#### LETTER FROM THE CHAIRMAN

To the President, the Congress, and the Judicial Conference of the United States of America

I am pleased to transmit this report chronicling the activities and accomplishments of the United States Sentencing Commission in 1990.

The Commission is committed to refining the guidelines in the years ahead to ensure that this new sentencing system, which already has significantly improved the federal criminal justice system, realizes its full potential.

Respectfully submitted,

William W. Wilkins, Jr.

Judge, United States Court of Appeals

for the Fourth Circuit

#### Chapter One

# Introduction

The United States Sentencing Commission, established in the 98th Congress after more than a decade of bipartisan effort, is an independent agency in the Judicial Branch of government. The Commission consists of seven voting members appointed by the President and confirmed by the Senate and two non-voting, ex-officio members.

The Commission's primary function is to promulgate sentencing policies and practices for the federal courts that include guidelines prescribing the appropriate form and severity of punishment for offenders convicted of federal crimes.

The Commission was created by the Sentencing Reform provisions of the Comprehensive Crime Control Act, Pub. L. No. 98-473 (1984), and its authority and duties are set out in chapter 58 of title 28, United States Code. Procedures for implementing guideline sentencing are prescribed in a new chapter 227 of title 18.

As specified in 28 U.S.C. § 991(b), the sentencing guidelines established by the Commission are designed to:

- Effectuate the purposes of sentencing enumerated in 18 U.S.C. § 3553(a)(2). In brief, those purposes are just punishment, deterrence, incapacitation, and rehabilitation;
- Provide certainty and fairness in meeting the purposes of sentencing by avoiding unwarranted disparity among offenders with similar characteristics convicted of similar criminal conduct, while permitting sufficient judicial flexibility to take

- into account relevant aggravating and mitigating factors; and
- Reflect, to the extent practicable, advancement in the knowledge of human behavior as related to the criminal justice process.

Organized in October 1985, the Commission submitted its initial Sentencing Guidelines and Policy Statements to Congress on April 13, 1987. Prior to submission of the guidelines, the Commission held 13 public hearings, published two drafts for public comment, and received more than 1,000 letters and position papers from hundreds of individuals and organizations. After the requisite period of Congressional review, the guidelines became effective on November 1, 1987, and apply to all offenses committed on or after that date.

Shortly after implementation of the guidelines, defendants throughout the country challenged the constitutionality of the Commission and the Sentencing Reform Act, claiming improper legislative delegation and violation of the separation of powers doctrine. On January 18, 1989, the U.S. Supreme Court in Mistretta v. United States rejected these challenges and upheld the constitutionality of the Commission as an independent judicial branch agency. The Supreme Court's decision in Mistretta cleared the way for nationwide implementation of the guidelines.

In 1990, monitoring statistics continued to show a stable rate of guideline application. According to the Commission's ongoing departure study, sentences imposed from October 1, 1989, through September 30, 1990, were within the guideline range established by the court in 83.4 percent of the cases. Courts departed downward in 7.5 percent of the cases based on a motion by the government for a reduced sentence due to the defendant's substantial assistance to authorities in the investigation or prosecution of other offenders. In 2.3 percent of the cases, courts departed upward and sentenced above the guideline range, while in 6.9 percent of the cases courts departed downward for other reasons.

Importantly, the rate at which defendants chose to plead guilty has remained essentially constant since nationwide implementation of the guidelines. Monitoring statistics show that 87.7 percent of all defendants sentenced under the guidelines in 1990 entered pleas of guilty or nolo contendere, reflecting approximately the same ratio of pleas versus trials the federal system experienced before guideline sentencing.

In 1990, the Commission provided guideline application training to approximately 4,028 individuals at 78 training sessions across the country. Program participants included circuit and district court judges, probation officers, prosecuting attorneys, defense attorneys, investigative case agents, congressional staff members and staff from other government agencies.

Also in 1990, the Commission continued its review of penalty provisions of federal criminal statutes in an effort to supplement its preliminary report submitted to Congress on November 1, 1989. A follow-up report is scheduled to be presented to Congress in early 1991.

Commissioners continued their leadership roles in two special research projects in 1990: the Alternatives to Imprisonment project and a study of plea negotiations and prosecutorial charging practices under the guidelines.

The primary objective of the Alternatives project is to present to the Commission a comprehensive package of non-prison sanctions -- compatible with the structure of the guidelines -- that meet the purposes of sentencing. The project staff and advisors reviewed the full range of programs being provided across the country, including community confinement, intermittent confinement, home detention, boot camp, community service, and intensive probation. The report containing the project's findings and recommendations is scheduled to be presented to the Commission in late 1990.

The plea negotiation study involves site visits to selected jurisdictions across the nation to investigate the impact of the guidelines on charging and plea practices. The research includes an analysis of case files and interviews with district judges, U.S. Attorneys, assistant U.S. attorneys, federal defenders, defense attorneys, and probation officers in each district. The plea negotiations study group is scheduled to provide detailed reports of its research to the Commission in 1991.

On May 1, 1990, the Commission submitted to Congress a series of substantive and clarifying amendments to the sentencing guidelines. The amendments took effect on November 1 upon expiration of the statutory, 180-day Congressional review period.

Beginning with this year's report, the Commission has revised its statistical reporting cycle to follow a fiscal year calendar. Consequently, unless specifically noted elsewhere, the term "1990" should be interpreted as meaning fiscal year 1990 (October 1, 1989 through September 30, 1990).

#### Chapter Two

# Administration

The U.S. Sentencing Commission consists of seven voting Commissioners and two non-voting, ex-officio members. The seven voting Commissioners -- three of whom must be federal judges -- are appointed by the President with the advice and consent of the Senate. By statute, Commissioners hold full-time positions until November 1, 1993, at which time all Commissioners except the Chairman switch to part-time status.

#### Organization

The Commission staff is headed by a Staff Director and divided into six main offices: General Counsel, Monitoring, Evaluation, Research Studies, Training and Technical Assistance, and Administration (See organization chart, Figure 1). The director of each office reports to the Staff Director, who reports to the Chairman.

The **Staff Director** is responsible for planning, coordinating, directing, and allocating resources for all staff activities. In addition to carrying out the planning and management functions, staff in this office manage special projects and perform the public information and computer support functions of the agency.

The Office of General Counsel provides support to the Commission on a variety of legal issues, including the formulation and application of guidelines and guideline amendments, legislative proposals, and statutory interpretations. The legal staff monitors district and circuit court application and interpretation of the guidelines, and advises Commissioners about statutes and legislation affecting the Commission's work. The guidelines production unit, which is within

the legal staff, drafts proposed amendments to existing guidelines and drafts new guidelines in response to Commission directives.

The Office of Monitoring has developed a comprehensive computerized data collection system to track application of the guidelines. The staff receives, inputs, and analyzes case data and produces periodic reports about guideline implementation. These data and reports provide significant information for the Commission's review when it considers amending individual guidelines. The office updates a master file of guideline sentencing statistics that is made available to the public through the Inter-University Consortium for Political and Social Research at the University of Michigan.

The Office of Evaluation is focusing its energies on the Congressionally-mandated four-year evaluation of the sentencing guidelines and their impact on the federal courts. As part of this effort, evaluation staff are interviewing court personnel in federal courts across the country. Analyses of official records are underway using data from the Bureau of Prisons, the U.S. Parole Commission, the Executive Office of U.S. Attorneys, the Administrative Office of the U.S. Courts, and the Commission's monitoring system. These analyses will be used to assess the impact of the guidelines as they relate to prosecutorial discretion, plea bargaining, disparities in sentencing, and the use of incarceration.

The Office of Research Studies provides research, analysis, and support to the Commission on a variety of topics, including the effect of proposed guideline amendments on projections of federal prison population, sentencing practices related to organizational defendants, and substantive criminal justice issues such as deterrence and recidivism.

The Office of Training and Technical Assistance teaches guideline application to judges, probation officers, prosecuting and defense attorneys, and other criminal justice professionals. This staff operates a "hotline" to respond to guideline application questions from judges and probation officers, and systematically reviews probation officers' application of the guidelines. The staff develops training materials including lecture outlines and visual aids, and participates in the sentencing guideline portions of training programs sponsored by other agencies. The staff plays a pivotal role in the amendment process by informing the Commission of current guideline application practices.

The Office of Administration provides general administrative support to Commissioners and staff regarding budget and finance, contracting, personnel management, library, facilities, mail, messenger, copying, reception, and other office services. The office provides support to the Staff Director and senior managers in accomplishing project planning and budget forecasting on a short- and long-term basis.

#### Management Accomplishments

The Commission made a significant number of improvements to its management process in 1990. A committee of senior managers met at a planning conference in the spring to formulate potential changes in the organization and work processes and to propose items for the Commission's long-range planning calendar. The Commission reviewed, amended, and approved a three-year planning calendar, and managers developed detailed project plans and

descriptions of resource needs to accomplish specific tasks within their areas of responsibility. In addition, the Commission implemented improvements in the guideline amendment process, employed working groups to systematically and comprehensively analyze policy issues, and increased Commissioner outreach to the field.

Several important organizational changes were implemented in 1990. First, the Commission created the position of Deputy Staff Director to allow the agency to increase its coordination and management of resources and expand its outside liaison. In addition, the Monitoring, Evaluation, and Research Studies units became independent offices due to the importance of the individual functions performed by each unit and the need to coordinate directly on issues and staff efforts that cross organizational lines.

During the past year, the Staff Director's office implemented a number of new and improved uses of computerized support. This office, which receives public comment on all proposed guidelines and policy statements, instituted a computerized tracking system to assist in the timely receipt, consideration, and circulation of comment.

This staff coordinated further improvements to the ASSYST software designed to aid in guideline application, including the incorporation of approximately 300 guideline amendments and the addition of applicable case law for individual guideline sections. In addition, function keys were updated to include 1990 guideline text and commentary. These improvements were completed in September 1990 and ASSYST (version 1.0) was distributed to the field during the fall. In addition, ASSYST was made available to the Executive Office of U.S. Attorneys, federal public defenders, and the National Association of Criminal Defense Lawyers.

Additionally, two probation districts were selected as test sites to use ASSYST to electronically transfer sentencing data to the Commission. Staff is working with this method of data transmission to determine whether it will be compatible with the Monitoring unit's datasets.

The Commission greatly expanded its computer network during the past year with new file servers, optical disk drives, cabling, and computer workstations. A gateway was installed to connect staff with the Department of Justice mainframe computer, thereby improving access to relevant databases. Desktop publishing functions and an electronic mail system were added to current computer capabilities, and computer staff conducted in-house training to ensure that users obtain maximum benefit from the new software, network, and other computer system improvements. A computer task force, composed of representatives from each staff office, was established to share technical information and keep abreast of changing agency needs and the expanding computer network services.

The Commission's Legal staff coordinated staff working group efforts to study substantive guideline issues for possible amendment. In addition, the legal staff began a systematic monthly review of all district and appellate court decisions on guideline sentencing issues. Staff developed and instituted a process for drafting case law summaries and generating regular updates for the Commission and the field. In 1990, staff increased its legislative liaison activities in response to requests for comments or drafting assistance from individual Congressional offices and committee staffs.

The Monitoring staff continued to meet increased workload demands in response to the nationwide implementation of the guidelines. To meet this challenge, the office hired additional permanent

and temporary employees and organized the large-scale effort needed to bring the database up-to-date as new system modules were implemented. In 1990, three modules were implemented, capturing basic identifying information, specific sentencing data, and guideline application information for each case.

In its efforts to examine the effects of the guidelines, the Evaluation staff began extensive analyses of various existing databases using the mainframe computer services available from other federal agencies. In addition, the staff developed and tested survey instruments for use in on-site interviews with court personnel. This office temporarily increased its staff to meet peak workload demands in 1990 and 1991.

The Research Studies staff expanded and analyzed its database of corporate sentencing cases, a database made available to the public through the Inter-University Consortium for Political and Social Research. Other efforts focused on: (1) beginning an assessment of the extent to which the guideline criminal history categories are meaningful indicators in predicting recidivism; (2) formulating plans to use the Commission's monitoring data to make updated prison impact projections; and (3) planning analyses of the effects of the guidelines in furthering the purposes of rehabilitation, just punishment, deterrence, and public safety.

During the past fiscal year, the Office of Training and Technical Assistance conducted 78 training programs attended by 4,028 participants. This staff was called upon to support the evaluation effort and lead working group efforts to produce new policy statements on revocation of probation and supervised release. In order to meet this workload, the office increased its reliance on visiting probation officers to assist with coverage

of the "hotline" and to perform other short-term work assignments.

The Office of Administration supported improvements to the efficient functioning of Commission operations by (1) locating and preparing office space for occupancy by the Monitoring and Evaluation staffs; (2) negotiating a complex lease renewal arrangement; (3) drafting updated position descriptions; (4) researching and implementing flexible and compressed work schedules for Commission employees; and (5) strengthening internal management and financial controls. Existing administrative procedures were reviewed and updated and new procedures were issued for a number of support functions and administrative processes.

During the past year, the administrative staff began using a new budget database to track the Commission's financial obligations and automatically generate purchase orders. It began to utilize direct entry of accounting data into the Judiciary's Central Accounting System. The staff prepared pre-Mistretta guideline cases and past practice cases for archiving and acquired a number of articles, journals, books, and computerized reference services for the Commission's specialized sentencing library. Additionally, this staff worked with the Administrative Office of the U.S. Courts and other judicial agencies to prepare plans for relocation to the new Judiciary Building in 1992.

#### Staffing

During fiscal year 1990, the Commission used staff resources totaling 77 workyears. Approximately 27 percent of the staff were involved in various aspects of the sentence monitoring efforts. Ten percent of the resources were devoted to evaluation work, and seven percent went to research studies. The technical assistance and

training staff accounted for seven percent of the staff resources, and legal staff represented 17 percent of the workyears. The Commissioners' offices, the Staff Director's office, and the administrative staff accounted for the remaining 32 percent.

#### Budget and Expenditures

In fiscal year 1990 Public Law 101-162 provided 83 full-time permanent workyears and an appropriation of \$6,445,000 for the salaries and expenses of the U.S. Sentencing Commission. In addition, the Commission received a supplemental appropriation of \$700,000 and 17 temporary workyears under Public Law 101-302. The supplemental appropriation will enable the Monitoring unit to complete development and implementation of a data collection system to track compliance with the guidelines, process the growing number of cases since the Supreme Court's Mistretta decision, and analyze these statistics to best serve the needs of the Congress, the Commission, and the criminal justice community. The appropriation also provides small increases in staffing for Legal and Evaluation staffs.

The Commission expended the appropriation of \$6,445,000, and \$54,000 from the supplemental appropriation for total obligations of \$6,499,000 in fiscal year 1990. For fiscal year 1991, the Commission was granted 100 full-time permanent workyears and an appropriation of \$8,422,000 under Public Law 101-515. In fiscal year 1991, the Commission plans to expend its annual appropriation and the remainder of the supplemental appropriation.

Total Obligations	\$6,499	\$9,068

#### Chapter Three

# Legal Issues

#### A. Guideline Legal Issues

#### Introduction

A large body of federal sentencing case law has developed since the Supreme Court's decision in United States v. Mistretta, 109 S. Ct. 647 (1989), to reject constitutional challenges to the Sentencing Reform Act (SRA) and the creation of the Sentencing Commission. In 1990, the federal courts interpreted key provisions of the sentencing guidelines and the SRA. The following overview highlights a number of the most significant legal developments.

#### Relevant Conduct

"Relevant Conduct" (U.S.S.G. §1B1.3), one of the fundamental provisions of the guidelines, defines the scope of the "acts and omissions" of a defendant and his accomplices for which the defendant will be held accountable. Prior to implementation of the guidelines, courts had upheld the constitutionality of considering uncharged and unconvicted conduct at sentencing. And in early cases interpreting U.S.S.G.

§1B1.3, several circuits had held that consideration of criminal conduct outside the scope of the offense of conviction did not violate due process.<sup>2</sup> However, in 1990 the Ninth Circuit held that only quantities of drugs in the count of conviction could be considered in setting the guideline range in drug distribution cases.3 This view limiting the scope of U.S.S.G. §1B1.3 was contrary to the position taken by other circuits to include all drugs that were part of the same course of conduct or common scheme or plan as the offense of conviction in determining the guideline offense level. 4 After a rehearing en bane, the Ninth Circuit subsequently withdrew its opinion and issued a new decision compatible with the decisions in the other circuits.5

#### Acquitted Conduct, Standard of Proof, Burden of Persuasion

In 1990, several circuits approved the use of conduct underlying a charge of which the defendant or a co-defendant was acquitted in calculating the guideline range if supported by reliable evidence.<sup>6</sup>

See, e.g., McMillan v. Pennsylvania, 477 U.S. 79 (1986); <u>United States v. Romano</u>, 825 F.2d 725 (2d Cir. 1987); <u>United States v. Garcia</u>, 698 F.2d 31 (1st Cir. 1983).

See, e.g., United States v. Fox, 889 F.2d 357 (1st Cir. 1989). United States v. Guerrero, 863 F.2d 245 (2d Cir. 1988); United States v. Taplette, 872 F.2d 101 (5th Cir.), cert. denied, 110 S.Ct. 1288 (1989).

<sup>3</sup> United States v. Restrepo, 883 F.2d 781 (9th Cir. 1989).

See, e.g., United States v. Blanco, 888 F.2d 907 (1st Cir. 1989); United States v. Rutter, 897 F.2d 1558 (10th Cir.), cert. denied, 111 S.Ct. 88 (1990). United States v. Alston, 895 F.2d 1362 (11th Cir. 1990); United States v. White, 888 F.2d 490 (7th Cir. 1989).

<sup>5</sup> United States v. Restrepo, 903 F.2d 648 (9th Cir.), reh'g en banc granted, 912 F.2d 1568 (1990).

See, e.g., United States v. Rodriguez-Gonzalez, 899 F.2d 177 (2d Cir.), cert. denied, 111 S.Ct. 127 (1990). United States v. Mocciola, 891 F.2d 13 (1st Cir. 1989); United States v. Isom, 886 F.2d 736 (4th Cir. 1989).; United States v. Cianscewski, 894 F.2d 74 (3d Cir. 1990).

As the Supreme Court noted in McMillan v. Pennsylvania, 477 U.S. 79 (1986), evidence at sentencing need only be established by a "preponderance of the evidence" rather than the trial standard of proof "beyond a reasonable doubt." By the end of 1990, all 12 circuits had held that factual determinations under the guidelines also may be supported by a preponderance of the evidence.

