART
ROPES & GRAY
Washington, D.C.

Before the United States Sentencing Commission
March 22, 1993

The proposed amendments to the guidelines for money laundering offenses announce the critical principle of "tying base offense levels more closely to the underlying conduct that was the source of the illegal proceeds." 57 Fed. Reg. 62832, 62839 (Dec. 31, 1992). This principle would correct a major distortion in sentencing under current guidelines for money laundering, which can readily be manipulated by prosecutors to achieve sharply different sentences for similarly-situated defendants. The manipulation involves adding money laundering charges under 18 U.S.C. §§ 1956 and 1957 to cases that do not fit any reasonable definition of money laundering. This is reflected in money laundering convictions based on (i) garden-variety fraud allegations, United States v. Lovett, 964 F.2d 1029 (10th Cir.), cert. denied, 113 S.Ct. 169 (1992), United States v. Johnson, 971 F.2d 562 (10th Cir. 1992), (ii) bankruptcy fraud, United States v. Levine, 970 F.2d 681 (10th Cir. 1992), (iii) bank fraud, United States v. Kelley, 929 F.2d 582 (10th Cir. 1992), cert. denied, 112 S.Ct. 341 (1991); United States v. Hollis, 971 F.2d 1441 (10th Cir. 1992), petition for cert. filed (Dec. 30, 1992), (iv) pension fraud, United States v. Cusumano, 943 F.2d 305 (3rd
As prosecutors candidly admit, money laundering charges are added to such cases solely because the current guidelines establish dramatically higher sentences for money laundering counts than for related fraud charges. The Money Laundering Working Group of this Commission confirmed this pattern in a recent study. In a sample of 24 non-drug cases with additional money laundering charges, 23 defendants faced sharply higher sentences because money laundering counts were included:

<table>
<thead>
<tr>
<th>Increased Guideline Levels Due to Money Laundering Count</th>
<th>No. of Cases</th>
</tr>
</thead>
<tbody>
<tr>
<td>+ 21 levels</td>
<td>1</td>

<td>2</td>
</tr>
</tbody>
</table>
In this sample, the money laundering charges created an average increase of 9 offense levels for sentencing. In most cases, that means that at least two additional years in prison. Whether the defendant faces that additional prison time now turns largely on the prosecutor's discretion to add money laundering counts to other, substantive charges.

The proposed amendment to § 2S1.1 recognizes this inappropriate distortion of the guidelines and begins to address it. This is an important step to reduce unjustified disparity in punishment and unintended prosecutorial power over investigative targets. Although the proposed amendment correctly diagnoses the problem, however, its solution needs more work. In particular, the Commission should reconsider the use of the fraud tables of § 2F1.1 to set money laundering sentences.

Under the proposed amendment to § 2S1.1, most money laundering sentences would be calculated based on the offense levels specified in the fraud table in § 2F1.1, plus 12 offense levels for a drug-related offense and 8 offense levels for non-drug-related offenses. The base offense level from the fraud table is based on the "value of the funds" involved in the offense.

As a practical matter, this amendment will preserve the current distortion in sentencing and prosecution in non-drug
cases. (Because guideline levels are so high in drug cases, there is no significant disparity for drug cases under proposed § 2S1.1.) The Money Laundering Working Group found that in non-drug cases, a money laundering count would increase offense levels by an average of 9 offense levels; the proposed amendment would institutionalize a differential of at least 8 offense levels between fraud and money laundering sentences. Indeed, that differential can be 10 or 12 offense levels if sentence enhancements apply for "special offense characteristics" under the proposed § 2S1.1(b). The differential often will be even larger, though, because of the distinction between "loss" under the fraud guidelines and "value of funds" under the money laundering guidelines.

For example, a scheme to overcharge the federal Medicare program may involve receipt of payments totalling $750,000, of which only $100,000 represents actual overcharges. Under the fraud guideline, the "loss" to the victim (the Medicare program) is $100,000, or offense level 6 before enhancement. But under § 2S1.1 the "value of funds" involved in the money laundering offense will be $750,000, or a level 10 when measured by the fraud table, plus the 8-level increase under § 2S1.1(a)(3), plus "specific-offense characteristic enhancements" of up to four offense levels. The gulf between the offense level for the underlying fraud (6 plus enhancements) and that for the money laundering charge (from 18 to 22) is both huge and contrary to
the Commission's professed goal of "tying base offense levels more closely to the underlying conduct that was the source of the illegal proceeds."

Under the proposed amendments, the continuing disparity between money laundering sentences and those for non-drug underlying offenses flows from the ill-advised reliance on the fraud table for determining money laundering sentences. The courts have stressed the error of equating money laundering with theft or fraud for sentencing purposes. In United States v. Johnson, supra, the Tenth Circuit declined to group money laundering and fraud offenses because the former concern "the value of funds" while the latter concern "loss." (971 F.2d at 576).

Although both offense levels are determined from a calculation involving an amount of money, the harm being measured by each is significantly different in character. "Loss" is used throughout the guidelines as a measure of the net harm resulting from theft and property crimes. . . . In any given case, the "loss" may or may not be the same as the total amount of funds involved in the fraudulent scheme. See U.S.S.G. § 2F1.1 comment (n. 7-10). A determination of loss requires an assessment of the impact of the fraud on the individual victims. Section 2S1.1, on the other hand, is not based on the amount of the loss. It is based on the value of the funds involved in the laundering transaction. The harm from such a transaction does not generally fall upon an individual but falls upon society in general. Thus, the measure of harm under § 2S1.1 is the total amount of funds involved.
For the reasons identified by the Johnson court, the fraud table is not appropriate for determining money laundering sentences. To the extent the fraud table is based on the concept of loss, it simply does not fit the value-of-funds measure for money laundering. Cf. United States v. Kopp, 951 F.2d 521, 535 (3d Cir. 1991) ("loss" under theft guidelines differs from fraud "loss" under § 2F1.1).

The Commission also should address specifically the disparity problem in government "sting" cases, in which government agents represent that funds are the product of specific illegal activity. For defendants in sting cases, the money laundering guidelines should tie the sentence to the underlying offense described by the government agents.

In order to achieve its stated goal of tying money laundering sentences more closely to the sentences for the underlying offenses, § 2S1.1 should be revised in three respects. First, the sentence for non-drug offenses should not exceed the sentence for the underlying offense; that change will eliminate the current powerful incentive for prosecutors to add, or threaten to add, money laundering charges to non-drug, white-collar cases. Second, the previous table for § 2S1.1 should be reviewed or revised to avoid the further disparity caused by using the fraud tables under §§ 2S1.1(a) and 2S1.1(a). Third, the guidelines should provide that the money laundering sentence
in sting cases shall not exceed the sentence for the crimes that supposedly generated the funds at issue.
U.S. SENTENCING COMMISSION
HEARINGS ON SENTENCING GUIDELINES

TESTIMONY OF CHARLES H. MORLEY
ON
MONEY LAUNDERING GUIDELINES

March 22, 1993

Introduction

I am here today to offer my comments with respect to the Sentencing Commission's consideration of the sentencing guidelines for money laundering and currency reporting offenses. As the Commissioners can see from my attached Curriculum Vitae (Attachment 1), I have been working with these issues since at least 1979.

For the last seven and one half years I have been in private practice as a consultant to attorneys, law enforcement officials, prosecutors, and foreign governments on the subjects of money laundering, financial investigative techniques, and currency reporting laws. I am an associate member of the American Bar Association, and I am active in the Money Laundering Subcommittee of the ABA's White Collar Crime Committee (Criminal Justice Section).

In late 1992, the co-chairs of the Money Laundering Subcommittee asked me to join the Sentencing Guidelines Working Group. As a member of the working group, I drafted several monographs which explained the types of activities that are common to money laundering (Attachment 2). I also drafted my suggestions for revising the guidelines (Attachment 2). The Commission staff considered these monographs and suggestions in their deliberations of the money laundering portion of the guidelines revision.

I appear today before the Commission in my capacity as an expert on the subjects of money laundering and the currency reporting laws and regulations. I urge the Commission to approve the proposed revised guidelines 2S1.1 and 2S1.2 intact. In the words of the staff report, the revised guidelines establish offense characteristics which reflect "greater sensitivity to such factors as sophistication of the money laundering conduct." I believe the proposed guidelines do an excellent job of accomplishing this important revision. On the other hand, I believe the Commission should consider lowering the offense levels for the currency reporting guidelines (2S1.3 and 2S1.4) to level 6 to bring them in conformity with proposed guideline 2S1.2. I believe level 6 would more realistically reflect the seriousness of these offenses.
US Sentencing Commission
Hearing on Guidelines

Testimony
of
Charles H. Morley
The Scope of the Problem

I would like to commend the Commission's staff for their excellent work. They thoroughly researched the sentencing practices under the statutes, and solicited a wide range of sources for information, assistance, and opinions.

The Sentencing Commission had specific expectations when they adopted U.S.S.G. 2S1.1

"The Commission expected that U.S.S.G. 2S1.1 would be applied in cases in which financial transactions 'encouraged or facilitated the commission of further crimes,' and to offenses that were 'intended to...conceal the nature of the proceeds or avoid a transaction reporting requirement.'"

"Thus, it appears that the base offense levels in 2S1.1 may reflect a view that 18 U.S.C. 1956 would generally be applied primarily to 'traditional,' and perhaps large-scale, professional money launderers."

However, the staff found that prosecutors have stretched the guidelines far beyond the Commission's expectations.

"The statutory phrase 'to promote the carrying on of specified unlawful activity' has not been limited to offenses in which the defendant 'encouraged' or 'facilitated' the commission of further crimes, as the Commission indicated in commentary that it expected."

"Offenses that technically qualify as 'money laundering' are frequently simply incidental to, or component parts of, an underlying crime..."

This prosecutorial over-reaching of the Commission's intentions has creating widespread anomalous charging and sentencing practices.

"Despite the fact that this 'money laundering' conduct may reflect little additional harm to society beyond that reflected in the underlying offense, practitioners assert that, due to the operation of the guidelines, when a money laundering count is charged the sentence can be significantly higher than it would have been if the underlying offense were charged alone."

The staff report provides ample evidence that this has indeed been the case.
The government has prosecuted "incidental" conduct under 18 U.S.C. 1956 using the theory that such incidental conduct encourages or facilitates the commission of further crimes. Take for example corporate officers White and Black, both of whom are bribing foreign officials in order to secure lucrative contracts. White illegally takes funds from his corporation by wiring funds to his own bank account. He does not attempt to otherwise conceal the funds. He then uses the funds to make the bribe payments.

Black on the other hand sets up a number of sham foreign corporations in various offshore secrecy haven countries. He funnels payments through this intricate web in such a way as to make the disbursements appear legitimate to the company and its auditors. He later converts the payments to cash which he then passes under the table to the foreign officials.

Here we have two corporate officers engaged in the same two predicate offenses to the money laundering statutes: wire fraud and violations of the Foreign Corrupt Practices Act. White, admittedly not too bright, has simply misappropriated corporate funds to make the payments. Black on the other hand has constructed a complicated web of offshore transactions that may never be discovered. Yet under the current guidelines, both White and Black could receive the same sentence for their money laundering activities. The guidelines consider White's "incidental" laundering of the funds (his wiring them to his own bank account), as serious as Black's highly sophisticated, and nearly impenetrable laundering network.

As the staff so aptly put it in their report, "this kind of outcome...conflicts with just punishment principles and gives undue weight to charging decisions."

**Concealment**

**The Key Element of Money Laundering**

I believe the root of the problem arises from the conflict between the guidelines and the universally accepted definition of money laundering. Money laundering is the attempt to hide the source or ownership of money. Concealment is an integral part of the money laundering process.

The laundering of currency (the most common type of laundering found today) is a three step process: placement, layering, and integration.

**Placement** occurs when currency is "placed" into a financial institution.
Layering is the process of moving the placed funds among many financial institutions, often in the names of various companies and often in different countries.

Integration is the process of returning the funds to "legitimate" use in such a manner that they appear to be from legal sources.

Concealment is an integral part of each of these steps, and is the ultimate goal of the entire process. Yet as the staff's report and the above example indicate, the current guidelines do not necessarily take concealment into account.

The staff report shows that in almost 40% of the cases surveyed, the defendant charged with money laundering had not taken any steps to conceal or disguise the proceeds of criminal conduct. Of the 60% that, as the staff states, "...could be said to meet the test of 'traditional' money laundering activity," only one third engaged in "any meaningful degree of complexity or sophistication." According to the staff, "the Commission's selection of relatively high alternative base offense levels (20 and 23) was presumably based on the general conclusion that 18 U.S.C.1956 would apply to relatively serious offenses." Yet only 20% of the cases brought under the current guidelines actually involve these types of offenses.

Unfortunately, the government's ability to prosecute this "incidental" activity as laundering has resulted in a dramatic skewing of sentences.

The report shows that a similar sentencing disparity has arisen from the guidelines for currency reporting violations. This is particularly evident in the guidelines for structuring currency transactions. According to the report, 68% of the persons sentenced for structuring neither knew nor believed they were dealing with criminally derived funds. Yet under the guidelines, these defendants could receive the same sentence as a person recruited as a so-called Smurf for a major laundering organization.

The courts have recognized this disparity, as they have granted downward departures in 24.1% of the monetary reporting cases surveyed.

Take the Guidelines Out of the Driver's Seat

The Commission staff unequivocally states that the sentencing disparity created by the current guidelines "...conflicts with just punishment principles and gives undue weight to charging decisions." I agree.
Some would argue that the revised guidelines take the punishment out of money laundering offenses. This simply is not true. The proposed guidelines punish both "incidental" laundering and laundering under 18 U.S.C. 1957. Thus the proposed guidelines would still punish laundering that does not involve, in the staff's words, "traditional laundering activities." However the punishment for this less serious laundering would be more directly linked to the punishment for the underlying offense. The proposed guidelines reserve enhancement for those who actively conceal transactions, who engage in sophisticated laundering activities, and for those who launder the proceeds of illegal drug transactions.

There is a key distinction between the current guidelines and proposed guideline 2S1.1. The facts show that the current guidelines punish "incidental" conduct with the same severity as they punish sophisticated laundering. Proposed guideline 2S1.1 assures that the offense levels match the seriousness of the conduct. The proposed guideline provides the criminal justice system with a far more realistic result.

In a similar vein, the proposed guidelines take a much more realistic approach to structuring. Defendants who structure transactions with the intent to evade the reporting requirements are still punished, even if they do not know or believe they are using funds derived from unlawful activity. Proposed guideline 2S1.2 enhances the sentence for those who act with reckless disregard as to the source of the funds. They enhance the sentence further for those who know or believe the funds are proceeds of unlawful activity. These distinctions that give rise to sentence enhancement are a much more realistic approach to matching the punishment to the seriousness of the offense.

Unfortunately, I do not believe proposed guideline 2S1.3 achieves the same result. I believe a base offense level of 6 for 2S1.3 and 2S1.4 is a much more realistic approach to these violations. As with structuring violations, defendants who intend to evade these requirements are still punished. Those who do so with the belief or knowledge that the funds are derived from unlawful activity would receive enhanced sentences.

Unfortunately the current guidelines have made it very attractive for prosecutors to charge these offenses in order to elicit greater sentences for incidental conduct, non-willful conduct, or conduct by a defendant who does not know or believe he/she is dealing with proceeds of unlawful activity.

As the staff has correctly concluded, the punishment dictated by the current guidelines exert an undue influence over prosecutors' charging decisions.
A Classless Approach to Sentencing

The staff report indicates that a class distinction has arisen under the current guidelines. The staff found that about 70% of all cases involving laundering counts involve drug money. Yet in some cases, the government charged money laundering rather than drug offenses in order to reach a lower guideline sentence. The money laundering offense level was higher than the underlying conduct in only 52.5% of the drug cases.

This contrasts sharply with the 25% of cases classified as non-drug cases. In these cases, the money laundering offense level was higher than the underlying conduct in 96% of the cases. In both types of cases, the disparities ranged from minor to very large. In one case the money laundering guideline was 21 levels above that of the underlying offense. Other evidence already cited indicates these disparities may have more to do with the type of underlying offense rather than seriousness or sophistication of the laundering conduct. Prosecutors have charged drug defendants with money laundering to reduce their potential sentences. On the other hand they have used money laundering counts to increase the potential sentence faced by non-drug defendants.

The proposed guidelines make no such class distinction. Sentencing is a function of the laundering conduct, not the nature of the underlying offense.

I recently heard the argument that the proposed guidelines are an attempt to lessen the penalties faced by white collar defendants. From my perspective I can say this is categorically untrue. At the time I offered my suggestions to the Commission staff, I was unaware that they had prepared a report. I was also unaware of the degree to which existing cases reflected such disparities in sentencing. I based my recommendations solely upon my belief that the Commission could modify the guidelines to reflect more realistically the various degrees of sophistication in money laundering. As I stated early in this paper, I believe the proposed guidelines achieve that objective.

I have also heard the argument that these revisions are premature, that we should give the Justice Department's new money laundering policies time to work. But the Justice Department policies do not address the fact that the sentencing guidelines do not match the severity of the laundering or currency reporting violation. I therefore fail to see how waiting for the effect of these policies will make any difference as to the disparities and inequities present in the existing sentencing guidelines. While I applaud the Department's new policies as being long overdue, they do not address the problem at issue here.
Conclusion

I view money laundering in the abstract, whether the laundering involves drug proceeds, the fruits of wire fraud, or structuring currency transactions to evade the currency reporting requirements. I believe proposed guidelines 2S1.1 and 2S1.2 correctly and fairly match the severity of penalties to the seriousness of the laundering activity, without regard to who does the laundering. These proposed guidelines correctly link the penalties to the underlying offense, but provide for incremental enhancements where appropriate.

Sections 2S1.3 and 2S1.4 should achieve the same result. I therefore urge the Commission to amend these guidelines and provide for a base offense level of 6, with appropriate enhancement language for those who believed or knew the funds involved were proceeds of unlawful activity.

By adopting the revised money laundering and structuring guidelines and making appropriate adjustments to the currency reporting guidelines, we will achieve the goals of Congress and the Commission: To severely punish those who would engage in sophisticated laundering activities, or the laundering of drug proceeds. To continue under the current money laundering sentencing guidelines is to ignore the realities of money laundering while continuing to mete out disproportionate and unfair sentences to both drug and non-drug defendants.

FINANCIAL INVESTIGATIONS, CONSULTING, AND TRAINING

Sampling of cases

Investigations include: Bank Secrecy Act civil and criminal investigations; re-insurance fraud against major insurer; money laundering investigations; criminal tax cases; limited partnership fraud; Medicaid fraud risk assessment; commercial fraud; locating hidden or laundered assets; civil & criminal forfeiture cases; and bank fraud.

Complete data base management and spreadsheet analysis of financial data

GOVERNMENT CONSULTING

Central Intelligence Agency/Gama Corporation (1990)

Participated in a strategic analysis session dealing with the current and future programs in international drug money interdiction. The 29 participants were drawn from senior levels of government and the banking industry.

U.S. Information Agency/State Department, International Narcotics Matters (1990-91)

Retained as a consultant with U.S.I.A./State Department to advise senior foreign government officials and private sector leaders on issues involving narcotics money laundering.

Countries Visited: Venezuela, The Bahamas, Costa Rica, Colombia, Ecuador, Paraguay, Brazil, and Argentina.

Government Officials Briefed Included: Presidential, Legislative and Judicial Commissions; Legislators; Supreme Court Justices and staffs; Attorneys General and prosecutors; senior federal and regional law enforcement officials; Central Bank Directors and staffs; bank examination staffs; and senior military officials.

Private Sector Briefings Included: Senior bank executives; bank security officers; banking associations; industry leaders; and trade associations.

Broadcast World-Net program on money laundering to Latin America and Nigeria.

MEMORANDUM

To: The Money Laundering Subcommittee
From: Chuck Morley
Subject: Sentencing Guidelines for Money Laundering

In my second memorandum on sentencing guidelines, I refined my initial notes on money laundering and grouped the various offense characteristics under three headings: placement, layering, and integration. I have now further reduced these elements of money laundering and have put them into a hierarchy. The result is the following broad offense characteristics.

Note that these are not separated by placement, layering, and integration, but take these laundering steps into account. Note also that using an alias, presenting false information, or making false statements, only increase the levels for transactions involved in the layering or integration phase of money laundering. I think to make this work, we will need a short paragraph giving the agreed upon definition of placement, layering, and integration. That paragraph will save us the trouble of trying to use more words in the explanation of the characteristics themselves.

In my first memorandum of September 30, I recommend the base offense level for 2Sl.1 and 2Sl.2 be the same base offense level as the predicate offenses proven to sustain the section 1956 or 1957 offense. Section 2Sl.1(b)(1), 2Sl.2(b)(1)(A) & (B) remain the same as they now are. Sections 2Sl.1(b)(2) and 2Sl.2(b)(2) remain the same, but I recommend the value of the funds increase be capped for increases resulting from government sting or reverse sting operations. A new section is added under the Specific Offense Characteristics for both 2Sl.1 and 2Sl.2. The wording of the new section reflects the specific offense characteristics detailed below.

I have ranked the various characteristics below, but query whether or not these characteristics should be given specific levels (ie., 20, 23, etc), independent of the level assigned to the underlying offense. What we are saying is without the characteristics below, money laundering carries the same penalties as the underlying offense. This presumably would give rise to concurrent sentences (?). But once the defendant undertakes overt
laundering, a separate crime with separate guidelines has taken place, and separate sentencing is indicated.

As of the hour of this fax, I have not completed my work on 2Sl.3 and 2Sl.4. I hope to have that completed by later today.

SPECIFIC OFFENSE CHARACTERISTICS

1. If the defendant conducted, attempted to conduct, or assisted in conducting a transaction through a straw party, a front company, or by concealing transactions in one or more legitimate businesses, increase by 2 levels.
   a. If the transaction is an attempt to layer or integrate the funds, or if as part of layering or integrating, an alias is used, increase by 3 levels.

2. If the defendant prepared or presented, attempted to present, or assisted in preparing or presenting altered, false or fraudulent documents with the intent of disguising the true source or ownership of funds, increase by 2 levels.
   a. If the transaction is an attempt to layer or integrate the funds, or if as part of layering or integrating, false information is supplied or false statements are made, increase by 3 levels.

3. If the defendant placed funds into, or moved funds through a company or financial institution outside the United States, increase by 3 levels.

   - C H M -
MEMORANDUM

To: The Money Laundering Subcommittee
From: Chuck Morley
Subject: Sentencing Guidelines for Money Laundering

I am further refining my initial thoughts on the money laundering sentencing guidelines in accordance with our committee members' telephone conference call today.

The universally agreed upon definition of money laundering involves three steps: placement, layering, and integration. I have therefore attempted to group the offense characteristics detailed in my 9/30/92 memorandum under each of these three laundering steps.

I. PLACEMENT

A. Conducting currency transactions involving the proceeds of SUA in such a way as to evade the currency reporting/record keeping thresholds.

Examples

1. Structuring currency transactions involving the proceeds of SUA with the intent to evade the currency reporting/record keeping requirements;

Examples

a. Depositing the currency proceeds of SUA in amounts of $10,000 or less into a financial institution.

b. Using cadres of third parties to structure currency transactions involving the proceeds of SUA, or allowing oneself to be so used.

c. Purchasing multiple monetary instruments for oneself or another with less than $3,000 of currency proceeds of SUA for the purpose of evading the currency record keeping requirements.
Memo to the Money Laundering Subcommittee
Sentencing Guidelines for Money Laundering
October 14, 1992
C.H. Morley

d. Transporting currency proceeds of SUA across U.S. borders in amounts of $10,000 or less for oneself or another for the purpose of evading the CMIR filing requirements.

e. Breaking up large blocks of currency proceeds of SUA into smaller amounts for oneself or another for the purpose of keeping any other type of currency transaction under the currency reporting/record keeping thresholds.

2. Presenting false information or making false statements in order to cause a false currency report to be filed or a false currency record to be made with respect to proceeds of SUA.

*Examples*

a. Using a false drivers license.

b. Using a false passport or alien identification card.

c. Using a false credit card.

d. Giving a false name.

e. Using a false address.

f. Using a false telephone number.

g. Giving false identification numbers.

h. A person giving false information to a third party who is to make a currency transaction on behalf of the person.

i. A person intentionally keeping a transaction secret from third parties who, in the normal course of events, would have knowledge of the transaction.

j. A third party providing false documents to be used to cause a false currency report/record to be made.
Memo to the Money Laundering Subcommittee
Sentencing Guidelines for Money Laundering
October 14, 1992
C.H. Morley

3. Presenting false information in order to obtain an exemption from a bank with respect to the proceeds of SUA.

Examples

a. Making false statements or presenting false documentation to a bank in order to obtain an exemption.

b. Bribing or offering other illegal inducement to a banker in order to obtain an exemption.

c. A third party making false statements as part of a "cover story."

4. Bank, non-bank financial institution, or non-financial institution business employees, business employees, or others knowingly assisting in the placement of the proceeds of SUA.

Examples

a. Holding the currency proceeds of SUA back and feeding it into accounts/purchases in amounts under the currency reporting/record keeping thresholds.

b. A Casa de Cambio recording a single large transaction with one party as multiple small transactions conducted in the names of fictitious parties.

c. Preparing CTRs/8300s on a customer’s transactions involving the proceeds of SUA, but willfully failing to file them.

d. Filing false CTRs/8300s with respect to a customer’s transactions involving the proceeds of SUA.

e. Not filing CTRs/8300s on a customer's transactions involving the proceeds of SUA.

f. Preparing fraudulent bank exempt list information or documentation on behalf of a customer.
Memo to the Money Laundering Subcommittee
Sentencing Guidelines for Money Laundering
October 14, 1992
C.H. Morley

5. Conducting a currency transaction involving the proceeds of SUA in the name of an alias, a straw party, a front business, or through a legitimate business for the purpose of having a false currency report filed or a false currency record made.

Examples

a. A Casa de Cambio deposits a customer’s currency proceeds of SUA into the Casa’s bank account to make it appear that the currency belongs to the Casa rather than the Casa’s customer.

b. A trafficker has an associate buy a luxury automobile with the proceeds of SUA in the name of the associate in order that the trafficker’s name will not appear on the form 8300.

c. A customer presents false identification in order that a currency report/record filed with respect to the proceeds of SUA will contain false information.

d. A person allows his/her name to be used in a currency transaction involving the proceeds of SUA, knowing the result will be a false currency report/record being made.
Memo to the Money Laundering Subcommittee
Sentencing Guidelines for Money Laundering
October 14, 1992
C.H. Morley

e. An attorney allows a client to place the proceeds of SUA into his/her escrow or other accounts to make it appear that the currency belongs to the attorney, rather than to the client.

f. A person forms a front cash business in order to disguise the true source of currency deposits from SUA.

g. A person co-mingles proceeds of SUA with legitimate revenues of a legitimate business in order to hide the true source of the dirty money.

h. In U.S. vs Sharir, a jeweler shipped over $100 million in currency to a third party jewelry company in order to "buy" gold bullion to be used in the manufacture of gold rope. Sharir knew the currency was proceeds from the sale of narcotics and the purported gold purchases were in fact sham transactions designed to disguise the true nature of the currency. The bank filed CTRs on the jewelry company, not Sharir.

