#### UNITED STATES SENTENCING COMMISSION

1331 PENNSYLVANIA AVENUE, NW SUITE 1400 WASHINGTON, D.C. 20004 (202) 662-8800

#### LETTER FROM THE CHAIRMAN

To the President, the Congress, and the Judicial Conference of the United States of America

I am pleased to transmit this report chronicling the activities and accomplishments of the United States Sentencing Commission in 1991.

The Commission is committed to refining the guidelines in the years ahead to ensure that this new sentencing system, which already has significantly improved the federal criminal justice system, realizes its full potential.

Respectfully submitted,

William W. Wilkins, Jr.

Judge, United States Court of Appeals

for the Fourth Circuit

# Introduction

The United States Sentencing Commission, established after more than a decade of bipartisan effort, is an independent agency in the judicial branch of government. The Commission's primary function is to develop and monitor sentencing policies and practices for the federal courts that include guidelines prescribing the appropriate form and severity of punishment for offenders convicted of federal crimes. The agency's activities are directed by seven voting members appointed by the President and confirmed by the Senate and two non-voting, ex-officio members.

The Commission was created by the sentencing reform provisions of the Comprehensive Crime Control Act, Pub. L. No. 98-473 (1984), and its authority and duties are set out in chapter 58 of title 28, United States Code. Procedures for implementing guideline sentencing are prescribed in a new chapter 227 of title 18.

As specified in 28 U.S.C. § 991(b), the sentencing guidelines established by the Commission are designed to:

- Effectuate the purposes of sentencing enumerated in 18 U.S.C. § 3553(a)(2).
   In brief, those purposes are just punishment, deterrence, incapacitation, and rehabilitation;
- Provide certainty and fairness in meeting the purposes of sentencing by avoiding unwarranted disparity among offenders with similar characteristics convicted of similar criminal conduct, while permitting sufficient judicial flexibility to take into account relevant aggravating and mitigating factors; and

 Reflect, to the extent practicable, advancement in the knowledge of human behavior as related to the criminal justice process.

Organized in October 1985, the Commission submitted its initial Sentencing Guidelines and Policy Statements to Congress on April 13, 1987. Prior to submission of the guidelines, the Commission held 13 public hearings, published two drafts for public comment, and received more than 1,000 letters and position papers from hundreds of individuals and organizations. After the requisite period of congressional review, the guidelines became effective on November 1, 1987, and apply to all offenses committed on or after that date.

Shortly after implementation of the guidelines, defendants throughout the country challenged the constitutionality of the Commission and the Sentencing Reform Act, claiming improper legislative delegation and violation of the separation of powers doctrine. On January 18, 1989, the U.S. Supreme Court in Mistretta v. United States rejected these challenges and upheld the constitutionality of the Commission as an independent judicial branch agency. The Supreme Court's decision in Mistretta cleared the way for nationwide implementation of the guidelines.

Since Mistretta, the Commission has continued to address its significant ongoing responsibilities in the research, sentence monitoring, evaluation, and training areas, as well as serving as a clearinghouse of sentencing information for Congress, criminal justice practitioners, and the public. In addition, the Commission has used its statutory authority both to amend the existing guidelines and to promulgate new guidelines. Of particular note, on May 1, 1991, the Commission submitted

to Congress the nation's first sentencing guidelines for organizations convicted of federal offenses. The guidelines took effect on November 1, 1991, upon expiration of the statutory, 180day congressional review period.

The Commission maintains a comprehensive, computerized data collection system to track application of the guidelines and provide support for other Commission activities. On a continuing basis, the Commission extracts, codes, and inputs data from presentence reports, judgment of conviction orders, statements of reasons, written plea agreements, and guideline worksheets for all cases sentenced under the guidelines. Since Mistretta, the Commission has begun research on issues such as recidivism, incapacitation, prison impact, and offense severity. Additionally, the Commission is studying the implementation of the guidelines, use of incarceration, disparity in sentencing, and prosecutorial discretion and plea bargaining in fulfillment of the statutorily required evaluation of the guideline system.

#### Chapter One

# Administration

The U.S. Sentencing Commission is an independent agency in the judicial branch with seven voting Commissioners, two non-voting, ex-officio Commissioners, and approximately 100 employees. The seven voting Commissioners — three of whom must be federal judges — are appointed by the President with the advice and consent of the Senate. By statute, Commissioners hold full-time positions until November 1, 1993, at which time all Commissioners except the Chairman switch to part-time status.