During the year, courts continued to hold that the burden of persuasion for establishing mitigating factors is on the defendant, while the burden of establishing aggravating factors rests with the government.<sup>8</sup>

### Vulnerable Victim, Official Victim, Role in the Offense

In 1990, appellate courts upheld adjustments under U.S.S.G. §3A1.1 if the defendant "knew or should have known that a victim was unusually vulnerable due to age, physical or mental condition; ... or otherwise particularly susceptible to criminal conduct." These holdings are seen in

cases in which the defendant drugged his minor victims, making them physically and mentally more vulnerable to sexual exploitation, took an elderly man hostage during an escape attempt, and stole money from bank tellers during a robbery. 11

Conversely, several courts found such adjustments improper if the record did not support a finding that the victim was targeted because of a particular vulnerability, e.g., intoxication, 12 or if the particular vulnerability was already incorporated into the applicable guideline, e.g., the victim's age. 13 The Fourth Circuit in United States v. Wilson, 913 F.2d 136 (4th Cir. 1990), held that the district court erred in increasing the defendant's sentence pursuant to U.S.S.G. §3A1.1 in a case in which the defendant mailed letters to five residents of Raleigh, NC, requesting funds to aid victims of a recent tornado in the area. According to the appellate court, the fact that Raleigh had been struck by a tornado did not qualify every person in the area as a vulnerable victim and held that the vulner-

See, e.g., United States v. Burke, 888 F.2d 862 (D.C. Cir. 1989); United States v. Wright, 873 F.2d 437 (1st Cir. 1989); United States v. Guerra, 888 F.2d 247 (2d Cir. 1989), cert. denied, 110 S. Ct. 1883 (1990); United States v. McDowell, 888 F.2d 285 (3d Cir. 1989); United States v. Urrego-Linares, 879 F.2d 1234 (4th Cir.), cert. denied, 110 S. Ct. 346 (1989); United States v. Casto, 889 F.2d 562 (5th Cir. 1989), cert. denied, 110 S. Ct. 1164 (1990); United States v. Silverman, 889 F.2d 1531 (6th Cir. 1989); United States v. White, 888 F.2d 490 (7th Cir. 1989); United States v. Gooden, 892 F.2d 725 (8th Cir. 1989), cert. denied, sub nom. Keener v. United States, 110 S. Ct. 2594; United States v. Wilson, 900 F.2d 1350 (9th Cir. 1990); United States v. Fredericks, 897 F.2d 490 (10th Cir.), cert. denied, 111 S. Ct. 171; United States v. Terzado-Madruga, 897 F.2d 1099 (11th Cir. 1990).

<sup>8 &</sup>lt;u>See, e.g., United States v. McDowell</u>, 888 F.2d 285, 291 (3d Cir. 1989); <u>United States v. Urrego-Linares</u>, 879 F.2d 1234 (4th Cir.), <u>cert. denied</u>, 110 S.Ct. 346 (1989). <u>United States v. Howard</u>, 894 F.2d 1085 (9th Cir. 1990); <u>United States v. Kirk</u>, 894 F.2d 1162 (10th Cir. 1990).

<sup>9 &</sup>lt;u>United States v. Altman</u>, 901 F.2d 1161 (2d Cir. 1990).

<sup>10</sup> United States v. White, 903 F.2d 457 (7th Cir. 1990).

<sup>11</sup> United States v. Jones, 899 F.2d 1097 (11th Cir.), cert. denied, 111 S.Ct. 275 (1990).

<sup>12</sup> See, e.g., United States v. Cree. 915 F.2d 352 (8th Cir. 1990). But cf. United States v. Boise, 916 F.2d 497 (9th Cir.), cert. denied, ---S.Ct.---, (May 20, 1991) (No. 90-7217) (rejecting argument that adjustment proper only if defendant selects victim for his vulnerability)

<sup>13</sup> See, e.g., United States v. Plaza-Garcia, 914 F.2d 345 (1st Cir. 1990).

ability that triggers U.S.S.G. §3A1.1 must be unusual.

In 1990, courts upheld adjustments for offenses against official victims in cases in which defendants made threats against the President of the United States, <sup>14</sup> or shot at police officers attempting to serve an arrest warrant. <sup>15</sup> However, the Tenth Circuit held an adjustment under U.S.S.G. §3A1.2 improper if the defendant communicated a threat to an assistant U.S. attorney, but the assistant U.S. attorney was not the target of the threat. <sup>16</sup>

A number of circuits in 1990 issued differing interpretations of the scope of the Chapter Three adjustment for role in the offense, with several courts holding that an adjustment under U.S.S.G. §3B1.1 must be based solely on conduct in the offense of conviction. The Other courts, however, held that the scope of the conduct to be considered under this adjustment is wider and includes relevant conduct. In determining whether an adjustment for a leadership role is appropriate, courts have required a determination that other "criminally responsible" persons were involved in the offense. One circuit has held that for the defendant to qualify as a leader

or organizer, he or she must exercise "control" or be otherwise responsible for organizing, supervising, or managing others in the commission of the offense. <sup>20</sup>

The Eighth Circuit has adopted a broad definition of leadership and organizational roles and has held that a defendant may qualify as an organizer without directly controlling other individuals. 21 According to the Fifth Circuit, it is not enough for the government to offer evidence that the defendant is the head of a drug cartel to qualify the defendant as an organizer, leader, or supervisor in criminal activity involving five or more participants; the court has held that five or more participants must be involved in the "transaction of conviction."<sup>22</sup> Similarly, the Second Circuit held that there must be a "specific finding of the identities" of the "five or more participants."<sup>23</sup> The Tenth Circuit found that the district court incorrectly made a four-level adjustment for aggravating role based on the number of participants when only three other persons had been controlled by the defendant and the only other parties involved were two uncontrolled suppliers and 100 unidentified customers. However, the appellate court subsequently

upheld the adjustment because the operation was "otherwise extensive." <sup>24</sup>

#### Obstruction, Acceptance of Responsibility

The guidelines provide a two-level enhancement if a defendant "willfully impeded or obstructed, or attempted to impede or obstruct the administration of justice during the investigation or prosecution of the instant offense." In 1990, the appellate courts approved application of the obstruction adjustment to a variety of conduct, including committing perjury at trial, threatening a witness and materially misleading investigators, giving a false name at the time of arrest, lying to the probation officer, efusing to provide a handwriting sample, and jumping bond and failing to report to the probation officer.

However, several courts held in 1990 that "mere flight" in the immediate aftermath of a crime does not justify the two-level enhancement for obstruction of justice. <sup>32</sup> It should be noted that the Fifth Circuit reversed an adjustment for obstruc-

tion in a case in which the defendant concealed the gun used in the crime before the crime was reported or investigated. The circuit court found that the appellant concealed the gun not to obstruct justice, but rather in an effort to ensure that his crime would go unpunished. 33 Similarly, the Eighth Circuit has held that it was error to apply the obstruction adjustment where concealment was an element of the offense.<sup>34</sup> Finally, the Second Circuit held that the district court erred in failing to allow a defendant's doctor to testify about the "willfulness" of the defendant's obstructive action in a case in which the defendant claimed that his manic depressive and chemically imbalanced state deprived him of the ability to control his actions.<sup>35</sup>

The guidelines grant district courts broad discretion to make a two-level downward adjustment "[i]f the defendant clearly demonstrates a recognition and affirmative acceptance of personal responsibility for his criminal conduct." In reviewing district court determinations in 1990, the appellate courts upheld denials of the acceptance of responsibility adjustment in cases in

<sup>35</sup> United States v. Altman, 901 F.2d 1161 (2d Cir. 1990).

<sup>36</sup> U.S.S.G. §3E1.1.

which a defendant has committed additional illegal conduct after arrest, <sup>37</sup> committed perjury, <sup>38</sup> or failed to come forth, indicate violation of the law, and express regret for committing the crime. <sup>39</sup> During the year, courts generally held that entry of a guilty plea alone is not sufficient for the adjustment. <sup>40</sup> During the year, appellate courts continued to afford great deference to district courts in awarding or denying the adjustment, holding that the judge's determination will not be disturbed unless it is without foundation. <sup>41</sup>

The circuit courts split in 1990 on the question of whether a defendant must accept responsibility for all criminal conduct or only for conduct underlying the offense of conviction. The Fourth and Fifth Circuits <sup>42</sup> have held that before the district court makes an adjustment pursuant to U.S.S.G. §3E1.1, the defendant must accept responsibility for all criminal conduct. Other circuits, however, have followed <u>United States v. Perez-Franco</u>, 873 F.2d 455 (1st Cir. 1989) in holding that the adjustment cannot be denied where the defendant refuses to make self-incriminating statements about conduct in counts to

which he has not pleaded guilty and which were dismissed as part of the plea agreement. <sup>43</sup> Furthermore, the Ninth Circuit vacated the sentence in a case in which the district court denied the defendant a reduction for acceptance of responsibility on the grounds that the defendant failed to assist in gathering "the fruits and instrumentalities of the crime." According to the circuit court, the denial of the adjustment violated the defendant's fifth amendment right against self-incrimination. <sup>44</sup>

#### Adequacy of Criminal History

Guideline 4A1.3 permits a departure if the court finds that "reliable information indicates that the criminal history category does not adequately reflect the seriousness of the defendant's past criminal conduct or the likelihood the defendant will commit future crimes." In 1990, appellate courts generally affirmed the departures if prior convictions have been consolidated for sentencing 45 or where the defendant's criminal history score exceeded the parameters of the criminal history categories.

<sup>37 &</sup>lt;u>See, e.g., United States v. Sanchez</u>, 893 F.2d 679 (5th Cir. 1990); <u>United States v. Watkins</u>, 911 F.2d 983 (5th Cir. 1990); <u>United States v. Snyder</u>, 913 F.2d 300 (6th Cir. 1990), <u>cert. denied</u>, 111 S.Ct. 709 (1991);

<sup>38 &</sup>lt;u>See, e.g., United States v. Dyer, 910 F.2d 530 (8th Cir.), cert. denied, 111 S.Ct. 276, cert. denied, 111 S.Ct. 366 (1990);</u>

<sup>39</sup> See, e.g., United States v. Beard, 913 F.2d 193 (5th Cir. 1990).

<sup>40</sup> See, e.g., United States v. Rowland, 916 F.2d 621 (11th Cir. 1990).

<sup>41</sup> See, e.g., United States v. Camargo, 908 F.2d 179 (7th Cir. 1990).

<sup>42 &</sup>lt;u>United States v. Gordon</u>, 895 F.2d 932 (4th Cir.), <u>cert. denied</u>, 111 S.Ct. 131 (1990), <u>United States v. Tellez</u>, 882 F.2d 141 (5th Cir. 1989).

<sup>43</sup> See, e.g., United States v. Oliveras, 905 F.2d 603 (2d Cir. 1990).

<sup>44</sup> United States v. Watt, 910 F.2d 587 (9th Cir. 1990).

<sup>45 &</sup>lt;u>See, e.g., United States v. White,</u> 893 F.2d 276 (10th Cir. 1990); <u>United States v. Armstrong,</u> 901 F.2d 988 (11th Cir. 1990).

<sup>46</sup> See, e.g., United States v. Brown, 899 F.2d 94 (1st Cir. 1990); United States v. Dycus, 912 F.2d 466 (6th Cir. 1990); United States v. Marston, 914 F.2d 258 (2d Cir. 1990); United States v. Bernhart, 905 F.2d 343 (10th Cir. 1990).

Appellate courts also have affirmed upward departures in cases in which older prior convictions were excluded from the calculation of the criminal history score, 47 sentencing was pending on unrelated offenses, 48 and commission of subsequent criminal conduct. 49 In United States v. Gaddy, 909 F.2d 196 (7th Cir. 1990), the Seventh Circuit upheld an upward departure under U.S.S.G. §4A1.3 for a defendant who jumped bail on a previous conviction and never received the appropriate criminal history points. Reliable evidence also indicated that the defendant had two outstanding arrest warrants for conduct similar to the offense of conviction. Generally, however, courts have held that a prior arrest record by itself should not be the basis for a departure.<sup>50</sup>

While several courts have devised formulas to determine the reasonableness of departures for adequacy of criminal history, <sup>51</sup> other courts continue to "reject any bright-line rule that requires a sentencing judge . . . to subrogate his or her residual discretion to some explicit or external criteria." <sup>52</sup>

In 1990, the First Circuit reversed an upward departure in a case in which the district court

found that the defendant's criminal history category of VI did not "mirror the severity and extent of [his] historic lawlessness." The appellate court reversed and remanded, holding that the district court failed to explain the rationale for departing from a guideline range of 27-33 months and imposing the maximum statutory sentence of 60 months. The appellate court held that the degree of the departure was "unreasonably harsh." 53 In United States v. Rodriguez-Castro, 908 F.2d 438 (9th Cir. 1990), the appellate court found that the defendant's criminal history score did not adequately take into account the fact that the defendant had previously engaged in high speed chases similar to those involved in the current offense of conviction. However, the appellate court vacated the sentence because the district court failed to explain explicitly the reasons for the extent of its upward departure and failure to make any analogies to other criminal history categories.

During the year, several appellate courts reversed downward departures from criminal history category I based on the defendant's lack of criminal record. Meanwhile, the Eighth Circuit affirmed a downward departure for a career offender because of the "relatively minor nature

<sup>47</sup> See, e.g., United States v. Oliver, 912 F.2d 464 (4th Cir. 1990); United States v. Harvey, 897 F.2d 1300 (5th Cir.), cert. denied, 111 S.Ct. 568 (1990). United States v. <sup>53 &</sup>lt;u>United States v. Ocasio</u>, 914 F.2d 330 (1st Cir. 1990).

of the [defendant's] crimes, the briefness of his [criminal] career, and his age at the time of the crimes."

#### Offender Characteristics

The guidelines provide that offender characteristics such as age, <sup>56</sup> education and vocational skills,<sup>57</sup> mental and emotional conditions,<sup>58</sup> physical condition, <sup>59</sup> previous employment record, 60 and family ties and responsibilities and community ties, 61 while not ordinarily relevant in establishing the sentencing range, may in extraordinary circumstances form the basis for a departure. In 1990, several courts recognized atypical circumstances and departed based on such offender characteristics. In one case, the district court made a downward departure for a defendant who suffered from chronic obstructive pulmonary disease, finding that he had an extraordinary physical impairment that made it unlikely that he would survive prison.<sup>62</sup> Similarly, the Second Circuit affirmed a downward departure where the defendant's homosexual orientation, small stature, and immature appearance made him particularly vulnerable to physical attack while in prison.<sup>63</sup>

Although several appellate courts have held that alcohol abuse is not a legitimate basis for a downward departure, <sup>64</sup> the Eighth Circuit upheld a downward departure in an escape case in which prison officials knowingly permitted an alcoholic inmate to take an unsupervised furlough. While on furlough, the inmate engaged in a week-long drinking binge, spent her travel funds, and failed to return on time. According to the appellate court, the prison officials' conduct, rather than the defendant's alcoholism, provided the basis for the departure. <sup>65</sup>

The appellate courts have reversed downward departures based on the defendant's pregnancy, <sup>66</sup> the impact a defendant's incarceration would have on her 18-month and seven year-old children, <sup>67</sup> and the passive nature of a defendant who was convicted of mailing child pornography. <sup>68</sup> The Eighth Circuit reversed a downward

<sup>65 &</sup>lt;u>United States v. Whitehorse</u>, 909 F.2d 316 (8th Cir. 1990).

<sup>66</sup> See, e.g., United States v. Pozzy, 902 F.2d 133 (1st Cir.), cert. denied, 111 S.Ct. 353 (1990).

<sup>67</sup> United States v. Brand, 907 F.2d 31 (4th Cir.), cert. denied, 111 S.Ct. 585 (1990).

<sup>68 &</sup>lt;u>See, e.g., United States v. Deane, 914 F.2d 11 (1st Cir. 1990); United States v. Studley, 907 F.2d 254 (1st Cir. 1990).</u>

departure based on the defendant's stable family life, commitment to assisting young people by coaching athletic teams, military service, and lack of a prior record. According to the circuit court, none of these factors was sufficiently atypical to warrant a departure. However, the appellate court said a downward departure was appropriate in a case in which the defendant, a Native American, had held a steady job for most of his adult life in the adverse environment of the Pine Ridge Reservation.

Additionally, appellate courts remanded cases when judges have concluded, as a matter of law, that they could not consider the characteristics identified in U.S.S.G. §§5H1.1-5H1.10 to determine if a particular situation was extraordinary and warranted departure, <sup>71</sup> or in setting the sentence within the guideline range. <sup>72</sup>

### Substantial Assistance, Aggravating and Mitigating Factors

The guidelines allow a district court to depart downward in cases in which the defendant "has provided substantial assistance [to the government] in the investigation or prosecution of another person who has committed an offense."<sup>73</sup> However, the court cannot depart under this provision unless the government makes the requisite motion <sup>74</sup> and circumstances warrant a reduced sentence. <sup>75</sup> In 1990, the appellate courts that considered the issue have found that the requirement of a government motion does not violate due process. <sup>76</sup> On a related issue, several circuits have held that a memorandum <sup>77</sup> or letter <sup>78</sup> from the government is not the functional equivalent of a motion.

Although the district court may not make a downward departure based on substantial assistance absent a government motion, the court may consider the defendant's cooperation with the government in choosing a particular sentence within the applicable guideline range. Some courts have noted in dicta that if there has been a breach of a plea agreement or if the prosecution has acted in egregious bad faith, the defendant may be entitled to a downward departure.

<sup>77 &</sup>lt;u>See, e.g., United States v. Brown</u>, 912 F.2d 453 (10th Cir. 1990).

<sup>78</sup> See, e.g., United States v. Coleman, 895 F.2d 501 (8th Cir. 1990).

<sup>79</sup> See U.S.S.G. §1B1.4; United States v. Alamin, 895 F.2d 1335 (11th Cir.), reh'g denied, 904 F.2d 712, cert. denied, sub nom. Wellington v. United States, 111 S.Ct. 196 (1990); United States v. Bruno, 897 F.2d 691 (3d Cir.