B. Placing the proceeds of SUA into a financial institution, business or asset in such a way as to conceal the true nature or ownership of the proceeds.

C. Using offshore bank accounts to receive the proceeds of SUA.

Examples

1. Currency proceeds of SUA illegally smuggled out of the source country is deposited into a haven bank account.

2. Funds representing the proceeds of SUA are wire transferred to an offshore bank account of an offshore shell company; the company and account having been established to receive the proceeds of SUA.
II. LAYERING

A. Conducting a transaction involving the proceeds of SUA in the name of an alias, a straw party, or a business.

*Examples*

1. Opening a bank, stock or investment account in the name of an alias and moving funds through the account to additional accounts or assets.

2. Forming a corporation, partnership, or other business entity in the name of an alias, in order to move funds through it to additional entities.

3. Obtaining identification documents or other types of documents in the name of an alias in order to facilitate creating layers between the source of funds and the disposition of the funds.

B. Knowingly using a business (whether a legitimate business or a shell company) to facilitate the laundering of the proceeds of SUA.

*Examples*

1. Establishing and using one or more businesses that have no legitimate business purpose other than to act as conduits for the proceeds of illegal activities.

2. Incorporating offshore shell corporations that have no legitimate business purpose other than to create layers of transactions to facilitate laundering of the proceeds of SUA.

3. Using offshore corporations to commit fraud.
C. Creating or using two or more controlled (directly or indirectly) business entities for the transfer of funds in such a way as to facilitate laundering of the proceeds of SUA.

*Examples*

1. Repeatedly moving funds representing the proceeds of SUA among various controlled businesses, where the evidence shows that the movement of such funds has no apparent legitimate business purpose.

2. Moving funds representing the proceeds of SUA among various controlled businesses solely in order to create multiple layers of transactions between the origin of the funds and the ultimate transactor.

D. Knowingly assisting in subverting a business (whether a legitimate business or a shell company) to facilitate laundering of the proceeds of SUA.

*Examples*

1. An attorney incorporates one or more businesses for the primary purpose of creating layers to facilitate laundering of the proceeds of SUA.

2. A bank official, stock broker, etc., sets up a series of accounts and/or transactions for a person or business for the primary purpose of creating layers of transactions to facilitate laundering of the proceeds of SUA.

3. Knowingly making false or fraudulent entries in the business records to hide the true nature of transactions involving the proceeds of SUA.

4. Knowingly preparing, presenting, or accepting false or fraudulent documents to hide the true nature of transactions involving the proceeds of SUA.

5. Knowingly altering records to hide the true nature of transactions involving the proceeds of SUA.
Memo to the Money Laundering Subcommittee
Sentencing Guidelines for Money Laundering
October 14, 1992
C.H. Morley

6. Purposefully not keeping the types of records normal for the business in order to conceal the true nature of transactions involving the proceeds of SUA.

7. Purposefully destroying records that would normally be retained under normal business circumstances in order to conceal the true nature of transactions involving the proceeds of SUA.

8. Knowingly using false, altered, counterfeit, stolen, or otherwise non-legitimate documents to conceal the true nature of transactions involving the proceeds of SUA.

Examples

a. Submitting a false credit application.

b. Submitting a false bank or stock brokerage account opening form.

c. Using a false stock, bond, certificate of deposit, or other security.

d. Submitting false tax returns.

9. Knowingly making false statements in order to conceal the true nature of transactions involving the proceeds of SUA.

III. INTEGRATION

A. Knowingly using a business (whether a legitimate business or a shell company) to facilitate laundering of the proceeds of SUA.

Examples

1. Opening a bank account, stock account, or other type of investment account in the name of a minor child, a spouse, a
spouse's maiden name, a mother's maiden name, a third party's name, etc., and conducting transactions through the account in order to avoid having any records of the transactions in the defendant's accounts.

2. Establishing and using one or more businesses that have no legitimate business purpose other than to act as resting places for the proceeds of SUA.

3. Intentionally conducting transactions involving the proceeds of SUA through an otherwise legitimate business or business account in such a manner as to disguise the proceeds or otherwise make them appear "normal".

B. Conducting a transaction in the name of an alias, a straw party, or a shell company for the purpose of concealing the illegal nature of the proceeds of SUA and making the proceeds appear legitimate.

Examples

1. Purchasing assets in the name of a third party (who may or may not be aware of the purchase) in order to hide the fact that the defendant is the true owner.

2. Allowing one's name to be used to buy an asset, knowing the purpose to be an attempt to hide the true identity of the owner of the asset.

3. An attorney allowing his/her escrow or other accounts to be used to hide the true identity of the owner of an asset.

4. Using secretly owned or controlled offshore corporations to "loan" money or otherwise "finance" the purchase or operations of U.S. based assets or businesses.

5. Using offshore corporations to provide fraudulent documentation for transactions.
C. Falsifying records to make illegal transactions appear legitimate.

Examples

1. Inflating invoices to fraudulently "document" the receipt of the proceeds of SUA.

2. Inflating purchase documents, shipping documents, etc., to fraudulently "document" the transfer of the proceeds of SUA.

3. Inflating currency receipts to fraudulently "document" the receipt of currency proceeds of SUA.

4. Submitting false or fraudulent documents to fraudulently "document" transactions involving the proceeds of SUA.

Examples

a. In Operation Polar Cap I, the defendants attempted to document the legitimacy of over $1 billion in proceeds from SUA by claiming the transactions involved the purchase and sale of gold bullion.

b. In U.S. vs Sharir, a jeweler shipped over $100 million in currency to a third party jewelry company in order to "buy" gold bullion to be used in the manufacture of gold rope. Sharir knew the currency was proceeds from the sale of narcotics and the purported gold purchases were in fact sham transactions designed to convert the proceeds of SUA into "legitimate" holdings of gold bullion.

Testimony concerning proposed U.S. Sentencing Commission Guideline Amendments for Public Comment

March 15, 1993

Submitted by: Mary K. Shilton on behalf of The International Association of Residential and Community Alternatives

Chairman Wilkins and Commissioners:

I am pleased to testify today on behalf of the International Association of Residential and Community Alternatives (IARCA). Founded in 1964, IARCA is dedicated to promoting and enhancing community-based correctional services as well as providing professional development for its members.

IARCA represents more than 250 private agencies operating over 1500 programs. It also serves over 600 individual members employed in community alternative and residential programs. They operate in conjunction with courts, departments of corrections, probation, the Federal Bureau of Prisons, counties and cities throughout the United States.

IARCA members are involved in a wide variety of programs including:
* Community Based Corrections Centers
* Educational/Vocational Services
* Drug Testing/Treatment
* Tutoring Services
* Day Treatment
* Crisis Intervention
* Family/Individual Counseling
* Victim Services
* Community Service Supervision
* Bail Supervision
* Home Detention/Electronic Monitoring
* Neighborhood Outreach
* After Care

Approximately 80% of the adult community-based corrections facilities in the United States are represented by IARCA and its members.
IARCA is pleased that the Commission has published the wide range of proposals and issues for consideration at this hearing. I will focus on proposals related to the use and development of alternative punishments because community based sanctions have not been fully developed under the Federal Guidelines. It is IARCA's position that they offer more cost-effective punishments than incarceration.

There are several steps necessary to improve correctional treatment of offenders under the Guidelines, particularly in the area of community-based alternatives. With respect to issues for comment published by the Commission, proposals 32, 33, and 52 provide a context for several of the following recommendations:

* In view of Federal budget cuts for planned prison expansion, the Guidelines should save existing prison space for serious and violent offenders, and emphasize lower cost community based alternatives for nonviolent offenders.
* Continue to document the impact of mandatory minimums and the Anti-Drug Abuse Act of 1986.
* Develop guidelines which expand both categories of eligibility and range of community based options permissible as a condition of probation or as substitution for prison.
* Permit alternative sentences to be served in lieu of imprisonment by most drug offenders, and other non-violent first time offenders.
* Work with judges to develop sentencing practices which more fully utilize presently available alternatives.
* Include a sentencing policy of presumed transitional release programs for up to twelve months prior to release from prison.
* Gather available data related to information about basic questions concerning fairness, costs, recidivism and impact on the justice system and its components.

The Commission and its staff are to be applauded for documenting the impact of Federal mandatory minimum sentences and the Anti-Drug Abuse Act of 1986.

The Commission deserves credit for its leadership in studying the impact of mandatory minimums and their erosion of the Guidelines. This is especially important due to the provisions of the Anti-Drug Abuse Act of 1986 which have created increased penalties and limited the ability of the guidelines to

---

provide fair and proportionate sentences under these statutes. The Commission should continue to highlight the high rate of incarceration for this group as it affects potential rehabilitation, fair punishment, and burden on the justice system.

During the decade of the 1980s, a confluence of factors brought about considerable changes in Federal sentencing practices. The greatest number of offenders were affected by changes in drug related sentences. The U.S. Department of Justice, Bureau of Justice Statistics profiled the impact of our Federal drug sentencing policies during the past decade. There was a 213% increase in drug related cases between 1980 and 1990. The percent change of those sentenced to prison increased 274% during the decade, but the average prison term for drug offenders increased 515% over that period.²

Although the numbers outlined above give overall patterns, little effort has been made to document the individual human costs until recently. Examples of individual cases compiled by Families Against Mandatory Minimums bring home the human impact of our drug sentencing policies.

* O. Maffett Pound is serving a 20 year sentence for conspiracy to distribute 300 pounds of marijuana as a first offense. Maffett is a 52 year old owner of a Mississippi resort who purchased marijuana for his own consumption and his friends.
* Maffett’s wife was sentenced to 5 years in prison for not turning him in although she did not use drugs. At her sentencing, the judge indicated he was forced to give her the 5 year term under the guidelines.
* Bobby Joe Ward is serving a 6 1/2 year sentence for manufacturing marijuana plants. Bobby Joe is a 60 year old retired coal miner with black lung disease who was arrested at his son’s marijuana patch.
* Charles Dunlap is a 46 year old father, who worked for the army, as a fireman and as an emergency medical technician. He rented a truck for an informant to off-load marijuana. He is serving 8 years for conspiracy to import 10 tons of marijuana.

While IARCA supports incarceration of high volume, career drug dealers, it does not support the preferred use of incarceration of most non-assaultive criminals. We must take immediate steps to treat these non-assaultive offenders differently that violent, predatory offenders.

With half of all defendants sentenced to prison in 1990 guilty of drug-related offenses, and many to mandatory terms, it is time to re-evaluate whether our sentencing laws should permit assignment of many of these offenders to community alternatives, home confinement with electronic monitoring, and halfway houses. The nation cannot afford to continue imprisoning offenders who can be punished more effectively in community programs.

The Sentencing Guidelines should adopt a capacity-based approach to sentencing to give priority for holding the most serious and violent offenders.

The United States is on the verge of a massive prison building boom through the 1990s. According to the U.S. Department of Justice, Bureau of Justice Statistics, the population in federal prisons was 65,526. The Wall Street Journal (3/12/93) reports that the Federal prison population is projected to be 133,000 by the year 2000. The number of Federal prisoners increased at a higher rate than state or local prisoners during 1990.

It costs about one twentieth of our 1992 national debt to care for prisoners in the United States. Cells cost about $110,000 to build and it costs nearly $20,000 per prisoner per year on the average.

Federal prisons are operating at 151% of their capacity although a 1991 study by the General Accounting Office found that halfway houses were 27% under-utilized by the Federal government. Unless the Guidelines are also based on an assessment of limited space and resources, we will continue to fill prisons while ignoring the availability of more effective community-based programs.

The Sentencing Guidelines have increased the length of many sentences while failing to create rehabilitative options for many offenders.

A majority of Federal offenders have not committed a violent offense, yet most receive a prison sentence. Most Federal offenders are ranked at the lowest and second lowest security levels and are not classified as dangerous. Despite these facts, many will serve prison sentences because the Guidelines increased length of terms.

In developing Guidelines and avoiding unwarranted disparity

---

4 Id.
in sentencing, the Commission has narrowed its focus to an offense and criminal history classification system. This was accomplished by creating a sentencing decision process which does not reflect other variables such as age, infirmity, culpability and capacity for change which may have been considered by the pre-guidelines sentencing judge. The tendency, in many instances, has been to apply more stringent confinement practices than are justified by the goals of rehabilitation, need for deterrence, incapacitation or demand for punishment proportionate to the offense.

Although longer sentences have not resulted in all cases under the guidelines, the pattern has been to lengthen sentences. A recent study by Gerald W. Heaney, Senior Circuit Judge, United States Court of Appeals for the Eighth Circuit concluded that some Federal prisoners are serving twice as long as they did prior to sentencing guidelines and the number of offenders receiving probation has declined dramatically. Some writers have noted the importance of prosecutorial discretion in determining the ultimate sentencing result. Because the guidelines were based on sentences which were generally shortened by parole, and parole is now no longer available, this has had a tendency to lengthen terms when coupled with mandatory minimums.

The Guidelines should set forth specific provisions to develop opportunities for intermediate sanctions and community based punishments.

The statutory purposes of the Guidelines give equal weight to the primary goals of sentencing: punishment, deterrence, incapacitation, restitution and rehabilitation, as well as elimination of unwarranted disparity. However, the legislation also indicates that when a court is considering whether to imprison and if so the length of term then it should note that "...imprisonment is not an appropriate means of promoting correction and rehabilitation."

Because the legislation does not recognize rehabilitation as a basis for imprisonment, the Guidelines should provide a range of non-incarcerative rehabilitative options for all but the most serious offenders who are imprisoned for life. To provide no rehabilitative options for large categories of offenders is to disregard effective correctional treatment as one of the four

7 See 18 U.S.C. Sec. 3582(a) (1988)
purposes of the legislation.

The Guidelines should include a non-incarcerative rehabilitative option for all non-violent first time offenders. As recommended in the Corrothers' Alternatives to Imprisonment Project Report, this can be accomplished by expanding the array of sentencing options to include: residential incarceration, intensive supervision, public service work, bootcamps, and day reporting centers as a substitute for imprisonment. Another possibility is to extend split sentence options to Zone D. In addition, transitional release programs to halfway houses should be the norm for offenders for up to 12 months prior to their release from prison.

Rehabilitation is more likely to occur in an alternative sentencing program.

There is growing evidence that rehabilitation is more likely to occur with use of halfway houses or other alternatives in lieu of confinement. According to Ralph Ardito, Jr. President, Federal Probation Officers Association. "Unlike prison, intermediate punishment programs deal with some root causes why people commit crime. They help offenders get a job and they receive treatment for their addiction and counseling for them and their families."

If appropriate offenders receive drug treatment, literacy training, and job placement in the community, they can become productive members of that community. This will enable them to support their families, build their neighborhoods and help reduce crime. Stable families with adequate economic support and opportunity for the future are the best anti-crime measures.

The National Institute of Justice reported that electronic monitoring was successful in three out of four cases. Only 11% of drug offenders granted home confinement in Florida re-offended compared to 27%. In Genessee County, Michigan 79% of offenders who completed community residential programs did not commit a new crime. Day reporting centers have reported successful completion rates as high as 80%. These are but a few of the program evaluations indicating lower rates of recidivism for community

---

9 The Challenge of Crime in a Free Society indicated community based programs are less expensive and at least as effective as incarceration according to Norval Morris and Michael Tonry, Between Prison and Probation, New York: Oxford University Press, 1990.
corrections programs.

Many judges believe that intermediate punishment programs are an effective option in lieu of prisons. In a survey of 225 federal judges a majority supported a wide array of sentencing alternatives and many indicated there were too few intermediate punishment programs available. Among the programs they identified for expansion were: community service, intensive supervision, electronic monitoring, boot camps and community treatment centers. Focused telephone interviews indicated that the most frequently mentioned program that was lacking was community treatment centers and home confinement with electronic monitoring.

Intermediate sanctions should be approached as a public private partnership. Both Federal and private agencies operate programs successfully but citizens, businesses and nonprofit groups should be engaged in the planning, implementation and delivery of services.

The Commission should further expand the guidelines to permit courts to sentence non-violent first offenders to alternatives as suggested in Issue 32.

Issue 32 suggest courts should impose sentences other than imprisonment for first offenders convicted of non-violent offenses. IARCA urges the Commission to develop and adopt an amendment as indicated by extending the option of a community sentence to all first time offenders including Zone D. There is a preference for this to be handled as an extension of Zone A rather than as a downward departure. If it were treated instead as a downward departure, it would increase the complexity of the sentencing process.

There is growing public support for the greater use of intermediate sanctions. A 1991 survey by the Wirthlin Group of 1,000 Americans indicated that four out of five support community-based corrections provided selected offenders are closely supervised, pay restitution, get a job and participate in substance abuse treatment. This is consistent with public opinion polls by the Public Agenda Foundation, Figgie International, Gallup and Harris polls which found that the public wants tough but rehabilitative programs for non-violent offenders.

Under proposed issue 52, the Guidelines would be revised to presume probation without confinement for Zone A unless there is a finding to the contrary.

IARCA supports proposed amendment 52 which would require a Zone A sentence to be probation without confinement unless the court gives reasons stated on the record that imprisonment is
necessary to serve the purposes of sentencing. There is presently a failure of judges to use probation or alternative split sentences for some offenders who would otherwise be eligible. Although there are a number of compelling reasons for declining to use non-incarcereative sentences permissible under the existing guidelines, these could be noted by the judge at sentencing.

Prison beds should be saved for violent offenders and those with a record of aggressive or dangerous behavior. With respect to non-violent first time offenders, the Guidelines should presume that punishment will be limited to probation or alternative community punishments in the absence of a finding by the sentencing judge that there is an adequate basis for a departure from this guideline. Such a presumption would be consistent with the tradition of parsimony in use of incarceration when more effective options are available.

IARCA supports an increase in the availability of the type of sentences in Zones A and B to more offense levels within all criminal history categories as proposed in 33.

Approximately 62% of all Federal offenders could be assigned to community based alternative punishments. In 1990 the Federal Bureau of Prisons reported that only 18.2% of the more than 65,500 prisoners were placed in halfway houses. Richard M. Bilby, United States District Judge, District of Arizona noted summed up the response of many judges when he noted: "We need more halfway houses because these programs keep offenders off the streets and away from those who contributed to their criminal behavior, they help offenders get a job and they mandate drug testing and treatment."

Halfway houses are most often private agencies under contract with the Bureau of Prisons. In order to adhere to the strict standards set by the Bureau of Prisons all Federal offenders are required to undergo drug testing and urinalysis, participate in substance abuse treatment, a GED or remedial education, and gain employment. Offenders are required to pay 25 percent of their gross wages for room and board and pay all court-ordered fines, costs and restitution.

There is a need for more information about individual impacts of the guidelines on offenders as well as on the entire justice system.

This Guideline decision model fails to adequately report on individual offender outcomes as well as justice system results. The Commission's publications have neglected to analyze results related to such factors as: cost for sentencing options, and whether current practices in any way limit the impact of crime on society. As a recent GAO report concluded: "At this time, neither we nor the Commission can definitively answer the central
question posed by Congress regarding how effective the sentencing guidelines have been in reducing sentencing disparity.

In order to gain an understanding of whether the guidelines have any discernable impact on reducing crime or rehabilitating offenders, the Commission must continue to work with other Federal agencies to develop a better profile of sentencing outcomes, including probation, alternative sanctions and split sentences.

The Commission should continue to work with other agencies in gathering data about costs of imprisonment and sentencing alternatives, recidivism of various sentences populations, and impact of incarceration practices on the other justice agencies. Although statistical analyses and descriptions of offender characteristics and types of sentences are widely available, this information does not adequately describe the impact of the Sentencing Guidelines on crime reduction. For example, there is very little information about the effect of widespread use of imprisonment for the nearly half of all felons who are convicted of drug crimes. By sentencing them to prison are we doing as much as we can to preclude the possibility that they will re-offend upon release?

There is little information about the average cost of incarceration as compared to probation, split sentence and community based alternatives. According to national figures, it costs about $110,000 to build a prison cell and about $19,244 to house a person in prison for a year. In contrast, some intermediate sanctions are one third the cost of incarceration. More information is needed about the cost of prison compared to alternatives where prisoners can earn a wage, pay room and board and family support.

With respect to an analysis of results, the Commission has not gained sufficient access or used data from public defenders, prosecutors, the courts and other Federal agencies to indicate the real outcomes of the Guidelines. This has failed to shed light on the real decision points in the sentencing process. It has also failed to highlight the overall results of our increased incarceration rates.

I thank the Commission for this opportunity to discuss the expansion and use of alternatives under the Guidelines. I commend the Commission for its willingness to consider these issues which are very important to system of justice. It is my belief that the Commission will not have adequately addressed the area of fairness in sentencing until all sentences short of life include

a community corrections sanction component.

**PREPARED BY NATIONAL ASSOCIATION OF CRIMINAL JUSTICE PLANNERS—WASHINGTON DC**
March 15, 1993

To the UNITED STATES SENTENCING COMMISSION GUIDE LINE HEARINGS:

We understand that it is not within the power of this Commission to change even the most unjust laws, but it is within your power to lessen the evil consequences of such laws. When a very substantial minority of the population (meaning many millions of Americans, including millions of non-users of cannabis) believe that a body of laws is unjust, then the harsh enforcement of such laws further erodes the respect for the Law in general, and alienates a large segment of the population. We believe that this is a valid point of consideration for this Commission.

The National Organization for the Reform of Marijuana Laws (NORML) is opposed to any imprisonment of persons for the possession, growing, or sale (to adults) of cannabis. We believe that the imprisonment of such persons is not only unjust, but also an absurd waste of finite resources at a time when the nation is being overwhelmed with violence. NORML wishes to point out that virtually all of the violence associated with the use of cannabis is that perpetrated by the government itself.

At the very least, we pray that the Sentencing Commission will take these points into consideration:

1. The reduction of marijuana related offenses from Level 38 to Level 25 would leave such offenses in Zone D, but would save the government huge sums and free up overcrowded prison space for violent offenders.
2. Special consideration should be given to those possessing or growing cannabis for medicinal use. The United States government should not be in the business of persecuting the sick and dying, which at present it does. Currently, there is no consideration given to the medicinal use of cannabis even though it has been recognized by the Drug Enforcement Administration's own administrative law judge as having a wide range of medical uses. This fact should be reflected in the guidelines, and judges should be encouraged to make downward departures when there is a valid medical need.
3. The basis for the sentencing levels for cultivation of cannabis is arbitrary, capricious, and at variance with well established fact. First, seedlings are given a weight of one kilo each when it highly unlikely that a full grown plant would have even one third of that weight of usable product. Second, no recognition is given to the fact that over half of all plants will be male and therefore would be destroyed by the grower.

We hope that you will do all that you can to lessen the suffering caused by these cruel and unjust laws.

Respectfully,

Richard Cowan
National Director

Senate Joint Resolution #8
Introduced by Senators Mello and Marks
March 3, 1993

Legislative Counsel's Digest

SJR No. 8 Relative to cannabis/marijuana.

SJR 8, as introduced, Mello. Controlled substances: cannabis/marijuana.
This measure would memorialize the President and the Congress of the United States to enact appropriate legislation to permit cannabis/marijuana to be prescribed by licensed physicians and to ensure a safe and affordable supply of cannabis/marijuana for medical use.

Fiscal Committee: no.

SJR #8
(Full Text)

WHEREAS, Scientific and medical studies by the National Academy of Sciences have shown Cannabis/Marijuana to be a safe and effective medicine with very low toxicity compared to most prescription drugs. It has been shown to be effective in the treatment of glaucoma, epilepsy, muscle spasticity, arthritis; the nausea, vomiting and appetite loss associated with chemotherapies anxiety and depression; and the symptoms of withdrawal from alcohol and narcotics.

WHEREAS, Studies show that one third of all cancer patients discontinue potentially life-saving chemotherapy due to the severe and debilitating side effects and the same is true for many AIDS patients receiving AZT or other similar therapies; and

WHEREAS, Most physicians surveyed said that they would prescribe Cannabis/Marijuana if legally available and one-half of all cancer of all cancer specialists surveyed said that they have already encouraged at least one of their patients to break the law and use Cannabis/Marijuana to ease the violent nausea and vomiting associated with their current treatments; and

WHEREAS, In May of 1991, the United Nations Narcotic Control Board voted overwhelmingly to reclassify Cannabis/Marijuana's active ingredient, placing it back on Schedule II and made available by prescription, and making it available by prescription, and the United States representative to this board voted in favor of rescheduling, and
WHEREAS, Despite a federal court order recognizing the "clearly established medical value" of Cannabis/Marijuana and mandating that it be reclassified to Schedule II and made available by prescription, the federal government continues to deny access to this safe and effective medicine; and

WHEREAS, By its own admission, the federal government continues to deny access to Cannabis/Marijuana for political rather than medical reasons, and are using patients as pawns in the ever-escalating war on drugs by following current policies which place message before medicine, convenience before compassion, and politics before patients; now, therefore, be it

Resolved by the Senate and Assembly of the State of California, jointly, that the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact appropriate legislation to permit cannabis/marijuana to be prescribed by a licensed physicians and to ensure a safe and affordable supply of cannabis/marijuana for medical use; and be it further

Resolved, that the Secretary of the Senate transmit copies of this resolution to the President and the Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.
HOUSE JOINT RESOLUTION 11

By: Delegate Rynd
Introduced and read first time: February 3, 1993
Assigned to: Environmental Matters

HOUSE JOINT RESOLUTION

A House Joint Resolution concerning

Marijuana – Use for Medical Purposes

FOR the purpose of urging the President and the Congress of the United States to
remedy federal policies that inhibit or prevent legal access to marijuana for
legitimate medical purposes.