#### Organization

The Commission staff is headed by a Staff Director and organized into six main offices: General Counsel, Monitoring, Evaluation, Research Studies, Training and Technical Assistance, and Administration (see organizational chart, Figure A).

The **Staff Director** is responsible for planning, coordinating, directing, and allocating resources for all staff activities. In addition to carrying out the planning and management functions of the agency, staff in this office manage special projects and perform the public information and computer support functions of the Commission.

The Office of General Counsel provides support to the Commission on a variety of legal issues, including the formulation and application of guidelines and guideline amendments, legislative proposals, and statutory interpretations. The legal staff monitor district and circuit court application and interpretation of the guidelines, and advise Commissioners about statutes and legislation affecting the Commission's work.

In response to Commission directives, staff in this office draft new guidelines and proposed amendments to existing guidelines. In addition, the legal staff provide a "hotline" service for assistant U.S. attorneys and defense attorneys on sentencing guideline issues.

The Office of Monitoring maintains a comprehensive computerized data collection system to track application of the guidelines. The staff receive, input, and analyze case data and produce periodic reports about guideline implementation. These data and reports provide significant information for the Commission's review when it considers amending individual guidelines. The office updates a master file of guideline sentencing statistics that is made available to the public through the Inter-University Consortium for Political and Social Research at the University of Michigan.

The Office of Evaluation focuses its energies on the congressionally-mandated evaluation of the sentencing guidelines and the guidelines' impact on the federal courts. This effort culminated in an extensive report on the operation of the guidelines system and short-term impacts on disparity in sentencing, use of incarceration, and prosecutorial discretion and plea bargaining.

The Office of Research Studies provides research, analysis, and support to the Commission on a variety of topics, including the effect of proposed guideline amendments on projections of federal prison population, sentencing practices related to organizational defendants, and broad criminal justice issues such as deterrence and recidivism.

The Office of Training and Technical Assistance teaches guideline application to judges, probation officers, prosecuting and defense attorneys, and other criminal justice professionals. The staff develop training materials, participate in the sentencing guideline portions of training programs sponsored by other agencies, and provide substantive input in the amendment process by informing the Commission of current guideline application practices. In addition, staff operate a "hotline" to respond to guideline application questions from judges and probation officers. Staff also systematically review probation officers' application of the guidelines.

The Office of Administration provides general administrative support to Commissioners and staff regarding budget and finance, contracting, personnel management, library, facilities, mail, messenger, copying, reception, and other office services. The office provides support to the Staff Director and senior managers in accomplishing project planning and budget forecasting on a short- and long-term basis.

#### Management Accomplishments

The Office of Administration supported improvements in employee benefits and the functioning of Commission operations by (1) implementing an automated time and attendance system; (2) installing an improved office security system as well as modular workstations for support staff; (3) drafting a number of procedures and policies aimed at personnel management improvements; (4) acquiring updated database software for automated tracking of all library holdings; (5) providing employees with access to a nearby health care unit and blood bank, and the opportunity to participate in the Combined Federal Campaign; and (6) beginning a series of in-house seminars on topics such as

stress management and other occupational health issues, and increasing staff participation in outside training sessions. Existing procedures were reviewed and updated; new procedures were issued for a number of financial, office support, and administrative processes.

#### Staffing

During fiscal year 1991, the Commission used staff resources totaling 105 workyears; five of those workyears were expended under authority from a supplemental appropriation. Approximately 35 percent of the staff were involved in various aspects of the sentence monitoring efforts. Ten percent of staff resources were devoted to evaluation functions, five percent to research studies, eight percent to technical assistance and training, and 14 percent to legal. The Commissioners' offices, the Staff Director's office, and the administrative staff accounted for the remaining 28 percent of staff resources.

#### Budget and Expenditures

In fiscal year 1991, Public Law 101-515 provided 100 full-time permanent workyears and an appropriation of \$8,422,000 for the Commission's salaries and expenses. The Commission expended \$8,272,000 from the annual appropriation and \$199,000 (and five workyears) from the carryover supplemental and start-up appropriations; total obligations were \$8,471,000 in fiscal year 1991. For fiscal year 1992, the Commission was granted 108 full-time permanent workyears and an appropriation of \$9,000,000 under Public Law 102-140 (see Table 1). Expenditure of remaining carryover funds is planned during fiscal years 1992 and 1993.