The guidelines and the underlying statute allow a district court to impose a sentence outside the applicable guideline range if the court finds that there exists "an aggravating or mitigating circumstance of a kind, or to a degree, not adequately taken into consideration by the Sentencing Commission in formulating the guidelines that should result in a sentence different from that described."82 In 1900, appellate courts continued to affirm upward departures in cases in which district courts found that the guideline sentence did not reflect the seriousness of the offense conduct. This affirmation has come in cases involving an "astronomical" quantity of drugs, 83 a parent involving a minor child in drug trafficking, <sup>84</sup> and a defendant behaving in a dangerous and inhumane way by importing illegal aliens in a small compartment above his van's exhaust system. 85 Courts also affirmed upward departures in cases in which a defendant kidnapped a bank president during a robbery, 86 possessed a firearm while under the influence of drugs, <sup>87</sup> led a dangerous high-speed chase while trying to transport illegal aliens, <sup>88</sup> and used explosives for intimidation during a bank robbery. <sup>89</sup>

Appellate courts reversed upward departures in 1990 based on the local community's intolerance of drug-trafficking, 90 the defendant's need for psychiatric treatment, 91 and the attempt to equalize sentences between co-defendants. 92

#### Notice Requirement, Appellate Review

Several appellate courts held in 1990 that a defendant must receive notice of the court's intent to depart and an opportunity to comment prior to the imposition of the sentence. Recently, the Second Circuit held that the government is entitled to notice in the context of downward departures. Other circuits have held that sufficient notice is given when factors warranting a departure are identified in the pre-

sentence report and the defendant receives the report prior to sentencing. 95 The split between the circuits on this notice issue may be resolved in 1991 by the Supreme Court. In United States v. Burns, 893 F.2d 1343 (D.C. Cir.), cert. granted, 110 S. Ct. 3270 (1990), the district court departed upward in a case of a defendant who embezzled \$1.2 million from the government during a six year period. The defendant received a copy of his presentence report and was allowed to address the court prior to sentencing. On review, the D.C. Circuit held that the defendant was not entitled to notice of the judge's decision to depart upward. According to the court, "[s]uch a requirement would constitute a radical deviation from past practice and would impose a cumbersome burden on trial judges."96

The Sentencing Reform Act of 1984 provides that the defendant and the government may appeal a sentence if the sentence: (1) was imposed in violation of law; (2) was imposed as a result of an incorrect application of the sentencing guide-

lines; (3) was an unreasonable departure; or (4) was imposed for an offense for which a guideline does not exist and is plainly unreasonable. <sup>97</sup> In 1990, the appellate courts continued to hold that a district court's discretionary refusal to make a downward departure is not appealable, <sup>98</sup> nor is the extent of a downward departure appealable by the defendant.

The statutory scheme for appellate review is set forth at 18 U.S.C. § 3742(e).

The court of appeals shall give due regard to the opportunity of the district court to judge the credibility of the witnesses, and shall accept the findings of fact of the district court unless they are clearly erroneous and shall give due deference to the district court's application of the guidelines to the facts. The statute directs appellate courts to give due regard to the district court's determination of the credibility of the witnesses, accept the findings of fact unless they are "clearly erroneous," and give due defer-

See, e.g., United States v. Pighetti, 898 F.2d 3 (1st Cir. 1990); United States v. Gant, 902 F.2d 570 (7th Cir. 1990); United States v. Left Hand Bull, 901 F.2d 647 (8th Cir. 1990); United States v. Wright, 895 F.2d 718 (11th Cir. 1990) (per curiam); see also United States v. Dean, 908 F.2d 215 (7th Cir. 1990) (defendant cannot appeal extent of a downward departure made pursuant to a government motion under U.S.S.G. §5K1.1).

<sup>18</sup> U.S.C. § 3742(e) provides: (e) Consideration.--Upon review of the record, the court of appeals shall determine whether the sentence--(1) was imposed in violation of law; (2) was imposed as a result of an incorrect application of the sentencing guidelines; (3) is outside of the applicable guideline range, and is unreasonable, having regard for--(A) the factors to be considered in imposing a sentence, as set forth in chapter 227 of this title; and (B) the reasons for the imposition of the particular sentence, as stated by the district court pursuant to the provisions of section 3553(c); or (4) was imposed for an offense for which there is no applicable sentencing guideline and is plainly unreasonable.

<sup>101 &</sup>lt;u>United States v. Perry</u>, 908 F.2d 56 (6th Cir.), <u>cert. denied</u>, 111 S.Ct. 565 (1990) (to be clearly erroneous, "a decision must strike the court as more than just maybe or probably wrong; it must strike [the court] as wrong with

ence to the district court's application of the guidelines to the facts. 102

Several circuits in 1990 adopted the procedures set forth in <u>United States v. Diaz-Villafane</u>, 874 F.2d 43 (1st Cir.), <u>cert. denied</u>, 110 S. Ct. 177 (1989), for appellate review of departures. Under the <u>Diaz-Villafane</u> approach, a reviewing court will (1) "assay the circumstances relied on by the district court in determining that the case is sufficiently 'unusual' to warrant departure"; (2) "determine whether the circumstances . . . actually exist in the particular case"; and (3) review "the direction and degree of departure . . . by a standard of reasonableness." The Fourth Circuit adds a fourth prong to the test, 104 while the Ninth Circuit has adopted a more extensive, five-part test to review departures.

During the year, several courts upheld departures based on both proper and improper grounds, <sup>106</sup> while other courts have remanded for resentencing. <sup>107</sup> Additionally, courts have held that in cases of a dispute involving overlapping guidelines, the question can be left unresolved and the sentence affirmed if the record supports the conclusion that the same sentence would have been imposed regardless of the out-

come of the dispute. 108 Other courts have remanded in cases in which the district court intentionally sentenced the defendant at the bottom of the higher of the disputed ranges. The Fourth Circuit has held that if a dispute exists as to which guideline range applies and there is an overlap, the district court must make a specific determination that the sentence would be the same under either range. 110

#### Conclusion

A common law of sentencing for the federal courts continues to develop as the number of defendants sentenced under the guidelines increases yearly. During 1990, the federal courts decided key cases on the issues of relevant conduct, guideline adjustments, departures, and appellate review that enhanced the understanding of the sentencing guidelines and interpreted core provisions of the Sentencing Reform Act.

#### B. Statutory Penalty Review Project

The Commission is required under section 994(r) of title 28 to submit a report to Congress recommending changes to statutory maximum penalties established in the federal code.

the force of a five-week old, unrefrigerated dead fish").

<sup>109</sup> See, e.g., United States v. Luster, 896 F.2d 1122 (8th Cir. 1990).

<sup>110</sup> United States v. Willard, 909 F.2d 780 (4th Cir. 1990).

The Commission, not later than two years after the initial set of sentencing guidelines promulgated under subsection (a) goes into effect, and thereafter whenever it finds it advisable, shall recommend to the Congress that it raise or lower the grades, or otherwise modify the maximum penalties, of those offenses for which such an adjustment appears appropriate.

Responding to this mandate, the Commission submitted a preliminary report to Congress on November 1, 1989, that included a statutory penalties project description and compilations of federal criminal offenses. 111

In 1990, the Commission continued its work on a supplemental report containing recommendations for raising or lowering the penalties in federal criminal statutes proscribing organized crime, civil rights, assaults against federal officials, and involuntary manslaughter.

#### Scope of the Report

In its preliminary report, the Commission noted that its review of statutory maximum penalties was compatible with the Commission's overall mission of developing sentencing guidelines and policy statements for the federal courts. The Commission views the study as affording an opportunity to discover inconsistencies and unwarranted disparities in the maximum punishment available under the code for similarly situated offenders who commit similar offenses.

In large measure, the Commission has addressed the disparities in the patchwork of statutory pen-

alties through promulgation of the guidelines. In many instances, the guidelines cut through inconsistent and disparate statutory maximum penalties to provide uniformity to the federal sentencing system. This is possible, in part, because in most instances guideline sentences do not reach the maximum penalties authorized by the statute. Thus, even where one guideline covers several statutes containing different maximum penalties, uniformity in sentencing for similar criminal conduct can be achieved.

The guidelines have been successful in instilling a substantial amount of rationality in the sentencing process despite variations in statutorily authorized penalties for similar offenses. However, when the guideline sentence conflicts with a statutorily-required minimum or maximum penalty, the statute prevails. In such instances, the statute may act to frustrate the sentencing outcome otherwise required by the guidelines and, in that sense, impede the goal of a uniform, consistent sentencing system envisioned by the Sentencing Reform Act.

With such concerns in mind, the Commission is reviewing statutes or groups of statutes that appear to defeat, or carry the potential to defeat, the guidelines' objective of providing similar sentences for similarly situated defendants who commit similar offenses.

The Commission's recommendations in its supplemental report will focus on those statutory penalties that possess a strong potential to perpetuate unwarranted disparity, disproportionality, or inconsistency in federal sentencing that cannot be remedied by the guidelines. Im-

<sup>111</sup> United States Sentencing Commission, <u>Preliminary Report to the Congress: Statutory Penalties Project Description and Compilations of Federal Criminal Offenses</u> (November 1, 1989).

plementation of the recommendations will also reduce inconsistencies in penalty exposure faced by criminal defendants and improve the overall consistency of the federal code.

### Criteria for Including Statutes in the Report

Statutes selected for review in the supplemental report include those in which the penalty range available is insufficiently broad to allow for full consideration of the defendant's conduct in determining a sentence. Generally, such statutes fall into two categories: 1) statutes that encompass a wide range of criminal behavior, including serious violent or drug-related offenses, but provide only a narrow range of sentencing alternatives; or, 2) statutes that create the potential for irrational and disproportionate sentences by providing a schedule of escalating maximum penalties based upon a limited set of aggravating factors. 112

Based on this criteria, the supplementary report will focus on the following statutes:

- Offenses in Deprivation of Civil Rights:
   18 U.S.C. §§ 242, 245, 247; 42 U.S.C.
   § 3631
- Assaults Against Members of Congress, Supreme Court Justices, Federal Officers and Employees, Foreign Officials, Official Guests, Internationally Protected Persons, and Assault With a Dangerous Weapon: 18 U.S.C. §§ 111, 112(a), 113(c), 351(e) and 1751(e)

- The Travel Act: 18 U.S.C. § 1952
- Involuntary Manslaughter: 18 U.S.C. §1112

#### Methodology

In compiling this report, the Commission is examining the legislative background of the statutes selected, landmark cases involving their interpretation, and appellate opinions involving both pre- and post-guideline sentencing issues. Staff are reviewing the Final Report of the National Commission on Reform of Federal Criminal Laws (the Brown Commission), the Model Penal Code, and the last effort to reform the federal criminal code passed by the United States Senate. Additionally, the Commission is analyzing data it has received on sentences imposed from January 19, 1989, through December 31, 1989. To supplement this research, the Commission is also examining detailed court records in a representative sample of cases.

The Commission plans to submit its supplementary report on the statutory penalty review project to Congress in early 1991.

<sup>112</sup> For example, section 111 of title 18, United States Code, provides a three year penalty for assaulting various federal officers and employees. That penalty is increased to ten years if the assault involves the use of a dangerous weapon. One result of this penalty structure is that an assault against a federal officer resulting in serious bodily injury -- committed without a dangerous weapon -- is subject to a maximum penalty of only three years imprisonment, while an assault not resulting in bodily injury that involves brandishing a weapon is subject to the higher penalty.

Chapter Four

## Guideline Amendments

The legislation creating the Sentencing Commission envisioned that the guidelines would be subject to periodic modification and refinement. Congress provided that," The Commission periodically shall review and revise, in consideration of comments and data coming to its attention, the guidelines promulgated pursuant to the provisions of this section." 18 U.S.C. § 994(o).

The Commission adopted this approach to guideline drafting, stating in the <u>Guidelines Manual</u> that the initial draft was "but the first step in an evolutionary process." The Commission has ongoing responsibilities to refine and modify the guidelines in light of monitoring, research, and Congressional enactment of new statutes.

### Permanent and Emergency Amendment Authority

By statute, the Commission may transmit amendments to the Congress yearly on or after the beginning of a regular session of Congress but not later than the first day of May. Such amendments must remain before the Congress for 180 days before taking effect. At the expiration of this review period or at a later date set by the Commission, the guideline amendments become effective automatically, unless the Congress provides otherwise by enactment of law.

Congress also provided the Commission with authority (expiring November 1, 1989) to promulgate temporary, emergency amendments during the initial phase of guideline implementation. Emergency amendments were permitted to take effect without a period of Con-

gressional review but must be submitted as permanent amendments to remain in effect. The Commission has utilized the temporary emergency guideline promulgation authority to clarify and improve the guidelines and to respond to legislative enactments.

#### Amendments Promulgated

In 1990, the Commission continued its ongoing efforts to clarify, improve, and expand the Guidelines Manual. As part of the regular amendment process, the Commission published a series of proposed amendments for public comment in the Federal Register. The Commission received extensive written and oral comment on the proposed amendments in connection with a public hearing held in Washington, D.C. on March 15, 1990. After review of the written comment and hearing testimony, the Commission adopted 55 amendments to the sentencing guidelines, policy statements, and official commentary. These amendments and accompanying reasons were reported to Congress on May 1, 1990. Congress took no action to delay or revise the amendments during its 180-day review period and, consequently, the amendments became effective on November 1, 1990.

In addition, during the summer of 1990 the Commission promulgated policy statements governing the revocation of probation and supervised release. These policy statements also became effective on November 1, 1990.

The majority of the amendments promulgated in 1990 were designed to clarify existing guidelines, policy statements, and commentary. Sev-

eral substantive amendments resulted from Commission policy decisions, including: restructuring of the arson guideline; new guidelines for conspiracy or solicitation to commit murder and feloniously mailing injurious articles; and increasing offense levels in guidelines for sexual exploitation of minors and violations of civil rights. In addition, a number of guideline amendments responded to Congressional legislation (e.g., the Financial Institutions, Reform, Recovery, and Enforcement Act of 1989).

#### Working Groups

During 1990, the Commission convened interdisciplinary staff working groups to study specific guideline areas in detail for possible amendment consideration. Commission priorities in 1990 included: bank robbery, criminal history, drugs, firearms and explosives offenses, immigration, and revocation of probation and supervised release. Additionally, existing working groups studying organizational sanctions and statutory maximum penalties continued their work.

The staff working groups study a specific guideline issue, identify problems and areas of concern, and make recommendations to the Commission for possible action. During the process, each group reviewed the following information as it pertained to the respective guideline area under scrutiny: Technical Assistance Service (hotline) reports of frequent questions from probation officers about guideline application; monitoring data regarding sentencing practices and departures; case files; previously considered draft amendment proposals; relevant court decisions; public comment; and legislative history and recent legislative enactments. Reports from the staff working groups are presented to the Commission to aid in their deliberation and made available to the public.

# Research

#### A. MONITORING

#### Background and Data Collection Activities

#### Statutory Requirements

The Monitoring Unit collects, prepares, and analyzes data on guideline sentences to support the Commission's activities. As authorized by Congress, the Commission has a variety of research responsibilities, including:

- the establishment of a research and development program within the Commission for the purpose of serving as a clearing-house and information center for the collection, preparation, and dissemination of information on federal sentencing practices (28 U.S.C. § 995(a)(12));
- the publication of data concerning the sentencing process (28 U.S.C. § 995(a)(14));
- the systematic collection and dissemination of information concerning sentences actually imposed and the relationship of such sentences to the factors set forth in section 3553(a) of title 18, United States Code (28 U.S.C. § 995(a)(15)); and
- the systematic collection and dissemination of information regarding effectiveness of sentences imposed (28 U.S.C. § 995 (a)(16)).

In establishing the Commission, Congress envisioned systematic collection and reporting of information on guideline cases.

The appropriate judge or officer shall submit to the Commission in connection with each sentence imposed (other than a sentence imposed for a petty offense, as defined in title 18, for which there is no applicable sentencing guideline) a written report of the sentence, the offense for which it is imposed, the age, race, and sex of the offender, information regarding factors made relevant by the guidelines, and such other information as the Commission finds appropriate. The Commission shall submit to Congress at least annually an analysis of these reports and any recommendations for legislation that the Commission concludes is warranted by that analysis (28 U.S.C. § 994(w)).

Pursuant to its authority under 28 U.S.C. §§ 994(w) and 995(a)(8), and after discussions with the Judicial Conference Committee on Criminal Law and Probation Administration and the Administrative Office of the U.S. Courts (AO), the Commission requested that probation offices in each judicial district submit the following documents on every case sentenced under the guidelines:

- Presentence Report (PSR)
- Guideline Worksheets
- Report on the Sentencing Hearing (statement of reasons for imposing sentence as required by 18 U.S.C. § 3553(c))
- Written Plea Agreement (if applicable)
- Judgment of Conviction

#### USSC Data Collection

In order to better serve the needs of Congress and the court community, the Commission has revised its statistical reporting cycle to follow a fiscal year calendar. Consequently, unless specifically noted elsewhere in this report, the term "1990" should be interpreted as meaning fiscal year 1990 (October 1, 1989 through September 30, 1990).

Throughout 1990, the Monitoring Unit has continued to make substantial progress toward developing a comprehensive computerized data file on defendants sentenced under the guidelines. To date three major data collection modules have been implemented and data collection is proceeding. In addition, a data collection module to monitor court decisions made regarding probation and supervised release violations has recently been developed.

Module I, Receipt Control, serves as a document control system that provides a mechanism for identifying cases. Prior to September 1990, the Receipt Control system imported data from the AO's Federal Probation Sentencing and Supervision Information System (FPSSIS) to supplement data collected in-house. In September when FPSSIS was terminated, the USSC system was redesigned to collect much of the information previously provided by FPSSIS from court documents received by the Commission. Module II, Basic Sentencing Information, captures sentencing information on each case as documented in the Judgment of Conviction order, as well as statutory and guideline provisions from the Presentence Report and Report on the Sentencing Hearing. Module III, Cuidcline Application and Departures, captures the complete range of guideline decisions made by the court and departure information on each case. The Probation and Supervised Release Violation Module will monitor court decisions and implementation of the Commission's violation policy statements.

The remaining modules, to be implemented for research purposes, will capture selected real offense behavior, plea agreements, factual disputes, criminal history, and offender characteristics. These modules will differ from other modules in that data will be collected on a sample of cases as opposed to the entire population.

In 1990, the Monitoring Unit prepared two data files on guideline cases. For each file, the unit prepared a report on descriptive statistics for the Commission and public release. In addition, the unit finalized a data file covering cases sentenced through 1989 and submitted it for public release to the Inter-University Consortium for Political and Social Research at the University of Michigan. Additional data files will be forwarded to the Consortium on a regular basis.

#### Data Collection Issues

The Commission received documentation on 29,011 cases sentenced under the Sentencing Reform Act between October 1, 1989, and September 30, 1990. Table C provides the number of cases received by circuit and district.

From October 1, 1989, through August 31, 1990, probation offices across the country reported a

total of 26,183 guideline cases to the AO through its FPSSIS data entry system. The same time period, 26,919 cases were reported to the Commission. Despite the close match in cases reported to these two systems, both suffer from underreporting problems, partially due to different reporting criteria.