WHEREAS, Scientific and medical studies show marijuana to be of medical value
in the treatment of glaucoma, in easing the debilitating side effects of anticancer
treatments, reducing muscle spasticity, and increasing appetite that is useful to those
combating the deadly AIDS virus; and

WHEREAS, The courts in several states have recognized the benefits of marijuana
in the treatment of these diseases; and

WHEREAS, Numerous states have enacted laws and sought to establish
compassionate programs of medical access to marijuana; and

WHEREAS, Individual physicians have applied to federal agencies in good faith for
permission to use marijuana in a legal and controlled therapeutic regimen; and

WHEREAS, Federal agencies have failed to meet the good faith efforts of the
states and individual physicians and have instead through regulatory ploys and obscure
bureaucratic devices resisted and obstructed the intent of state legislatures and otherwise
law-abiding citizens; and

WHEREAS, Individuals with cancer, AIDS, glaucoma, paralysis, multiple sclerosis,
and other ailments have been promised legal access to marijuana through the federal
investigative new drug (IND) process and are now denied supplies of the drug by the
Public Health Service; and

WHEREAS, These problems are not particular to Maryland but generally affect
adversely several other states and the citizens of those states; now, therefore, be it

RESOLVED BY THE GENERAL ASSEMBLY OF MARYLAND. That the
General Assembly urges the President and Congress of the United States to:

(1) become informed of these difficulties;

(2) investigate and hold public hearings into federal policies that prohibit
the legitimate use of marijuana;
HOUSE JOINT RESOLUTION 11

(3) remedy federal policies that prevent the several states from acquiring, inhibit physicians from prescribing, and prevent patients from obtaining marijuana for legitimate medical applications; and

(4) end federal prohibitions against the legitimate and appropriate use of marijuana in medical treatments; and be it further

RESOLVED, That a copy of this Resolution be forwarded by the Department of Legislative Reference to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, and to the Maryland Congressional Delegation: Senators Paul S. Sarbanes and Barbara A. Mikulski, Senate Office Building, Washington, D.C. 20510; and Representatives Wayne T. Gilchrest, Helen Delich Bentley, Benjamin L. Cardin, Albert R. Wynn, Steny Hamilton Hoyer, Roscoe G. Bartlett, Kweisi Mfume, and Constance A. Morella, House Office Building, Washington, D.C. 20515.

EXECUTIVE SUMMARY

In previous annual reports the Research Advisory Panel has used the experience acquired during its operation to be critical of the research community and to summarize other problems of drug abuse important to the State of California. In this annual report, the Panel presumes to suggest that the Legislature act to redirect this State away from the present destructive pathways of drug control.

Our "War on Drugs" for the past fifty years has been based on the principle of prohibition and has been manifestly unsuccessful in that we are now using more and a greater variety of drugs, legal and illegal. As with the "noble experiment" of the 18th Amendment, prohibition as opposed to regulation has not controlled drug use and a societal over-reaction has burdened us with ineffectual, inhumane and expensive treatment, education and enforcement efforts. These efforts at reducing the social cost of drug use fail to distinguish between drug effects and associated criminal activity and fail to recognize that different drugs pose different problems and that we do not have one massive drug problem.

The Research Advisory Panel suggests to the Legislature that whatever we have been doing in the area of drug abuse should be immediately modified. Legislation aiming at regulation and decriminalization (not "legalization") should be formulated as novel efforts that could be quickly modified if unsuccessful. The Panel suggests that this legislation be formulated following four principles. First, separately consider the different drugs involved and not consider that there is one massive drug problem; second, distinguish between the effects of drugs and the associated criminal activity; third, design the legislation being aware that these are initial efforts subject to change with experience; and fourth think of "drugs" as including alcohol and nicotine, not as being separate substances.

The first suggestions for demonstration legislation, rationalized and detailed herein are:

1. Permit the possession of syringes and needles
2. Permit the cultivation of marijuana for personal use
3. As a first step in projecting an attitude of disapproval by all citizens toward all drug use, take a token action in forbidding the sale or consumption of alcohol in state supported institutions devoted in part or whole to patient care or educational activity.

COMMENTARY

In previous annual reports the Research Advisory Panel has used the experience acquired during its operation to be critical of the research community and to summarize other problems of drug abuse important to the State of California. In this annual report, the Panel presumes to suggest that the Legislature act to redirect this State away from the present destructive pathways of drug control. The Panel suggests that this legislation be formulated following four principles. First, separately consider the different drugs involved and not consider that there is one massive drug problem; second, distinguish between the effects of drugs and the associated criminal activity; third, design the legislation being aware that these are initial efforts subject to change with experience; and fourth think of "drugs" as including alcohol and nicotine, not as being separate substances.

PANEL QUALIFICATION

The Panel presumes to make these suggestions because of the long experience of Panel members in activities relating to drug abuse, both in their role as members of the Panel and also from their comprehensive experience outside of their Panel function in areas related to the effects of drugs, the treatment of drug abuse and societal response to drug abuse.

The Panel approaches the Legislature differently from most advocates that appear before you. Such advocates have some conflict of interest, but that conflict is not always disclosed nor easily apparent to the Legislature or to the persons themselves. It is not easy or pleasant, but it is essential, to acknowledge that even peace officers and workers in the drug abuse treatment industry (not to mention simple "legalization" advocates) have an interest in maintaining and initiating

This report represents a consensus among Panel members acting as individual experts. It does not represent policies or positions of the appointing agencies nor have those agencies been consulted during its preparation.

The diversity of opinion and choice of tactics is so great that no Panel member adheres completely to every item herein. One Panel member disagrees with the commentary portion of the Annual Report on the grounds that the legislative recommendations are not within the authority of the Panel as granted by the Legislature. Two members disagree with certain legislative recommendations within the commentary. Their comments are contained in minority reports at the end of this commentary.
certain practices. With minor exceptions, members of the Panel over the past twenty-two years have had no vested interest in drug treatment programs or sources of research support. Panel members are appointed by different agencies within the State and most receive compensation from their primary employment and are relieved of any tendency to react out of self interest to suggestions for change.

After years of informed discussion and sensing a change in the attitudes of a large fraction of the population, Panel members have agreed that we are mandated as an advisory group to the Legislature to suggest that some legislation be attempted to reduce the damage to society now being imposed by drugs (always including alcohol and tobacco) and by inappropriate societal reaction to drug use.

IMMEDIATE NEEDS

**Action must occur now.** It is unnecessary to belabor the magnitude and importance of the problems of drug abuse as they are currently perceived by at least a fraction of the American public and by their elected representatives. The reaction is in part rational and justifiable, but is also colored by emotion and misunderstanding. The traditional activities by enforcement and regulatory agencies, however expanded by the long standing wars on drugs, whether directed at the individual drug user or small or large purveyor, have not been able to alter the course of the problems, of the extent of use, of individual damage or of the associated criminal activity. Even in the judgment of the enforcement agencies this traditional approach has accomplished little except possibly to increase price and encourage experimentation with alternate drugs. In spite of the sanctions imposed upon drug users, we have over the past 22-years seen massive epidemics involving high-dose intravenous methamphetamine, heroin, marijuana, hallucinogens, sniffed cocaine, synthetic narcotics, PCP, and now smoking free-base or crack-cocaine. It appears incontrovertible that whatever policies we have been following over the past generations must not be continued unexamined and unmourned since our actions to date have favored the development of massive individual and societal problems.

**Action must be innovative.** Not only should the leaders of this State act now, but they must act differently. They must adopt actions unlike those we have tested and found wanting over past generations. The responsibility for initiating change appears to us to be passing at this moment from the intellectual and scholarly community to the Legislature. There is more than an undercurrent of published discussion favoring radical change and questioning the efficacy of what, for convenience, we will call the "prohibition policy." Technical journals cited below and leading intellectual periodicals across the political spectrum have published
carefully reasoned discussions establishing that our present policies are worse than useless. "Legalization" (not our term) has even been supported by conservative leaders such as William F. Buckley and Milton Freedman.

**BASIS OF DERIVATION OF SUGGESTED LEGISLATION**

The Panel believes that a rational approach to change should be based on three concepts that neither the public nor many legislators appear to be aware of or appreciate, however clear the distinctions are to researchers and practitioners in the area of drug abuse:

1) **Differentiate different drugs and different routes of administration.** There is no basis for progress in talking about the drug problem and looking for one magic solution to the massive problem as it is perceived by the public. The approach must be based upon a separate consideration of each of the several drugs involved. The various drugs involve different toxicities and different individual and social problems. The terrible lethal effects of cigarette smoking, that is, of inhaling tobacco smoke, are familiar. Some drugs, notably alcohol, cause, as a direct pharmacological effect, criminal or anti-social activity. Other drugs, notably heroin, are much less inherently dangerous either to the individual or to society, in spite of their high addiction liability, but they generate massive problems for the criminal justice system. The statement about heroin is not controversial or arguable. The California and Federal Legislatures have acknowledged that narcotics are not inherently prohibitively dangerous and have authorized programs to provide huge doses of methadone, a strong narcotic, to heroin users in lieu of their street drug.

We must then, not be naively permissive in our attitude toward alcohol and other depressants that disinhibit and cause inappropriate reactions. And we should not react emotionally against less harmful drugs in such a way that their regulation generates more problems than would their ungoverned use.

Eventually, although certainly not at this time, regulations, that is, societal reaction, will have to take into account different routes of administration as well as different drugs and recognize, for example, that cocaine in one form may be a minor hazard, whereas smoked cocaine may be highly addictive and require a more restrictive approach.

In our judgment, a first step in rationalizing our approach would be to further isolate marijuana from the other illegal drugs. This drug is widely used as a social drug, comparable to alcohol. More than half of the population has or will have had experience with this drug. Marijuana presents the same problems of responsible and irresponsible use as alcohol. However, no change in regulation would be acceptable if it leads to another industry comparable to the alcohol and tobacco industry.
2) **Separate drug effects from associated criminal activity.** Legislators and other political leaders must look objectively at the hazards claimed to result from drug abuse and differentiate damage caused by direct drug effects from damage engendered by societal reaction. For example, the population is not actually threatened by the behavior of the heroin user under the influence of this drug. The heroin user who is "coasting" after an injection is not given to violent activity. Yet those same heroin users, driven by their compulsion, will, in their efforts to maintain a supply of this drug, resort to income generating criminal activities. These may be as minor as panhandling, may lead only to property and drug-trafficking crime or, the personality of the user permitting, result in violent crime. Above the individual user is a stratum of heroin purveyors who operate as organized criminal activity and who will, the need in their opinion requiring, resort to the most violent acts. Obviously, to burden the individual user with the onus of criminal activity carried out by people who are rarely users themselves is not to control of the problem only if the consumers are totally removed from the streets. This has not been accomplished even in the face of horrendous penalties, including briefly, in New York State under the so-called Rockefeller plan, the death penalty.

With a drug like marijuana, which enjoys popular approval in the face of legal prohibition, the associated criminal activity is regarded as nominal. And in the face of a refusal by a significant fraction of the population to support the laws against marijuana, it will be impossible to control the market in marijuana. Indeed, although the huge illegal market for imported marijuana may add significantly to our negative balance of payments, that market is not associated with drive-by killings or other devastating criminal activity.

3) **Awareness of Risk/Benefit Ratio of any Change.** Suggestions for changes in the regulation of abused drugs should realistically take into consideration the possibility that any relaxation of regulation could lead to increased use. Any change effected should be evaluated over time to ensure that it does nothing, or the minimum, to encourage drug use. The term "legalization," should never be used in describing the approach we are advocating since we are not proposing to add an unregulated drug to the market or to permit the development of an industry which proselytizes for drug use. "Decriminalization" would be a legitimate description, but there is no intent to minimize the dangers or encourage the use of any drugs, always including those already in wide and damaging use, such as alcohol and tobacco.

**A STEP-WISE APPROACH TO DECRIMINALIZATION**

The Panel does not pretend to be able to suggest an ultimate solution to the problem of drug abuse and does not suggest that an ultimate solution be sought at
this time. Instead, we suggest a phased approach based upon the above principles of differentiating drugs and their problems that would initially achieve minor change but would demonstrate to the public that the minor change involved would not be accompanied by any significant increase in use or other damage. Since the Panel does not pretend to have the ultimate solution it suggests that the outcome of such legislation be monitored closely.

Not only the traditional legislative responses, but most current proposals in the area of drug abuse legislation, are almost entirely in the direction of being increasingly more restrictive and vengeful. One can surmise this is a result of an apparent fear of being labeled "soft on drugs." Existing legislation, like prohibition itself, should be considered essentially a failure but one from which we can learn. Prohibition was characterized at the time as a "noble experiment," a judgment with which most of us would now agree. But the experiment, however, was unsuccessful and altogether less than a success when it was terminated. The intent of the 18th Amendment was beyond criticism and the effort was indeed noble, did accomplish a decrease in alcohol consumption, and could be used to justify additional experimental approaches. However, the experiment was unsuccessful in that the American public did not support enforcement and the illegal market generated an amount of associated criminal activity in the 1920's that was unacceptable to the public.

We are currently at a similar point in our history where much of the leadership and a considerable fraction of the public are coming to question whether prohibition is not equally unproductive in coping with the drug problems. Clearly, the marijuana laws are unenforceable in the face of the attitudes and practices of a significant fraction of the population.

The Panel then suggests areas in which initial steps can be taken to prevent individual tragedies and unclog our judicial system. Should any of the ideas prove less than optimal, the legislation can be modified as easily as the Volstead Act was terminated. If the changes are successful, they will serve to demonstrate to the citizenry of California that different drugs can be viewed differently, that some decriminalization may be beneficial to the general public, and that they can be developed without great or irreversible harm.

**SUGGESTED LEGISLATION**

Remove penalties for possession of needles and syringes. The statement that heroin is inherently not a dangerous drug has been somewhat weakened by the appearance in the community of the AIDS virus. This virus is transmitted, among other ways, by the use by one person of paraphernalia contaminated with the blood of an infected person. The AIDS virus has already
spread through the drug-using community to an extent that varies with the sanitary practices of the local population. The prevalence of infection is much higher, for example, in New York City than in San Francisco.

There are two suggested methods of controlling the spread of this relatively new virus. The first, demonstrably ineffective, is to adopt a moralizing attitude, continue our current practices and simply add the individual tragedy and economic burden to the community of more AIDS patients. There is no reason to conclude that the additional threat of infection with AIDS has lead to a decrease in the use of injected drugs.

The other method of controlling the spread of the AIDS virus would be to encourage sanitary practices at the time of injection by making it possible for each heroin user to use his own "outfit", that is, syringe and needle, rather than accept the risk of using one contaminated with another addict's blood. This would become permissible as well as possible if the intravenous (IV) drug user were permitted to legally possess his own syringe and needle. The idea of providing or permitting the possession of the paraphernalia is controversial being viewed by some as offensive to the public morality. This attitude appears extremely shortsighted, in that making clean outfits available will not affect the prevalence of heroin use for the simple reason that syringes and needles are not difficult to obtain at this time. It follows that current experimental programs of needle exchange will be ineffective so long as the IV drug user fears harassment or arrest for carrying paraphernalia on his person.

Heroin users understandably try to avoid carrying supplies of their drug and their injecting paraphernalia any more than is absolutely necessary since the mere possession of the substance and the equipment is a punishable, although nominal, crime. The possession of paraphernalia is defined as a misdemeanor. Even though convictions under that complex section of the code are not easy to obtain if the charge is contested, the availability of the charge becomes a convenient means of harassing the addict and of subjecting him, in effect, to a three-day jail sentence without trial. A person with a prior drug related conviction must be especially careful since in such a situation, even the possession of an ordinary spoon can be construed as possession of paraphernalia. As a result, users are reluctant to carry their own outfits and, their compulsion being upon them, are quite likely to use whatever equipment is available at the site of drug purchase. People driven by the compulsion that a heroin user feels, and given their choice between using someone else's outfit and doing without their drug will use the possibly contaminated equipment.

The Panel urges an approach that would acknowledge the difficulty of treatment and accept a humane, rather than a punitive approach, and attempt the control of the spread of AIDS through the drug-using population by removing the prohibition
against the possession of drug using equipment, which equipment is after all no
different than that used by a diabetic or that available in the trash cans of some
dozens of offices and hospitals in every city. The suggestion then, is that those
sections of the codes (California Health and Safety Code sections 11364,
11364.5, and 11364.7 and Business and Professions Code section 4140) be
revised to decriminalize possession of needles and syringes. Whether syringes and
needles remain prescription items or not is a minor consideration in the spread of
drug abuse, since this equipment or substitutes improvised out of plastic tubes and
pacifiers are already easily available.

The result of this action would be to control to some extent the spread of the AIDS
virus. Fortunately, in California the action could have significant impact since the
incidence in drug users with HIV infection is still below 5% in cities other than San
Francisco. Also, there would be important progress in controlling the spread of
hepatitis, other infections, and local abscesses. Most important, it would provide
experience and presumably evidence that liberalization of regulations would be
followed by some gain in individual and public health rather than by a massive
increase in drug use. There is no reason to believe that the availability or lack of
availability of needles and syringes has anything to do with the recruitment of new
heroin users. Except during the early years of the epidemics (1949-50 and 1970-
71) the spread of heroin use to new users can be best understood by considering
what older students in this area refer to as the "infectious disease model." New
heroin users do not appear because of the availability of syringes, but because of
their contact with established heroin users.

Allow cultivation of marijuana for personal use. Insofar as damage to the individual
and society is concerned, the quantitatively most important drugs are alcohol and
nicotine in the form of cigarettes. There remains, then, as the other quantitatively
important drug, marijuana, which has become, for a large fraction of the
population, a social drug comparable in pattern and approaching that of alcohol in
extent of usage.

Marijuana is a disinhibiting drug used socially to relieve anxiety and as such has
many liabilities in common with alcohol. We acknowledge that marijuana is not
without its effect on the individual user and would not suggest any change that
carried a significant risk of increasing the use of marijuana. We resist the use of
the word "legalization" in relation to any drug, including marijuana. On the other
hand, an objective consideration of marijuana shows that it is responsible for less
damage to the individual and to society than are alcohol and cigarettes, the other
social drugs mentioned above. A further consideration in forming a reaction to the
wide use of marijuana is that it is a source of conflict between generations and of
disrespect for the law.
Equally important is the economic and, to some extent, criminal activity associated with the marketplace of marijuana. At the moment, we are adding millions to our trade deficit, off of the books to be sure, by our purchases of marijuana in Columbia, Mexico, Thailand, and elsewhere. Yet, thanks to a previous action of the California Legislature, the product of this illegal activity may be possessed and used by the citizen with the possibility of only minor sanctions.

The Legislature, some years back, did liberalize the regulations pertaining to marijuana in making the possession of a small amount (less than one ounce) an infraction, rather than a crime, calling for a citation and a nominal fine upon the first violation. This change has not lead to any disastrous consequences. On the contrary, it has reduced the tension between generations and decriminalized to some extent the generally sanctioned use of this new social drug by large numbers of people.

This new situation, for which we applaud the Legislature, is however, not stable, in the sense that the failure to act in relation to the supply of the drug leaves unmet the question of the still illegal market and the economic problem that that entails. If this disparity could be resolved there would be economic gain and a great simplification of law enforcement which now devotes a considerable effort to seizing a small fraction of the illegal importations or cultivations.

The Panel therefore suggests that the law be changed to permit cultivation for personal use. Such cultivation would be permitted only on property serving as the residence for the individual, that is, it would not authorize the cultivation of fifty plants on a National forest and it would not permit the possession outside of the home of more than the present one ounce, nor would it sanction the provision to others in or out of the residence whether by sale or in the form “parties”. The change regulating the provision of this drug must be made in such a way that we do not see the development of another industry comparable to the alcohol or cigarette industry. This would require extensive revision of Health and Safety Code, Section 11358, which covers substances and matters other than the plant.

There are people who will express concern about whether such a change, however warranted by social and economic gains, would not also result in increased use. These justifiable concerns must not be dismissed out of hand. The Panel insists that no attitude of approval of marijuana, or alcohol, or tobacco be projected. In fact, as we have said above, we all remain prohibitionists to the extent that prohibition will work. To the extent that prohibition creates a marketplace or social conflict, we suggest more flexible, practical, and humane policies. It appears that the use of marijuana has reached a plateau at this time, and that usage over foreseeable circumstances will remain about at its present level, as is the case with alcohol.
From the point of view of the younger members of the population, the problem becomes a matter of consistency which we should answer by saying marijuana is "just as bad as alcohol", rather than as the defenders of marijuana would probably say, "it's no worse than alcohol".

The resulting conflict between the proposed change in California Law and existing Federal law is apparent, but the liberalization of State regulations would result in decreased enforcement activity at the State level, and Federal enforcement activity is directed primarily at a level above the activity we are presently discussing. The success of a trial of this sort would provide leadership to other states and nationally. It would have no immediate effect on problems related to other more emotionally-laden drugs, except as it demonstrates the need to consider these problems separately and one-by-one with an awareness of risk/benefit ratios.

REDUCING THE USE OF DRUGS

The present status or effectiveness of education aiming at drug abuse prevention is obviously disappointing. The amount and variety of drugs with which younger people are experimenting and subsequently using have increased to its present level during the very period when this State had a required kindergarten through 12th-grade anti-drug use curriculum in place. National efforts, in or out of the formal school situation, have been equally disappointing.

Not even the success in controlling cigarette smoking extends to the youthful population. However, it is from the successful imposition and acceptance of restrictions on smoking by the adult population that we must learn important lessons about which target population to focus on and about which arguments work and which do not. The successful campaign against smoking did not focus entirely on the user but engaged most of the population in making an aesthetic and personal responsibility issue out of smoking.

The abstract advertisements about cancer and other deadly issues were ineffective compared to the demonstration provided by intelligent community leaders and, laudably, doctors who publicly gave up tobacco and made an issue of passive smoking. In drug education we have focused on physical damage, which is not important to a young risk-taker. And we have focused on the population that we consider to be at-risk, that is, young people and some minority groups. The target population should be the total population and should examine the use of all drugs, including or even especially, the nominally legal alcohol, tobacco and prescription drugs.

In efforts to limit the use of quantitatively important drugs, we should act to influence the entire population so that an unambiguous attitude of disapproval is
projected. Even those of us who continue to drink or smoke should be willing to
do so without claiming that our practices are anything but bad. For a parent to
decide that his children will never see him drink and that he will not keep alcohol in
the home, even though he may drink socially elsewhere, is not hypocritical, but
exemplary.

A major effort in changing the attitudinal climate will eventually have an effect on
potential new users or judging from the experience with cigarettes, shorten the
duration of their habit.

However, efforts at drug abuse prevention or limitation must be multiple in that
populations exposed to hard drugs present separate problems. Certain populations,
notably those in urban ghettos, have greater contact with smoked cocaine and
inhaled heroin, drugs which by those routes of administration are highly addictive,
that is, highly likely to be used compulsively. About these "hard drugs", there are
two preliminary points:

1) Drug education among these high-risk populations proceeds at the level
of individual experience and independently of our efforts. The loss of control
in using certain drugs becomes recognized, and most people in these
populations then resist their use. That is, some drugs do get a bad name.
As a result, epidemics of such use are self-limiting to some extent, and,
after these epidemics (of which we have now seen four: two heroin, one
high-dose IV-speed and one smoked-cocaine as crack), we see a residual
number of users who have not matured out of their habit.

2) The spread of the habit from these established users to new recruits can
be best understood by the infectious disease model mentioned above, and
accounts for the relatively small number of new users after the initial period
of high use. The number of people involved with these "hard" drugs is small
compared to the numbers using the social drugs discussed above, and the
problems, however destructive and however exaggerated in extent, are
geographically limited and are typically associated with non-pharmacologic
problems.

For the general public, effective drug education would consist of neutralizing
advertisements (however disguised) that glamourize and proselytize for drug use.
Instead, an aura of general disapproval of all drugs, including the common socially
used drugs should be established.
PROHIBIT [LEGAL] DRUG USE IN SPECIAL STATE ESTABLISHMENTS.

We have recently seen amazing progress in dissuading people from the use of tobacco. We will below suggest additional action in relation to alcohol, already a regulated drug, with at least some discipline applied. Overall, prohibition is not feasible but restricted use of alcohol in inappropriate places is justifiable and would be an essential step in projecting the attitudinal change desired.

The Panel applauds the establishment of tobacco free areas in State institutions. As a condition of their funding the Legislature should now insist that certain agencies within the State system not sell or provide alcoholic beverages within the confines of their campus or building. This should be immediately applied to any medical center campus or hospital. Doctors and other care-givers have a generally favored status and acquire with that a special responsibility to project an attitude of disapproval about the use of any disabling drug while they are accepting responsibility for a dependent patient. Certainly the State acquires a liability in providing alcohol to individuals who are then going to drive or see patients. More importantly, such use then projects an attitude totally at odds with that which we claim throughout our discussions as desirable.

Similarly, it is impossible to rationalize the use of a depressant drug, clearly shown to impair performance after small doses, on a University or State University campus dedicated to intellectual activity. The individual instructors, that is, teachers at all levels, should probably feel an obligation to neither drink nor smoke in public, but this is not a matter for legislation.

COUNTER ADS. In addition to the emphasis on role modeling implied by the suggestion immediately above, there is an obvious need for counter promotion to offset the various advertising techniques that subtly, or explicitly, imply sexual or other social rewards for the use of products. The experience with cigarette advertising would suggest that counter ads placed immediately after the offending ad and providing an alternate view of the problem were more effective than currently isolated, however cute, anti-drug ads. To what extent this policy could be initiated intra-state is a matter beyond our competence, but it would appear more than desirable.

While I applaud the intent of the Panel in its 1989 annual report to stimulate discussion in several major areas of policy concerning drug abuse, I am not prepared as a relatively new member of the Panel (since November 1989) to support all the recommendations contained in the Executive Summary. As is noted in the Commentary, the internal debate by Panel members on these topics was both lively and diverse. I am in agreement in philosophy, content and interpretation with much of the discussion presented in the Commentary. I particularly endorse the emphasis that policy toward illicit drugs should not disregard differences among abused drugs (and the consequences of their use), and that they should be perceived in the context of the enormity of the social problems surrounding much more frequently used substances such as cigarettes and alcohol.

I further concur with the philosophy that social reaction to the use of drugs should be very carefully considered so that the inherent problems are not exacerbated by inappropriate social reaction or overreaction, particularly given the current tax burden imposed by major expenditures for criminal justice system-based efforts.

To the extent that the issues raised in the Panel’s Executive Summary and Commentary can stimulate discussion in important policy areas, provide informational expertise from the Panel members’ aggregated experience, and promote a thorough examination by the Legislature of alternative policy options, I am pleased to add my support. Furthermore, my lengthy experience with the AIDS epidemic among intravenous drug users suggests that major public health benefits could be derived from more flexible policies concerning the possession of syringes and needles, as well as promotion of better disinfection techniques involving bleach.

However, I am not in full agreement with some of the Executive Summary’s recommendations. In particular, allowing cultivation of marijuana use for personal consumption, a social debate of some 25 years, needs careful consideration. Certainly, the consequences of marijuana use are significantly less than use of either cigarettes or alcohol, and it is true that the majority of people do not use marijuana and, of those who do, few do so with high levels of consumption. Furthermore, public policy toward marijuana has been discredited to the extent that social overreaction has distorted evidence about medical and social consequences of its use. With all this said, however, I am hesitant, without considerable further public debate, in suggesting changes in laws, either toward further decriminalization or toward more punitive criminal penalties.