BUDGET AUTHORITY AND OBLIGATIONS (dollar amounts in thousands)

New Budget Authority	<u>FY 1991</u> \$8,422	FY 1992 \$9,000
Personnel Compensation	\$4,470	\$4,777
Personnel Benefits	\$ 906	\$1,155
Travel and Transportation	\$ 490	\$ 575
Communications, Utilities		
and Other Rent	\$1,049	\$1,208
Printing and Reproduction	\$ 276	\$ 230
Other Services	\$ 777	\$1,034
Supplies and Equipment	<u>\$ 503</u>	<u>\$ 534</u>
Total Obligations*	\$8,471	\$9,513

<sup>\*</sup>Total obligation amounts include funds carried forward from previous "no-year" appropriations.

#### Chapter Two

# Guideline Amendments

The legislation creating the Sentencing Commission envisioned that the guidelines would be subject to periodic modification and refinement. Congress provided that "[t]he Commission periodically shall review and revise, in consideration of comments and data coming to its attention, the guidelines promulgated pursuant to the provisions of this section." 28 U.S.C. § 994(o).

The Commission adopted an iterative approach to guideline drafting, stating in the <u>Guidelines Manual</u> that the initial draft was "but the first step in an evolutionary process." Accordingly, the Commission has ongoing responsibilities to refine and modify the guidelines in light of monitoring, research, and congressional enactment of new statutes.

#### Amendment Authority

By statute, the Commission may transmit amendments to the Congress yearly on or after the beginning of a regular session of Congress but not later than the first day of May. Such amendments must remain before the Congress for 180 days before taking effect. At the expiration of this review period or at a later date set by the Commission, the guideline amendments become effective automatically, unless the Congress provides otherwise by enactment of law.

#### Amendments Promulgated

In 1991, the Commission continued its ongoing efforts to clarify, improve, and expand the <u>Guidelines Manual</u>. As part of the regular amendment process, the Commission published a series of proposed amendments for public comment in the

Federal Register on January 17, 1991. The Commission received extensive written and oral comment on the proposed amendments in connection with a public hearing held in Washington, D.C., on March 5, 1991 (see Table 2). After review of the written comment and hearing testimony, the Commission adopted 60 amendments to the sentencing guidelines, policy statements, and official commentary. These amendments and accompanying reasons were reported to Congress on May 1, 1991. Congress took no action to delay or revise the amendments during its 180day review period and, consequently, the amendments became effective on November 1, 1991. The Commission promulgated an additional 15 amendments to clarify commentary to the guidelines. These 15 amendments, which did not require submission to Congress, also became effective on November 1, 1991. In addition, pursuant to direction from Congress, the Commission promulgated two superseding amendments that took effect on November 27, 1991.

Most of the substantive amendments promulgated by the Commission in 1991 derived from work by interdisciplinary working groups that had been established in 1989 and 1990. These amendments included a new chapter dealing with the sentencing of organizations and amendments to the bank robbery, drug, firearms and explosives, immigration, and criminal history guidelines. Many of the amendments promulgated in 1991 were intended to clarify existing guidelines, policy statements, and commentary. In addition, a number of guideline amendments resulted from congressional legislation (e.g., the Crime Control Act of 1990).

#### Guidelines for Organizational Defendants

In 1991, the Commission sent to Congress the nation's first sentencing guidelines for organizations convicted of federal offenses. In drafting these guidelines, the Commission consulted numerous experts in government, the business sector, and academia, held five public hearings beginning in 1986 at various sites across the country, and received hundreds of legal memoranda and position papers from interested individuals, corporations, and business membership groups (see Table 3). Additionally, the Commission conducted extensive empirical research of federal courts' organizational sentencing practices from 1984-1990.

The organizational guidelines provide incentives for organizations who self-police and self-report criminal conduct, but mandate high fines for organizations who have no meaningful program to prevent and detect criminal violations or in which management was involved in the crime. The guidelines take into account the potential range of organizational criminal culpability, from an inadvertent recordkeeping violation to an organization created solely for criminal purposes. In addition, the guidelines mandate full restitution to compensate victims for any harm caused and disgorgement of illegal gains from criminal activity in order to ensure that organizations will not profit from their illegal activity.