Ninety-one percent of the Commission's monitoring cases sentenced prior to September of 1990 have been matched successfully with corresponding FPSSIS cases. The remaining nine percent of cases reported to the Commission were not reported to the AO or were reported in an inconsistent manner so that a meaningful computerized match could not be made. No attempt was made to match monitoring cases with corresponding FPSSIS cases in September 1990 due to significant reductions of reports to FPSSIS during that month.

Despite possible reporting problems experienced by the two data systems, differences in general characteristics or descriptive statistics about the national population of defendants sentenced pursuant to the guidelines are minor. However, reporting problems specific to individual districts or offices may result in more substantial difficulties in generalizing to the actual district populations. It is important to note that all data collected and analyzed by the Commission reflects only reported populations (i.e., cases in which appropriate documentation was forwarded to the Commission).

In order to assess the potential for biases in the Commission data file due to non-reporting, the AO's FPSSIS data file on guideline cases sentenced through August 30, 1990, was utilized to identify cases that were not received by the Commission as of December 28, 1990. Table C reports the number of cases identified from FPSSIS as non-petty, guideline, or mixed law cases that were not located in the Commission's Monitoring data file. 114

Because the monitoring data file considers a "case" a single sentencing event (even if multiple indictments are involved), and the FPSSIS data file is indictment-based, multiple cases listed in FPSSIS as sentenced by the same judge on the same date have been considered a single case for purposes of the figures reported in this table.

The combined total reported in Table C, including cases received and not received, should approximate the number of non-petty cases sentenced under the Sentencing Reform Act (assuming substantial mutual non-reporting is not occurring in both systems). Due to the termination of the sentencing component of FPSSIS in September 1990, the Commission will monitor reporting activities based on the AO's Criminal Masterfile in future years.

As Table C indicates, the percentage of cases received for each district varies substantially. Seventy-nine of the 94 districts have reporting rates higher than 90 percent. While preliminary

Both reporting figures exclude cases involving solely petty offenses, organizational defendants, or diversionary sentences. The USSC Monitoring data file used for this document, MONFY90, includes cases received by the Commission as of December 28, 1990. The Administrative Office of the U.S. Courts' FPSSIS data file was cut from the ongoing data file and includes cases reported and edited as of November 16, 1990.

<sup>114</sup> Figures reported as not received are dependent on the accuracy of reporting to FPSSIS. Cases inappropriately marked as guideline, mixed law, and non-petty in the FPSSIS data file are included in these figures unless correspondence from the field was received informing the Commission of the incorrect status.

investigation suggests that magistrates' courts have higher rates of non-reporting, most reported populations should provide representative results within the districts themselves. On the other hand, 13 districts have reporting rates of less than 90 percent, with seven of these having reporting rates of less than 80 percent. Without further investigation of reasons for non-reporting, assumptions that the reported population is representative of the total population become more problematic as the non-reporting rate increases.

Despite the low rates of reporting in several districts, each district's representation in the total USSC case population varies little from the national combined total. For example, although the District of Columbia has a non-reporting rate of 8.8 percent, the District's cases represent 1.7 percent of the USSC data file, only a 0.1 percent difference from the national combined total percent of 1.8. As a result, we can expect most within-district reporting rates to have little impact on the national figures reported here. As illustrated in the last column of Table C, all districts show less than one half of one percent difference in the proportion of cases in the USSC population compared to the national combined total.

While the above figures provide information on the degree of potential non-reporting, further study would be required to uncover any biases associated with non-reporting. One known reporting bias arising from fewer reported magistrate cases is the potential for slightly higher rates of imprisonment, longer average prison terms, and fewer cases among less serious crimes. Other unknown reporting biases could enhance or counteract these biases.

As noted previously, the Commission should receive up to five documents on each case sentenced pursuant to the guidelines. In FY1990, the Commission received Presentence Reports (PSR) for 95 percent of the cases (in 3.0% the PSR was known to have been waived); Judgment of Conviction Orders for 98 percent of the cases; Guideline Worksheets for 93 percent; and Written Plea Agreements for 46 percent. 116

The submission rate for the Report on the Sentencing Hearing (statement of reasons) has increased significantly during the past three years, rising to 79.1 percent for cases sentenced in FY1990 compared to the 40.0 percent rate reported in 1988 and 65.0 percent in 1989. However, this is still below the rate necessary for a complete account of court activities under the guidelines. In FY1990, the Commission continued to work with Judge Edward R. Becker, then-Chairman of the Judicial Conference Committee on Criminal Law and Probation Administration, and staff of the Probation Division to improve the submission rate of this document. The recent incorporation of the Report on the Sentencing Hearing within the Judgment of Conviction Order should enhance both the submission and uniformity of this information. See Table D for document submission rates by circuit and district.

<sup>115</sup> Two districts, Guam and the Northern Mariana Islands, had no reported cases for FY1990.

<sup>116</sup> For the 54 percent of cases for which no written plea agreement was received, over two-thirds involved no applicable written plea agreement. In the remaining cases, the applicability of a plea agreement was unknown. The Commission is currently working with the Probation Division to incorporate more extensive information within the Presentence Report on the applicability of plea agreements.

Because Report on the Sentencing Hearing information is critical to determination of guideline factors and ranges accepted by the court, lack of information may create biases in tables dependent on such information. Again, preliminary investigations reveal that magistrates' courts are less likely than district courts to submit Reports on the Sentencing Hearing. As a result, it is anticipated that available information may be biased toward cases at higher offense levels and guideline ranges. However, comparisons of ranges obtained from Presentence Reports from cases with Reports on the Sentencing Hearing to cases from the entire population indicate only a slight difference (approximately 1.0%) in the proportion of offenders in the lowest range and virtually no difference in the remainder of the distribution of recommended ranges.

In addition, a comparison of cases with guideline information available to all cases received indicates little bias in distributions based on type of offense or type of sentence received; the average prison terms were similar. As a result, no initial reasons are found to indicate a possible direction for bias in the distributions of guideline factors. 117

A comparison of type of sentence imposed shows: probation only (14.1%; 15.5%), probation and confinement (7.0%; 7.0%), prison plus supervised release (72.7%; 71.2%), prison only (3.1%; 3.1%), new split sentence (2.6%; 2.6%). The average prison sentence was 59 months for "Cases with Guideline Factors Available" and 61 months for "All Cases Received."

A comparison of "Cases with Guideline Factors Available" to "All Cases Received" on the distribution across primary offense category shows: drug offenses (Cases with Guideline Factors Available - 48.4%; All Cases Received - 47.0%), forgery and counterfeiting (3.4%; 3.5%), firearms (6.6%; 6.4%), immigration offenses (5.3%; 6.2%), embezzlement (4.1%; 4.4%), fraud (10.1%; 10.4%), robbery (3.9%; 4.1%), larceny (6.5%; 6.4%).

Descriptions of variables used in this table are provided in Appendix A.

### Descriptive Statistics

### Implementation of the Guidelines

By statute, the Commission receives information only on defendants sentenced pursuant to the Sentencing Reform Act of 1984 (SRA). Information about defendants sentenced under pre-guideline law is reported through the AO's data systems.

The prospective nature of the SRA, coupled with constitutional challenges to the Act, resulted in only 17.9 percent of all federal criminal defendants sentenced in 1988 being sentenced under the guidelines. The following year, 54.5 percent of all federal criminal defendants were sentenced under the SRA. In 1990, the figure rose to 70.0 percent. Figure 2 depicts the proportion of defendants sentenced monthly under guideline and pre-guideline law. During August 1990, approximately 75 percent of all federal defendants were sentenced under the SRA.

As stated earlier, the Commission received 29,011 cases sentenced under the SRA in 1990. Four districts were responsible for 20.2 percent of the cases received: Southern Texas, Western

Texas, Southern California, and Central California. The Fifth and Ninth Circuits accounted for 36.1 percent of all guideline cases. Table E depicts the distribution of guideline cases across the 94 judicial districts and 12 judicial circuits.

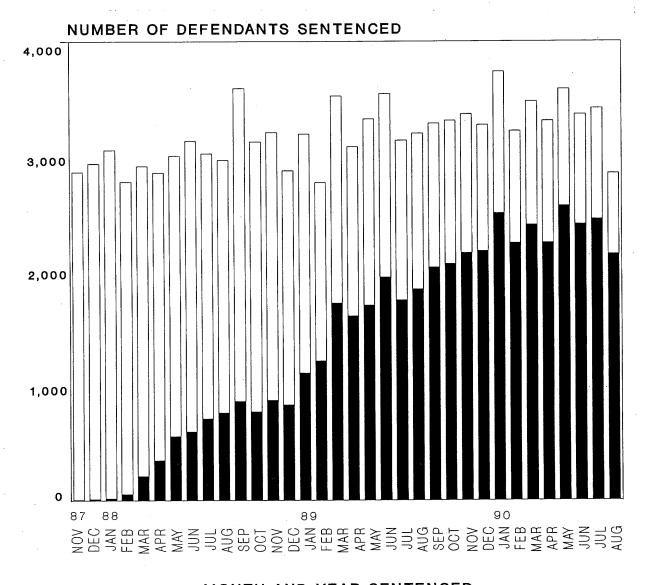

The gradual phase-in of guideline sentencing is due primarily to the prospective nature of the SRA. Given the time necessary for detection of an offense, case development, and processing, defendants are still being sentenced under preguideline law. This phasing-in of the guidelines is occurring at different rates in different districts. While 81.2 percent of the defendants in the Fifth Circuit sentenced in 1990 were subject to the guidelines, only 56.2 percent of the defendants in the First Circuit were sentenced under the new law during the same period. Table C-2 in Appendix C presents the distribution of guideline and pre-guideline cases by circuit and district.

<sup>118</sup> A "case" or "defendant" as discussed in this report is defined in the USSC data collection system as a single sentencing event for a single defendant. Multiple defendants in a single sentencing event are treated as separate cases. If an individual defendant is sentenced more than once during the time period of interest, each sentencing event is identified as a separate case.

<sup>119</sup> These figures involve calendar year 1989. Any variations from figures previously reported are due to updates to the data files received. The percentage for 1990 guideline and pre-guideline cases includes only cases sentenced between October 1, 1989, and August 31, 1990. With the termination of FPSSIS in August 1990, the information necessary to make guideline and pre-guideline comparisons is no longer available.

The Sentencing Commission data file, MONFY90, includes information reported to the Commission by December 28, 1990, on defendants sentenced under the Sentencing Reform Act of 1984 between October 1, 1989, and September 30, 1990. The data file excludes defendants sentenced solely for petty offenses and those receiving diversionary sentences. Further specifications on the contents of this file are included in Appendix A or are available upon request from the Commission. The Administrative Office of the U.S. Courts' FPSSIS data file provides a large portion of the variables currently in MONFY90.

Figure 2
GUIDELINE VS. PRE-GUIDELINE DEFENDANTS SENTENCED\*
(November 1987 through August 1990)

### MONTH AND YEAR SENTENCED

GUIDELINE PRE-GUIDELINE

'The number of guideline and pre-guideline defendants sentenced each month is contained in Appendix C, Table C-1. Multiple count cases involving both guideline and pre-guideline counts have been included in the "Guideline" category. Descriptions of variables used in this figure are provided in Appendix A.

SOURCE: Administrative Office of the U.S. Courts, FPSSIS 1987-1990 Data File, excluding cases involving solely petty offenses, corporate offenders or diversionary sentences.

Descriptions of variables used in this table are provided in Appendix A.

### Primary Offense and Demographic Characteristics of Guideline Offenders

### Primary Offense Type

Forty-seven percent of all defendants sentenced under the SRA in 1990 were convicted of drug offenses. Other frequent offenses of conviction included fraud (10.4% of all cases), larceny (6.4%), firearms (6.4%) and immigration (6.2%). Offenses that typically take extended time to detect, investigate, and prosecute (e.g., tax offenses and money laundering) are likely to be underrepresented in the guideline distribution. Figure 3 displays the distribution and frequency of guideline cases across the primary offense categories.

#### Race

Of all defendants sentenced under the guidelines during 1990, 46.7 percent were identified as White, 28.3 percent as Black, 22.2 percent as Hispanic, and 2.9 percent as "Other" (American Indian, Alaskan Native, Asian or Pacific Islander). Table F displays the distribution of these racial and ethnic groups within primary offense categories.

#### Gender

Males comprised 83.9 percent of all defendants sentenced under the guidelines, while females comprised the remaining 16.1 percent. The difference between gender categories was less dramatic within the primary offense categories of embezzlement (in which 54.5% of those sentenced were female), use of a communication facility in a drug offense (35.0% female), and larceny (30.6% female). Table G displays the

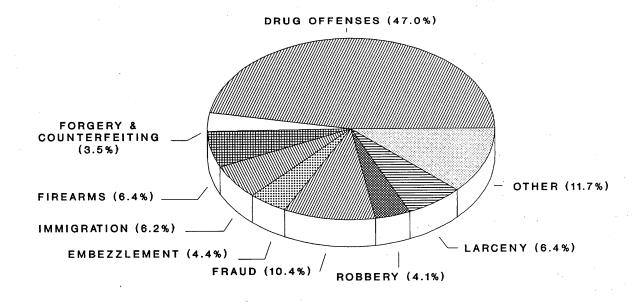

distribution of gender for each primary offense category.

#### Age

The average and median age for all defendants sentenced under the guidelines in 1990 was 34 and 32 years respectively. Defendants sentenced within the following offense categories were most likely to be 25 years of age or younger: homicide (in 37.7% of the cases), burglary or breaking and entering (45.4%), simple drug possession (32.8%), and immigration violations (32.0%). In contrast, the majority of defendants sentenced for gambling and lottery offenses, tax offenses, and bribery were 41 years of age and older. Table H displays the distribution of age for each primary offense category.

Figure 3

### DISTRIBUTION OF GUIDELINE DEFENDANTS SENTENCED BY PRIMARY OFFENSE CATEGORY\* (October 1, 1989 through September 30, 1990)

Total	26,308	100.0

<sup>\*</sup>Of the 29,011 guideline cases, 297 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 2,406 cases were excluded due to missing information on primary offense category. Descriptions of variables used in this figure are provided in Appendix A.

Of the 29,011 guideline cases, 297 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 3,096 cases were excluded due to one or both of the missing primary offense category (2,406) or missing date of birth (1,278). Descriptions of variables used in this table are provided in Appendix A.

following conditions:

### Mode of Conviction

According to the AO's FPSSIS datafile for all cases sentenced between October 1, 1989, and August 31, 1990 (guideline and pre-guideline), 88.5 percent were resolved pursuant to a plea of guilty or nolo contendere, while 11.5 percent were sentenced after conviction by a jury or at a bench trial. This plea/trial rate reflects minimal change in the national rate over the last three years: the same data found a plea rate of 88.6 percent in 1988 and 88.9 percent in 1989.

The plea rate for defendants sentenced under the guidelines in 1990 was 87.7 percent. Table I shows the rates of conviction by plea and trial for guideline and pre-guideline defendants in 1990.

<sup>121</sup> The numbers and percentages used to calculate the mode of conviction for guideline and pre-guideline cases includes only cases sentenced between October 1, 1989, and August 31, 1990. With the termination of FPSSIS in August 1990, FPSSIS information concerning mode of conviction was no longer available. Further, the AO has indicated that some reporting problems concerning plea/trial information have been discovered. It is anticipated that such problems may mask a slightly lower plea rate for both guideline and pre-guideline cases. A preliminary analysis comparing FPSSIS data to documents received by the USSC suggests that the plea rate reported to the AO may be up to 2 percent lower than FPSSIS data suggest.

Table I

Seven guideline cases and 38 pre-guideline cases were excluded due to missing information on mode of conviction. Descriptions of variables used in this table are provided in Appendix A.

SOURCE: Administrative Office of the U.S. Courts, FPSSIS 1989-1990 Data File, excluding cases involving solely petty offenses, corporate offenders or diversionary sentences.

## Sentencing Information on Guideline Cases

### Type of Sentence

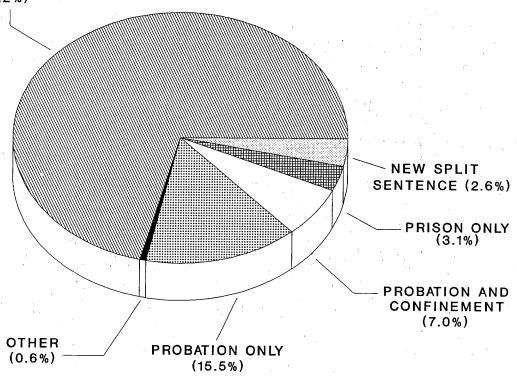

he majority of guideline defendants (71.2%) received a sentence of imprisonment followed by a term of supervised release. Another 3.1 percent received imprisonment with no post-release supervision. Approximately 3 percent received the new split sentence option under the guidelines (a term of imprisonment followed by supervised release with a condition of community confinement or home detention). Probation without a confinement condition was ordered in 15.5 percent of the cases, and probation with a condition of community confinement, intermittent confinement, or home detention in 7.0 percent of the cases. No supervision (i.e., no probation, community confinement, or imprisonment) was imposed in less than 1 percent of all cases. Figure 4 displays the distribution of guideline cases by type of sentence.

Predictably, the type of sentence most frequently imposed by the court varied by offense type. Defendants convicted of violent crimes, drug importation and distribution, burglary, money laundering, and escape were imprisoned at the highest rates (all over 90%). Defendants convicted of larceny, embezzlement, and simple drug possession were least likely to receive sentences of imprisonment; the majority of defendants in these categories received probation. Table J shows the distribution of type of sentence imposed for the primary offense categories.

Figure 4

TYPE OF GUIDELINE SENTENCES IMPOSED\* (October 1, 1989 through September 30, 1990)

### PRISON AND SUPERVISED RELEASE (71.2%)

Of the 29,011 guideline cases, 297 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 437 cases were excluded due to missing sentencing information. The number of cases represented in each category is reflected in Appendix C, Table C-4. Descriptions of variables used in this figure are provided in Appendix A.

Of the 29,011 guideline cases, 297 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 2,738 cases were excluded due to one or both of the following conditions: missing primary offense category (2,406) or missing sentencing information (437). Descriptions of variables used in this table are provided in Appendix A.

### Average Length of Imprisonment

Defendants sentenced for homicide, kidnapping, robbery, and drug importation and distribution received the longest average terms of imprisonment under the guidelines (all 80 months or longer). In comparison, the shortest average prison sentences were imposed for embezzlement, immigration, gambling and lottery offenses, and simple possession of drugs (all less than 12 months). The average prison sentence for each offense category is provided in the first column of Table K.