Given the current serious levels of drug use and the cost to society of prevention, treatment, and enforcement efforts, the Panel’s attempt to reconsider drug abuse issues and to propose consideration of alternate social policy directions is a new emphasis that is initiated in the 1989 Annual Report. To the extent that the Panel’s efforts have credence with the Legislature, the ensuing discussion may contribute to ameliorating drug abuse problems.
The Commentary portion of the Annual Report sets forth suggested legislation to amend or repeal certain laws relating to drug enforcement and control. The Commentary states that the Panel "presumes" to recommend such changes in law because of the experience of the Panel members in activities relating to drug abuse both in their role as Panel members and their experiences outside of their Panel functions. The Commentary states that the Panel is "mandated as an advisory group to the Legislature to suggest some legislation ... to reduce the damage to society ... imposed by drugs."

This claim of authority to recommend legislation on drug control and enforcement is not supported by and, indeed, is contrary to the statement in the Annual Report concerning the Panel's Legislative Mandate. This Report on page 19 states: "LEGISLATIVE MANDATE The Research Advisory Panel was created in 1969 by the California Legislature to encourage and oversee research related to controlled drugs and narcotic addiction. The Panel was given responsibility to review, approve and oversee research projects involving marijuana, hallucinogenic drugs and other controlled substances, and innovative treatment programs for narcotic addiction and abuse of controlled substances. Since 1969, such research within the State of California has operated under the aegis of the Panel. The Legislature also mandated that the Panel encourage research with marijuana and other controlled substances as well as research into the treatment of drug addiction."

Further, an examination of the statutes pertaining to the Panel reveals that the Legislature has only given the Panel authority with respect to research projects involving the use of controlled substances and research projects concerning the treatment of abuse of controlled substances. The statutes also require the Panel to report annually to the Legislature and Governor the research projects approved by the Panel including the nature and conclusions of the research projects. (Appendix A)

In my opinion, the Commentary's recommendations to amend or repeal the laws on drug enforcement and control are not within the legislative authority of the Panel. There is no statutory authority for the Commentary's statement that the Panel is mandated to suggest drug enforcement legislation. The Panel's "presuming" of such authority is unwarranted and ill advised. Since the Panel lacks legislative authority in the above area, it is my position that the Commentary portion of the Annual Report should be omitted.

In addition to the lack of authority for the Commentary, I would emphasize that the Commentary's legislative recommendation allowing cultivation of marijuana for personal use is particularly injudicious. The argument, that since marijuana use continues to escalate and therefore criminal sanctions should be abandoned, fails to acknowledge or discuss the extent of marijuana use if sanctions were removed. Certain premises for the recommendation, e.g., that marijuana is currently increasing in use and is comparable to alcohol in extent of usage, are not established. The recommendation is not accompanied by a strong, well-planned comprehensive program to reduce the use and abuse of marijuana. Allowing marijuana cultivation for personal use as an experimental approach is not appropriate since the research subjects would extend to all citizens of California. If the experiment were not successful, the social cost of the experiment could be significant.

Marijuana and the Criminal Justice System

The Relationship of Illegal Drug Use to Crime

The legislation and enforcement of anti-drug laws has created an unprecedented strain on the criminal justice system. Advocates of drug legalization argue that there are other more effective ways to regulate drug-related behavior and commerce than criminalization, which creates economic incentives to increase crime.

The National Institute of Justice (NIJ) holds that the use of drugs such as heroin, cocaine and marijuana would create crime even if the drugs were legalized. This position is meant to counter arguments that drug legalization would eliminate large numbers of crimes.

The argument that drug use contributes to criminal behavior is laid out in a July 1990 report of the National Institute of Justice Searching for Answers - Research and Evaluation on Drugs and Crime. Drug use creates dangers, the report states, including heightened criminal activity, degraded work performance, and personal and property damage. While there is no drug which itself causes someone to commit a crime, drug use is held to be one of several major causes of criminal behavior.

The report claims convincing empirical linkage between drug use and crime. Drug use is believed to amplify criminal tendencies, and criminal behavior is seen to diminish when drugs are removed or absent. Three linking mechanisms are described. First, drug use has an effect on crime due to the psychopharmacological effects, the "disinhibiting or disorienting effects of the drug on the mind or body". Second, drug use creates an economic compulsive contribution to crime - when crime becomes a way to pay for drugs. Finally, they point to the systemic contribution to crime when criminal acts become a routine way of doing business related to drugs. The data summarizing these linking mechanisms are reviewed below and in Table 1.

Drug legalization would remove the economic compulsive and systemic influences of illegal drugs. The argument against legalization, in many respects, rests on the premise that drug use causes criminal behavior, and that if the now illegal drugs were legalized, crime rates would increase far beyond what they are now, even with the elimination of drug possession and trafficking offenses.

Attention will also be devoted below to distinguishing the effects of widespread marijuana use from that of other drugs associated by NIJ with criminal activity.

The Evidence (1):
Drug Use Among Criminals

The most prominent evidence cited by the report is that drug use is much more popular with prisoners and arrestees than with the general population. For example, according to surveys by the Bureau of Justice Statistics (BJS) in the mid 1980's, 62% of state prisoners used illegal drugs weekly compared to 18% of the general population; 63% of incarcerated juveniles were weekly users compared to 25% of high school seniors.

There is no evidence that marijuana use contributes to criminal behavior. BJS also reports that more than half of state prisoners who ever used a major drug such as heroin or cocaine had continued on page 3
Table 1. Links Between Drugs and Crime

<thead>
<tr>
<th>Linking Mechanism</th>
<th>Supporting Data: Cocaine &amp; Heroin</th>
<th>Supporting Data: Marijuana</th>
<th>Other Factors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Psychopharmological: relating to the disinhibiting or disorienting effects of the drugs on the mind or body. When drugs are present, tendencies within the individual or group toward crime are amplified, and when drugs are removed or absent, criminal behavior diminishes.</td>
<td>serious offenders have a history of pill, cocaine or heroin use -25% to 40% of inmates in custody said they were &quot;high&quot; during the offense for which they were incarcerated -criminals have higher drug usage rates than the non-criminals according to both surveys and urinalysis testing -while not all drug users are involved in other illegal activity, serious offenders are also the heaviest users</td>
<td>-9% of local jail inmates were high on marijuana when they committed the crime that jailed them -during the 1980's roughly three out of four jail inmates reported using marijuana some time in their lives</td>
<td>-43.3% of local jail inmates were under the influence of alcohol when their crime was committed -most serious offenders with a history of drug abuse began use of a major drug (heroin, cocaine, PCP) after their first arrest -while many criminals use and or abuse drugs, including alcohol, most drug and alcohol users do not commit crimes -the incarceration rates per capita for alcohol, and marijuana are similar to the incarceration rates for non-drug users</td>
</tr>
</tbody>
</table>

Economic compulsive: relating to the motivation to commit crime as a means of supporting a drug habit

-daily heroin users who commit crimes are criminally active on more days per year than other groups
-in one study daily heroin use was calculated at costing $17,000/yr
-In 1986, 28% of jail inmates reported past drug dependencies
-One fourth of property crime can be attributed to needing money for drugs
-the large profits of marijuana farming has attracted rural groups formerly engaged in illegal alcohol production
-domestic marijuana cultivation accounts for at least 25% of the marijuana consumed in the United States

Systemic: relating to violence or crime as parts of the business or cultural lifestyle associated with drugs, as in gang wars or turf battles

-drug dealers are at a high risk for violence
-a high percentage of urban homicides have been linked to cocaine and heroin related violence
-some marijuana farmers use booby-traps to discourage poaching their crop
-marijuana has been sold by violent groups incl. Jamaican posses and motorcycle gangs

-the DEA has reported decreasing incidents of violence associated with marijuana farming
-such violence is not statistically significant related to general crime rates

Marijuana Digest: Pg.2  Post Office Box 16054  Washington, DC 20041
Marijuana Digest: Pg. 3  Post Office Box 16054  Washington, DC 20041

not done so until after their first arrest. Major drug use may be as much a symptom of criminal behavior as it is a cause.

Of the survey population of local jail inmates, 70.7% admit to have using marijuana at least once in there life, and 28.1% reveal they are monthly users. General population surveys indicate that 66.5% of the general population have tried marijuana at least once, but only 10.2% are monthly users.

Usage rates may be much higher, as according to Searching for Answers the "stigma associated with drug use has increased over the past 20 years" and this may have caused "an increasing reluctance to admit drug use" to surveys of the general population.

There is evidence linking opiate addiction to criminal activity. For example, a study of New York City street-level opiate abusers held that extensive criminality is proportionate to levels and patterns of drug usage. Daily use of heroin was estimated as costing $17,000 annually. This is evidence of the economic compulsive linking mechanism.

Gang warfare over crack markets is persuasive evidence of the systemic linking mechanism. As evidence of criminal activity due to marijuana use, the report cites as an example how "the large profits of drug marketing, particularly of marijuana, have also attracted rural groups formerly engaged in other criminal activities such as illegal alcohol production."

However, these causes of crime would be eliminated by legalization of drugs. There are no studies on record that indicate that significant numbers of people steal to support a marijuana dependency. While occasional stories surface of booby-trapped marijuana fields, the marijuana trade does not have a violent reputation. The 1990 Drug Enforcement Administration report on domestic cannabis eradication states that "violence and the use of booby traps have decreased."

The Evidence (2):

Drug Use at the Commission of a Crime

The other evidence presented that there is a psychopharmaceutical contribution of illegal drug use to criminal behavior concerns the number of inmates who were on drugs at the time they committed the offense that placed them in prison. According to surveys by the BJS, in the mid 1980's 25% of convicted inmates were on drugs at the time of the offense, and 40% of incarcerated juveniles.

A BJS special report, Profile of Jail Inmates, 1989 provides recent data to examine the prevalence of drug and alcohol use at the time criminal offenses occur. The survey is of prisoners in local jails rather than state prisons or federal institutions. In 1989 nearly 1 in every 4 inmates were in jail for a drug offense, compared to 1 in every 10 in 1983.

The data concerns drug use at the time the offense was committed, regardless of whether the offense was drug-related or not. The focus here is to what extent people on drugs commit crimes (in addition to illegal drug use). Of the 205,524 convicted offenses of the survey population, 27% of them were caused by someone under the influence of an illegal drug.

Alcohol, though, was a factor in 41.3% of all offenses, and 44% of the offenses committed under the influence of drugs were also under the influence of alcohol.

The data suggests a strong link between alcohol and crime. Alcohol use at the time of offense was more prevalent among violent offenders (46.8%) than property offenders (30.7%). An estimated 65.2% of those serving time for homicide and 54.1% of those for assault reported being under the influence of alcohol.

Drug use of any kind was common among burglars (37.9%) and robbers (35.0%) and least common among persons serving time for assault, minor traffic offenses, Driving While Intoxicated, and other public-order offenses.

Of greater interest is how the population of local jail inmates compares to the general population of drug users. For example, the number of offenses committed under the influence of alcohol is going to be a lot larger than others because a lot more people drink alcohol than take any illegal drug.

Table 2 rates the number of offenses committed under the influence of various drugs according to their annual using population as estimated by the 1990 National Institute on Drug Abuse Household Survey of drug use.

Rating allows the comparison of equal populations, as if to answer the question 'of every 100,000 people who drink alcohol, how many will commit an offense serious enough to land them in a local jail while under the influence?'

If illegal drug use does contribute to crime, then the incarceration rates for illegal drug users will be significantly higher than those for both alcohol and the non-drug using population.

The local jail incarceration rate for the general population is 209 per 100,000. Another reference point is provided by calculating the incarceration rate for adults who are not monthly drug users. The incarceration rate for this control group is 137.

The rate for heroin, at 6,120 per 100,000, is continued on page 8
Table 2. Incarceration Rates for Crimes Committed Under the Influence of Drugs & Alcohol

This table compares two sets of data. The first is an estimate of how many local jail inmates were under the influence of an illegal drug or alcohol at the time their crime was committed. A local jail is defined as a facility which holds persons pending adjudication or persons committed after adjudication, usually for sentences of a year of less. The second data set consists of estimates of the annual national drug using populations. These two sets of estimates are used to compare incarceration rates in local jails for different drug using populations. As standards of comparison, the incarceration rate in local jails is also calculated for the entire adult population, as well as for those committing crimes under the influence of any drug or alcohol and those committing crimes not under the influence of drugs or alcohol.

Notes:

3) While all other population estimates are annual, these estimates, while based on the same surveys, are monthly. The control group is offenders who have not used illegal drugs thirty days prior to arrest compared to adults who did not report using illegal drugs within the last thirty days.

4) The summary group is composed of offenders who were under the influence of drugs or alcohol at the time of their offense compared to the annual drug and alcohol using population, which assumes that most drug users also drank alcohol during the year. Illegal drug users who do not drink alcohol are not thought to be statistically significant, but if added to the drinking population would lower the summary incarceration rate.
Recent Drugs & Crime Data

From the
United States Department of Justice,
Bureau of Justice Statistics,
Washington, D.C.

Growth Trends:

Drug arrests have grown from 583,000 in 1983 to 1,247,000 in 1989. In the same period the percentage of inmates in local jails on drug offense charges rose from 9.3% to 23%. While total inmate growth rose 77% during this time, the numbers of inmates charged with drug offenses rose 328%.

In 1988 drug offenders comprised 1/3 of all state court felony cases. From 1986 to 1988 state court convictions for drug trafficking rose 46%.

In a comparison of prior drug use by jail inmates, in 1983 only 12% of the sample used cocaine while in 1989 that had doubled to 24%. Cocaine was the only drug proportionally more inmates used in 1989 than in 1983. Cocaine users were three times as likely to have committed offenses to get money for drugs.

Prohibition Related Crime:

According to a survey of local jail inmates, 1/4 of all property crime (including robbery, burglary, larceny, theft, motor vehicle theft, fraud, stolen property and other property crimes) is committed to gain money to buy drugs. Over 30% of robberies and burglaries are committed for money to buy drugs.

Persons under Correctional Supervision:

In 1988 there were 3,713,000 persons under correctional supervision in the U.S., 2% of the adult population. The figures are: 344,000 in jail (9%), 2,256,000 on probation (64%), 607,000 in prison (16%) and 408,000 on parole (11%). Probation is a sentencing alternative to jail or prison, while parole is in conjunction with time served.

Arrest and Incarceration:

In 1988 there were 13.8 million arrests (FBI Uniform Crime Reports) and yet only 3.7 million people under correctional supervision (26.9%). Of those arrested in 1988, approximately 2.5% went to jail; 4.4% went to prison; 17.0% went on probation, and 2.9% ended up on parole. (Based on Correctional Populations in the United States, 1988. March, 1991)

In 1990 state prisons, on average, were operating at 115% of their lowest capacity and 127% of their highest capacity. (Prisoners in 1990. May 1991)

In 1990 local jails operated on average at 111% of their occupancy capacity. Jurisdictions with at least one jail operating under a court order to reduce population operated on average at 113% over capacity. (Jail Inmates, 1990. June 1991)

Who is in Jail for Drug Offenses?

Race: Drug offenders in local jails in 1989 were 25.5% white, 48.3% black, and 24.7% Hispanic.

Age: 18-24: 33.6% 25-29: 27.5% 30-34: 15.9%

35-44: 15.2%

Education: 8th grade or less: 15.2% some high school: 39% high school graduates: 37.2% some college: 13% (Drugs and Jail Inmates, 1989. August 1991)

What sentences do drug offenders get?

The survey population of local jail inmates represents offenses which were serious enough to land the offenders in jail, rather than receive a sentence of probation or dismissal of charges. In surveys conducted in both 1983 and 1989 half of drug offenders sentenced to a local jail received a sentence of 9 months or less. (Drugs and Jail Inmates, 1989. August 1991)

Of drug traffickers brought before state courts in 1988, 71% were sentenced to some kind of incarceration: jail (30%), prison (41%), or probation (28%).

The average sentence for a drug trafficker in 1988 was 66 months, with 20 months actually served and the remainder on parole. (Generally, a prisoner is eligible for parole after one third of the sentence has been served.) Other average sentences are larceny - 50 mo.; burglary 74 mo.; robbery - 114 mo.; rape - 183 mo. and murder - 230 mo. (Drugs and Jail Inmates, 1989. August 1991)

</table>

incredibly high. The high cost of illegal heroin and its addictive properties create the classic case study in the relationship between drug use and crime. Since criminal activity diminishes as heroin use is reduced, this extremely high incarceration rate is an argument for getting addicts into treatment. It seems that a small number of heroin addicts are committing a great deal of crime.

While heroin may offer the classic model, this does not mean that the same relationship holds for other drugs.

The rates for cocaine and stimulants are extremely high by comparison with either standard, 924 and 347 per 100,000 respectively. These rates may support the argument that cocaine and stimulant use makes someone significantly more likely to commit a crime than someone in the general population. The question remains whether this criminal activity is due to the effects of drug abuse or the need to get money to buy drugs.

The incarceration rates do not support the theory that the psychopharmological effects of alcohol or marijuana contribute to a higher rate of criminal activity than is present in the general population.

The incarceration rate for marijuana users (194) is not significantly different from that of the general population (209). Furthermore, the percentage of inmates who committed their offense under the influence of marijuana is nearly equal to the percentage of marijuana users in the general population. Taken along with the general lack of data linking marijuana use to economic compulsions to commit crime and systemic market violence, the low incarceration rate for marijuana users is an indication that it does not cause criminal activity.

The even lower rate for alcohol (131) is an indication that far far more people use alcohol responsibly than those who commit criminal acts. The incarceration rate for alcohol users is not significantly different for that of the non-drug using population. Otherwise, the evidence suggests that while most alcohol users do not commit crimes, the criminal behavior of those who do can be reduced by treating their alcohol abuse.

Allocating Resources:

According to "Searching for Answers": "crafting a coherent drug enforcement strategy requires not only an assessment of the jurisdiction's drug problem - the types of markets, the range of drugs available, and the characteristics of their users populations - to inform selection of the appropriate tactics; but also assessment of the costs of committing additional resources (in terms of alternative activities that cannot be undertaken); and then a realistic estimate of the capabilities of other parts of the system - prosecutors, judges, and corrections officials - to respond to increased arrests and mounting numbers of drug cases."

State and local police are being encouraged to pursue retail, street level enforcement focusing on particular neighborhoods, while letting the federal agents go after the Mr. Big's of the drug trade.

Despite the political rhetoric of the day, the resources do not exist for ambitious prosecution of possession offenses. The costs to the taxpayers of each state justice system are reviewed in Tables 3 and 4, as well as the size of the each states correctional population. NJJ's response is to find more creative ways to place people under correctional supervision.

Sanctions:

"The Institute will continue to search for new low-cost sanctions that can be used on a large scale against recreational drug users. The criminal justice system cannot afford to supervise millions of casual users...nor can it ignore them. NJJ wants to find solutions that do not congest the courts or swell probation caseloads. One appealing solution is income proportioned fines for first offenders. On the model of traffic courts, a computerized system can impose and collect fines in high volume to halt the drain drug cases make on correctional resources. The Institute will encourage research on all sanctions that effectively (but not unrealistically) inflict damage on offender households and require minimal additional resources to administer."

"NJJ's research is exploring intermediate sanctions like house arrest, electronic monitoring, shock incarceration, asset seizure and forfeiture, and intensive probation supervision. The goal is to give the American criminal justice system a more problem-specific, more rational structure of options for dealing with diverse offenders."

COMMENTS OF THE NEW YORK COUNCIL OF DEFENSE LAWYERS REGARDING PROPOSED 1993 AMENDMENTS TO THE SENTENCING GUIDELINES

Respectfully submitted,

NEW YORK COUNCIL OF DEFENSE LAWYERS
530 Fifth Avenue
New York, NY
(212) 221-1414

Robert G. Morvillo, President
Paul Bergman and Marjorie J. Peerce
Co-Chair, Sentencing Guidelines Committee

March 12, 1993
We would like to thank the Sentencing Commission for the opportunity to present our views on the proposed amendments. The New York Council of Defense Lawyers ("NYCDL") is an organization comprised of more than one hundred attorneys whose principal area of practice is the defense of criminal cases in federal court. Many of our members are former Assistant United States Attorneys, including ten previous Chiefs of the Criminal Divisions in the Southern and Eastern Districts of New York.

Our members thus have gained familiarity with the Sentencing Guidelines both as prosecutors and as defense attorneys. In the pages that follow, we address a number of proposed amendments of interest to our organization. With respect to those proposed amendments and issues for comment, we have organized our submission essentially in numerical sequence. However, with respect to those matters which deal in the white collar business crime area and the narcotics area, we have departed from the sequential presentation in order to present those areas together.
PROPOSED AMENDMENT 1

Relevant Conduct (§1B1.3) -- prohibits use of acquitted conduct in determining guideline offense level; possible basis for departure in exceptional cases.

We support this proposed amendment, which provides that conduct of which the defendant has been acquitted after trial shall not be considered in determining the defendant's offense level under the relevant conduct section. We oppose the proposed amended commentary insofar as it states that in an exceptional case acquitted conduct may provide a basis for an upward departure.

We believe this proposed amendment comports with the philosophical underpinnings of the Guidelines, as well as fundamental notions of due process. There is an inherent imbalance in including, for the purpose of adding up the relevant conduct of a defendant applicable to Guidelines calculations, conduct for which a defendant has been found not guilty. It is also unfair. For these reasons, we support the proposed amendment as reasonable.

The proposed amendment is also necessary. Practice under the Guidelines thus far indicates that most courts which have confronted the issue have held that an acquittal does not bar a sentencing court from considering the acquitted conduct in imposing sentence. E.g., United States v. Averi, 922 F.2d 765 (11th Cir. 1991); United States v. Rodriguez-Gonzalez, 899 F.2d 177 (2d Cir. 1990); United States v. Mocciola, 891 F.2d 13 (1st Cir. 1989);
United States v. Isom, 886 F.2d 736 (4th Cir. 1989); United States v. Juarez-Ortega, 866 F.2d 747 (5th Cir. 1989) (per curiam); United States v. Ryan, 866 F.2d 604 (3d Cir. 1989). One court has held that a trial court may consider a prior acquittal as long as that acquittal is not relied upon to enhance the sentence, United States v. Perez, 858 F.2d 1272, 1277 (7th Cir. 1988).

We believe the proposed amendment reflects a far better approach.

NYCDL opposes acquitted conduct providing the basis for an upward departure in any case. The Guidelines reflect a balance that in many ways limits the avenues by which defendants can seek downward departures; we cannot see why the prosecution should be able to seek an upward departure as a result of conduct for which the defendant has been found not guilty.

**PROPOSED AMENDMENT 2**

Use of Guidelines Manual in Effect on Date of Sentencing (§1B1.11) -- application of amended guidelines to multiple count cases

We oppose this amendment, which extends the Commission's "one book" rule to multiple count cases on the basis of judicial convenience, while ignoring the basic principles of the *ex post facto* clause of the United States Constitution. The proposed amendment provides that in cases where a defendant is convicted of two offenses which "straddle" an amendment to the Guidelines, the
The latest revised edition of the Guidelines is to be applied "even if" the revised edition of the Guidelines results in an increased penalty for the first offense. This position is in direct conflict with the "Background" to this Guidelines section which specifically states that courts have consistently held that the *ex post facto* clause does, in fact, apply to sentencing Guideline amendments that subject the defendant to increased punishment.

The general rule of § 1B1.11 is to apply the sentencing Guideline in effect on the date that the defendant is sentenced. Subsection (b) provides an exception to this general rule where the court decides that to apply the Guidelines in effect on the date of sentencing would violate the *ex post facto* clause. The Guidelines, therefore, permit the courts to apply the Guidelines in effect on the date of the offense of conviction. By enacting such a provision, the Commission codified the rationale displayed throughout the federal courts, which recognizes that to sentence a defendant based on legislation not in effect at the time of the offense raises serious constitutional problems. We believe that proposed amendment 2, which provides that "straddled" offenses be sentenced uniformly based on the most recent amendments, contradicts the policy and the rationale epitomized in enacting § 1B1.11(b) in the first place. This amendment enables a court to sentence a defendant based on legislation not in effect at the time of the offense and therefore violates the *ex post facto* clause.
It is the position of the NYCDL that the proposed amendment be revised to say one of two things. Primarily, we would endorse a version of the amendment which replaced the words "even if" with "unless," thereby allowing use of the most recent amendment for sentencing on multiple counts in cases where such "grouping" would not result in a harsher sentence for the defendant based on legislation not in effect at the time he committed his crime. This proposal balances institutional interests in judicial convenience and efficiency with the well-established constitutional concerns of Article I, section 9.

Our second recommendation concerning this amendment calls for reworking the section to read that "the revised edition of the Guidelines shall be applied to both offenses, when the court, in its discretion, so decides that such application balances the government's practical interests with the defendant's constitutional concerns." Leaving this determination up to the court's discretion is consistent with the rest of § 1B1.11. Section 1B1.11(b) already gives the court authority to make the initial determination of whether there is an ex post facto consideration. Enabling the court to further this inquiry in cases consisting of multiple "straddled" offense counts is consistent with the rest of the section and the policy considerations behind enabling the court to make that determination in the first place. In addition, the Guidelines have gradually usurped the all too important discretion of the sentencing court in most other
sentencing areas. In an area as fact specific as *ex post facto* determinations, where the Commission has already recognized the need for court discretion, the Guidelines should not abandon its rational approach towards this difficult issue on the basis of symbolic uniformity and efficiency.

Accordingly, the NYCDL opposes the proposed amendment to §1B1.11 as presently worded. We do, however, support an amendment which either prevents the application of the most recent version of the Guidelines where it prejudices the defendant's constitutional rights under the *ex post facto* clause or which leaves the determination in the discretion of the sentencing court, balancing the interests of the government with those of the defendant.

**PROPOSED AMENDMENT 5**

Fraud, Theft, Tax (Chapter Two, Parts F, B & T) --
deletes "more than minimal planning" adjustment from fraud and theft guidelines and "use of sophisticated means" from tax guidelines; restructures monetary loss tables in fraud, theft, and tax

The NYCDL believes that the proposed changes to the theft and fraud tables are unwise, and that they exacerbate one of the worst aspects of the current sentencing regime: virtual mandatory imprisonment for first offenders who commit relatively minor property offenses.
Under the present Guidelines, the offense levels for theft and fraud offenses are determined largely by the amount of loss involved as set forth in the dollar tables that are central to the sentencing scheme. See Guidelines § 2B1.1(b)(1), § 2F1.1(b)(1). There is a two-point "bump" for crimes that involve "more than minimal planning." The proposed amendment would eliminate the "more than minimal planning" offense characteristic, and substitute dollar tables with increased offense levels for almost all amounts of dollar loss.

In our view, to enact these proposed changes would be a serious mistake, affecting thousands of cases each year. We believe that one of the worst features of the present Guidelines is the compelled imprisonment of first-offenders in larceny and fraud cases. Under the current provisions, any defendant who steals more than $10,000 is not eligible for a straight sentence of probation. Absent other mitigating factors in such cases, present law sets a minimum offense level at "9", taking the offender out of "Zone A" of the sentencing table and requiring at least one month of imprisonment, intermittent confinement, community confinement, or home detention. Offenders who cause losses in excess of $40,000 face offense levels of "11" or higher, taking them out of "Zone B" of the sentencing table and requiring that at least half of the minimum term of the Guideline sentence be satisfied by imprisonment. As a practical matter, therefore,
under current law any first-offender who steals in excess of $40,000 must spend at least 4 months in a federal prison.¹

If the proposed changes in the theft and fraud tables are enacted, even more first-offenders will wind up in federal prisons. According to the new tables, any offender who steals more than $5,000 faces a minimum offense level of "9"; such an offender is out of Zone A and is ineligible for a sentence of straight probation. Similarly, any offense involving a loss of more than $13,500 generates a minimum offense level of "11", requiring a prison sentence unless some other deduction is applicable.

These changes are unwarranted for a slew of reasons. First, they fly further in the face of the Congressional mandate, contained in 28 U.S.C. § 994(j), that the Commission "insure that the Guidelines reflect the general appropriateness of imposing a sentence other than imprisonment in cases in which the defendant is a first offender who has not been convicted of a crime of violence or an otherwise serious offense . . . ." (emphasis added).

If this statute means anything, then persons with no criminal records who steal $5,000 or $10,000 or $15,000 ought not be sent to prison as a routine matter. The typical defendant in such cases

¹ The base offense level for theft cases, pursuant to Guidelines § 2B1.1(a) is "4." A case involving a loss of $40,000 results in a "7" level increase, for an offense level of "11". First-offenders, i.e., those in Criminal History Category I, face a "Zone C" guideline sentence of 8-14 months. Pursuant to Guidelines § 5Cl.1(d)(2), at least one-half of the minimum sentence -- 8 months in this example -- must be satisfied by imprisonment, resulting in at least a 4-month prison term.
-- an embezzling bank teller, for instance -- commonly faces such collateral consequences as the loss of employment and the difficulty of finding a new job as a convicted felon. The sentencing tables ought not require prison in such relatively non-serious cases, particularly when Congress has indicated that prison generally should not be required in those circumstances. The proposed amendment, which reduces further the loss threshold at the door of the federal prison cell, is unwise and contrary to congressional intent.

It bears emphasis here that the proposed increase of punishment levels at the low end of the spectrum in theft and fraud cases evidently was not a deliberate policy decision by the Commission or its staff. Rather, the increased punishment levels appear to be an artifact of the proposal to abolish the specific offense characteristic for crimes marked by "more than minimal planning." If the two-point increase for offenses with more than minimal planning is killed, its ashes apparently are to be scattered over the entire theft and fraud tables, resulting in higher sentences for all levels of loss. Ironically, however, when the White Collar Working Group began examining these issues, its "Preliminary Purpose Statement" indicated that it would examine, inter alia, "whether the punishment level is low enough at the low end of the loss spectrum and high enough at the high end." The amended tables drastically increase sentences at the high end -- cases involving multimillion dollar losses -- but they inexplicably
raise punishment levels even at the low end. Yet, the offenses at the low end of the spectrum -- those involving several thousand dollars of loss -- typically were not the kinds of cases in which sentences were enhanced for "more than minimal planning." The net result, therefore, is that the Commission has proposed doing away with an aggravating factor that typically did not impact low-end cases, and raising sentence levels across the board. The low-end offender winds up facing more prison time, when the question at the outset was whether punishment levels at the low end of the spectrum already were too high.

We emphasize in this regard that the purpose of the Guidelines was to eliminate sentencing disparity, and not to increase prison sentences generally. With the Guidelines, however, have come sharply higher average sentences. According to statistics published by the Department of Justice in September 1992, defendants sentenced for fraud offenses who were released from prison in 1991 had spent, on average, 37% more time in prison than fraud defendants who were released from prison in 1985. Federal Criminal Case Processing, 1980-90, United States Department of Justice, Bureau of Justice Statistics, at 18. To the extent

---

2 Defendants who were released in 1985 had served an average time until first release of 11.4 months. Defendants released in 1991 for the same offenses had served an average time of 15.6 months until first release. This increase undoubtedly understates the impact of the loss tables in generating increased sentences, because fraud prosecutions tend to involve lengthy investigations, and the statistics for 1991 therefore must include a substantial number of pre-Guidelines cases.
this phenomenon reflects the imprisonment of first-time offenders who steal relatively minor amounts of money, it is deplorable, and the proposed amendments only make matters worse.\(^3\)

An additional problem with the proposed loss tables for theft and fraud cases is that they increase the number of gradations calibrated to dollar loss, further complicating a sentencing scheme that already draws unwarranted distinctions between offenders. A case involving a loss of less than $40,000 would be slotted into one of eleven pigeon holes, rather than one of the nine categories that currently exist. The dollar gradations at the lower end of the spectrum seem almost trivial. In the experience of our membership, the defendant who steals $3,000 is not a materially different person from the defendant who steals $5,000 or $8,000 or $13,500. Yet, these defendants receive markedly different sentences under the loss tables, particularly as amended. By contrast, an offender who already has stolen $70,000,000 may steal an additional $49,999,999 before his offense level jumps by so much as one point. To be sure, a one-point increase in offense level translates into substantially more prison time at the high end of the spectrum, but we question whether the

\(^3\) We note that the only low-end offender whose lot would be improved under the amendments is the defendant whose conduct generates a loss of less than $600. Such defendants would face no increase in the base offense level of their crimes, whereas previously there was some increase for any loss of more than $100. The impact of this change, at least in the districts in which our members practice, will be less than \textit{de minimus}.
Guidelines ought to draw distinctions that turn on whether the defendant steals $600 as opposed to $1,000 or $1,700, as the proposed loss tables would mandate. The NYCDL believes that punishment for property crimes already is myopically focused on the amount of loss involved. The kinds of picayune distinctions that the proposed loss tables draw in low-end cases aggravate this problem and serve no valid purpose. Our members, undoubtedly joined by federal judges all over the country, would prefer tables that draw fewer and broader distinctions, perhaps based on orders of magnitude. Put simply, a $10,000 thief may perhaps be distinguished from a $100,000 thief, and a person who steals $100,000 may commonly be distinguished from a defendant who steals $1,000,000. But a person who steals $1,000 ought not be treated differently from one who steals $1,700. That is just silly.

With respect to the wisdom of doing away with the specific offense characteristic for crimes that involve "more than minimal planning," we agree that this characteristic has resulted in some sentencing disparities because it is both overbroad and ambiguous. However, we also believe that there is a valid distinction to be drawn between sophisticated, carefully calculated criminal conduct and unplanned, opportunistic behavior. Accordingly, we favor redrafting and retaining this characteristic so that it can be applied in appropriate cases, as opposed to abolishing it in favor of across-the-board increases in the offense levels for theft and fraud offenses. An appropriate formulation,
in our view, would allow for enhancing the sentence where the
defendant has engaged in substantial planning beyond that typical
of the offense of conviction.

PROPOSED AMENDMENT 6 AND ISSUES FOR COMMENT 7 AND 38

Fraud (§2F1.1) -- invites departure in fraud cases in
which loss fails to fully capture the seriousness of the
offense or the fraud causes substantial non-monetary harm

Fraud & Theft (Chapter Two, Parts B & F) -- issue for
comment about adding offense levels when loss fails to
fully capture the harmfulness and seriousness of the conduct

Theft (§2B1.1) -- issue for comment regarding
whether downward adjustment should be added for
defendants who do not personally profit from the offense

In proposed amendments 6 and 7, the Commission has
proposed permitting an upward departure in fraud cases where the
defendant's conduct causes substantial nonmonetary harm. The
Commission also has asked for comment whether significant
nonmonetary harm should be a specific offense characteristic for
theft and fraud cases, resulting in a one- or two-level increase
in offense level severity.

We agree that there are cases in which the dollar amount
of the loss does not appropriately reflect the seriousness of the
defendant's crime. The theft of $50,000 from an elderly couple
with no other savings is properly viewed as a more serious crime
than a bank officer's theft of a like amount from a commercial
It is our view, however, that such differences are best handled by considering them on a case-by-case basis, rather than creating another specific offense characteristic. No further amendment is necessary; Application Note 10 to §2F1.1 already addresses these situations, and permits upward departure where the loss table "does not fully capture the harmfulness and seriousness of the conduct."

We are far more concerned with the plethora of cases in which the single-minded focus on financial loss overstates the seriousness of the defendant's crime. A major weakness of the current system, in our view, is that the Guidelines in theft and fraud cases do not distinguish sufficiently between defendants who are and who are not motivated by personal profit. The corrupt president of a savings and loan institution who steals $10,000,000 to line his pocket deserves a heavy sentence. But the assistant who aids and abets that president, perhaps only in order to keep their job, should not have the severity of his or her offense slavishly determined by the same "dollar loss" yardstick. We realize that in some cases (though by no means all), the assistant may merit a deduction for minor role in the offense. However, where the offense level already has risen out of sight because of the amount of loss involved -- loss that the assistant may not have desired, and from which they may not have profited -- the impact of the mitigating role adjustment is insubstantial.
The Commission already has taken note of a similar anomaly in narcotics cases. Proposed amendment No. 8 provides for a ceiling for lower-level defendants in drug cases, and the basis for the proposed amendment is, in part, as follows:

Commentators have argued that the guidelines over-punish certain lower-level defendants when the sentence is driven by the quantity of drugs involved in the offense. For such lower-level defendants, the quantity of drugs involved is often opportunistic and may be a less appropriate measure of the seriousness of the offense than when the defendant has assumed a mid-level or higher role.

We believe that precisely the same point applies to lower-level defendants in theft and fraud cases when the sentence "is driven by" the amount of financial loss that the case involves. Accordingly, we strongly endorse the suggestion of the Practitioners' Advisory Group, set forth at proposed amendment 38, that the Guidelines permit a downward adjustment where the defendant did not personally profit from the theft, and we believe that courts should be encouraged to depart downwardly in such cases. Likewise, we agree that there should be a cap on the offense level for minor or minimal participants whose sentences are determined with respect to the theft or fraud loss tables.
NEW YORK COUNCIL OF DEFENSE LAWYERS

PROPOSED AMENDMENT 23

Abuse of Position of Trust
(S3B1.3) -- guideline reformulated
to better distinguish intended scope
of adjustment for abuse of "special" trust

We strongly support the proposed amendment. The addition of the word "special" and the proposed additional Commentary make it plain that the "position of trust" necessary as a predicate for the enhancement may not be, for example, the ordinary employee-employer relationship (such as the relationship abused in ordinary embezzlement or postal employee theft cases)⁴ but rather must involve the abuse of a trust that has been specially placed in the defendant, a trust that does not involve a merely ministerial function.

In applying the current § 3B1.3, the courts have considered a number of factors, including (1) the extent to which the position of trust provided the freedom to commit a difficult-to-detect crime, United States v. Hill, 915 U.S. 502, 506-7 (9th Cir. 1990); (2) defendant's duties as compared to those of other

⁴ In this connection we strongly oppose proposed amendment 46, propounded by the United States Postal Service, precisely because it provides for an automatic enhancement for certain offenses, based exclusively on the status of the defendant (employee of the USPS) without regard to the particular circumstances of the offense or defendant. There is no reasoned basis to enhance the penalties for USPS employees, and for the same reason that the "ordinary bank teller" is not subject to enhancement, the "ordinary postal employee" should not be subject to enhancement.
employees, *United States v. Lange*, 918 F.2d 709-10 (8th Cir. 1990); (3) defendant's level of specialized knowledge, *United States v. Mulligan*, 958 F.2d 345, 346 (11th Cir. 1992); (4) defendant's level of authority in the position, *United States v. Gergiadis*, 933 F.2d 13219, 1227 (3d Cir. 1991); and (5) the level of public trust involved in the offense, *United States v. Rehal*, 940 F.2d 1, 5 (1st Cir. 1991). However, a large number of courts have struggled to apply the provision's general language, (which appears to focus on the abuse of any trust) with the exception carved out in the current Commentary for "embezzlement by an ordinary bank teller." See e.g. *United States v. Odoms*, 801 F. Supp. 59 (N.D. Ill. 1992).

To resolve that conflict many courts have turned to the analysis offered in *United States v. Hill*, *supra*, which applies only the first of the above-listed factors and seems to ignore the others, particularly those which focus on the nature of the position of trust in question.

We believe that the proposed amendment would encourage courts to apply all of the above-listed factors and, thus, would promote careful distinctions between those cases where the abuse of trust is critical to the commission of the crime and the extent of the harm to the victim from those cases where the abuse of trust is not central to the crime. It would induce the courts to examine all facts which speak to the question of whether the defendant's abuse goes beyond the ordinary elements of the crime in question.
However, it would do so without rejecting the useful (though not exclusive) analysis offered in United States v. Hill, supra. An amendment just to §§ 2B1.1 and 2B1.2 to deal with simple embezzlement cases (as suggested by the additional issue for comment) would not address the concern posed by the Hill case in an across-the-board manner. For example, such a limited amendment would leave simple mail fraud cases in which employees defraud their employers (where no "special" trust is abused) in the same posture as the simple embezzlement cases have been in under the current section. We do not believe the issues posed in the embezzlement cases are limited simply to embezzlement cases and would recommend a broader approach.

We urge the Commission to adopt the proposed amendment.

**PROPOSED AMENDMENT 20**

Money Laundering (Chapter Two, Part 5) -- consolidates §§2S1.1 and 2S1.2 and §§2S1.4 and 2S1.4; ties offense level closer to seriousness of offense

The NYCDL generally supports the proposed modifications to the money-laundering Guidelines. Money-laundering charges have become the latest "darling in the prosecutor's nursery"; given the breadth of the money-laundering statutes, and the government's prevalent threatened and actual use of those statutes in imaginative (and frequently inappropriate) ways, the existing base
offense levels clearly need to be changed in order to prevent manifest injustice.

We must question, though, why the base levels remain as high as they are even under the amendments. Under proposed Guideline § 2S1.1(a)(3), for instance, the base offense level for a defendant who launders money that has been stolen is "8" plus the number of offense levels from the fraud table. However, it is not evident that the defendant who laundered stolen funds should be punished more severely than the defendant who stole the money in the first place. The thief starts with a base level of "6", after which the fraud table comes into play. Additionally, for many defendants, including personnel at financial institutions, the amount of funds laundered (or the amount of funds not reported as required) may not be an appropriate measure of the seriousness of the crime. Courts generally should have the ability to depart downward where the dollars involved seriously overstate the magnitude of the defendant's offense.

Subject to these criticisms, however, we support the changes to the money-laundering Guidelines, and urge that the amendments be presented to Congress.
NEW YORK COUNCIL OF DEFENSE LAWYERS

PROPOSED AMENDMENT 21

Tax (Chapter Two, Part T) -- consolidates §§2T1.1, 2T1.2, 2T1.3, and 2T1.5; adopts uniform definition of tax loss

We endorse proposed amendment 21's efforts to simplify the tax Guidelines, and eliminate inherent confusion in their application. We also endorse the efforts made in this amendment to allow deviations from the pure percentage calculation of tax loss in appropriate circumstances by stating that the percentages are subject to a rebuttable presumption.

We oppose the additional issue for comment which asks whether the tax table levels should be increased one level to account for a change in the sentencing table which increased the available levels for probation. If a defendant is within levels 7 or 8 already, and the court believes some type of confinement (community or otherwise) is appropriate, the court has the authority to impose such a sentence. If the tax tables are increased in response to the changes in the sentencing tables, the salutary purpose of the change in the sentencing table -- to increase the number of defendants for whom straight probation is available -- will be lost since those defendants will no longer fall within the new ranges. In sum, we think the change is ill-advised and defeats the purpose of the 1992 amendment.
PROPOSED AMENDMENT 8

Drug Trafficking & Role in the Offense
(§§2D1.1, 3B1.2) -- provides offense level ceiling in drug trafficking guideline for defendants who receive a mitigating role adjustment

While we believe it entirely appropriate to limit the offense level for "lower-level defendants," as proposed § 2D1.1 would achieve, we question whether the proposed "cap" for defendants who receive a mitigating role adjustment, that is, level 32, is low enough to reflect the truly mitigated role that some lower-level poor and financially desperate defendants play in concerted activity.

For defendants who receive a "minimal role" adjustment, the "cap" should be even lower than for those who receive a minor role adjustment. Further, as suggested in other proposed amendments (specifically, 39 and 48), the "cap" should be lower depending on the type of controlled substance involved -- with a lower cap for less dangerous controlled substances. Such differentiation would further achieve the purposes of the proposed amendment in the first place, which is differentiating between defendants whose culpability is not appropriately measured by reference to whatever quantity of drugs may be involved, but rather by the economic and social circumstances in which they find themselves.
NEW YORK COUNCIL OF DEFENSE LAWYERS

While we reach no determination on the precise "cap" that ought to be applied in each circumstance (as to which experience under some "cap" may be the best guide), we do wish to comment on another aspect of the proposed change in the Guideline, which is unjustified regardless of whether there is a "cap" or not. Thus, the NYCDL strongly objects to the proposed Application Note 7 to the proposed revision of the Mitigating Role Guideline, § 3B1.2. Both proposed Options of the proposed Application Note specifically exclude from the class of defendants who are eligible to receive a mitigating role adjustment, any "defendant who is entrusted with a quantity of contraband for purposes of transporting such contraband (e.g., a courier or mule, not an offloader or deckhand)."

It is our view that this exclusion of all "mules," without regard to characteristics of the individual defendant and transactions is an unjustified exclusion. The culpability levels of any individual "mule" is not necessarily higher than other minimal participants in a narcotic distribution scheme. More significantly, the exclusion is entirely inconsistent with Proposed Application Note 5, which lists characteristics "ordinarily . . . associated with a mitigating role" that can be said to apply to many courier-defendants, and with Note 3, which directs that, whenever certain characteristics exist, a minimal role adjustment is appropriate. When such characteristics exist with a "mule"-
defendant, there is no valid reason to deny a minimal role adjustment as to that defendant too.

Proposed Application Note 3 thus provides that the 4-level reduction "applies" to a defendant who is "one of the least culpable of the participants in the criminal activity," and that, to be considered one of the least culpable, such defendants "ordinarily must have all of the characteristics consistent with a mitigating role listed in Application Note 6 below." Application Note 6 provides that no defendant is entitled to a mitigating role adjustment if he or she

(a) sold, or played a substantial part in negotiating the terms of the sale . . . ;

(b) had an ownership interest in any portion of the contraband; or

(c) financed any aspect of the criminal activity.

Application Note 3 also suggests consideration -- "though not determinative" -- of the fact of a defendant's "lack of knowledge or understanding of the scope and structure of the criminal activity and of the activities of others" in determining whether a defendant played only a "minimal role."

In our experience, many mule-defendants -- generally including the "intestinal tract smugglers, a class of defendant often seen in the Districts in which we practice -- meet the qualifications of Application Notes 3 and 6. Indeed, the vast majority of these defendants are not sellers or negotiators of the
terms of any sale, have no ownership interest, and have not financed the transaction. Indeed, the vast majority of the defendants we encounter in the Districts in which we practice are from foreign countries, often from rural environments, who are driven by some of the worst economic hardship to undertake activity of the most offensive and dangerous nature (swallowing drugs), and who have no idea of American culture or of the significance and effect of their conduct on our American culture. Not only do they have no "knowledge or understanding of the scope and structure of the criminal activity and of the activities of others," as Application Note 3 discusses, but they are exploited by traffickers who lie to them about quantity so that they can underpay them for their piecemeal work.

Not only do these individuals meet the qualifications of Application Note 6 for "minimal role" attribution, but they also meet the qualifications of Application Note 5. That Note provides "a non-exhaustive list of characteristics that are ordinarily associated with a mitigating role," as follows:

(a) the defendant performed only unskilled and unsophisticated tasks;
(b) the defendant had no decision-making authority or responsibility;
(c) total compensation to the defendant was small in amount, generally in the form of a flat fee; and
(d) the defendant did not exercise any supervision over other participant(s).
While there may be mule-defendants who possess none of these qualifications (or not all of them), the vast majority meet the characteristics which the Note recognizes as defining "the least culpability." The task they perform is not only unskilled and unsophisticated, but it is disgusting and dangerous. There is no decision-making responsibility on the part of these individuals at all, and indeed, most are escorted to the airport in the foreign country of origin and met in this country at the airport. They are totally supervised, and not supervisory in any sense of the word. And though the compensation paid to these defendants is often dependent on weight, it is small compensation, and, because the principals wish to limit their financial outlay, they often lie to the mules about the weight they are carrying. In a weight-driven scheme of sentencing, culpability is often overstated for this reason alone.

There is no reason to deny an adjustment to a courier as a matter of justice because the characteristics set forth elsewhere to qualify criminal conduct applies no less to a courier who fits the characteristics, than to any other participant in a drug operation who possesses these characteristics. There is no reason to deny the adjustment as a matter of policy because, as a very real matter, there is no real deterrent effect of increasing the sentence for the many foreign offenders who have no knowledge or understanding of the laws, or of the risk that they take in performing the task of carrying drugs. (Indeed, though there are
repeat couriers, we have rarely, if ever, seen a defendant who is a "second-offender" courier.)

In sum, because most couriers, including almost all intestinal tract smugglers, meet all of the inclusive definitions of minimal role, and none of the exclusions, it makes no sense to have a categorical bar to treating them as any other defendant.

**PROPOSED AMENDMENT 9**

Drug Trafficking (§2D1.1) -- reduces upper limit of Drug Quantity Table; adds adjustments to further reflect defendant culpability and risk of harm

We endorse the concept of reducing the upper limit of the Drug Quantity Table. We believe that adjustments by virtue of specific offense characteristics more appropriately deal with gradations of seriousness in offenses than increases due solely to quantity of drugs involved.

As to the suggested adjustments for firearm possession and use, we oppose any expansion of the adjustment from the current 2-point adjustment to 4 or 6 points. This adjustment could potentially alter a defendant's sentence by some 150%. Such a huge adjustment is inappropriate where the adjustment is based on conduct that constitutes a separate substantive offense, as these firearms adjustments do. Use of a firearm during a drug transaction could be charged as a violation of 18 U.S.C. 924(c). Discharge could be charged as attempted murder or assault, if
warranted. Causing injury could be charged as assault or attempted murder, and killing someone as murder.

The impact of transferring separate substantive offenses into offense characteristics is to dilute the government's burden of proof. We believe that substantive crimes, such as those represented by the firearms adjustments, should be tried to factfinders with the standard trial burden of proof and with the evidentiary protections that Due Process require in a criminal trial.

Accordingly, we oppose the portion of proposed amendment 9 (and the similar portion in proposal 39, which we separately address, infra, at pp. 29-31) that would allow firearms enhancements ranging from 2 to 6 points. We all agree that those who brandish or fire guns should be punished severely, but we believe that they should be tried and convicted for the offense first.

We further believe that there should be no adjustment when a defendant has been convicted of § 924(c) or any substantive offense that is premised on the use of a weapon in a drug transaction. Additionally, we believe that, wherever there is an adjustment because of the use or discharge of a weapon, the adjustment should be applied, as proposed amendment 39 suggests, only when the defendant himself "actually possessed" or discharged the gun, or where he "induced or directed another participant" actually to do so. Given the statements of various courts that
"guns are tools of the narcotics trade", any adjustment that is not so limited is potentially abusive in its overinclusiveness.

We also approve of the decrease for defendants who "did not own or sell the drugs, did not exercise decision-making authority, did not finance the operation, and did not use relevant special skills." We would not approve any limitation on the type of defendant for whom that decrease could be made -- specifically, the limitations in other proposed amendments for couriers. Where such couriers -- or indeed any participant -- in drug activity meets the criteria for a decrease, the court should have discretion to award the decrease regardless of whether the defendant "carried" the drugs or not, for the same reasons as are stated in our comments to proposed amendment 8.

We also oppose the sliding scale of upward adjustments for a defendant who was "the principal organizer or leader of the criminal activity or was one of several such principal organizers or leaders," based on the number of participants "involved." Aside from the difficulty in counting "participants," we believe that the number of participants "involved" does not necessarily increase true culpability, unless the defendant was responsible for procuring the participation of those others. The quality of the leadership function, rather than the absolute number of followers, is, we think, the better measure of culpability.
NEW YORK COUNCIL OF DEFENSE LAWYERS

PROPOSED AMENDMENT 39

Drug Trafficking and Role in the Offense ($§2D1.1, 3B1.2) -- revises drug and role guidelines by reducing maximum offense level in drug quantity table, adding enhancements for weapon usage and high-level organizers, and capping offense levels for defendants receiving mitigating role adjustments; increases reduction for minimal participants.

As with proposed amendment 8, we agree that there should be a "cap" for those who qualify for a mitigating role adjustment. We approve of a lower "cap" where less dangerous controlled substances are involved, as this proposal provides.

As we stated in our comment to proposal 9, we oppose expansion of the firearm enhancement from the current 2 points to a 6-point range. We believe that for such substantial adjustment to be applied for conduct that in essence constitutes a separate crime, the defendant should first be tried and convicted for the offenses.

We further believe, however, as stated in our comment to proposal 9, that any adjustment for weapon use should focus on what the defendant himself did -- not on whether weapons "were used". In this regard, this proposed amendment, number 39, is far better than 9, because it indicates that an adjustment should apply only where the defendant himself possessed a weapon, or where he is equally culpable because he "induced or directed another participant" to actually do so. Given the by now-familiar
maxim that guns are tools of the trade, "looser" language, that does not focus on individual conduct, has the potential to add points to defendants who are not truly culpable for the offending weapons conduct.

As with proposal 9, we disagree with an increase for a principal organizer or leader of criminal activity "that involved 15 or more participants." Where the organizer or leader does not himself bring in participants, the exact number of participants may not be a fair measure of actual culpability.

Finally, we oppose a 2-level increase for a defendant who qualifies for an aggravating role adjustment where he or she "obtained substantial income or resources" from the criminal activity. First, the use of this definition in essence constitutes "double counting." Larger quantities entail large profits, and also higher offense levels. So, an increase keyed to profits counts the same increase in culpability that is already accounted for in increased offense levels.

Moreover, when applied to convictions premised on § 848 -- which includes such an element of the obtaining of "substantial income or resources" -- there is also a factor of double counting. For these reasons, we oppose the adjustment.

Further, the term is too ambiguous for proper application. A proposed Application Note 16 would direct a court that must interpret "substantial income or resources" to refer to the law that has developed under 21 U.S.C. § 848(c)(2)(B). Cases
interpreting those words, however, have shown that the term is ambiguous. For instance, the Second Circuit held in one case that the sum of $2000 constituted "substantial income or resources" sufficient to render § 848 applicable. United States v. Losada, 674 F.2d 167 (2d Cir. 1982). If $2000 constitutes "substantial income or resources," then anything can be, and the term is too ambiguous for legitimate use.