Table K also reports average prison sentences for offenders by guideline criminal history categories. The large increase in imprisonment of category VI defendants is due primarily to the inclusion of those defendants qualifying for the career offender enhancement. <sup>122</sup>

#### Fines and Restitution

A fine, restitution, or both were ordered in 34.6 percent of all cases sentenced under the guidelines. Neither sanction was ordered in the remaining 65.4 percent of the cases, primarily due to findings by the court of an inability to pay or burden on the defendant's family. The frequency with which fines and restitution were ordered as part of guideline sentences is reported in Table L.

The imposition of fines and restitution orders varied greatly by offense category. Financial sanctions were most common in convictions for larceny, embezzlement, tax, fraud, and bribery offenses (approximately 60-70% of such cases).

Fines were most often imposed for tax offenses, simple possession of drugs, bribery, and gambling and lottery offenses; restitution orders were most common for robbery, embezzlement, and fraud.

Financial sanctions are least likely utilized in drug importation and distribution, escape, and immigration cases. This finding is not surprising given the high incarceration rate for these offenses and the alien status and possible deportation of defendants in immigration cases.

Table L also provides the mean, median, and total payments ordered. In general, the median fine is a better indicator of the average fine imposed because it is not affected by unusually high or low fines that may skew the mean. The median represents the amount at which 50 percent of the fines are higher and 50 percent are lower. The greatest median payments were ordered for money laundering (\$10,000), tax offenses (\$5,800), extortion and racketeering (\$5,000), and fraud (\$4,532). The total of all payments ordered was more than \$222 million; more than 68 percent of this amount was ordered in drug importation and distribution and fraud cases.

<sup>122</sup> The career offender enhancement is applied to defendants sentenced for a violent crime or serious drug offense who have two prior convictions for violent crimes or serious drug offenses. The guidelines provide a sentence that approaches the statutory maximum penalty allowed for such offenders.

<sup>\*</sup>Of the 29,011 guideline cases, 6,512 cases with zero months prison ordered, and 297 cases involving mixed law counts (both guideline and preguideline) were excluded. In addition, 2,549 cases were excluded due to one or more of the following conditions: missing primary offense category (1,867), missing criminal history category (344), or missing or indeterminable sentencing information (661). Criminal history category has been taken from the Presentence Report when the Report on the Sentencing Hearing was not available. While the court may disagree with PSR information, the criminal history category was the same in more than 90% of cases for which both documents were received. Descriptions of variables used in this table are provided in Appendix A.

Of the 29,011 guideline cases, 297 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 2,659 cases were excluded due to one or both of the following conditions: missing primary offense category (2,406) or missing information on type of economic sanction for cases in which orders were made (294). The total number of cases (8,596) used to calculate amounts of payment ordered is less than the total number of cases receiving fines and/or restitution (9,016). The difference is due to the exclusion of 420 cases for which a fine and/or restitution was ordered but the amount was not specified. Descriptions of variables used in this table are provided in Appendix A.

### Guideline Factors

In 1990, the Monitoring Unit expanded its data analysis capabilities with the full implementation of Module Two. Data coded in this module reflect specific guideline application factors determined by the court, such as the Chapter Two guideline, adjusted offense level, criminal history category, and guideline range.

The Report on the Sentencing Hearing is crucial for the determination of a court's guideline application decisions (see discussion under Data Collection Issues). In FY1990, the Commission received complete reports in 79.1 percent of all cases submitted. Of the reports submitted, adequate information to determine the offense level and criminal history category was unavailable in another 9.6 percent the cases.

Consequently, fewer cases are reflected in the tables in this section of the report compared to previous sections. However, as previously reported, little variation in primary offense categories, sentence received, or range recommended by the probation officers was found between the sub-population reported here and the total population used throughout the rest of this report.

### Criminal History Category and Offense Level

Table M shows the distribution of cases across offense levels and criminal history categories for which complete Reports on the Sentencing Hearing were received. Approximately one half of these cases were determined by the courts to have offense levels of 13 or less. The majority of offenders (62.5%) were found to have a criminal history category of I.

### Guideline Range

Table N provides the distribution of guideline sentencing ranges across primary offense categories. As would be expected, defendants sentenced for robbery, homicide, and drug distribution and importation received considerably higher guideline ranges than defendants sentenced for non-violent or non-drug offenses. In contrast, more than 40 percent of the larceny, embezzlement, and simple drug possession cases had guideline ranges of zero to six months.

Table O provides the distribution of sentencing alternatives for various guideline ranges. In 74.8 percent of the cases with guideline ranges of zero to six months, the sentencing alternative imposed was probation only or probation plus community confinement, intermittent confinement, or home detention. For cases whose minimum of the guideline range was one to six months, probation plus confinement was used 31.6 percent of the time, while the new split sentence was used 6.5 percent of the time. For cases in which the minimum of the guideline range was eight to 10 months, the new split sentence was used 15.5 percent of the time. Finally, 97.9 percent of the cases with guideline minimums of 12 or greater (for which no non-imprisonment alternatives are available under the guidelines) received a term of imprisonment.

### Application of Chapter Two Guidelines

Table P provides the distribution of Chapter Two guidelines applied in single and multiple count cases. The Chapter Two guideline most often used in both single and multiple count cases was §2D1.1 (Unlawful Manufacturing, Importing, Exporting, or Trafficking (Including Possession with Intent to Commit These Offenses)). Other Chapter Two guidelines applied frequently in both single and multiple count cases were

§2B1.1 (Larceny, Embezzlement, and Other Forms of Thest) and §2F1.1 (Fraud and Deceit).

OFFENSE LEVEL BY CRIMINAL HISTORY CATEGORY
For Guideline Cases With Complete Reports on the Sentencing Hearing Received
(October 1, 1989 through September 30, 1990)

Of the 29,011 guideline cases, the Commission received Reports on the Sentencing Hearing for 22,943 (79.1%). Of the 22,943 cases with such reports, 216 mixed law cases (both guideline and pre-guideline counts) were excluded. In addition, 2,780 cases were of the following conditions: missing offense level (2,574), missing criminal history category (2,628), or cases with no analogous guideline (43). Descriptions of variables used in this table are provided in Appendix A.

Of the 29,011 guideline cases, the Commission received Reports on the Sentencing Hearing for 22,943 (79.1%). Of the 22,943 cases with such reports, 216 mixed law cases (both guideline and pre-guideline counts) were excluded. In addition, 4,437 cases were excluded due to one or more of the following conditions: missing guideline range (2,758), missing primary offense category (1,867), or cases with no analogous guideline (43). The guideline ranges indicated above correspond to the offense levels and criminal history categories established by the court and do not indicate the impact of mandatory minimums or statutory maximums constricting the sentence. Descriptions of variables used in this table are provided in Appendix A.

	Tot	al number	21,502	71.7	8,500	28.3			
	Total number of guidelines applied: Total number of cases:						75.3	6,853	24.7

Of the 29,011 guideline cases, 971 cases missing guideline applied and 347 cases missing number of counts information were excluded. The totals can add to more than 100% because a single case may reference several different guidelines. A number of Chapter Two Guidelines list possible cross-references, which resulted in multiple counting of cases applying both the original and cross-referenced guideline(s). In cases in which application of a specific cross-reference was required, only the original guideline was used to avoid double-counting for these cases. Descriptions of variables used in this table are provided in Appendix A.

## Departures and Sentences Within the Guideline Range

### $Methodology^{123}$

In order to assess national trends in sentences as they relate to the guidelines, a special study is used to determine: (1) the rate at which defendants are sentenced within the guideline range established by the court; and (2) rates and reasons for departures from that range. Congress, in promulgating the Sentencing Reform Act of 1984, authorized departures subject to review by appellate courts. In this section, the Commission reports on the frequency of district court departures and the reasons given by the courts for such departures.

This study is based on a 25 percent random sample of all cases sentenced between October 1, 1989, and September 30, 1990, and received by the Commission by December 28, 1990. The data collection process included follow-up phone calls to the field on any case in the sample for which documentation was missing or inadequate. The sample in this analysis consisted of 7,364 guideline defendants.

Staff reviewed all case files to determine departure status and reasons for departure as indi-

cated in the Report on the Sentencing Hearing. The case was determined to involve no departure if the sentence imposed was within the guideline range established by the court and set out in the Report on the Sentencing Hearing. If the sentence fell outside the guideline range established by the court, it was determined that a departure had occurred and the applicable reasons were noted.

If a Report on the Sentencing Hearing was not provided or if the information contained in it was insufficient to permit a departure determination, the sentence from the Judgment of Conviction was compared to the guideline range recommended by the probation officer in the Presentence Report. No departure was assumed when the sentence fell within the range recommended by the probation officer. 124

A departure could not be assumed if the sentence from the Judgment of Conviction did not correspond to the guideline range recommended by the probation officer. A court, through the fact finding process, may determine a different guideline range to be correct and sentence within that range. Thus, a discrepancy between the sentence and the range indicated in the presentence report does not necessarily indicate a departure. In order to determine the presence or absence of a departure in cases that fell into

<sup>123</sup> The submission rate by the courts of Reports on the Sentencing Hearing (79.1% for FY1990 cases), as well as inconsistencies in the content of the documents, have made necessary an in-depth study of a 25 percent random sample of all cases to provide national estimates of departure rates. The Commission hopes that the rising rate of submission for the Reports on the Sentencing Hearing will permit reporting of departure determinations for all cases in the future.

<sup>124</sup> This assumption was tested in a previous USSC departure study analyzing a sample of cases sentenced between November 1, 1987, and March 31, 1989. A random 25 percent sample of cases for which no Report on the Sentencing Hearing was available, but for which the sentence fell within the range recommended by the probation officer, was further investigated by telephone calls to the field. Of the 196 cases for which calls were made, none involved a departure from the guideline range. As a result, all such cases were considered within-guideline sentences for the purposes of that study as well as for the present study.

this category, telephone calls were made to probation officers or the courts. If the case involved a departure, staff requested any reasons for that departure given by the court. Calls were also made in cases in which a comparison between the Judgment of Conviction and probation officer's recommendation could not be made due to the absence of or inadequacy in the relevant documents. After calls to the field, a departure determination could not be made in 117 cases. <sup>125</sup> In addition, 57 cases found to involve offenses for which there were no analogous guidelines were excluded from this analysis. Consequently, a departure determination was made for 7,190 of the 7,364 cases in the sample.

In January 1990, the Commission began reviewing 100 percent of the Reports on the Sentencing Hearing to determine departure status. However, the Commission will continue to draw a 25 percent sample for the purpose of establishing a

national departure rate until the submission rate for this report and the uniformity of the information contained in it increases.

#### Results

Sentences were within the guideline range established by the court in 83.4 percent (5,995) of the 7,190 cases for which a departure determination could be made. <sup>126</sup> In 7.5 percent of the cases (539), courts departed downward based on a motion by the government for a reduced sentence due to the defendant's substantial assistance to authorities. In another 6.9 percent of the cases (494), the court departed downward for other reasons. In 2.3 percent of the cases (162), the court departed upward, sentencing above the guideline range established by the court.

To understand the departure rate, it is important to note the effect of two particular statutes on

#### **Departure Rate**

83.4% • Sentences Within Guideline Range

7.5% • Sentences Below Guideline Range for Substantial Assistance on Motion of Government

**6.9**% ● Sentences Below Guideline Range

2.3% • Sentences Above Guideline Range

Because of an inability to obtain departure information on some cases in the sample, even after making telephone calls, assessments for several districts may be less reliable than previously presented margin of error information would predict. For Eastern Pennsylvania, departure information for seven sample cases remains missing; Northern Ohio, seven missing; Northern New York, 14 missing; and Central California, 35 missing. Reasons that may influence failure to report could bias results from these districts.

The departure analysis employed here considers the probation, imprisonment, and confinement alternatives in relation to the guideline range established in Part A of Chapter Five. This analysis does not involve an assessment of the fine range established in Part E of Chapter Five; however, a breakdown of the number of cases receiving a fine is presented in Table L. In addition, no assessment is made regarding terms of supervised release as established by Part D of Chapter Five.

guideline sentencing patterns. Congress, in 18 U.S.C. § 3553(e), authorized the court to impose a sentence below that required by a mandatory minimum statute "to reflect a defendant's substantial assistance in the investigation or prosecution of another person who has committed an offense." In addition, the Commission was instructed in 28 U.S.C. § 994(n) to "assure that the guidelines reflect the general appropriateness of imposing a lower sentence than would otherwise be imposed" for substantial assistance to authorities. Consequently, the Commission specifically addressed such sentence reductions in §5K1.1 of the guidelines.

Tables Q and R provide reasons given by the courts for upward and downward departures. The most frequently cited reasons for departing upward included adequacy of criminal history (41.0%), drug amount (7.1%), pursuant to a plea agreement (6.4%), and guidelines do not represent the seriousness of the offense (6.4%).

Substantial assistance upon motion of the government was a reason cited in 54.4 percent of the downward departures. Other reasons for downward departures included: pursuant to a plea agreement (11.1%), mule/role in the offense (4.8%), further demonstration of acceptance of responsibility (4.7%), and family ties and responsibilities (3.8%).

Table Q

#### Departures and Within Guideline Sentences by Primary Offense

Departure rates varied substantially by offense category. Offenses involving the importation and distribution of drugs had a higher rate of departure due to substantial assistance compared to other offenses. Simple drug possession, larceny, immigration, and fraud cases had relatively lower rates of departure. Table S provides departure rates by primary offense categories.

Table T provides reasons for upward and downward departures for selected primary offense categories. For all of the offense categories selected except embezzlement, the most frequently cited reason for downward departure was substantial assistance. In upward departure cases, the most frequently cited reason was adequacy of criminal history.

#### Departures and Within Guideline Range Sentences by Circuit and District

The 25 percent sample used to provide national estimates of the departure rate produces an estimate that accurately predicts the actual rate for the total population within a 0.92 percent margin of error. However, because the possible degree of error is dependent on the sample size, the same credibility cannot be attributed to circuit or district rates of departure. In evaluating the departure rate by circuit and district, the 25 percent national sample begins to produce very small numbers, creating a risk of misinterpretation.

A sample size of 1,500 will produce a margin of error of plus or minus 2 percent in predicting the actual reported population rate. (A sample size of 1,000 produces a margin of error of plus or minus 2.5%; 500 - 3.5%; 300 - 4.5%; 200 - 5.5%; 100 - 7.8%; 50 - 11.1%.) With this in mind, it is suggested that sample estimates provided for circuits or districts with small sample sizes be considered only descriptive of the sample population; they should not be considered accurate for describing the actual rate for the total reported populations.

That said, the sample provides varying departure estimates for the 12 circuits. The District of Columbia (n=124, margin of error=7.0%) reflects the lowest departure rate at 10.5 percent. The Second Circuit (n=554, margin of error=3.3%) reflects the highest at 22.9 percent. Table U indicates the within-guideline sen-

tence and departure rates by circuit established for the sample.

Table V provides sample departure rates for the ten districts with sample sizes of more than 150. Of these, Central California (n=223, margin of error=5.3%) and Eastern Virginia (n=159, margin of error=6.2%) had the lowest departure rate at 9.9 and 10.1 percent respectively. Arizona (n=172, margin of error=6.0%) had the highest departure rate at 34.9 percent. Table C-5 in Appendix C provides sample departure statistics for all districts.

Margins of error are based on 95 percent confidence intervals. Given a sample finding of 83.4 percent within-guideline sentencing rate, we are 95 percent confident that the actual within-guideline sentencing rate of the reported population is between 82.5 and 84.3 percent.

GUIDELINE DEPARTURE RATE BY CIRCUIT

## (October 1, 1989 through September 30, 1990)

Table U

		DEPARTURE RATE (Based on 25% Random Sample)

New York, Southern	189	148	78.3	24	12.7	14	7.4	3	1.6	
Texas, Southern	544	446	82.0	35	6.4	52	9.6	11	2.0	
Texas, Western	394	352	89.3	9	2.3	19	4.8	14	3.6	
Virginia, Eastern	159	143	89.9	6	3.8	9	5.7	1	0.6	

Included in this table are the ten districts whose departure sample sizes were more than 150. The margins of error for the sample estimates for the ten districts are: Arizona (plus or minus 6.0%), Central California (5.3%), Southern California (5.1%), Middle Florida (5.3%), Southern Florida (4.4%), Eastern New York (5.9%), Southern New York (5.7%), Southern Texas (3.4%), Western Texas (3.9%), Eastern Virginia (6.2%). Descriptions of variables used in this table are provided in Appendix A.

SOURCE: U.S. Sentencing Commission, 1990 Departure Study Data File.

### Summary

Between October 1, 1989, and August 31, 1990, almost 70 percent of the 38,091 defendants sentenced in the federal system were sentenced pursuant to the Sentencing Reform Act of 1984. The remainder were sentenced under preguideline law due to the date of the commission of the offense.

Almost half (47.0%) of the defendants sentenced under the guidelines in FY1990 were convicted of drug offenses; fraud cases made up an additional 10 percent. Other major categories of federal crimes sentenced under the guidelines include larceny, firearms, immigration, robbery, embezzlement, and forgery and counterfeiting.

Examination of the FY1990 guideline population reveals the following characteristics: 46.7 percent were White, 28.3 percent were Black, and 22.2 percent were Hispanic; 83.9 percent were males and 16.1 percent were females; the average age was 34 years.

Guideline defendants were convicted after a plea of guilty in 87.7 percent of the cases, while pre-guideline defendants sentenced in the same period were convicted after a guilty plea in 90.3 percent of the cases.

Under the guidelines, 15.5 percent of offenders received sentences of probation with no confinement condition, while 7.0 percent received probation with conditions of community confinement, intermittent confinement, or home detention. The remaining offenders received imprisonment sentences, most including a term of supervision to follow release from imprisonment. The average prison sentence imposed across of-

fense categories was 61 months. Of all guideline cases, 34.6 percent received a fine, restitution order, or both.

The type of sentence imposed varied with the guideline range. A term of imprisonment was imposed in 98 percent of the cases in which the minimum of the guideline range was 12 or greater. Conversely, 75 percent of the cases with a guideline range of zero to six months received a term of probation only or probation plus a condition of confinement.

A study of a 25 percent random sample of cases shows that 83.4 percent of the cases in 1990 were sentenced within the guideline range established by the court. In 7.5 percent of the total cases, courts departed downward based on a motion by the government for a reduced sentence due to the defendant's substantial assistance to authorities. In the remaining 9.2 percent, courts sentenced above or below the guideline ranges (2.3% upward and 6.9% downward departures).