This proposed amendment also contains three different mitigating role adjustments instead of two -- or actually, five adjustments, since the proposal contemplates cases "falling between" the adjustment levels provided. While we applaud larger decreases for truly minimally-involved defendants, we wonder how a "significantly minimal participant" is different from a "minimal participant." We would welcome the amendment, however, so that a district judge can exercise this added discretion in an appropriate case.

To the extent that the proposed application note 7 provides that a defendant who transports contraband "shall not receive" any of the mitigating role adjustments as to the amount of contraband transported, we object for the reasons expressed in our comment to proposed amendment 8, supra, pp. 21-26; couriers are, in fact, often "minimally" involved, even if they carry contraband.
NEW YORK COUNCIL OF DEFENSE LAWYERS

PROPOSED AMENDMENT 48

Drug Trafficking (§2D1.1) --
established ceiling on offense levels
for minor and minimal participants

We again approve of the concept of a "cap" for minor and minimal participants. This proposal specifically sets forth lower caps for those minimally involved than for those who are minor participants, and specifically sets forth lower caps for certain kinds of controlled substances. We approve of these further distinctions, and favor the formulation in this proposal over the others. These proposals promote the policy of the Guidelines in recognizing further distinctions based on the level of participation of the defendant and the nature of the controlled substance involved.

PROPOSED AMENDMENT 60

Mitigating Role (§3B1.2) --
prohibits mitigating role adjustments
for defendants held responsible under relevant conduct only for the quantity of drugs in which they actually trafficked

For the same reasons as are expressed in our comment to proposal 87, we object to this DOJ proposal, which prohibits any mitigating role adjustment as to drugs "in the defendant's actual possession."
NEW YORK COUNCIL OF DEFENSE LAWYERS

PROPOSED AMENDMENT 51

Drug Trafficking (§2D1.1) -- clarifies that term "cocaine base" means "crack"

We specifically endorse this proposal, because it remedies a defect in both the Guidelines and the statutes. It is clear that Congress and the Commission meant to punish "crack" offenses more heavily than other offenses. At present, "crack" is subsumed into the term "cocaine base." There is, however, another substance that falls within the definition of "cocaine base" which, unlike crack, is a precursor to cocaine, and is unlike crack in nature or dangerous effect.

We strongly believe that, regardless of any other amendments, the Commission should adopt this amendment, to make it clear that it is "crack" to which heavier penalties are meant to apply, not the type of cocaine base that is also covered by present definitions.

ISSUES FOR COMMENTS 24, 31 AND 47:

Modification or deletion of Government motion requirement for 5K1.1 downward departure

We strongly endorse issues for comment 31 and 47, which would eliminate the need for a government motion as a predicate for a § 5K1.1 "substantial assistance" departure. Access to this most important of departures should not be controlled by the
prosecution. While we applaud the Commission's solicitation of comment in this area (see issue for comment 24), we do not agree with its suggestion that elimination of government control might be limited to cases involving non-violent first offenses. We believe that courts are fully able to assess the extent and value of a defendant's cooperation, and that the nature of the crime and the offender's history should not preclude the court, in appropriate cases, from adjusting the sentence downward.

PROPOSED AMENDMENTS 25 AND 36

Standards of Acceptance of Plea Agreements (§6B1.2) -- adds commentary recommending that the government disclose to the defendant information relevant to application of the guidelines prior to entry of a guilty plea.

We endorse proposed amendments 25 (Commission) and 36 (Practitioner's Advisory Group) regarding disclosure by the government of information known to it in the context of plea discussions so the parties can have a realistic perception of probable sentencing outcomes. This practice is already encouraged in the Second Circuit by virtue of that Court's suggestions in United States v. Pimental, 932 F.2d 1019, 1034, (2d Cir. 1991), and as practitioners in the Second Circuit we have found it extremely helpful in plea discussions. By engaging in those discussion many factual disputes between the parties have been resolved, eliminating the necessity of pre-sentencing factual
hearings, and defendants have been able to enter the plea process with some level of knowledge of the likely sentence.

Dated: New York, New York
March 12, 1993

Respectfully submitted,

NEW YORK COUNCIL OF DEFENSE LAWYERS
530 Fifth Avenue
New York, NY 10036
United States Sentencing Commission  
One Columbus Circle, NE, Suite 2-500 South Lobby  
Washington, D.C. 20001

Dear Sirs/Mesdames,

For the past five years I have served as an expert on the subject of marijuana cultivation, intent and yield in both federal and state courts. Before that, I studied the plant, cannabis, for over fifteen years. As a result of my study and research I have come to the conclusion that federal sentencing in marijuana cultivation cases is inappropriate and unjust. In addition it does not accomplish any of the purposes for which it has been promulgated.

The Guidelines were created to develop a more uniform method of sentencing for offenses of equal magnitude. The Guidelines, as they pertain to marijuana cultivation do not accomplish this goal. Instead, they create a system of arbitrary and capricious punishment, not justice.

In order to have a clear understanding of the effects of the sentencing regulations as they affect marijuana growers it is helpful to have an understanding of marijuana’s botany as it relates to yield, cultivation techniques, patterns of personal use and sales and intent.

Botanically, marijuana is considered a short day or long light plant. That means that its flowering cycle is triggered when the plant receives between 8-12 hours of uninterrupted darkness each evening. Two plants of the same variety, one a seedling and one a large, older plant will both flower at the same time if given the same long night regimen. One implication of this is that plants grown outdoors will flower at a given time during the season no matter what size they are.

Once the plants begin to flower, they stop new growth of branches and stem. Instead, all of the new growth consists of flowers in the male, which then dies, or the flowers of the unpolinated female. If the female remains unpollinated it continues to grow new flowers which spread along the branches and develop into thick masses commonly called buds or colas. Should the female flowers be pollinated, which occurs through wind pollination in nature, the plant stops growing new flowers and instead devotes its energy to developing seeds.
TO: United States Sentencing Commission  
FROM: Ed Rosenthal  
March 14, 1993

Marijuana is a dioecious plant, there are separate male and female plants. Males make up half the population. The male is removed from the garden to prevent pollination of the females as soon as its sex is detected. The plant is discarded. If a garden is seized one day, the plant count might be much higher than the next day after males are removed.

Marijuana users prefer to smoke sinsemilla because it produces more weight of useable material and is easier to prepare for use than seeded flowers. The seeds cannot be used for intoxicating purposes and are commonly thrown away.

The size and yield of the plant is dependent on several factors.

1.) Variety.

Since there is no central source for seed, varieties have not been standardized as they have for commercial vegetable and flower crops. Growers either use seed that they have found in marijuana they bought for use, in the same way that a person might start a plant from an avocado pit, or find a source of seeds or cuttings. When they need new plants, they then use seeds which they have produced. Because of this each grower eventually has his/her own distinct variety. There are literally thousands of varieties and each has its own potential yield and prime conditions, climate and weather, gardening technique, water conditions, and date of planting.

2.) Cultivation Technique

No matter what the potential of a particular plant’s genetics, cultivation processes determine the actual yield of a particular plant.

A.) Plants which are grown close together stunt side growth so that each has smaller buds with less branching than it would grow given more space. Unreleased DEA studies on spacing and yield confirm this. In these experiments, plants were placed on 6 foot centers (about 36 square feet) and yielded just one pound of bud per plant. A typical indoor garden may be the same size as the single plant grown by the DEA, six by six feet, a total of 36 square feet.

Rather than trying to grow large plants, growers often use a method dubbed, "sea of green". Plants are started four or more per square foot and are never intended to grow out of that space. This garden may have plants growing at the density of four plants per square foot, a total of 144 plants. Each plant would have a maximum yield under ideal conditions with a high yielding variety of only about one half ounce. The maximum yield of the garden would be four and a half pounds. If the grower were reproducing plants using cuttings, a small tray of them, with a size of less than two square feet, could contain 36 plants.
B.) Plant growth and yield is determined in part by the amount of water the plant receives. Less water results in smaller growth. This is especially important in gardens which receive no irrigation. In parts of the country, there is no water for long periods during the growing cycle. This results in very small plants. Indoors, plants are often over watered, resulting in poor growth.

C.) Plants receiving low light or too intense a light have lower yields than plants receiving optimum light. Because of the necessarily surreptitious nature of growing operations and the need for them to remain hidden, plants are often grown in less than ideal conditions. They are often hidden under the shade of trees or in other areas where they do not receive direct sunlight. Plants receiving these conditions will grow much smaller than plants receiving direct sunlight. In areas of the country where the sun is very intense, plants will be stunted from over-radiation. Indoors, growers often try to grow plants using inadequate lighting, resulting in very low yields.

D.) Outdoors, late planting results in smaller plants, because the plants of a single variety flower at the same time no matter the size. Surreptitious growers often plant late so that there is less time for the plants to be detected and so that stay small, making detection less likely. Indoors, growers using the "sea of green" force the plants to flower when they are only 18 inches high. At maturity, the plants are only two to three feet tall, with no branching and a yield of only one half ounce.

3.) Conditions

A.) Soil fertility and fertilizing regimen plays a part in growth of plants. Plants receiving inadequate nutrients have smaller yields than those obtaining adequate amounts. No two farmers use exactly the same techniques, so each will have different results.

B.) Temperatures which are too high or too low retard both growth and yield. This affects all outdoor crops. Indoors, gardeners often find it difficult to control temperatures because of the heat generated by high intensity of the lights needed for indoor cultivation.

C.) Very high or low humidity lowers the growth rate and yield of the plant by slowing photosynthesis. This leads to lower yields.

D.) Rain may destroy a crop if it occurs close to harvest time because the ripening buds are susceptible to mold under conditions of high humidity and moisture. Once attacked the bud can be destroyed by the spreading fungus overnight.

March 14, 1993

Lowering Level 42 through 24 as proposed (Sec 2D1.1) is a step in the right direction. The offense levels for what is now Levels 22-26 should also be reduced. Even a 2 point reduction would make the sentencing more appropriate.

The Guidelines should also be amended so that the court can consider downward departures based on mitigating circumstances for marijuana crimes of Level 12 and under. Penalties other than incarceration should be considered for first time offenders in these cases. This would free the courts of many small and relatively minor cases as well as limiting the possibility of these offenders mingling with hardened criminals.

## CONTENTS

### I. Scope of chapter; sentence authorities

1. Scope of chapter
2. The legislative function
3. The intermediate function; guided judicial discretion
4. The sentencing function; abolition of jury sentencing; sentencing councils; appellate review of sentences

### II. Public policy legislative choices

A. Societal purposes
   1. Multiple purposes; consequential and retributive approaches
B. Types of sanctions
   2. Types of sanctions authorized
C. Costs and resources
   3. Costs of criminal sanctions; resources needed
D. Severity of sanctions
   4. Severity of sentences generally
E. Determinacy, disparity and individualized sentences
   5. Determinacy and disparity
   6. Individualization of sentences
F. Systemic Review
   7. Systemic review
III. Legislatively authorized sentences

A. Legislative framework generally

1. Current offense sentences
   - 3.1. Ordinary offenses and offenders
   - 3.2. Mitigating factors
   - 3.3. Definition of offenses; aggravating factors
   - 3.4. Personal characteristics of individual offenders

2. Criminal history of offenders
   - 3.5. Criminal history: recidivism

3. Simultaneous sentences for more than one offense
   - 3.6. Offense of conviction as basis for sentence
   - 3.7. Convictions of multiple offenses
   - 3.8. Multiple offenses in different jurisdictions

4. Offenders' conduct in response to charges as affecting sentence
   - 3.9. Acknowledgement of responsibility
   - 3.10. Cooperation with prosecution

B. Legislation as to types of sanctions

1. Authorization and use
   - 3.11. Authorization of sanctions
   - 3.12. Use of authorized sanctions; guidance to sentencing courts

2. Compliance programs
   - 3.13. Compliance programs for individuals
   - 3.14. Compliance programs for organizations
3. Economic sanctions
3.15. Restitution or reparation
3.16. Fines
3.17. Community service
4. Acknowledgment sanctions
3.18. Acknowledgment sanctions
5. Intermittent confinement sanctions
3.19. Intermittent confinement in facility
3.20. Home detention
6. Total confinement
3.21. Total confinement
3.22. Costs, fees, and assessments

IV. The intermediate function

A. General
4.1. Basic responsibilities of the agency performing the intermediate function

B. The intermediate function and a sentencing commission
4.2. Establishment of sentencing commission
4.3. Creation of provisions to guide sentence discretion
4.4. Structure of provisions to guide sentence discretion

C. The intermediate function in the absence of a sentencing commission
4.5. Legislative agency to perform the intermediate function
4.6. Judicial agency to perform the intermediate function
## Sentencing procedures

### A. Information base

5.1. Information for sentence determination and system accountability

### B. Presentence reports

5.2. Requirement of report
5.3. Substantiation of information
5.4. Contents of report
5.5. Timing of investigation and report
5.6. Confidentiality of presentence report
5.7. Disclosure of report to parties
5.8. Disputes regarding information in report; stipulations; presentence conferences

### C. Victims' rights in sentencing

5.9. Notice to victims
5.10. Victims' statements prior to sentencing hearings
5.11. Victims' statements at sentencing hearings
5.12. Evidentiary effect of victims' statements

### D. Sentencing proceedings

5.13. Designation of sentencing judge
5.14. Time of sentencing
5.15. Notice of possible departure from presumptive sentence
5.16. Consolidation of multiple offenses for sentencing; disposition of other charges
5.17. Sentencing hearing
5.18. Findings of the sentencing court
5.19. Imposition of sentence
5.20. Record of sentencing proceedings
5.21. Sentence reports
VI. Sentencing discretion

6.1. General principles

6.2. Considering types of sanctions; composite sentences

6.3. Using presumptive sentences: mitigating and aggravating factors and personal characteristics of individual offenders

6.4. Sentencing to total confinement

6.5. Sentencing for more than one offense

VII. Change of sentence

A. Reduction in severity or modification

7.1. Authority to reduce the severity of sentences

7.2. Authority to modify requirements or conditions of sentences in light of changed circumstances

B. Resentences following violation of initial sentences

7.3. Legislative authority to resentence offenders for violation of the requirements or conditions of sentences

7.4. Procedures regarding violations of requirements or conditions of sentences

VIII. Appellate review of sentences

8.1. Jurisdiction to review sentences; reviewing courts

8.2. Purposes of appellate review

8.3. Appeals by defense or prosecution

8.4. Disposition by reviewing court

IX. Disputed terms of total confinement

9.1. Mechanism for resolving disputes about the length of a total confinement sentence
PART I. SCOPE OF CHAPTER; SENTENCE AUTHORITIES

Standard 18-1.1. Scope of chapter

(a) This chapter deals with sentencing of adult individuals or organizations convicted of felonies and misdemeanors [for which an individual offender may be sentenced to total confinement for six months or more].

(b) This chapter does not deal with capital punishment.

(c) This chapter does not deal with sentencing of juvenile offenders unless those offenders are tried and convicted as adults.

(d) This chapter does not deal with commitments to institutions for treatment programs, whether characterized as criminal or civil, unless a commitment is a part of a sentence imposed following conviction for an offense.

(e) This chapter does not deal with sentencing by military justice tribunals.

Standard 18-1.2. The legislative function

(a) The legislature and executive should determine the public policies of sentencing and enact the statutory framework for the sentencing system. The legislative function is performed best by statutes that articulate the societal purposes in sentencing, define the authorized types of sanctions, and set the maximum limits of those sanctions.

(b) The legislature and executive should establish the organs of government necessary to implement the legislatively determined policies within the legislative framework and delegate to them the powers appropriate to their roles.

Standard 18-1.3. The intermediate function; guided judicial discretion

(a) The legislature should create or empower a governmental agency to transform legislative policy choices into more particularized sentencing provisions that guide sentencing courts. The agency should also be charged with responsibility to collect, evaluate and disseminate information regarding sentences imposed and carried out within the jurisdiction. Guidance of judicial discretion in sentencing and development of an information base about sentencing are the basic aspects of what these Standards describe as "the intermediate function."
(b) The intermediate function should be performed by an agency with state-wide authority. The intermediate function is performed most effectively through a sentencing commission.

(c) If a jurisdiction elects not to create a sentencing commission, the legislature should either undertake the intermediate function itself or designate another organ of government to do so. If the function is delegated to the judicial branch, it should be made the responsibility of the highest state court or a state-wide judicial conference.

Standard 18-1.4. The sentencing function; abolition of jury sentencing; sentencing councils; appellate review of sentences

(a) Imposition of sentences is a judicial function to be performed by sentencing courts. The function of sentencing courts is to impose a sentence upon each offender that is appropriate to the offense and the offender. The jury's role in a criminal trial should not extend to determination of the appropriate sentence.

(b) Sentencing courts may convene councils, composed of judges sitting on a sentencing court, as advisory panels to develop common criteria for sentencing decisions and to assist individual judges in determining the appropriate sentences in particular cases.

(c) The highest court of the state, if authorized to promulgate rules of criminal procedure, should establish rules for pre-sentence and sentencing proceedings.

(d) Review of sentences imposed by sentencing courts is a judicial function to be performed by appellate courts.

PART II. PUBLIC POLICY LEGISLATIVE CHOICES

A. Societal Purposes

Standard 18-2.1. Multiple purposes; consequential and retributive approaches

(a) The legislature should consider at least five different societal purposes in designing a sentencing system:

(i) To foster respect for the law and to deter criminal conduct.
(ii) To incapacitate offenders.
(iii) To punish offenders.
(iv) To provide restitution or reparation to victims of crimes.
(v) To rehabilitate offenders.

(b) Determination of the societal purposes for sentencing is a primary element of the legislative function. The legislature may be aided by the agency performing the intermediate function.

B. Types of Sanctions

Standard 18-2.2. Types of sanctions authorized

(a) The legislature should enact a criminal code that authorizes imposition of the following types of sanctions upon persons convicted of offenses:

(i) Compliance programs. Compliance programs are sanctions intended to promote offenders' future compliance with the law. For individuals, compliance programs involve control or supervision of offenders within their communities, such as probation. For organizations, compliance programs may involve supervision or change in the management or control of an offender.

(ii) Economic sanctions. Economic sanctions include fines, monetary awards payable to victims, and mandatory community service. The legislature should not authorize imposition of economic sanctions for the purpose of producing revenue.

(iii) Acknowledgment sanctions. Acknowledgment sanctions include court-ordered communications to the public at large, or to particular classes of persons, of information about offenders' convictions and other facts about the offenses.

(iv) Intermittent confinement. Intermittent confinement is confinement during specified hours in a local facility or in an offender's residence.
(v) **Total Confinement.** Total confinement is incarceration in a federal, state, county, or municipal institution.

(b) The legislature should be receptive to the development and use of new sanctions not set forth in these standards.

(c) The legislature should enact an adult community corrections act to facilitate the establishment of a comprehensive adult community corrections program. The Model Adult-Community Corrections Act is a suggested example.

## C. Costs and Resources

**Standard 18-2.3. Costs of criminal sanctions; resources needed**

(a) In designing or changing the criminal justice system, the legislature should consider financial and other costs of carrying out sentences imposed. For this purpose, the legislature should ensure that it receives a "sentencing impact statement" before it enacts new provisions in the criminal code.

(b) The legislature should appropriate the operating and capital funds necessary for each part of the sentencing system to perform its prescribed role. In particular, the legislature should provide adequate funding for alcohol and drug treatment programs.

(c) Presumptive sentences ideally should not be determined on the basis of funds or resources available.

(d) The legislature should recognize the consequences of not appropriating necessary funds, including the possibility that offenders will not serve appropriate and just sentences.

(e) In the event that the legislature fails to provide necessary funds, the agency performing the intermediate function should see that the aggregate of sentences imposed in conformity with legislative policies does not exceed the facilities and services provided for proper execution of those sentences. In particular, the aggregate of sentences to total confinement should not exceed the lawful capacity of the prison and jail system of the state.
D. Severity of Sanctions

Standard 18-2.4. Severity of sentences generally

The legislature should ensure that maximum authorized levels of severity of sentences and presumptive sentences are consistent with rational, civilized and humane values. Sentences authorized and imposed, taking into account the gravity of the offenses, should be no more severe than necessary to achieve the societal purposes for which they are authorized.

E. Determinacy, Disparity and Individualized Sentences

Standard 18-2.5. Determinacy and disparity

(a) The legislature should create a sentencing structure that enables the agency performing the intermediate function to make reasonably accurate forecasts of the aggregate of sentencing decisions, including forecasts of the types of sanctions and severity of sentences imposed, so that the legislature can make informed changes in sentence patterns through amendment of the criminal code, or the agency can do so through revised guidance to sentencing courts.

(b) The legislature should create a sentencing structure that sufficiently guides the exercise of sentencing courts' discretion to the end that unwarranted and inequitable disparities in sentences are avoided.

Standard 18-2.6. Individualization of sentences

(a) The legislature should authorize sentencing courts to exercise substantial discretion to determine sentences in accordance with the gravity of offenses and the degree of culpability of particular offenders.

   (i) Sentencing courts should be permitted to take into account facts and circumstances concerning the offense or the offender that constitute aggravating or mitigating factors.

   (ii) Neither the legislature nor the agency performing the intermediate function should assign specific weights to aggravating or mitigating factors.

(b) The legislature should authorize sentencing courts, sentencing individual offenders, to take into account personal characteristics not
material to their culpability that may justify imposition of a different type of sanction or, in limited circumstances, a sentence of lesser severity than would otherwise be imposed.

F. Systemic Review

Standard 18-2.7. Systemic review

(a) The legislature should ensure that valid, current data are compiled on the operation of the criminal justice system, including data on the use and efficacy of each type of sanction.

(b) At least once every ten years, the legislature should re-examine legislative policies regarding sentencing in light of the pattern of sentences imposed and executed.

PART III. LEGISLATIVELY AUTHORIZED SENTENCES

A. Legislative Framework Generally

1. Current Offense Sentences

Standard 18-3.1. Ordinary offenses and offenders

(a) For each offense, the agency performing the intermediate function should guide sentencing courts to the presumptive sentence, i.e., the level of severity of the sentence and the permissible types of sanctions to be imposed in the ordinary case. For cases that are not ordinary, the legislature or the agency should establish criteria for imposing sanctions of more or less severity, or of different types of sanctions. Such criteria should include the factors aggravating or mitigating the gravity of offenses, the degree of offenders' culpability, and personal characteristics of individual offenders that may be taken into account.

(b) Presumptive sentences may be expressed in terms of ranges of severity of sanctions.
Standard 18-3.2. Mitigating factors

(a) The legislature or the agency performing the intermediate function should identify factors that may mitigate the gravity of an offense or an offender’s culpability in commission of the offense.

(b) The agency performing the intermediate function should guide sentencing courts, upon finding that one or more of the mitigating factors is present in a case, in the use of discretion to choose a level of severity or type of sanction different from the presumptive sentence for an ordinary offense by an ordinary offender.

(c) Mitigating factors should not be assigned specific weights by statute or by guidance to sentencing courts.

(d) When presumptive sentences are expressed in ranges of severity, sentencing courts should be guided to consider mitigating factors in determining sentences within the range and, if the factors are substantial, in departing downward from the range.

Standard 18-3.3. Definition of offenses; aggravating factors

(a) The legislature should define offenses so that important factors determining the gravity of offenses are made elements of the offenses rather than aggravating factors to be considered only in sentencing.

(i) The legislature should categorize offenses in which an act of violence is an element separately from similar non-violent offenses so that the levels of severity of authorized and presumptive sentences are appropriate for each type of offense.

(ii) For offenses in which the gravity of the offense varies with the amount of money or quantity of goods, the legislature should differentiate offenses by including amounts or quantities as elements of the offenses.

(b) The legislature or the agency performing the intermediate function should identify factors that may aggravate the gravity of an offense or an offender’s culpability in commission of the offense.

(c) The agency performing the intermediate function should guide sentencing courts, upon finding that one or more of the aggravating factors is present in a case, in the use of discretion to choose a level of severity or type of sanction different from the presumptive sentence for an ordinary offense by an ordinary offender.
(d) Aggravating factors should not be assigned specific weights by statute or by guidance to sentencing courts.

(e) When presumptive sentences are expressed in ranges of severity, sentencing courts should be guided to consider aggravating factors in determining sentences within the range and, if the factors are substantial, in departing upward from the range.

Standard 18-3.4. Personal characteristics of individual offenders

(a) The legislature and the agency performing the intermediate function should authorize sentencing courts, sentencing individual offenders, to consider their physical, mental, social and economic characteristics, even though not material to their culpability for the offenses, only as provided in this Standard.

(b) The legislature and the agency should permit sentencing courts to use information about offenders' financial circumstances for the purpose of determination of the amount or terms of fines or other economic sanctions.

(c) Except as provided in (b), the legislature and the agency should provide that sentencing courts may take into account personal characteristics of offenders not material to their culpability to determine the appropriate types of sanctions to impose or, if the characteristics are indicative of circumstances of hardship, deprivation, or handicap, to lessen the severity of sentences that would have been imposed.

(d) The legislature should specify that the following personal characteristics shall not, in and of themselves, be used for this or any other purpose with regard to sentencing:

(i) Race,
(ii) Gender or sexual orientation,
(iii) National origin,
(iv) Religion or creed,
(v) Marital status,
(vi) Political affiliation or belief.
2. Criminal History of Offenders

Standard 18-3.5. Criminal history; recidivism

(a) The legislature should authorize more severe sentences for convicted offenders with prior convictions. The extent of enhancement should be reasonably related to the sentence severity levels authorized for the offense of conviction.

(b) Standards for enhancement of sentence on the basis of criminal history should take into account the nature and number of prior convictions and the time elapsed since an offender's most recent prior conviction and completion of service of sentence. The legislature should fix time periods after which offenders' prior convictions may not be taken into account to enhance sentence; these periods may vary with the nature of the prior offenses.

(c) The agency performing the intermediate function should guide sentencing courts to the appropriate weight to be given to an offender's criminal history.

(d) If a jurisdiction has an "habitual offender" statute or comparable law regarding recidivists, the statute should provide that sentences imposed because of prior convictions should be reasonably related in severity to the level of sentence appropriate for the offense of current conviction.

3. Simultaneous Sentences for More than One Offense

Standard 18-3.6. Offense of conviction as basis for sentence

The legislature and the agency performing the intermediate function should provide that the severity of sentences and the types of sanctions imposed are to be determined by sentencing courts with reference to the offense of conviction in light of defined aggravating and mitigating factors. The offense of conviction should be fixed by the charges proven at trial or established as the factual basis for a plea of guilty or nolo contendere. Sentence should not be based upon the so-called "real offense," where different from the offense of conviction.
Standard 18-3.7. Convictions of multiple offenses

(a) The agency performing the intermediate function should direct sentencing courts to impose on any offender convicted of multiple offenses a consolidated set of sentences that appropriately takes into account all of the offender's current offenses.

(b) For offenses that are part of a criminal episode,

(i) convictions of offenses whose elements substantially overlap should be merged for sentencing,

(ii) sentencing courts should not change the type of sanction or increase the severity of sentences for multiple offenses merely as a result of the number of counts or charges made from a single episode, and

(iii) where the separate offenses are not merged for sentencing, sentencing courts should impose sentences of a type of sanction and level of severity that take into account the fact that the separate offenses occurred as part of an episode.

(c) If multiple offenses are of a kind that is graded by the amount of money or property involved, sentencing courts should be authorized and guided to determine the appropriate sentence by treating the offenses as a single offense and measuring its gravity by cumulating the amounts of money or property in the separate offenses.

(d) Upon conviction of an offender for multiple offenses not within (b) or (c), the presumptive sentence should be derived by reference to the sentence appropriate for the most serious offense. If the court determines that an enhanced sentence is appropriate because of the other current offenses, the enhancement should ordinarily be determined as if the other current offenses were treated as part of the offender's criminal history or as factors aggravating the most serious offense.

(e) Sentencing courts, sentencing an offender who is subject to service of a prior sentence, should be authorized and guided to take into account the unexecuted part of the prior sentence in shaping a consolidated set of sentences.
Standard 18-3.8. Multiple offenses in different jurisdictions

(a) The agency performing the intermediate function should direct sentencing courts, sentencing an offender who is subject to a prior sentence of total confinement imposed by a court in another jurisdiction, to take into account the unexecuted part of the prior sentence in shaping the sentence to be imposed.

(b) The legislature should make it possible for multiple sentences of total confinement imposed by different states to be served under one prison authority. A sentencing court should be authorized to impose a sanction of total confinement to run concurrently with an out-of-state sentence, even though the time will be served in an out-of-state institution.

(c) Outstanding charges of offenses committed in different states should be disposed of promptly.

(d) The legislature should authorize implementation of the principles in this standard through interstate and federal-state agreements.

4. Offenders' Conduct in Response to Charges Affecting Sentence

Standard 18-3.9. Acknowledgment of responsibility

(a) On guilty pleas, the agency performing the intermediate function should guide sentencing courts to impose sentences in accordance with Standard 14-1.8.

(b) In the absence of a guilty plea, sentencing courts should be guided to impose sentences of lesser severity or of a different type of sanction upon defendants who have acknowledged responsibility for their conduct.

Standard 18-3.10. Cooperation with prosecution

(a) The agency performing the intermediate function should guide sentencing courts to impose sanctions of lesser severity or of a different type upon defendants who have cooperated with the prosecution.

(b) The agency should ensure that the views of the relevant prosecutor are considered by the sentencing court.
B. Legislation as to Types of Sanctions

1. Authorization and Use

Standard 18-3.11. Authorization of sanctions

(a) The legislature should authorize sentencing courts to impose sentences composed of any one or more of the available sanctions.

(i) All types of sanctions should be available for sentences of individual offenders.

(ii) The sanctions of intermittent or total confinement are not feasible for sentences of organizations, but all other sanctions should be available.

(b) For each offense, the legislature should specify a maximum authorized severity level for each type of sanction.

(c) The legislature should not mandate the use of the sanction of total confinement for an offense unless the legislature can contemplate no mitigating circumstance that would justify a less restrictive sanction.

Standard 18-3.12. Use of authorized sanctions; guidance to sentencing courts

(a) The agency performing the intermediate function should provide principles of preference among the types of sanctions to guide sentencing courts in the determination of sentences in light of the societal purposes to be served. The agency should recognize that

(i) Every criminal sanction is a deprivation of liberty or property and has the effects of punishing offenders, deterring criminal conduct and fostering respect for the law.

(ii) Sanctions other than total confinement may serve to punish and incapacitate offenders.

(iii) Rehabilitation of offenders is an insufficient basis, standing alone, for imposition of a criminal sanction not otherwise justified, or for imposition of a more severe sentence than otherwise justified. The possibility of rehabilitation or treatment of an individual offender is properly considered in choosing the type of sanction to impose.
(b) The agency should give priority to the use of sanctions that have the purpose and effect of promoting offenders' future compliance with the law. Compliance programs, alone or in conjunction with other types of sanctions, are an appropriate type of sanction for all offenders.

(c) Imposition of a sanction of total confinement may be proper -

(i) if the offender caused or threatened serious bodily harm in the commission of the offense,

(ii) if other types of sanctions imposed upon an offender for prior offenses have proven ineffective to induce the offender to avoid serious criminal conduct,

(iii) if necessary so as not to depreciate unduly the seriousness of the offense and thereby foster disrespect for the law, or

(iv) for a very brief period, if necessary to impress upon an offender that the conduct underlying the offense of conviction is unlawful and could have resulted in a longer term of total confinement.

(d) Use of economic sanctions, alone or in conjunction with other types of sanctions, is appropriate for offenders with ability to pay the amounts ordered. Use of the sanction of restitution or reparation is not proper unless the amount of the claims can be ascertained without inordinate burden on the time and resources of sentencing courts.

(e) The legislature should ensure that levels of severity of composite sentences that combine sanctions of different types are not, in the aggregate, unreasonably severe.

(i) The agency performing the intermediate function should provide particular guidance on the maximum severity of composite sentences.

(ii) Appellate courts reviewing sentences should monitor the patterns of composite sentences being imposed and develop, through caselaw, standards of appropriate severity.
Standard 18-3.13. Compliance programs for individuals

(a) The legislature should authorize sentence of an individual to a compliance program or programs. Sentence to a compliance program should be authorized as an appropriate sentence whether an offender has plead guilty, was convicted on plea of not guilty, or intends to appeal from conviction.

(b) The legislature should authorize a sentencing court to retain jurisdiction over an individual sentenced to a compliance program for a period specified in the sentence, subject to legislatively established maximum periods.

(c) The agency performing the intermediate function should guide sentencing courts in the appropriate use of compliance programs for individuals.

(i) Programs should promote offenders' future compliance with the law.

(ii) Programs should not be unduly restrictive of an offenders' liberty or autonomy. Where fundamental rights are concerned, special care should be taken to avoid overbroad restraints that are so vague or ambiguous as to fail to give real guidance.

(iii) Before an offender is sentenced to a program of education, rehabilitation or therapy, the court should consider whether the offender will participate in and benefit from the program, and

(iv) When an individual is required to pay a fine as a condition of a compliance program, the court should consider the offender's financial circumstances in determining the total amount of the fine and the schedule of payment. When an individual is required to make restitution to a victim as a condition of a compliance program, the court should consider the offender's financial circumstances in determining the schedule of payment.

(d) The agency should ensure that sentencing courts set conditions of a compliance program that fit the circumstances of an individual offender. The basic condition of every sentence to a compliance program is that the offender lead a law abiding life. Discretionary conditions may deal appropriately with other matters to the extent that restrictions have a
reasonable relationship to the individual's current offense and criminal history, such as:

(i) cooperating with the required terms of supervision;

(ii) meeting family responsibilities;

(iii) maintaining steady employment or engaging in a specific employment or occupation;

(iv) pursuing a prescribed educational or vocational training program;

(v) undergoing available medical, rehabilitative, psychological or psychiatric treatment, including periodic testing for illegal use of controlled substances;

(vi) maintaining residence in a prescribed area or in an available facility for individuals sentenced to a compliance program;

(vii) refraining from consort ing with specified groups of people, frequenting specified types of places, or engaging in specified business, employment, or professional activities;

(viii) making restitution of the proceeds of the offense or making reparation for loss or injury caused by the offense;

(ix) payment of a fine;

(x) refraining from the use of alcohol or illegal substances or the possession of a dangerous weapon;

(xi) performing specified public or community service.

The agency performing the intermediate function should develop a model set of compliance program conditions and guidance concerning their use.

(e) The legislature should authorize sentencing courts to set terms of a compliance program following release from total or intermittent confinement. The post-release program may, but need not, require supervision of an offender.

(a) The legislature should authorize sentences of an organization to a compliance program. Sentence to a compliance program should be authorized as an appropriate sentence whether the organization has plead guilty, was convicted on plea of not guilty, or intends to appeal from conviction.

(b) The legislation should authorize a sentencing court to retain jurisdiction over an organization for a period specified in the sentence, subject to legislatively established maximum periods for various offenses.

(c) The agency performing the intermediate function should guide sentencing courts in the appropriate use of compliance programs for convicted organizations.

(i) Programs should promote offenders' future compliance with the law;

(ii) Programs may require that an organization cease or modify specified practices or activities that gave rise to the organization's criminal behavior, including a requirement that the organization engage in an internal study to identify such practices or activities;

(iii) Programs should not interfere with or delay the making of legitimate "business judgment" decisions by the organization's management, governing board, shareholders, or members.

(d) The legislature should authorize continuing judicial oversight of the overall activities of a convicted organization if the sentencing court finds from the organization's current offense and criminal history that the organization's criminal behavior (i) was serious, repetitive, and facilitated by inadequate internal management, accounting or supervisory controls, or (ii) presented a clear and present danger to public health or safety. Judicial oversight may be effected through adoption of monitoring, reporting, record keeping, and auditing controls designed to increase the organization's mechanisms for internal accountability, such as an independent audit committee, special counsel, and a separate staff system for an organization's governing board.
3. Economic Sanctions

Standard 18-3.15. Restitution or reparation

(a) For an offense that resulted in a victim's personal injury or loss of money or property, the legislature should authorize sentencing an individual or an organization to make restitution to the victim or to compensate the victim for losses suffered. The legislature should authorize a sentencing court to order payment to a fund for future disbursement if the identities of the victims or the amounts of their claims are not ascertained at the time of sentencing.

(b) In the event of injury or loss that the offender has special capacity to restore or repair, the legislature should authorize sentencing an individual or organization to perform such reparations.

(c) The agency performing the intermediate function should guide sentencing courts in the appropriate use of restitution and reparation.

(i) The sanction should be limited to the greater of the benefit to an offender or actual loss to identified persons or entities. Claimants seeking general, exemplary, or punitive damages, or asserting losses that require estimation of consequential damages, such as pain and suffering or lost profits, should be limited to their civil remedies.

(ii) The agency should provide that sentencing courts may require offenders to pay the full amount of the sanction forthwith or, taking into account the financial circumstances of an offender, to pay the amount in scheduled installments.

(d) The legislature should enact appropriate provisions to integrate the criminal sanction of restitution or reparation with a victim's right of civil action against an offender. The legislature should authorize sentencing courts to allow a defense or plea in bar, which might have been raised in a civil proceeding by a victim against an offender, as appropriate and relevant to liability imposed in the criminal proceeding.

(e) The legislature should authorize a sentencing court to retain jurisdiction over an offender sentenced to a restitution or reparation sanction until the sanction is satisfied or the sentence is rescinded.

(f) The legislature should place responsibility for enforcement of orders of restitution or reparation on a designated public official. The
legislature should authorize that official to enforce the court order by use of any method available to enforce a civil judgment.

Standard 18-3.16. Fines

(a) The legislature should authorize sentence of an individual or an organization to a fine.

(b) The legislature should not prescribe a minimum fine for any offense.

(c) The agency performing the intermediate function should guide sentencing courts in the appropriate use of fines. Fine amounts may be set by use of one or more factors, including the following:

(i) the income and assets of the offender;

(ii) the amount of the victim's loss or the offender's gain; and

(iii) the difficulty of detection of the offense.

(d) The legislature should provide that sentencing courts, in imposing fines, are required to take into account the documented financial circumstances and responsibilities of an offender.

(i) An offender's ability to pay should be a factor in determining the amount of the sanction. Sentencing courts, in imposing a fine on an individual, should consider the offender's obligations, particularly family obligations.

(ii) Sentencing courts, in imposing a fine, should not undermine an offender's ability to satisfy a civil judgment, or sentence, requiring an offender to make restitution or reparation to the victim of the offense.

(iii) Sentencing courts, in imposing fines upon organizations, should not duplicate sanctions imposed under statutory provisions, such as antitrust laws or securities laws, for government or private civil actions for equitable relief, money damages, or civil penalties that have the same deterrent or remedial purpose as the sanctions of the criminal law.

(iv) Sentencing courts, taking into account the financial circumstances of an offender, should require the offender to pay the
full amount of a fine forthwith or to pay the amount in scheduled installments.

(e) The legislature should authorize a sentencing court to retain jurisdiction over an offender sentenced to a fine until the fine is paid or the sentence is rescinded.

(f) The legislature should place responsibility for enforcement of fines on a designated public official. The legislature should authorize that official to collect a fine by use of any method available to enforce a civil judgment for a sum of money and, in appropriate cases, to seek a court order holding a delinquent offender in civil or criminal contempt.

Standard 18-3.17. Community service

(a) The legislature should authorize sentence of an individual or organization to perform a specified community service without compensation.

(b) The legislation should authorize a sentencing court to retain jurisdiction over an individual or organization sentenced to perform a specified community service for the period specified in the sentence, subject to the same legislatively established maximum periods applicable to sentences to a compliance program.

(c) The agency performing the intermediate function should guide sentencing courts in the appropriate use of the community service sanction.

(i) Offenders should be ordered to perform community service only in programs of public agencies or non-profit organizations.

(ii) Sentencing courts selecting the particular community service to be included in an individual offender's sentence may, but need not, specify work possibly beneficial in rehabilitating an offender.

(iii) Sentence of an organizational offender may provide that the organization, at its expense, supply managers or employees of the organization to work for a public agency or non-profit organization for the period of the sentence.
4. Acknowledgment Sanctions

Standard 18-3.18. Acknowledgment sanctions

(a) The legislature should authorize sentence of an individual or an organization to perform a specified acknowledgment sanction without compensation.

(b) The legislature should authorize a sentencing court to retain jurisdiction over an individual or organization sentenced to perform an acknowledgment sanction for the period specified in the sentence, subject to the same legislatively established maximum periods applicable to sentences to a compliance program.

(c) The agency performing the intermediate function should guide sentencing courts in the appropriate use of the acknowledgment sanction.

(i) Sentencing courts selecting the particular acknowledgment sanction to be included in an offender's sentence may, but need not specify a sanction possibly beneficial in rehabilitating the offender.

(ii) Sentence of an organizational offender may provide that the organization, at its expense, supply managers, employees of the organization, or agents hired from outside the organization to perform the acknowledgment sanction for the period of the sentence.

5. Intermittent Confinement Sanctions

Standard 18-3.19. Intermittent confinement in facility

(a) The legislature should authorize sentence of an individual offender to commitment in a facility on an intermittent basis that permits the offender to leave the facility for employment, education, vocational training, or other approved purpose, but requires the offender to return to the facility for specified hours or periods, such as nights or weekends.

(b) The legislation should authorize the sentencing court to retain jurisdiction over an individual sentenced to intermittent confinement for the term specified in the sentence.

(c) The agency performing the intermediate function should guide sentencing courts in the appropriate use of intermittent confinement.
Standard 18-3.20. Home detention

(a) The legislature should authorize sentence of an individual offender to remain at home except for specified periods when the offender may leave for employment, education or vocational training, or other approved purpose.

(b) The legislature should authorize a sentencing court to retain jurisdiction over an individual sentenced to home detention for the term specified in the sentence.

(c) The agency performing the intermediate function should guide sentencing courts in the appropriate use of home detention.

(d) Use of electronic monitoring devices as part of a sentence to home detention is appropriate, but the availability of such devices should not be a prerequisite for such sentences. The ability of an offender to pay the costs of such a device should not be considered by sentencing courts in determining whether to use the sanction of electronically monitored home detention.

6. Total Confinement

Standard 18-3.21. Total confinement

(a) The legislature should authorize sentence of an individual offender to a term of total confinement.

(b) A legislature should not prescribe a minimum term of total confinement for any offense.

(c) The agency performing the intermediate function should guide courts in the appropriate use of the sanction of total confinement.

(d) The legislature should provide that individuals sentenced to total confinement be committed to the custody of the department or bureau charged with operation of the prison or jail system for the term of their confinement.

(e) The legislature should provide that individuals sentenced to total confinement receive substantial "good time" credit toward service of their sentences. The legislature should determine a specific formula for "good time" credit.
(f) The legislature should provide that the department or bureau with custody of an individual must determine the individual’s release date by giving credit for:

(i) time spent in custody prior to trial or plea, during trial, pending sentence, pending appellate review, and prior to the arrival at the institution to which an offender has been committed.

(ii) time spent in custody under a prior sentence if the prior sentence has been set aside and the individual has been sentenced again for the same offense or for another offense based on the same conduct. In the event of a reprosecution, credit should include all time spent in custody, in accordance with paragraph (i) as a result of both the original charge and any subsequent charge for the same offense or for another offense based on the same conduct.

(iii) time spent in custody upon arrest on a different charge if the charge on which the individual has been sentenced grew out of conduct that occurred prior to the arrest and that time has not been credited toward another sentence.

When an individual has been sentenced to consecutive terms of total confinement, credit toward the remaining sentence should be given for time spent in custody under a sentence that has been set aside as a result of appeal or postconviction review without reprosecution or resentencing for that offense or for another offense based on the same conduct.

(g) If the aggregate of total confinement sentences imposed does not satisfy the requirement of adequate determinacy in sentencing, the legislature should authorize an administrative board, such as a board of parole, to decide when individuals sentenced to total confinement should be released. The legislature should direct the board to take into account, in setting guidelines for presumptive dates of release or in considering the release date of a specific individual, the provisions in this standard.

Standard 18-3.22. Costs, fees, and assessments

(a) The legislature may provide that an offender may be charged with reasonable court costs and, in an appropriate case, with reasonable costs associated with a correctional program or sanction included in that offender’s sentence. The legislature should characterize such assessments as separate from offenders’ sentences.
(b) The agency performing the intermediate function should provide that sentencing courts should take into account offenders' financial circumstances in determining whether to assess costs and the amount of costs assessed.

(c) The agency should ensure that sentencing courts, in assessing such costs, do not undermine an offender's ability to satisfy a civil judgment, or sentence, requiring the offender to make restitution or reparations to the victim of the offense. The agency should determine whether assessments of such costs should be subordinated to sentence provisions for economic sanctions other than restitution or reparation.

(d) The agency should ensure that sentencing courts, in determining the amount of economic sanctions other than restitution or reparation, take into account the amount of costs assessed or to be assessed.

(e) The legislature should place responsibility for enforcement of cost assessments on a designated official. The legislature should authorize that official to enforce an assessment of costs by any method available to enforce a civil judgment. Non-payment of assessed costs should not be considered a sentence violation.

PART IV. THE INTERMEDIATE FUNCTION

A. General

Standard 18-4.1. Basic responsibilities of the agency performing the intermediate function

(a) Implementation of legislative policy determinations within the statutory framework of the criminal code requires a state-wide agency to develop a more specific set of provisions that guide sentencing courts to presumptive sentences and in the appropriate use of aggravating and mitigating factors, offenders' criminal history, and offenders' personal characteristics. This intermediate function is crucial to effective administration of a criminal justice system in a way that meets the established societal objectives, makes optimal use of available resources, and results in sentences that are reasonably determinate.

(b) The agency performing the intermediate function should be the information center for all elements of the criminal justice system. The agency should collect, analyze and disseminate information on the nature and effects of sentences imposed and carried out. The agency should develop
means to monitor, evaluate, and predict patterns of sentencing, including levels of severity of sentences imposed and relative use of each type of sanction. Information gathered by the agency is necessary to the legislature's performance of the legislative function, to the agency's performance of the intermediate function, and to the courts' performance of the judicial function. The agency's responsibility to provide information concerning the sentencing system extends to members of the bar and to the general public.

B. The Intermediate Function and a Sentencing Commission

Standard 18-4.2. Establishment of sentencing commission

(a) If a jurisdiction elects to establish a sentencing commission, the legislature should authorize the commission as a permanent body. The legislature should authorize appointment of commission members and chairman by the governor with the advice and consent of the senate or by the presiding judge of the highest state court. The legislature should provide that the commission be composed of lay persons and persons with varying perspectives and experience within the criminal justice system and with sentencing processes, including at least one representative of the judiciary, prosecuting authorities, defense bar, and correctional and probation agencies. In composing the commission, consideration should be given to the community's ethnic and gender diversity.

(i) Members of the commission should serve for a term of years long enough to ensure continuity and efficient functioning of the commission, but short enough to allow for the regular infusion of new perspectives and experience.

(ii) Members of the commission should be selected for their knowledge and experience and their ability to adopt a systemic, policy-making orientation. Members should not function as advocates of discrete segments of the criminal justice system.

(b) The legislature should designate the commission's responsibilities to include the following:

(i) promulgation and periodic revision of presumptive sentences and other provisions to guide sentencing discretion;

(ii) ongoing data gathering and research relating to sentencing policies and practices, including studies regarding compliance with the provisions promulgated by the commission, rates of disparities in
sentencing, and the past and projected impact of the provisions promulgated by the commission;

(iii) periodic reports to the legislature and the public regarding the commission's data gathering and research, and reports responsive to any particular queries posed by the legislature to the commission;

(iv) periodic recommendations to the legislature regarding changes in the criminal code or to the rule making authority regarding changes in the rules of criminal procedure;

(v) provision of information to the bar and the public regarding sentencing provisions promulgated by the commission and sentencing policies and practices;

(vi) development of manuals, forms, and other controls to attain greater consistency in the contents and preparation of presentence reports;

(vii) monitoring compliance with procedural rules, particularly as applicable to administrative and correctional personnel engaged in the collection and verification of sentencing data;

(viii) service as an educational agency for judges, probation officers, and for other personnel; and

(ix) administration of periodic sentencing institutes or seminars to discuss problems relating to sentencing and to develop improved criteria for the imposition of sentences.

(c) Adequate staff assistance for the commission is essential and should include persons familiar with recent developments in empirical criminology.

(d) The commission's empirical research capacity should be given highest priority and should be adequately funded by the legislature.

Standard 18-4.3. Creation of provisions to guide sentence discretion

(a) Presumptive sentences and other criteria to guide judicial sentencing discretion should be the product of cooperative effort by the legislature and the sentencing commission. The legislature should make a clear delineation of responsibility between itself and the commission with respect to the promulgation of sentencing policy.
(b) A new commission's first task, prior to the creation of sentencing provisions, should be a detailed empirical study of prior sentencing patterns in the jurisdiction. Projections regarding the impact of any proposed sentencing provisions should be developed. The legislature should require that the provisions promulgated by the commission reflect legislatively determined policy goals and judgments; presumptive sentences and related provisions should not be merely the product of reproducing or averaging prior sentencing practice.

(c) Proposed amendments to existing sentencing provisions should be drafted and evaluated in light of data regarding experience under the provisions in effect, and projections of future sentencing patterns under the proposed amendments.

(d) The commission should be required to observe the standards and procedures that apply generally to administrative agencies in rulemaking proceedings. Informal consultation with interested public groups and other criminal justice agencies should be encouraged.

Standard 18-4.4. Structure of provisions to guide sentence discretion

(a) The legislature should authorize the sentencing commission to transform the legislatively determined policy choices into more particularized sentencing provisions that guide sentencing courts to the levels of severity of presumptive sentences, within statutory limits, that are appropriate for ordinary offenders.

(b) The legislature should require the commission to indicate the types of sanctions that constitute the presumptive sentence for particular offenses. The legislature should further require the commission to specify the presumptively appropriate level of severity for each sanction.

(i) The sentencing provisions should direct sentencing courts to the types of sanction and severity of sanction determined with reference to the offense of conviction and the degree of culpability of the ordinary offender.

(ii) For the sanctions of fine, intermittent confinement or total confinement, the presumptive level of severity may be expressed in terms of a range. Sentencing courts, taking into account the material facts regarding the offense and the offender, should have broad discretion in determining sentences within the stated ranges. Ranges of presumptive sentences should be fixed so that sentences imposed are adequately determinate.
(iii) The sentencing provisions should indicate to sentencing courts the extent of adjustments in sentences appropriate to take into account an offender's criminal history.

(iv) The legislature should permit sentencing courts to impose a sentence of lesser or greater severity or types of sanctions different from the presumptive sentence if the court finds substantial reasons for so doing. Such circumstances are present:

(A) When a court finds a mitigating or aggravating factor that on balance justifies the court's determination, or

(B) When a court, sentencing an individual offender, finds a social, economic, physical or mental characteristic of the offender, indicative of circumstances of hardship, deprivation, or handicap, that justifies imposition of a less severe sentence.

(c) The legislature should require the commission to determine presumptive sentences for the sanction of total confinement with the expectation that, apart from credit for good time, the sentences imposed will determine the length of sentences served.

(i) The legislature should provide that the commission may not promulgate sentencing provisions that will result in prison populations beyond the capacity of existing facilities unless the legislature appropriates funds for timely construction of additional facilities sufficient to accommodate the projected populations.

(ii) The legislature should provide that the commission may amend its sentencing provisions to reduce the length of presumptive sentences for the sanction of total confinement to relieve prison overcrowding. The amended provisions, when promulgated, should be applied to offenders still serving sentences of total confinement as well as to newly sentenced offenders.

C. The Intermediate Function in the Absence of a Sentencing Commission

Standard 18-4.5. Legislative agency to perform the intermediate function

(a) If a jurisdiction elects not to establish a sentencing commission, the legislature may elect to perform the intermediate function through an arm of the legislative branch.
(b) To assist the legislature in performing the intermediate function, the legislature should establish a permanent body, comparable in knowledge, experience, competence, and diversity to a sentencing commission, to advise on the substance of the guidance to sentencing courts. The legislature should also charge that body with performance of all aspects of the intermediate function.

(c) The legislature should distinguish clearly between statutory provisions that carry out the legislative function, which should be controlling authority in sentencing proceedings, and provisions that carry out the intermediate function, which should be subject to exercise of discretion by sentencing courts.

Standard 18-4.6. Judicial agency to perform the intermediate function

(a) If a jurisdiction elects not to establish a sentencing commission, the legislature may delegate the intermediate function to the highest state court or a state-wide judicial conference. The intermediate function may be performed, in part, by rules of court.

(b) To assist the highest state court or judicial conference in performing the intermediate function, the supreme court should establish a permanent body, comparable in knowledge, experience, competence, and diversity to a sentencing commission, to advise on the substance of the guidance to sentencing courts. The court or conference should also charge that body with performance of all aspects of the intermediate function.

(c) The supreme court or courts of appeal should have the authority to modify judicially created guidelines in the normal course of the courts' appellate review of sentences imposed.