### B. EVALUATION

The Sentencing Reform Act of 1984 requires the Commission to:

[S]ubmit a report to the General Accounting Office, all appropriate Courts, the Department of Justice, and the Congress detailing the operation of the sentencing guideline system and discussing any problems with the system or reforms needed. The report shall include an evaluation of the impact of the sentencing guidelines on prosecutorial discretion, plea bargaining, disparities in sentencing, and the use of

incarceration, and shall be issued by affirmative vote of a majority of the voting members of the Commission. 128

The Commission's evaluation report is due to the General Accounting Office (GAO) on or before December 1, 1991. A GAO report on the Commission and its guidelines must be submitted to Congress by May 1992.

During 1990, the Commission continued its work in the four major areas of study that comprise the evaluation plan: implementation of the guidelines, use of incarceration, disparity in sentencing, and prosecutorial discretion and plea bargaining. The Commission views its evaluation of the guideline sentencing system as an ongoing responsibility and plans to continue its analysis of the new system beyond submission of the statutorily-required four year evaluation report. The delay in nationwide implementation of the guidelines until January 19, 1991, due to constitutional challenges to the Commission has compelled the evaluation report to focus primarily on short and medium-range results of the Sentencing Reform Act. Additional analyses in subsequent years will evaluate the Act's medium and long-range impact.

## **Evaluation Topics**

## Implementation of the Guidelines

Congress directed the Commission, as part of its evaluation report, to conduct an operational assessment of the guidelines. Such an assessment is generally a prelude to the analysis of relevant impact questions because it is necessary to understand the extent to which the guide-

lines have been implemented as intended in order to make a meaningful analysis of their impact.

Commission staff has developed an evaluation strategy to address a number of research questions, including:

- the roles of various participants under the guidelines;
- the development of local court rules to respond to guideline implementation;
- the extent to which guideline application training has been offered and received by various participants in the federal criminal justice system;
- the nature of the new process for appellate review of guideline sentences;
- the number and types of cases sentenced under the guidelines;
- the rate and types of departure; and
- the guidelines that generate the most application questions.

This section of the evaluation report will seek to assess: (1) the manner in which guidelines have been implemented; (2) the formal structure within which guidelines operate; and (3) the problems and solutions that have emerged.

#### Use of Incarceration

Incarceration can satisfy several of the statutorily-identified purposes of sentencing including deterrence, incapacitation, and punishment. For certain offenses such as firearms and trafficking in particular types and quantities of drugs, Congress has mandated minimum terms of imprisonment. For other offenses such as antitrust and fraud, Congress has given the Commission a clear signal in the Sentencing Reform Act to increase the use of incarcerative sentences over past practice.

This section of the evaluation report will focus on the frequency with which offenders are sentenced to prison, the length of time they can be expected to serve, and the way in which incarceration has changed under the guidelines and statutorily-mandated sentences. Figure 5 displays the incarceration rate for guideline and non-guideline cases from January 1984 through July 1990. While this analysis is not complete, it does suggest that the frequency with which convicted offenders were sent to prison was gradually increasing prior to implementation of the guidelines in November 1987.

A major analytical task for the evaluation staff is to identify the different sources of this gradual change in the national incarceration rate. While the guidelines will be a central focus of this study, other potential sources include changes in the use of mandatory minimum statutes, Congressional policy changes regarding certain offenses (e.g., white collar crime), and changes in the type of offenses and offenders convicted in federal courts.

#### Disparity in Sentencing

The evaluation of disparity in sentencing has two principal objectives: 1) to assess whether the effect of both proper (e.g., a defendant's criminal history) and improper factors (e.g., race of the defendant) on the type and length of sentence has changed as a result of implementation of the guidelines; and 2) to assess whether defendants

with similar criminal records convicted of similar criminal conduct are sentenced more uniformly under guidelines than previously was the case.

Staff has developed appropriate multivariate analyses to estimate the change in the effect of proper and improper factors on the average sentence imposed under the guidelines. The evaluation will assess whether these and other factors were uniform across crime categories (e.g., robbery, drugs) before implementation of the guidelines and whether there have been changes since guideline implementation.

A complementary set of analyses will measure change in the distribution of sentences for "typical" cases within four generic offense types: bank robbery, cocaine and heroin distribution, fraud and income tax evasion, and bank embezzlement. For example, after identifying the typical bank robbery case, the evaluation will examine the sentence spread before and after guideline implementation to determine whether the guidelines have reduced the distribution of sentences.

## Plea Bargaining and Prosecutorial Discretion

The evaluation of prosecutorial discretion and plea bargaining involves an assessment of whether and to what extent discretion in sentencing has shifted as a result of the guidelines. Comparing the proportion of cases disposed of by plea before the effective date of the guidelines with the proportion disposed of by plea after the effective date is a starting point in this analysis. Figure 6 provides a preliminary description of the monthly average rate of guilty pleas from January 1984 to July 1990. During this 79-month period the national rate has remained essentially unchanged.

A raw comparison of plea statistics, however, does not sufficiently identify whether any change in the proportion of pleas is attributable to: (1) implementation of the guidelines; (2) application of statutory mandatory minimum sentences; (3) changes in the types of criminal cases heard in federal courts; or (4) policy changes made by the Department of Justice in its plea practices. The evaluation will look beyond these statistics to assess the influence of different factors on the way in which criminal cases are disposed of under the guidelines.

### Bibliographies and Data Systems

The Commission plans to combine quantitative and qualitative evaluation methods in its research. In 1990, staff continued to review scientific literature on sentencing and prosecutorial discretion, obtained copies of automated information files with respect to individual federal criminal cases, and prepared interviews and other materials for collecting additional information about sentencing procedures in federal district courts. In addition, preliminary analyses were performed to explore the most appropriate procedures for data analysis.

The research literature on sentencing and prosecutorial discretion is extensive and the evaluation staff has sought to benefit from the insights and methodological approaches taken in prior evaluations. During 1990, staff continued to identify, assimilate,

and organize the material into annotated bibliographies on disparity, plea bargaining, guideline systems, and research methods.

The evaluation will rely primarily on the guideline monitoring data collected by the Commission. For information about non-guideline sentences and prosecutorial practices, the staff plans to draw upon a number of existing automated information systems used by the Administrative Office of the U.S. Courts, the Department of Justice, the U.S. Parole Commission, and the Federal Bureau of Prisons. Table W describes these different data systems, the time frames they cover, the analyses for which they will be utilized, and the relevant information contained in each dataset.

#### Original Data Collection

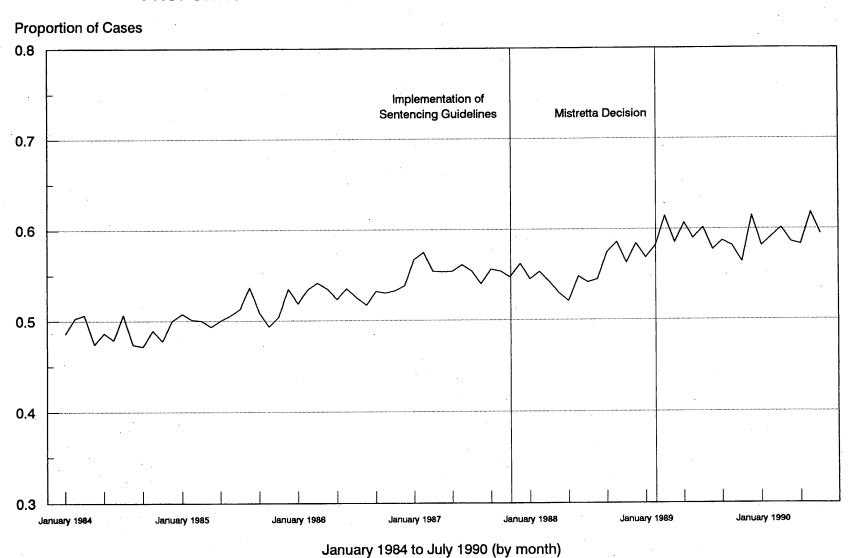

During 1988, the evaluation staff interviewed assistant U.S. attorneys, defense attorneys, and probation officers about charging, prosecution, and sentencing practices prior to implementation of the guidelines. In preparation for visits to selected districts in 1990 and 1991 to investigate post-guideline implementation practices, staff tested interview and observational materials and observed sentencing hearings. The draft instruments were field tested in two districts in early 1990, providing firsthand information about particular districts' local rules, operating procedures, and guideline implementation. In late 1990, staff conducted a pilot test of the entire data collection effort in one district and later began the district site visits that will be reported in the Commission's evaluation report.

## Research Advisory Group

During 1990, the Commission's mionitoring and evaluation efforts benefitted from the advice of the Commission's Research Advisory Group, chaired by Dr. Richard A. Berk of the University of California at Los Angeles. The group met several times and focused primarily on the development of the Commission's evaluation report. Members of the advisory group include Dr. Phil Cook, Duke University; Dr. Shari Diamond, American Bar Foundation; Joseph diGenova, Esq., Washington, D.C.; Professor Daniel Freed,

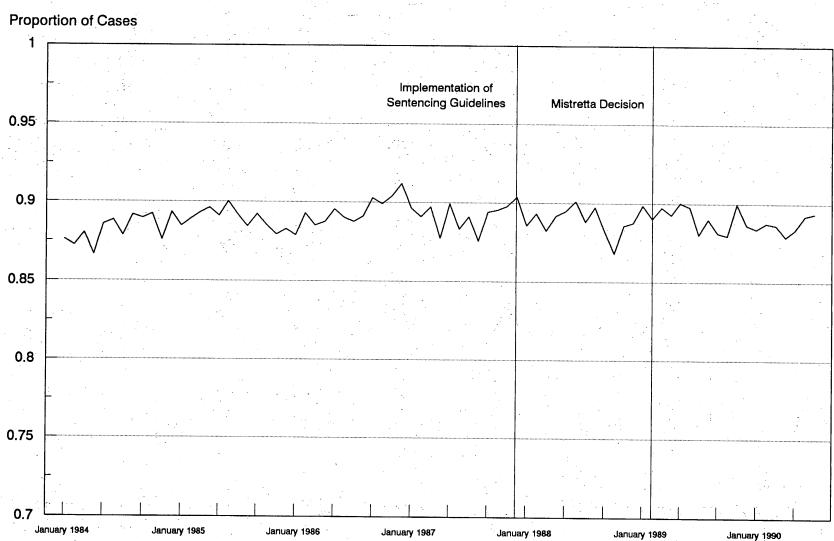

Yale University School of Law; Dr. Roderick Little, University of California at Los Angeles; Dr. Norval Morris, University of Chicago School of Law; and Julie Samuels, U.S. Department of Justice.

#### C. RESEARCH STUDIES

## Organizational Sentencing Practices

In 1990, the Commission continued its empirical examination of organizations sentenced in federal courts. This research builds upon prior study of organizational sentencing practices from 1984-1987, and will assist the Commission in the development of sentencing guidelines for organizational defendants.

During the past year, the Commission identified 433 organizations whose cases reached disposition in 1988 and collected all available court documentation on these organizations and any associated individual defendants. Review of the case files revealed that 328 of the 433 organizational defendants were convicted and subsequently sentenced in 1988.

Using documents supplied by U.S. probation offices, the Commission compiled a dataset of offender, offense, and sentencing characteristics for the 328 organizations. The dataset, entitled "Organizations Sentenced in Federal Criminal Courts, 1988," is archived at the National Archive of Criminal Justice Data at the University of Michigan's Inter-University Consortium for Political and Social Research. The following sections provide a summary of descriptive statistics from this dataset.

#### Primary Offense

Of the 328 organizational defendants sentenced in 1988, 110 (33.5%) were convicted of fraud offenses (including government procurement fraud and fraud against private individuals), 98 (29.9%) were convicted of antitrust offenses, and 28 (8.5%) were convicted of environmental offenses. Figure 7 displays the distribution of cases

across the primary offense categories. Table C-8 in Appendix C lists the primary offense categories for all 328 cases.

## Mode of Disposition, Organizational Structure

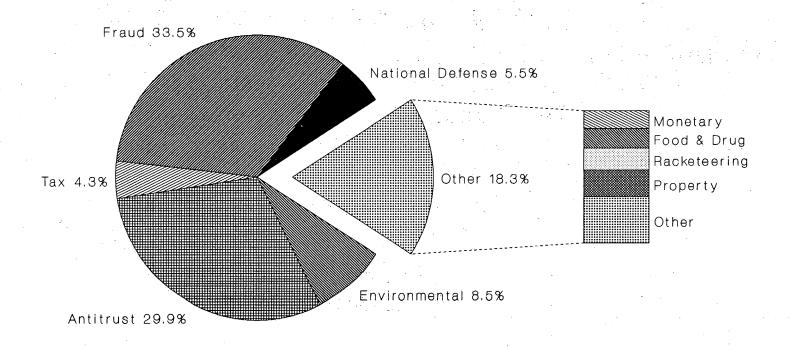

In 1988, 268 (81.7%) of the organizations were sentenced after pleading guilty, 20 (6.1%) entered pleas of <u>nolo contendere</u>, and 40 (12.2%) were convicted at trial.

Closely-held corporations accounted for 304 (92.7%) of the 328 organizations sentenced in 1988. Nineteen (5.8%) of the organizational defendants were publicly-traded, two (0.6%) were non-profit institutions, and the status of three (0.9%) was not able to be determined based on available information.

#### Distribution of Fine Amounts

The median fine amount ordered for organizations sentenced in 1988 was \$17,500 (n=327); the average fine ordered was \$147,310 (n=327). Fines ranged from a low of \$0 to a high of \$6.85 million. See Figure 8 and Table C-9 in Appendix C.

#### Recidivism Research

In 1990, the Commission continued research into one of the statutory purposes of sentencing, namely the "need to afford adequate deterrence to criminal conduct and to protect the public from further crimes of the defendant." 18 U.S.C. § 3553(a)(2).

In drafting the initial guidelines, the Commission considered a defendant's criminal history and dependence on criminal activity for a livelihood through a six-tier criminal history structure that provides enhanced punishment for repeat and career offenders.

At the time the initial guidelines were adopted, the Commission recognized the importance of testing the predictive capacity of the criminal history score. In its <u>Supplemental Report on the Initial Sentencing Guidelines and Policy Statements</u>, the Commission stated that it

intends to conduct research that will examine predictive power using various measures of recidivism, and the extent of crime control benefits derived from increasing sentence in relation to the criminal history score. In addition, it will consider research relating to other possible predictors of recidivism.

The Research Studies unit conducted preliminary research into recidivism by building on a sample of 2,268 individuals released from federal prison in 1978. The sample, which excludes offenders who received only a probationary (non-incarcerative) sentence, was originally created to develop and test the U.S. Parole Commission's revised Salient Factor Score. Re-arrest and re-imprisonment records covering the five-year period after release were obtained from the

National Crime Information Center of the Federal Bureau of Investigation.

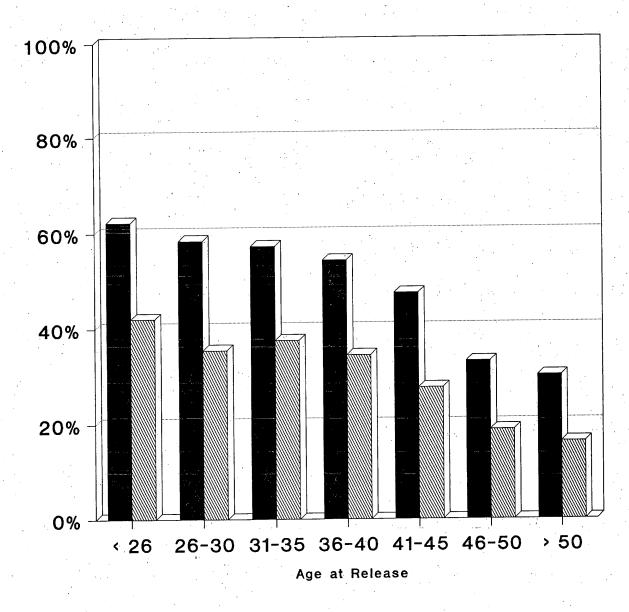

Because the study sample is more than ten years old and limited to previously imprisoned offenders, additional research is planned to examine the predictive power of the guidelines' criminal history score using a more representative sample of offenders sentenced under the Sentencing Reform Act.

#### Preliminary Findings

Criminological research has established a consistent relationship between offender age and likelihood of recidivism. Generally, younger offenders are re-arrested and re-imprisoned more frequently than are older offenders. The Commission's analysis of 2,268 offenders does not directly contradict that expectation. However, the preliminary findings of this study indicate that the reduction in recidivism related to age is relatively modest and gradual and does not show the age peaks typically reported in recidivism research. See Figure 9.

Deterrence theory suggests that more severe prison sentences will reduce recidivism; other theories hold that lengthy periods of incarceration increase the likelihood that individuals will continue a life of crime. This preliminary study finds little support for either theory -- recidivism rates remain fairly constant for offenders serving prison sentences of between one and seven years and thereafter increase only slightly. See Figure 10.

#### Prison Population Projections

During 1990, the Commission continued to work with the Federal Bureau of Prisons (BOP) to assess the impact of the guidelines on federal prison population using a prison impact model that simulates changes in average time served and size of the prison population.

In its 1987 Supplemental Report, the Commission and BOP developed prison population projections for five, ten, and 15 years into the future. At that time, it was estimated that the federal prison population would grow substantially from 1987 to 2002, with much of the increase attributable to: 1) changes in the number and types of offenders convicted in the federal courts; and 2) specific legislation mandating longer prison sentences for drug and career offenders.

Specifically, in 1987 the Commission/BOP baseline projection for the 1992 federal prison population was 57,000. The estimated impact of the mandatory minimum provisions of the 1986 Anti-Drug Abuse Act increased this baseline projection by 18 percent. The career offender statute was projected to increase population by another 2 percent, while the guidelines were estimated to add an additional 6 percent. Together, these factors resulted in a projected 1992 federal prison population of 72,000.

In developing its prison projections, the Commission and the BOP modeled three unknown variables with substantial potential impact on prison population: increases in federal prosecutions, changes in plea negotiation practices, and departures from the guidelines. For each year, the model made six projections: high and low growth rates in prosecutions; more restrictive and less restrictive plea negotiation practices; and high and low guideline departure rates. These alternative scenarios produced prison

population projections ranging from 67,000 to 83,000 for 1992, 78,000 to 125,000 for 1997, and 83,000 to 165,000 for 2002. These ranges set the high and low boundaries for projections of federal prison population under the most plausible alternative scenarios. Figure 11 displays these projections.