PART V. SENTENCING PROCEDURES

A. Information Base

Standard 18-5.1. Information for sentence determination and system accountability

(a) The legislature and the agency performing the intermediate function should ensure that, in all cases, adequate information is developed,
through presentence investigations or other means, to enable sentencing courts and members of the bar to perform their sentencing responsibilities.

(b) The legislature and the agency should ensure that basic information is collected on all cases in which sentences are imposed to enable monitoring and evaluation of the operation of the sentencing system.

(c) The highest state court should ensure that regular educational programs are conducted to inform sentencing courts and members of the bar about community or state-wide programs and facilities that may be utilized in sentences of offenders.

B. Presentence Reports

Standard 18-5.2. Requirement of report

(a) The rules of procedure should authorize sentencing courts, upon their own motion or upon request of either party, to call for a presentence investigation and a written report of its results.

(b) The rules of procedure should require such investigation and report in all cases except that -

(i) The investigation and report may be omitted in a case if the offender waives them, with the consent of the prosecutor, and the court finds that it has sufficient information to sentence the offender.

(ii) The rules of procedure may provide exceptions for sentencing in cases where the costs of investigations and reports exceed possible benefits in the sentencing process.

Any sentencing court that lacks sufficient information to perform its sentencing responsibilities should have the power to order a presentence investigation and report.

Standard 18-5.3. Substantiation of information

The rules of procedure should provide that:

(i) Information in the presentence report should be limited to material facts which the preparer of the report, upon diligent inquiry, believes to be accurate and which, if challenged, can be substantiated;
(ii) The preparer of the report should be available to answer questions concerning the content of the report and the sources of information at a presentence conference and at the sentencing hearing;

(iii) If any material information in the report is challenged by either the prosecution or the defense, the preparer of the report is responsible to assist in determining whether the information can be sufficiently substantiated.

Standard 18-5.4. Contents of report

(a) The rules of procedure should require that agencies preparing presentence reports adhere to standards, developed by the agency performing the intermediate function, relating to the contents, preparation, and substantiation of presentence reports. The rules should require that all reports be made in writing.

(b) The rules should permit a sentencing court to vary the scope of reports in accordance with the court's determination of the information it needs to perform its sentencing responsibilities. A full presentence report may contain:

(i) A description of the offense of conviction, together with any aggravating or mitigating factors;

(ii) A description of any prior criminal convictions or juvenile adjudications of the offender;

(iii) A description of personal characteristics of an individual offender, even though not material to the offender's culpability, that may be taken into account in determination of the sentence;

(iv) Information about programs or resources, such as treatment centers, residential facilities, vocational training services, educational and rehabilitative programs, and other programs that might be incorporated in an individual offender's sentence;

(v) Information assessing the physical, psychological, economic, or social effects of the offense on any person against whom the offense was committed;

(vi) A description of the authorized types of sanctions and the ranges of severity, and reference to the guidance applicable to sentencing in the case;
(vii) An assessment of the impact of possible sanctions and collateral consequences upon an organizational offender, including employees, creditors and other third parties who would be directly affected by the sanctions;

(viii) A summary of the most significant aspects of the report and, if the sentencing court has so requested, a recommendation as to the appropriate sentence.

(c) A statement prepared by a victim under Standard 5.10 should be included as an attachment to the presentence report.

Standard 18-5.5. Timing of investigation and report

(a) The rules of procedure should provide that a presentence investigation must not be initiated until there has been a determination of guilt, unless the defendant, with the advice of counsel, has consented to such action.

(b) When a presentence investigation has been initiated prior to determination of guilt, the rules should provide that --

(i) In a case being tried, adequate precautions must be taken to assure that nothing disclosed by the investigation comes to the attention of the prosecution, the defense, the court, or the jury prior to a determination of guilt;

(ii) In a case in which a defendant has offered a plea of guilty, on request of the defense or the prosecution, the court should be authorized to examine the report prior to determining whether to accept the plea.

Standard 18-5.6. Confidentiality of presentence report

(a) The rules of procedure should provide that a presentence report not be made part of a public record and should be available only to the following persons or agencies under the conditions stated:

(i) The report should be available to the parties.

(ii) The report should be available to the sentencing court for the purpose of assisting it in determining the sentence.
(iii) The report should be available to all judges who participate in a sentencing council consideration of the case.

(iv) The report should be available to reviewing courts where material to an issue on which an appeal has been taken.

(v) The report should be available to the department or bureau responsible for supervision of offenders or with custody of individual offenders.

(vi) Reports should be available to sentencing guideline commissions or other bodies charged with performance of the intermediate function.

(b) Upon order of court, reports should be made available to persons or agencies having a legitimate professional or academic interest in the information likely to be contained therein. Examples of such persons or agencies would be a physician or mental health professional appointed to assist the court in sentencing, an examining facility, a correctional institution, or a probation or parole department.

Standard 18-5.7. Disclosure of report to parties

(a) The rules of procedure should entitle the parties to copies of the written presentence report and any similar reports.

(b) The rules should provide that the information made available to the parties must be disclosed sufficiently prior to the sentencing hearing to afford a reasonable opportunity for challenge and verification of material information in the report.

(c) All communications to a court by the agency responsible for preparing the presentence report should be in writing and subject to the right of the parties to know the content of the report. The rules should prohibit confidential sentencing recommendations.

Standard 18-5.8. Disputes regarding information in report; stipulations; presentence conferences

(a) The rules of procedure should require each party to notify the opposing party, the court, and the preparer of the presentence report in writing of any part of the report which the party intends to controvert or supplement. Such notice should be required at a time sufficiently in advance
of the sentencing hearing to permit the preparer of the report to make an appropriate response.

(b) The rules should permit the parties to stipulate to a resolution of challenges to information in the report. The rules should provide that the resolution of any issue by stipulation must be preserved as part of the record of the sentencing proceedings.

(c) The rules should authorize a sentencing court to conduct a presentence conference to consider the possibility of a stipulation of the parties as to challenged information in the presentence report.

C. Victims' Rights in Sentencing

Standard 18-5.9. Notice to victims

(a) The rules of procedure should establish a mechanism for providing notice to victims of offenses of all important steps in the sentencing process. Notices should include information about victims' rights to participate in sentencing proceedings.

(b) If a victim is dead or unable to participate in sentencing proceedings, victims' rights should be afforded to the victim's heirs or guardian.

Standard 18-5.10. Victims' statements prior to sentencing hearings

(a) The rules of procedure should authorize victims to make statements concerning the physical, psychological, economic, or social effects of the offense on the victim or the victim's family.

(b) The rules should require offices that prepare presentence reports to receive statements written by victims and to attach the statements to presentence reports.

Standard 18-5.11. Victims' statements at sentencing hearings

(a) The rules of procedure should ensure that victims are permitted to make oral statements at sentencing hearings concerning the physical, psychological, economic, or social effects of the offense on the victim or the victim's family.
(b) The rules should require that, on motion of either party or on the court's own motion, the sentencing hearing be continued to permit the parties reasonable opportunity to respond to new issues of fact raised by the victim's statement.

Standard 18-5.12. Evidentiary effect of victims' statements

(a) A victim should be permitted to make a statement prior to or at the sentencing hearing without being put under oath as a witness.

(b) Information in a victim's unsworn statement should not be used as the basis for a finding of fact by the sentencing court.

(c) The right of a victim to make an unsworn statement should not preclude a victim being called as a witness at the sentencing hearing.

D. Sentencing Proceedings

Standard 18-5.13. Designation of sentencing judge

The rules of procedure should provide that the judge who presided in the guilt determination phase of a case should, if feasible, be the judge to preside in sentencing proceedings.

(i) If guilt was determined after a trial, the judge who presided at the trial should preside in sentencing proceedings unless there are compelling reasons in a specific case to provide otherwise.

(ii) If guilt was determined by plea, the judge who accepted the plea should preside in sentencing proceedings unless the system of rotating assignment of judges in a multi-judge court makes that unfeasible.

Standard 18-5.14. Time of sentencing

(a) The rules of procedure should ensure that sentencing proceedings take place as soon as practicable following determinations of guilt. Stated time limits, subject to extensions for cause, should be incorporated in the rules. A sentencing proceeding may be deferred to permit consolidation of multiple offenses.
(b) The rules should ensure that the calendar of sentencing proceedings is under the active control of the sentencing court.

Standard 18-5.15. Notice of possible departure from presumptive sentence

(a) The rules of procedure should require the parties, at a stated time before the sentencing hearing, to give notice in writing of intent to request the sentencing court to impose sanctions of lesser or greater severity or types of sanctions different from the presumptive sentence for the offense of conviction. The notice should state the grounds of the request.

(b) The rules should require a sentencing court, considering on its own initiative imposition of sanctions of lesser or greater severity or types of sanctions different from the presumptive sentence for the offense of conviction, to notify the parties and allow a reasonable time for response.

Standard 18-5.16. Consolidation of multiple offenses for sentencing; disposition of other charges

(a) The rules of procedure should provide that all outstanding convictions within the jurisdiction of the sentencing court or any other court of coordinate or inferior jurisdiction be consolidated for sentencing in a single sentencing proceeding.

(b) The rules should permit a sentencing proceeding to be deferred to permit prompt disposition of other charges pending against the offender within the jurisdiction of the sentencing court or any other court of coordinate or inferior jurisdiction and, if convictions ensue, consolidation of all convictions under (a).

(c) The rules should provide that, notwithstanding other venue requirements, a sentencing proceeding may be deferred to permit an offender, charged with other offenses within the jurisdiction of the sentencing court or any other court of coordinate or inferior jurisdiction in the same state, to enter a plea of guilty to some or all of those charges in the sentencing court for purposes of consolidation of offenses in the sentencing proceeding.

(i) The rules should provide that permission to plead guilty in the sentencing court shall not be allowed without the written consent of the official responsible for prosecution of the charge.

(ii) The rules should provide that submission of a guilty plea under these circumstances is a waiver by the defendant of venue
provisions that would otherwise apply and, where formal charges have not yet been filed, a waiver of the right to a formal charge.

Standard 18-5.17. Sentencing hearing

(a) The rules of procedure should provide that counsel for both parties, the offender, and the victim have the opportunity to present submissions material to the sentence to the sentencing court.

   (i) Both parties should be permitted to present evidence and information, to confront and cross-examine witnesses for the other side, and to offer rebuttal evidence and information to that adduced by the other side, contained in the presentence report, or otherwise presented to the sentencing court.

   (ii) Both parties should be permitted to present argument on (A) the relevance and accuracy of any evidence or information presented to the sentencing court, (B) the application to the sentence determination of statutes and guidance by the agency performing the intermediate function, and (C) the type of sanction and the level of severity of sanction appropriate to the sentence determination.

   (iii) The victim should be permitted the right to make an unsworn statement.

   (iv) The offender should be permitted the right of allocution.

(b) The rules should require the prosecutor and the defense counsel to disclose to the court any agreement, in connection with a plea of guilty or nolo contendere, that included a provision on the sentence.

Standard 18-5.18. Findings of the sentencing court

(a) The rules of procedure should provide that the sentencing court resolve issues of fact material to the sentence to be imposed.

   (i) The standard of proof on all issues of fact should be by a preponderance of the evidence.

   (ii) The court may treat the unchallenged factual information in a presentence report as accurate.

   (iii) The court may consider facts proven at the trial of the offender or facts established on the record of the acceptance of a plea.
(b) The rules should provide that the sentencing court make express findings on all disputed issues of fact material to the determination of the sentence imposed.

(c) The rules should provide that the sentencing court should integrate the sanctions of a current sentence with the remaining operative sanctions under any prior sentence of the offender.

Standard 18-5.19. Imposition of sentence

(a) The rules of procedure should provide that sentence be imposed in open court in the presence of the offender.

(b) The rules should provide that a sentencing court, when imposing sentence, should state or summarize the court's findings of fact, should state with care the precise terms of the sentence imposed, and should state the reasons for selection of the type of sanction and the level of severity of the sanction in the sentence.

(i) The statement of reasons may be relatively concise when the level of severity and type of sanction are consistent with the presumptive sentence, but the sentencing court should always provide an explanation of the court's reasons sufficient to inform the parties, appellate courts, and the public of the basis for the sentence.

(ii) If the sentencing court imposes a sanction other than total confinement, or in addition to total confinement, the court should ensure that the offender is informed, in detail, of the offender's responsibilities and obligations and, in general, of possible consequences of noncompliance with the terms of the sentence.

(iii) If the sentencing court imposes a sanction of total confinement, the court should inform the offender of the amount of credit the offender is entitled to receive for time already spent in custody and should ensure that the record accurately reflects time served.

(c) The rules should require the sentencing court to inform the offender of the right to appeal and of the time limits and procedures for initiating an appeal.

(d) The rules of procedure, or other rule of court, should require the attorney representing an offender at a sentencing proceeding to advise the
offender regarding possible appeal and to take the necessary steps to protect an offender’s decision to initiate an appeal.

Standard 18-5.20. Record of sentencing proceedings

The rules of procedure should require a sentencing court to make a complete record of the sentencing proceeding. The record should include the following:

(i) A verbatim account of the entire sentencing proceeding, including all testimony received, statements made by defense counsel, the prosecutor, the offender, or the victim, and the statements of the sentencing court imposing and explaining the reasons for the sentence;

(ii) A verbatim account of such parts of the trial on the issue of guilt, or proceedings leading to the acceptance of a plea of guilty, as are material to the sentencing decision; and

(iii) A copy of the presentence report and of any other reports or documents made available to or used by the sentencing court in determining the sentence.

Standard 18-5.21. Sentence reports

(a) The rules of procedure should require that, following sentencing in all cases, a designated court official compile a standardized report that includes:

(i) Offense of conviction and the initial charge,

(ii) Characteristics of the offense and victim information,

(iii) Personal characteristics of the offender,

(iv) Disposition by bench trial, jury trial, or plea, and

(v) The sentence imposed.

(b) The rules should establish appropriate measures to protect the privacy of offenders or victims with regard to information, included in sentence reports, that is not otherwise a matter of public record.
PART VI. SENTENCING DISCRETION

Standard 18-6.1. General principles

(a) The sentence imposed should be no more severe than necessary to achieve the societal purpose or purposes for which it is authorized. The sentence imposed in each case should be the minimum sanction that is consistent with the gravity of the offense, the culpability of the offender, the offender's criminal history, and the personal characteristics of an individual offender that may be taken into account.

(b) A sentencing court should be guided in exercise of its sentencing discretion by standards promulgated by the agency performing the intermediate function. Courts should give serious consideration to the goal of avoidance of unwarranted and inequitable disparities in sentences.

Standard 18-6.2. Considering types of sanctions; composite sentences

(a) A sentencing court should consider all permitted types of sanctions and, subject to the guidance of the agency performing the intermediate function, should select the type of sanction or sanctions that is most appropriate for the gravity of the offense, the culpability of the offender, the offender's criminal history, and the personal characteristics of an individual offender that may be taken into account.

(b) In shaping a sentence that is a composite of different types of sanctions, a sentencing court should determine the level of severity for each type of sanction so that the composite sentence is no more severe than necessary to achieve the societal purposes for which it is imposed and does not result in unwarranted and inequitable disparities in sentences.

Standard 18-6.3. Using presumptive sentences: mitigating and aggravating factors and personal characteristics of individual offenders; criminal history

(a) In determining the sentence of an offender, a sentencing court should consider first the level of severity and the types of sanctions that are consistent with the presumptive sentence. The court should then consider any modification indicated by factors aggravating or mitigating the gravity of the offense or the degree of the offender's culpability, by personal characteristics of an individual offender that may be taken into account, or by the offender's criminal history.
(b) Following guidance of the agency performing the intermediate function, a sentencing court should take into account an offender's acknowledgment of responsibility or cooperation with the prosecution.

Standard 18-6.4. Sentencing to total confinement

(a) A sentencing court should prefer sanctions not involving total confinement in the absence of affirmative reasons to the contrary. A court may select a sanction of total confinement in a particular case if the court determines that -

(i) the offender caused or threatened serious bodily harm in the commission of the offense,

(ii) other types of sanctions imposed upon the offender for prior offenses were ineffective to induce the offender to avoid serious criminal conduct,

(iii) the offender was convicted of an offense for which the sanction of total confinement is necessary so as not to depreciate unduly the seriousness of the offense and thereby foster disrespect for the law, or

(iv) confinement for a very brief period is necessary to impress upon the offender that the conduct underlying the offense of conviction is unlawful and could have resulted in a longer term of total confinement.

(b) A sentencing court should not select a sanction of total confinement because of community hostility to the offender or because of the offender's apparent need for rehabilitation or treatment.

Standard 18-6.5. Sentencing for more than one offense

(a) A sentencing court should impose a sanction appropriate to the offense of conviction and should not consider other offenses of which the defendant was not charged, which were dismissed prior to determination of guilt, or of which the defendant was acquitted.

(b) In sentencing an offender convicted of multiple offenses, a sentencing court ordinarily should impose a consolidated set of sentences that appropriately takes into account the offender's current offenses and criminal history.
(c) In sentencing an offender for offenses that were part of an episode,

(i) a sentencing court should not increase the severity of the sentence or change the type of sanction merely as a result of the number of counts or charges made from a single episode, and

(ii) where the separate offenses are not merged for sentencing, a sentencing court should consider imposition of sanctions of a type and level of severity that take into account the connections between the separate offenses and, in imposing sanctions of total confinement, ordinarily should designate them to be served concurrently.

(d) In sentencing an offender for an offense graded by the amount of money or property involved, a sentencing court ordinarily should determine the appropriate sentence by treating the offenses as a single offense and determining its gravity by cumulating the amounts of money or property in the separate offenses.

(e) In sentencing an offender for multiple offenses not within (c) or (d), a sentencing court should be guided by the presumptive sentence derived by reference to the sentence appropriate for the most serious current offense. Under guidance from the agency performing the intermediate function, a sentencing court may impose an enhanced sentence by treating other current offenses as part of an offender’s criminal history or as factors aggravating the most serious offense.

(f) When multiple sentences of total confinement are to be served consecutively, a sentencing court should impose sentences that do not exceed a total term reasonably related to the gravity of the offenses.

(g) In sentencing an offender who is subject to service of a prior sentence, a sentencing court should take into account the unexecuted part of the prior sentence in shaping a consolidated set of sentences.
PART VII. CHANGE OF SENTENCE

A. Reduction in Severity or Modification

Standard 18-7.1. Authority to reduce the severity of sentences

(a) The rules of procedure should authorize a sentencing court, upon motion of either party or on its own motion, to reduce the severity of any sentence. The rules should restrict the time for reduction in severity of a sentence to a specified period after imposition of a sentence.

(b) The rules should prohibit ex parte communications with the sentencing court regarding reduction of sentence and should ensure that both parties receive notice of any proposed reduction.

(c) The rules should prohibit reduction in the severity of a sentence unless the sentencing court reopens the sentencing hearing and follows the procedures in Standards 18-5.17 through 18-5.21.

Standard 18-7.2. Authority to modify requirements or conditions of sentences in light of changed circumstances

(a) The rules of procedure should authorize a sentencing court, at any time during the period that the court has retained jurisdiction over a sentenced offender, to modify the requirements or conditions of a sanction to fit the present circumstances of the offender. Such sentences include:

(i) a sentence to a compliance program,

(ii) a sentence involving an economic sanction,

(iii) a sentence to an acknowledgment sanction, or

(iv) an intermittent confinement sanction.

(b) The rules should provide that any modification of the requirements or conditions of a sentence under this authority may not increase the overall severity of an offender's sentence.

(c) The rules should provide that either party may move for modification of sentence or the sentencing court may act on its own motion. The rules should prohibit ex parte communications with the sentencing court regarding modification of a sentence and should ensure that both parties receive notice of any proposed modification with opportunity to respond.
Standard 18-7.2. Authority to modify requirements or conditions of sentences in light of changed circumstances

(a) The rules of procedure should authorize a sentencing court, at any time during the period that the court has retained jurisdiction over a sentenced offender, to modify the requirements or conditions of a sanction to fit the present circumstances of the offender. Such sentences include:

(i) a sentence to a compliance program,
(ii) a sentence involving an economic sanction,
(iii) a sentence to an acknowledgment sanction, or
(iv) an intermittent confinement sanction.

(b) The rules should provide that any modification of the requirements or conditions of a sentence under this authority may not increase the overall severity of an offender's sentence.

(c) The rules should provide that either party may move for modification of sentence or the sentencing court may act on its own motion. The rules should prohibit ex parte communications with the sentencing court regarding modification of a sentence and should ensure that both parties receive notice of any proposed modification with opportunity to respond.

B. Resentences Following Violation of Initial Sentences

Standard 18-7.3. Legislative authority to resentence offenders for violation of the requirements or conditions of sentences

(a) The legislature should authorize a sentencing court to resentence an offender, previously sentenced to a compliance program or a sentence involving an economic sanction, an acknowledgment sanction, or an intermittent confinement sanction, upon finding that the offender has committed a substantial violation of a material requirement or condition of the previous sentence.

(b) The legislature should provide that the effect of noncompliance or nonpayment should be determined after offenders' defaults and after examination of the reasons therefor.
(c) The legislature should provide that the sanctions available to a sentencing court imposing a resentence include all sanctions that were available at the time of the initial sentencing, although separate guidance by the agency performing the intermediate function may be appropriate.

(d) The agency performing the intermediate function should guide sentencing courts in the appropriate use of the authority to resentence offenders.

(i) A sentencing court should consider first whether an offender's noncompliance or nonpayment is excusable and whether substantial performance of the initial sentence can be achieved by exercise of legal power to compel or induce performance, particularly by use of measures, including civil contempt, for enforcement of economic sanctions.

(ii) A sentencing court should not sentence an individual offender to total confinement unless the conditions of Standard 18-6.4 are met. Incarceration should not automatically follow noncompliance. In the event of nonpayment of an economic sanction, total confinement should not be imposed unless the offender wilfully refused to pay or failed to make sufficient bona fide efforts lawfully to acquire the resources to pay.

(iii) A sentencing court should determine explicitly the extent to which an offender's substantial compliance with the requirements or conditions of the initial sentence is to be credited toward the requirements or conditions of a resentence. In determining the severity of a resentence, a sentencing court should take into account an offender's substantial compliance with the initial sentence that cannot be credited toward a resentence.

(e) The legislature should prohibit sentencing courts from setting the terms of a resentence prior to finding of a violation of a requirement or condition of the initial sentence. The initial sentence should not specify the terms of a resentence in the event that the offender violates the primary sanction.

Standard 18-7.4. Procedures regarding violations of requirements or conditions of sentences

(a) The legislature should provide that offenders should ordinarily be called by summons to appear before the sentencing court to respond to charges of violation of a requirement or condition of sentence.
(b) The legislature should authorize arrest of an individual offender pursuant to a warrant of arrest if the court issuing the warrant finds probable cause to believe that:

(i) the offender has committed a substantial violation of a material requirement or condition of a sentence, and

(ii) the offender is not likely to respond to a summons to appear before the sentencing court.

(c) The legislature should authorize arrest without a warrant when the officer making the arrest has reasonable cause to obtain a warrant of arrest and reasonably believes that arrest is necessary to prevent the offender's flight.

(d) Legislation or a rule of procedure should direct that, upon arrest and detention of an offender for alleged violation of a sentence not involving total or intermittent confinement, a preliminary hearing should be held promptly to determine whether there is probable cause to believe that the offender has committed a substantial violation of a material condition of the sentence and that continued detention of the offender is necessary.

(e) Legislation or a rule of procedure should direct sentencing courts to hold hearings, within a reasonable time after preliminary determinations of probable cause, and promptly make final determinations whether the offender committed the alleged violation, provided, however, that final determination of an allegation of the commission of another offense should be made as provided in (h).

(f) The rules of procedure should provide that, at the preliminary or final hearing:

(i) the offender should receive adequate notice of the alleged violation, including a description of the surrounding facts and circumstances and of the offender's rights at the hearing;

(ii) the offender should be entitled to representation by counsel and, if indigent, to have counsel appointed; and

(iii) both the prosecution and the offender should be permitted to subpoena witnesses, call and cross-examine witnesses, offer other evidence, and present arguments.
The rules should provide that, with respect to the final hearing:

(i) the offender is entitled to discovery of all evidence intended to be used by the prosecution to show that a violation has occurred and to access to all official records concerning the offender's case;

(ii) the prosecution must establish a violation by a preponderance of the evidence;

(iii) the offender should be allowed to show mitigating circumstances or other reasons why the violation should not result in a sentence; and

(iv) the sentencing court should make explicit findings on all material issues of fact, and a statement of the court's reasons for its determination;

(v) the sentencing court should make and preserve a full and complete record of the hearing; and

(vi) the offender has the right to appeal a sentence to the same extent as any other sentence.

(b) When an alleged violation is based solely on the alleged commission of another offense, the rules should provide that the final hearing on the alleged violation ordinarily should be held after disposition of the new criminal charge.

PART VIII. APPELLATE REVIEW OF SENTENCES

Standard 18-8.1. Jurisdiction to review sentences; reviewing courts

(a) The legislature should authorize appellate courts to entertain appeals of sentences. This should include:

(i) Review of a sentence imposed upon conviction based on a plea of guilty or the equivalent;

(ii) Review of a resentence following violation of the requirements or conditions of a prior sentence; and

(iii) Review of a resentence following reversal of a prior sentence by an appellate court and remand for resentencing.
(b) The legislature should authorize appellate review of sentences in the same courts empowered to entertain appeals from convictions. Specialized courts to review sentences only should not be established.

Standard 18-8.2 Purposes of appellate review

(a) The legislature should identify the following objectives of sentence review:

(i) To determine whether a sentence is unlawful or excessively severe under applicable statutes, provisions guiding sentencing courts, rules of court, or prior appellate decisions;

(ii) To determine whether the action of the sentencing court was an abuse of discretion; and

(iii) To interpret statutes, provisions guiding sentencing courts, and rules of court as applied to particular sentencing decisions and to develop a body of rational and just principles regarding sentences and sentencing procedures.

(b) Reviewing courts, and particularly the highest court of the state, should seek to make effective the legislature's public policy choices regarding sentencing. Reviewing courts should also seek, through caselaw, to develop principles for composite sentences.

Standard 18-8.3 Appeals by defense or prosecution

The legislature should authorize appeals from sentence at the initiative of the offender or the prosecution.

Standard 18-8.4 Disposition by reviewing court

(a) The legislature should authorize reviewing courts to:

(i) Affirm the sentence under review;

(ii) Reverse the sentence under review and remand the case to the sentencing court for resentencing;

(iii) Substitute, for the sentence under review, any other disposition that was available to the sentencing court.

(b) A reviewing court should set forth the basis for its decisions.
PART IX. DISPUTED TERMS OF TOTAL CONFINEMENT

Standard 18-9.1. Mechanism for resolving disputes about the length of a total confinement sentence

The legislature should designate an agency in the executive branch to resolve disputes about the correct date of release of offenders serving sentences of total confinement.