In 1990, the Commission proposed to the Congress a series of amendments to the sentencing guidelines. The prison impact model estimated that there would be virtually no change in the average time served as a result of the 1990 amendments and that the increase in the number of federal prisoners that resulted would be less than 200 per year beginning in 1994.

Part of the reason why the 1990 guideline amendments have so little immediate impact on the federal prison population is due to the fact that a majority of the current federal prison population was sentenced prior to the effective date of the guidelines. Figure 12 displays the federal prison population by guideline and pre-guideline sentences imposed.

Chapter Six

# Training & Technical Assistance

The Technical Assistance Service unit, organized by the Commission in 1987, continued to provide guideline application assistance to federal judges and probation officers in 1990. In addition, the unit supports the Commission on guideline application issues through its daily contact with criminal justice personnel applying the guidelines.

The Technical Assistance Service (TAS) is divided into three sections, each designed to provide a different service to the field.

- Hotline. TAS staff respond to telephone inquiries from the field, assist the drafting staff in the guideline amendment process, participate on staff working groups, and review amendments from a field officer's perspective.
- Training. Borrowing staff from other offices in the Commission, (e.g., legal, monitoring, and communications), TAS staffs and coordinates all Commission training activities.
- Case Review. This project responds to the Commission's Congressional directive to monitor the performance of probation officers under guideline sentencing. Staff systematically review cases received by the Commission's monitoring unit to identify areas of guideline application that appear to be problematic for the field.

#### A. Hotline

Information provided through the TAS hotline is offered to assist U.S. probation officers and judges in applying the sentencing guidelines. Questions that do not involve subjective judgments are readily answered by the TAS staff. For example, if a defendant is being sentenced for armed bank robbery (18 U.S.C. § 2113(d)) and use of a firearm during the robbery (18 U.S.C. § 924(c)), the TAS staff will instruct that because the 924(c) count carries a mandatory minimum consecutive five-year term of imprisonment, the specific offense characteristic in the robbery guideline for weapon use should not be used when calculating the defendant's guideline sentence.

Questions that involve a subjective determination by the judge, such as acceptance of responsibility, role in the offense, or a justification for a departure, are answered by directing the caller's attention to pertinent guidelines, commentary, or policy statements. Where debatable questions or interpretations of correct application arise, TAS staff assist the caller in understanding the alternative approaches while emphasizing that such decisions are left to the courts.

The hotline is operational from Monday through Friday between the hours of 8:30 a.m. and 5:30 p.m. (Eastern Standard Time).

#### Calls Received in 1990

The Technical Assistance Service responded to more than 2,112 questions in fiscal year 1990, averaging 176 questions per month. It is anticipated that the hotline will receive an even greater number of calls in 1991 as probation officers begin applying the new policy statements on probation and supervised release violations. Since November 1, 1987, TAS has responded to more than 6,000 questions from probation officers and judges.

Table X shows the number of questions received by individual guideline section. The greatest number of questions received (288) related to the criminal history section of the guidelines. Questions regarding drug offenses ranked second (165), followed by statutory and legal issues (152), multiple counts (124), and relevant conduct (108).

Table Y shows the number of calls received by individual districts. While the distribution provides a national breakdown of TAS use, it is not indicative of districts experiencing difficulty in guideline application.

#### Hotline Quality Control

In responding to questions from the field, TAS staff regularly consult with the legal and guide-line production staffs to ensure that questions are fully researched and accurately answered and that the guidance provided by the TAS staff is consistent with official Commission publications and other materials approved by the Commission. To assist with quality control, TAS staff maintain a log of each call received and the response provided.

In 1988, TAS began maintaining these logs through a computer program specifically devel-

oped to document the hotline calls. The program provides an easily accessible database that allows staff to check whether the same question has been asked previously, thereby speeding research efforts and enabling more consistent and accurate responses. In response to requests from probation officers on temporary assignment at the Commission, a similar computer program has been developed for use in the field. Called "SC HELP" (Sentencing Commission Hotline Extended Library Program), the program is scheduled to be distributed in 1991. SC HELP will allow probation officers to enter their own questions and answers on a variety of topics (e.g., guideline application, procedural issues, local rules). The program also incorporates the latest edition of the Commission's "Questions Most Frequently Asked About the Sentencing Guidelines."

#### Most Frequently Asked Questions

In march 1990, the Commission distributed volume III of the popular publication, "Questions Most Frequently Asked About the Sentencing Guidelines." The publication addresses substantive areas of concern in guideline application that have been identified through hotline calls and Commission training seminars.

#### Assistance in the Amendment Process

Calls to the hotline provide feedback to the Commission about practical implementation of the guidelines. For example, probation officers will frequently bring issues about clarity of language and guideline application to the attention of TAS staff members. TAS apprises the Commission of such issues, thus assisting in the drafting of more effective and understandable guidelines.

TAS also participates in the amendment process through membership in staff working groups that

focus on a particular issue or guideline (e.g., revocation of probation or supervised release, firearms, sex offenses). By working jointly with the legal, drafting, and research staffs, TAS contributes to a comprehensive review of proposed amendments by applying its special emphasis on practical application and impact of particular amendments on the field.

#### Probation Officers on Temporary Assignment

The Commission's temporary assignment program for probation officers, now in its third year, has proven successful in promoting guideline

application training and providing a link between the Commission and field officers. The temporary duty consists of a minimum five-week assignment during which officers help staff the hotline, become involved in the amendment process, and assist in the case review project. The Commission bears the cost of the officer's travel, per diem, and living expenses during the temporary assignment. The Commission plans to extend the length of the assignment to six weeks in 1991 in response to officer's feedback that a longer assignment would maximize their guideline application skills. At the same time, the Commission will benefit from the officer's increased assistance and expertise on the hotline.

In fiscal year 1990, 20 probation officers representing 15 districts participated in the program, including officers from Alaska, Massachusetts, Northern California, Nebraska, Eastern Arkan-

sas, Idaho, Middle Florida, Eastern Pennsylvania, Eastern Michigan, Arizona, Southern Indiana, Western Texas, Middle Louisiana, Western Oklahoma, and New Jersey. The participant's home districts represent a diverse geographical constituency and provide the Commission with broad insight into sentencing practices in various regions. Since the program's inception, 24 districts have been represented. Nine additional districts have signed up for the 1991 program, increasing the number of participating districts to 33, a third of all U.S. probation offices in the nation.

Both probation officers and the Commission benefit from the temporary assignment program. During their tenure at the Commission, officers quickly become expert in guideline application and return to their districts as valuable resource persons. The Commission, through interaction with officers who daily apply the guidelines, acquires a better understanding of the practical concerns confronting probation officers and establishes an important communication link with the field.

### B. Training

Congress authorized the Commission to "devise and conduct periodic training programs of instruction in sentencing techniques for judicial and probation personnel and other persons connected with the sentencing process." 28 U.S.C. § 995(a)(17) and (18). The Commission recognizes that an evolving guideline system, along with the steady influx of new practitioners, creates an ongoing need for effective training programs and materials. In 1990, the Commission provided training to approximately 4,028 individuals at 78 training sessions across the country; participants included circuit and district court judges, probation officers, prosecuting attorneys, defense attorneys, investigative case

agents, congressional staff members, law clerks, and staff of other government agencies. Additionally, the Commission significantly increased its collaborative training efforts with the Federal Judicial Center, Department of Justice, and Department of Treasury to develop and refine permanent, academy-based guideline education programs.

#### Court Personnel

Commission trainers and attorneys from the General Counsel's Office continue to provide guideline application training to newly appointed judges at orientation programs sponsored by the Federal Judicial Center. Judges of the Fifth and Eleventh Circuits also had an opportunity to discuss guideline sentencing issues with Commissioners and staff at the FJC's pilot Sentencing Institute in September 1990. Held in Fort Worth, TX, this Institute was of particular interest because it was the first conducted since the Supreme Court's Mistretta decision upholding the constitutionality of the sentencing guidelines.

The number of probation officers hired in 1990 increased dramatically compared to previous years. The Commission offered two days of guideline training to 392 new officers during six orientation programs at the National Probation and Pretrial Services Academy in Baltimore, MD. As an additional component of their orientation program, new officers met with Commissioners and staff at Commission offices in Washington, D.C. for Leadership Day programs.

In conjunction with the Department of Justice's Advocacy Institute, the Commission in 1990 provided guideline training to 685 newly appointed assistant U.S. attorneys who attended either the Basic Criminal Trial Advocacy Program in

Washington, D.C. or the Federal Practice Skills Seminar held in various cities across the country.

#### In-District Training

The Commission's training staff conducted 53 in-district sessions in response to requests for assistance from the field. Approximately 2,603 participants attended these training programs. Throughout 1990, Commissioners and staff lectured widely on sentencing issues at training sessions, academic seminars, judges' meetings, and professional conferences. L. Russell Burress, U.S. probation officer from South Carolina on assignment to the Commission, continued in his role as the Commission's primary trainer in guideline application.

#### Investigative Agents

In 1990, the Commission responded to requests from the Department of Treasury for guideline training for Alcohol, Tobacco, and Firearms senior investigative agents at the Federal Law Enforcement Training Center in Glynco, Georgia. Another guideline training program for case agents is currently being developed in conjunction with the Financial Fraud Institute, Federal Law Enforcement Training Center; a pilot program is scheduled for March 1991. FBI agents also received guideline training from the Commission during 1990.

#### Training Materials

The training staff designs exercises, visual aids, and a variety of training materials to accommo-

date the educational needs of practitioners. In 1990, the Commission provided judges, probation officers, prosecutors, and defense attorneys with volume III of "Questions Most Frequently Asked About The Sentencing Guidelines," in addition to a summary of newly enacted guidelines amendments entitled "Amendment Highlights."

#### C. Case Review

#### Introduction

The Case Review Project responds to one of the Commission's statutorily authorized monitoring functions by providing an in-depth analysis of guideline application for a randomly selected set of case files. The analysis consists of a thorough review of all documents submitted to the Commission's Monitoring Unit, including the presentence report and addendum, worksheets, plea agreement, statement of reasons, and the judgment of conviction order. Case review is conducted by TAS staff and U.S probation officers on temporary assignment to the Commission.

The Case Review Project is a valuable resource for the Commission, including providing input to the Commission's evaluation study, the amendment process, and the development of training materials. The following is a look at the project's methodology and progress to date.

<sup>129</sup> Congress authorized the Commission to "monitor the performance of probation officers with regard to sentencing recommendations, including application of the Sentencing Commission guidelines and policy statements;" and to "issue instructions to probation officers concerning application of Commission guidelines and policy statements" (28 U.S.C. § 995(a)(9), (10)).

#### Project Methodology

Staff will review a randomly selected sample of approximately 1,100 cases, representing 4 percent of all cases sentenced under the guidelines between August 1, 1989, and July 31, 1990. The case review sample is drawn each month from the Monitoring Unit's 25 percent random sample used in its departure study and includes defendants sentenced within the most recent six month period.

Staff review all documents in each case file to assess guideline application based on the information available and compare this assessment to the guideline calculations presented in the presentence report. This process involves a review of the base offense level, specific offense characteristics, Chapter Three adjustments, criminal history, fines, and sentencing options.

As with all monitoring functions, the review can only be as thorough as the information available. For many case files, information important to the resolution of particular issues is missing and the court may base its findings on information presented at the sentencing hearing that does not appear in the case file. For example, the criminal history section of a presentence report may assign a single point for a sentence of 60 days imprisonment. Because §4A1.1(b) would assign two criminal history points to a sentence of 60 days imprisonment, TAS would note this as a discrepancy. However, TAS has no way of knowing whether at sentencing the probation officer informed the court that this sentence was "suspended", in which case the defendant would correctly receive one criminal history point under §4A1.2(a)(3).

Case review, therefore, cannot make definitive assessments regarding whether guideline application is "correct" in individual cases. Rather, it

illustrates general trends and highlights possible problem areas across the sample.

#### Progress

To date, TAS has reviewed a total of 744 case files of defendants sentenced from August 1989 through April 1990. Table Z provides distribution of cases reviewed by district while Table AA provides descriptive information on mode of conviction and availability of documents for review. Figures 13 and 14 illustrate the primary offense category and class of offense for the sample reviewed. It is worth noting that half of all cases reviewed involved drug offenses, and 84.9 percent of all convictions were disposed of by a plea agreement. Statements of reasons were available for review in 71.4 percent of all cases.

As previously noted, while staff can identify apparent application errors, it is virtually impossible to determine if there is actually misapplication of the guidelines because the case file lacks the detail necessary to allow for a complete analysis. Arithmetic errors, misreading of tables such as the Drug Quantity Table, and typographical errors are more readily detectable but rarely occur. Early findings suggest that while probation officers' general guideline application skills are very good, they appear to have some difficulty applying the fine and supervised release guidelines.

This preliminary analysis has shown that TAS's initial goal of quantifying each case for analysis of probation officer performance was overly ambitious. The absence of conclusive information prohibits quantification of this type. However, case review provides the Commission with general information important to the guideline amendment and training processes.

**Description of Datafiles, Variables, and Footnotes** 

## Introduction

Pursuant to statute, courts are required to forward sentencing information to the Commission on all defendants sentenced under the Sentencing Reform Act of 1984, except cases involving solely petty offenses. Standard information on each case is computerized for analysis using data from case files received.

Most tables included in the body of this report have been developed using the United States Sentencing Commission's data file, MONFY90. This data file includes information on all (29,011) defendants sentenced under the guidelines during fiscal year 1990 (October 1, 1989, through September 30, 1990), for whom data were received by the Commission as of December 28, 1990. Given the nature of the data file and reporting requirements, the following types of cases are not included in the data presented here: cases initiated but for which no convictions were obtained; defendants convicted but for which no sentences were yet issued; and defendants sentenced but for which no data were submitted to the Commission.

Of the 29,011 cases received by the Commission, 91 percent of the cases for the first eleven months of fiscal year 1990 have been successfully matched with corresponding cases in the Administrative Office of the U.S. Court's Federal Probation Sentencing and Supervision Information System (FPSSIS) data file. This match allows the Commission to import information not previously collected by the USSC. The remaining 9 percent of cases reported to the Commission were not reported to FPSSIS or were reported in an inconsistent manner.

The availability of certain types of data depends on the Commission's ability to match with the FPSSIS data entry system. A review of potential problem areas undertaken after MONFY90 was created demonstrated a high probability of failure to match magistrate cases in the districts of Hawaii, Southern Texas, and Western Texas. For these cases, information normally imported when successfully matched remains missing.

Due to the termination of FPSSIS data collection as of September 1990, information in this report derived from FPSSIS indicators for the first 11 months have been collected from documents received by the Commission for September 1990. These variables are coded in a manner similar to the FPSSIS indicators and are noted in the variable descriptions that follow.

Because the USSC collects information only on cases sentenced under the guidelines, data from FPSSIS has been used for tables involving pre-guideline and guideline comparisons (Figure 2, Table I, and Appendix C - Tables C-1 and C-2). To facilitate more accurate comparisons of guideline and pre-guideline information, cases involving solely petty offenses or those indicated by FPSSIS indicators as corporations or diversionary cases have been excluded. Due to the termination of FPSSIS data collection, only information from the first eleven months of the fiscal year has been used. The resulting FPSSIS data file encompasses the time period from October 1, 1989, through August 31, 1990, and includes a total of 26,183 guideline cases and 11,908 pre-guideline cases.

For all tables, row or column percents have been rounded to the nearest tenth of a percent. Because of such rounding within rows or columns, the sum of all rows or columns may be slightly above or below 100 percent.

## Variables

The following section describes, in alphabetical order, the variables used in the tables and figures in the Monitoring section of this report (Part A of Chapter Five) and Appendices B and C.

## Age

Age represents the age of the defendant on the day of sentencing and is calculated utilizing the date of birth of the defendant as reported in the Presentence Report and the date of sentencing as reported in the Judgment of Conviction Order.

## **Average Length of Imprisonment**

Sentencing information is obtained from the Judgment of Conviction Order. Average Months Prison is the mean term of imprisonment ordered for cases involving a commitment to the Bureau of Prisons; cases that received no term of imprisonment are not included in the calculation of the average. Cases for which a term of imprisonment was ordered but the length was indeterminable are also excluded from these calculations. In most cases for which the exact term is unknown, the Judgment of Conviction merely specified a sentence of time served. Life sentences are included in the calculation as 360 months.

## Case Receipt Rate

In Table C, the Cases Received by USSC - Percent of District's Combined Total represents the case receipt rate for the subpopulation. This column provides the proportion of cases identified from both the USSC and FPSSIS data files that were submitted to the USSC. The number of guideline cases received by the USSC is divided by the total number of guideline cases identified in the federal criminal justice system (number of guideline cases received by the Commission plus the number of guideline cases received by FPSSIS but not received by the Commission).

The Difference in Representation column indicates the difference between the percentage of cases represented by the subpopulation in the Commission datafile and those identified in the federal criminal justice system (number received plus those not received). A positive value represents the amount or degree that the Commission's file overrepresents that district's proportion when compared to the combined total. A negative value indicates the degree of underrepresentation.

## Cases Received by the USSC

A Case as recorded by the USSC involves a single sentencing event for a single defendant. Multiple counts and even multiple indictments are considered a single sentencing event if sentenced at the same time by the same judge. A single defendant may appear in more than one case if involved in more

than one sentencing event. Multiple defendants in the same sentencing event each appear as a separate case.

## Chapter Two Guideline Applied

Chapter Two Guideline Applied represents the Chapter Two guidelines applied in single and multiple count cases. Because a single case may reference several different guidelines, the total percent adds to more than 100 percent. For Chapter Two guidelines that list possible cross-references which result in application of multiple guidelines, both the original and cross-referenced guideline(s) are included. However, if application of a specific cross-reference is required, only the original guideline is coded to avoid double-counting for these cases.

#### Circuit

Information on judicial *Circuit* in which the defendant was sentenced is generated by USSC computers using the location of the judicial district in which the defendant was sentenced.

## Criminal History Category

The Criminal History Category used in these tables is taken from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 79.1 percent of cases for which the Commission has received such documents.

When the criminal history category is not specified in the Report on the Sentencing Hearing, USSC computer's calculate the criminal history category based on several logical criteria, if available. For instance, if the number of criminal history points is known, or the guideline range and offense level are available from the Report on the Sentencing Hearing, criminal history category is calculated by reference to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing, but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the PSR.

For Table K only, criminal history category has been taken from the Presentence Report when the Report on the Sentencing Hearing is not available. While the court may disagree with the PSR information, study has shown that the criminal history category is the same in over 90 percent of cases for which both documents were received.

## District

Information on judicial District in which sentencing occurred is obtained from the Judgment of Conviction Order.

## **Document Submission Rates**

Three documents are represented on Table D: the Judgment of Conviction Order (J&C), the Presentence Report (PSR), and the Report on the Sentencing Hearing. The J&C and PSR are generally

submitted in a standardized format. PSR's waived by the court are indicated in a separate column. Sealed PSR's are included as *Not Received*. While standardized forms for the Report on the Sentencing Hearing are most frequently submitted, transcripts or partial transcripts from the sentencing hearing are also included as *Received*.

## Fines and Restitution

Fine and restitution information is obtained from the Judgment of Conviction Order. The *Total Receiving Fines and Restitution* includes the number of cases that were ordered to pay a fine, restitution, or both a fine and restitution. Cases involving fines and restitution overlap with other sentencing categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

The Average Dollar Amount and Mean amount of payment ordered are used interchangeably and represent the mean dollar amount of the fine and the restitution ordered for cases involving economic sanctions. Cases that received no fine or restitution order are not included in calculation of the average. The number of cases upon which the average is based may not equal the Total Receiving Fines and Restitution. This is due to the failure of some Judgment of Conviction Orders to specify the dollar amount ordered. The Sum of payment ordered reflects the total dollar amount of fines and restitution ordered, excluding cases in which the amount was indeterminable. The Median of payments ordered reflects the amount located at the fiftieth percentile of all amounts ordered, excluding cases in which the amount was indeterminable.

## Gender

Gender of the defendant is obtained from the FPSSIS matched file for cases sentenced from October 1, 1989, through August 31, 1990. Due to the termination of FPSSIS data collection, the variable is obtained from the Presentence Report or through contact with the probation office for cases sentenced in September of 1990.

## Guideline Defendants Sentenced (USSC file only)

Each Guideline Defendant Sentenced, or Case, as recorded by the USSC involves a single sentencing event for a single defendant. Multiple counts and even multiple indictments are considered a single sentencing event if sentenced at the same time by the same judge. A single defendant may appear in more than one case if involved in more than one sentencing event. Multiple defendants in the same sentencing event will each appear as a separate case.

## Guideline and Pre-Guideline Defendants Sentenced (FPSSIS file only)

Information on guideline and pre-guideline status for FPSSIS tables is obtained from the FPSSIS data file. Due to the termination of FPSSIS data collection, tables using both guideline and pre-guideline information extend only through August 1990. (Figure 2, Table I, and Appendix C - Tables C-1 and C-2).

## Guideline Departure Rate

Information on departures is obtained from the Report on the Sentencing Hearing or through telephone calls to the field when such information is missing or indeterminable. A departure decision is made by comparing the guideline range as determined by the court to the sentence imposed by the court. For a full discussion of the methodology used for the national departure study, refer to the departure section within the Monitoring section of this report.

## Guideline Sentencing Range

The *Guideline Sentencing Range* is taken from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 79.1 percent of cases for which the Commission has received such documents.

When the guideline sentencing range is not specified in the Report on the Sentencing Hearing, USSC computers calculate the criminal history category based on several logical criteria, if available. For instance, if the criminal history category and offense level are available from the Report on the Sentencing Hearing, the guideline sentencing range is calculated by reference to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the PSR.

In cases in which a guideline sentencing range is trumped by a statutory maximum or mandatory minimum, the original guideline sentencing range is reported.

Due to amendments to the guideline sentencing table, the range of 0-6 months includes cases that involve previous ranges of 0-1, 0-2, 0-3, 0-4, and 0-5 months.

#### Income

Income of the defendant is obtained from the FPSSIS matched file for cases sentenced from October 1, 1989, through August 31, 1990. Due to the termination of FPSSIS data collection, the variable is obtained from the Presentence Report for cases sentenced in September 1990.

FPSSIS defines income as the defendants average gross monthly income to the nearest \$50 for the months that the defendant was employed during the year prior to the "first appearance" for this offense. The Commission codes income to the nearest dollar. Zero dollars are entered for persons with no income, whether unemployed or a student.

## Length of Imprisonment

Sentencing information is obtained from the Judgment of Conviction Order. Length of imprisonment includes cases involving a commitment to the Bureau of Prisons. Life sentences are included in the category Over 60 months. Defendants sentenced to a partial month have been rounded to the next highest month. Differences between the number of cases included and the total number of defendants

sentenced to a term of imprisonment is due to missing information on the exact length of the term ordered. In most cases for which the exact term is unknown, the Judgment of Conviction Order merely specifies a sentence to "time served."

## **Mode of Conviction**

Information on *Mode of Conviction* is obtained from the FPSSIS data file and is provided for 11 rather than 12 months due to the termination of FPSSIS data collection. Defendants sentenced subsequent to a plea of guilty or *nolo contendere* are included in the *Plea* category. Defendants sentenced subsequent to a trial by judge or jury are included in the *Trial* category.

For tables in Appendix B, *Mode of Conviction* has been collected by the USSC for September 1990 cases.

#### Offense Level

The *Final Offense Level* used in these tables is taken from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 79.1 percent of cases for which the Commission has received such documents.

When the final offense level is not specified in the Report on the Sentencing Hearing, USSC computers calculate the offense level based on several logical criteria, if available. For instance, if the guideline sentencing range and criminal history category are available from the Report on the Sentencing Hearing, final offense level is calculated by reference to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the PSR.

## **Primary Offense Category**

Information on *Primary Offense Category* is obtained from the FPSSIS matched file for cases sentenced from October 1, 1989, through August 31, 1990. Due to the termination of FPSSIS data collection, the variable is determined by the USSC for cases sentenced in September 1990, using similar criteria. *Primary Offense* is considered the defendants most serious offense of conviction. FPSSIS instructions direct probation officers to code as the *Primary Offense* the offense carrying the highest severity code in the most recent edition of the "U.S. Title and Code Criminal Offense Citations Manual." The Severity Code considers statutory maximum, type of crime, and amount of potential fine in making a comparative severity assessment.

FPSSIS primary offense codes have been collapsed into the following offense categories:

Homicide includes murder in the first and second degree, manslaughter, negligent homicide; and these same offenses against government officials (FPSSIS codes 100-311, 7610-7611).

Kidnapping includes general kidnapping, kidnapping of government officials and representatives, and hostages (FPSSIS code 7600).

Robbery includes bank, postal, and other robberies (FPSSIS codes 1100-1400).

Assault includes aggravated or felonious assaults and assaults on government officials (FPSSIS codes 1500-1601).

Burglary/Breaking and Entering includes bank, postal, and other burglary and breaking and entering (FPSSIS codes 2100-2400).

Larceny includes all larcenies and thefts, except auto theft (FPSSIS codes 3100-3800).

Embezzlement includes bank, postal, and other embezzlements (FPSSIS codes 4100-4390).

Tax Offenses include all tax offenses except those involving lending and credit institutions, banks, postal and interstate wire (FPSSIS codes 4510-4540).

Fraud includes all federal fraud offenses, except income tax fraud and citizenship and immigration fraud (FPSSIS codes 4600-4999). This category encompasses fraud involving lending and credit institutions, banks, postal and interstate wire, veterans and allotments, bankruptcy, securities and exchange, tax (except income tax), passports, credit cards, and computers.

Drugs - Importation and Distribution includes most federal drug offenses (FPSSIS codes 6501-6504, 6511-6725, 6800-6808, 6811-6855 and 8605,8606, 8608). This category encompasses importation, distribution, possession, records offenses, manufacturing, and continuing criminal enterprise.

Drugs - Simple Possession includes only simple drug possession (determined by primary statute code - 21 U.S.C. § 844(a)). Because of enhancements in statutory penalties for simple possession of crack cocaine, all offenses sentenced under 21 U.S.C. § 844(a) are not restricted to the previous one year statutory maximum and substantially longer penalties are reflected here.

Drugs - Use of Communication Facility includes use of a communication facility in committing, causing, or facilitating an act that constitutes a drug felony (determined by primary statute code - 21 U.S.C. § 843(b)).

Drug Offenses include both Drugs - Importation and Distribution and Drugs - Use of a Communication Facility (as used in Appendix B tables).

Auto Theft includes auto theft and transportation, etc. of stolen motor vehicles or aircraft (FPSSIS codes 5100-5200).

Counterfeiting includes federal counterfeiting and forgery offenses (FPSSIS codes 5500-5800).

Sex Offenses include sex offenses, sexual abuse, and importation, transportation, or detention of individuals for prostitution or "other immoral purposes" (FPSSIS codes 6100-6300).

Bribery includes all general bribery offenses (FPSSIS code 7100).

Escape includes general escape, escape from work-release programs, and aiding or harboring an escapee. Escape also includes offenses committed while in prison such as possession of contraband and rioting (FPSSIS codes 7300-7320).

Firearms include all federal firearms and weapons offenses (FPSSIS codes 7800-7830).

Immigration includes illegal entry or reentry and fraud involving citizenship and immigration laws (FPSSIS codes 8710-8750).

Extortion and Racketeering includes extortion and racketeering, threats, and interstate travel or transportation in aid of racketeering. These offenses generally encompass an underlying illicit activity such as arson, bribery, gambling, liquor, narcotics, prostitution, etc. (FPSSIS codes 7400, 7410-7490 and by statute - 18 U.S.C. §§ 1951, 1952, 1952A, 1952B, 1958, 1959, 1962, 1963).

Gambling and Lottery includes all federal gambling and lottery offenses (FPSSIS codes 7500, 7530).

Money Laundering encompasses laundering of monies illegally obtained through illicit activity such as narcotic or gambling enterprises (determined by primary statute code - 18 U.S.C. §§ 1956, 1957).

The Other category minimally includes all other less frequently sentenced federal offenses, including: agricultural and conservation offenses, antitrust violations, food and drug offenses, environmental offenses, wildlife offenses, national defense violations, obscene mail or material offenses, civil rights violations, customs law violations, contempt, interstate commerce violations, labor violations, postal law violations, destruction of federal property, perjury, threats of public officials, and traffic offenses. In Figure 3 and the tables provided in Appendix B, Primary Offense Category is collapsed and the less frequently sentenced federal offenses are combined into the Other category. This category includes all categories listed above that are not listed separately.

## Race

Information on *Race* of the defendant is obtained from the FPSSIS matched file for cases sentenced from October 1, 1989 through August 31, 1990. Due to the termination of FPSSIS data collection, the variable is obtained from the Presentence Report or from contact with the field for cases sentenced in September of 1990. FPSSIS categories for race include "White," "Black," "White Hispanic," "Black Hispanic," "American Indian or Alaskan Native," and "Asian or Pacific Islander." For purposes of this table, the FPSSIS categories of "White Hispanic" and "Black Hispanic" have been combined into the *Hispanic* category; and as such the numbers reported underrepresent *Black* defendants. The *Other* category includes defendants whose FPSSIS categories are "American Indian or Alaskan Native" or "Asian or Pacific Islander."

## Reason for Departure

Reasons for Departure as given by the sentencing judge are coded for cases involving departures. This information is obtained from the Report on the Sentencing Hearing when available or through a telephone call to the field. Courts often provide more than one reason for departure; consequently, on departure tables the percentage across all reasons for departure may exceed 100 percent. Reasons listed are those given more than once. The Other category includes any reason given only once.

## Single and Multiple Count Cases

Information on number of counts of conviction is obtained from the Judgment of Conviction and verified with the Presentence Report. Cases with more than one count of conviction are included in the *Multiple Count* category.

## Type of Guideline Sentence Imposed

Sentencing information is obtained from the Judgment of Conviction Order. The *Total Receiving Prison* includes the number of defendants sentenced (and percent of *Total Cases*) who received a commitment to the Bureau of Prisons. This column includes those receiving *Prison and Supervised Release*, *Prison Only*, and the *New Split Sentence*.

The Prison Only category includes those defendants sentenced to a term of imprisonment only, with no condition of post-release supervision. The Prison and Supervised Release category includes those defendants sentenced to a term of imprisonment followed by a term of supervised release with no conditions of community confinement or home detention. The New Split Sentence is a term used for a new sentence under the guidelines involving a term of imprisonment followed by a term of supervised release that includes a condition of community confinement or home detention.

The Total Receiving Probation column includes the number of defendants sentenced (and the percent of Total Cases) who received a term of probation with or without a condition of community confinement, intermittent confinement, or home detention. This column also represents the total of the Probation Only and Probation and Confinement columns.

The *Probation Only* column includes the number of defendants who received a term of probation without a condition of community confinement, intermittent confinement, or home detention.

Probation and Confinement includes the number of defendants who received a term of probation with a condition of community confinement, intermittent confinement, or home detention.

Other Cases include cases that received an economic sanction only or supervised release only. Cases in the *Total Receiving Prison*, *Total Receiving Probation*, and *Other Cases* categories total 100 percent of cases;

Cases Involving Fines and Restitution overlap with the other categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

The following information corresponds to the footnotes contained in the "Fiscal Year 1990 Guideline Sentences" tables in Appendix B. Actual figures provided in these footnotes apply only to the national data table. Additional information describing variables and data is provided earlier in this appendix.

- Table-wide deletion is used to exclude cases missing information on any or all of the following defendant characteristics: Gender, Race, Age, or Income. Nationally, this involves the exclusion of 3,677 cases because of missing information on the following characteristics: Gender (2,449), Race (2,611), Age (1,282), or Income (3,083).
- Information on Mode of Conviction is obtained from the FPSSIS matched file for cases sentenced from October 1, 1989 through August 31, 1990. Due to the termination of FPSSIS data collection, the variable is obtained from the Judgment of Conviction for cases sentenced in September 1990. Nationally, 2,346 cases are excluded from this section due to missing or indeterminable information on Mode of Conviction. In addition, 80 cases coded with a value of Both Plea and Trial are excluded.
- The *Total Cases* column includes all cases with information available on type of sentence, economic sanction, and primary offense. Table-wide deletion results in the exclusion of cases missing any or all of these indicators. Nationally, 297 mixed law cases and 2,774 cases missing any or all of these indicators have been excluded: primary offense (2,406), sentencing alternative (437), and economic sanction type (294).

Cases in the Total Receiving Prison, Total Receiving Probation, and Other Cases categories total 100% of all cases; however, Cases Involving Fines and Restitution will overlap with the other categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

- Cases involving no term of imprisonment and cases with indeterminable terms are excluded from the calculation of the *Average Months Prison*. Any sentence of days is rounded up to the nearest month. Life sentences are included in these calculations as 360 months. Of the 25,940 cases included in the *Total Cases* column, 5,979 cases involving no term of imprisonment and 91 cases with an unspecified length are excluded from calculation of the average.
- Cases involving no term of imprisonment and cases with indeterminable terms are excluded from the category *Length of Prison Term*. Any sentence of days is rounded up to the nearest month. Life sentences are included in the category *Over 60*. Of the 25,940 cases included in the *Total Cases* column, 5,979 cases involving no term of imprisonment and 91 cases with an unspecified length are excluded.
- For the purposes of these tables, Drugs Importation and Distribution and Drugs Use of a Communication Facility are combined into Drug Offenses for the tables in Appendix B.
- Cases receiving no order of fine or restitution are excluded from the calculation of the *Total Receiving Fines and Restitution*. The number of cases upon which the average is based may not equal the *Total Receiving Fines and Restitution* due to the failure of some judgments to specify the dollar amount ordered. Of the 25,940 cases included in the *Total Cases* column, 16,968 cases

involving no order of fine or restitution and 413 cases with an indeterminable dollar amount ordered are excluded from these calculations.

The following information corresponds to the footnotes contained in the "Selected Federal Criminal Justice Indicators," "Crimes Reported To Police," and "Selected Demographic Indicators" tables in Appendix B.

- 1 Cities are listed in order of number of offenders having sentencing guideline documentation submitted to the USSC.
- <sup>2</sup> Source: Administrative Office of the U.S. Courts. <u>1990 United States Court Directory</u>. Includes active and senior district judges as of 10/1/90.
- Source: Administrative Office of the U.S. Courts. <u>Tables of Civil Cases and Defendants: Year Ended 9/30/90</u>. Table C. Represents civil cases.
- Source: Executive Office of U.S. Attorneys, Office of Personnel. Represents all attorneys designated as of 5/90 as members of criminal, drug task force, narcotics, savings and loan, and strike force units. The Executive Office estimates that attorneys assigned to lands and general units in 1989 spent 70 percent of their time doing criminal work. Therefore, the total represents 70 percent of the personnel in those two units. Note: of the 187 Assistant U.S. Attorneys assigned to the Federal District Court for the District of Columbia, 94 exclusively prosecute federal offenses. The total for the District of Columbia represents 70 percent of these 94 AUSAs.

Table C-1

# GUIDELINE AND PRE-GUIDELINE CASES SENTENCED PER MONTH (November 1987 through August 1990)

MONTH AND YEAR	NUMBER OF GUIDELINE CASES	NUMBER OF PRE- GUIDELINE CASES
November 1987	5	2,949
December 1987	10	3,012
January 1988	17	3,142
February 1988	. 56	2,810
March 1988	218	2,774
April 1988	357	2,594
May 1988	572	2,532
June 1988	613	2,619
July 1988	730	2,393
August 1988	779	2,281
September 1988	885	2,825
October 1988	789	2,418
November 1988	895	2,419
December 1988	853	2,110
January 1989	1,136	2,162
February 1989	1,245	1,610
March 1989	1,770	1,865

MONTH AND YEAR	NUMBER OF GUIDELINE CASES	NUMBER OF PRE- GUIDELINE CASES
April 1989	1,652	1,535
May 1989	1,753	1,684
June 1989	2,007	1,657
July 1989	1,798	1,437
August 1989	1,896	1,414
September 1989	2,093	1,296
October 1989	2,124	1,299
November 1989	2,228	1,245
December 1989	2,245	1,142
January 1990	2,585	1,267
February 1990	2,316	1,002
March 1990	2,482	1,111
April 1990	2,316	1,094
May 1990	2,658	1,039
June 1990	2,485	982
July 1990	2,533	994
August 1990	2,211	733

'Cases involving mixed law counts (both guideline and pre-guideline) have been included in the "Guideline" category. Descriptions of variables used in this table are provided in Appendix A.

SOURCE: Administrative Office of the U.S. Courts, FPSSIS 1987-1990 Data File, excluding cases involving solely petty offenses, corporate offenders or diversionary sentences.