The organizational guidelines assist the court in determining the fine amount and whether probation is appropriate. In most cases, the amount of the fine is dependent on two primary factors. The first consideration yields a "base fine" that measures the seriousness of the offense. The second yields a "culpability score" that measures how

culpable the organization was in committing the offense. Together, these two determinations yield a "guideline fine range" from which the court has discretion to select the fine amount to be imposed.

The guidelines mandate probation when it is needed to ensure that another sanction will be fully implemented and to ensure that steps will be taken within the organization to reduce the likelihood of future criminal conduct.

#### Working Groups

In June of 1991, the Commission convened interdisciplinary staff working groups to study specific guideline areas in detail for consideration during the 1992 amendment cycle. Areas for working group study included: acceptance of responsibility, alternatives to imprisonment, criminal history, departures, drug offenses (focusing on role in the offense), environmental offenses, and sexual offenses involving child victims.

Staff working groups study a specific guideline issue, identify areas of concern, and make recommendations to the Commission for possible action. During the process, each group reviews the following information as it pertains to the respective guideline area under scrutiny: Technical Assistance Service (hotline) reports of frequent questions from probation officers about guideline application; monitoring data regarding sentencing practices and departures; case files; previously considered draft amendment proposals; relevant court decisions; public comment; and legislative history and recent legislative enactments. During 1991, subcommittees of the Sentencing Commission's Practitioners Advisory Group and the American Bar Association Sentencing Guidelines committee provided additional input.

#### Acceptance of Responsibility

Section 3E1.1 of the guidelines provides a twolevel reduction in a defendant's combined adjusted offense level "if the defendant clearly demonstrates a recognition and affirmative acceptance of personal responsibility for his criminal conduct." The acceptance working group undertook a broad examination of the guidelines in response to a request from the Criminal Law Committee of the Judicial Conference for additional mitigation at higher offense levels. The group focused on problems in application and case law, asking whether any changes were needed in the structure of the guideline, the language of the guideline and related commentary, or the manner in which the Commission trains and educates the criminal justice community about its application.

During 1991, the acceptance of responsibility working group focused specifically on the following: (1) whether the guideline is being interpreted and applied consistently across the country; (2) whether the guideline provides an appropriate offense level reduction, especially for defendants whose offense levels are relatively high; (3) whether the guideline needs to differentiate more precisely between defendants; and (4) whether there are factors that the guideline does not consider that would help a court determine when the reduction is warranted.

To address these concerns, the working group conducted computer analyses of data drawn from case files submitted to the Commission after each sentencing of a guidelines case; an in-depth analysis of the files of atypical or aberrant cases; an analysis of published opinions from the courts dealing with acceptance of responsibility; a review of the available literature; an examination of questions and problems that have come to the attention of the Commission's Technical Assistance Service; personal interviews with each of the seven voting Commissioners and the two ex-officio Commissioners; an examination of proposals submitted by the Judicial Conference of the United States; a solicitation of input from practitioners and probation officers; and review of public comment received by the Commission.

#### Alternatives to Incarceration

During the last quarter of calendar year 1990, the Judicial Conference of the United States and the Alternatives to Imprisonment Project chaired by Commissioner Helen G. Corrothers submitted detailed reports to the Commission recommending an increase in the number of existing intermediate punishments, expansion of the pool of eligible defendants, and a general increase in district courts' flexibility in sentencing certain offenders. The Commission formed the alternatives to incarceration staff working group to undertake a comprehensive and coordinated assessment of the two reports. The group also examined written comments and public hearing testimony about alternatives received from other judges, practitioners, and private citizens.

In addition to Commission staff, representatives from the Probation Division of the Administrative Office of the U.S. Courts, the Federal Judicial Center, and the Bureau of Prisons participated in working group meetings and contributed to the process.

To make the most efficient use of staff resources, the group divided into three subgroups: program assessment, operational impact, and statistical modeling. The program assessment subgroup concentrated its efforts on the alternative sentencing programs identified in the Advisory Committee's Alternatives to Imprisonment Project Report. The operational impact subgroup reviewed the non-programmatic options of both sets of recommendations from a practitioner's standpoint in order to evaluate the impact that the proposed alternatives would have on guideline application. The statistical modeling subgroup used Commission monitoring data to

analyze populations of offenders that would be affected by any recommendations. Finally, working group members researched legal issues associated with the possible expansion of certain intermediate sanctions.

#### Drug Working Group

The drug working group was formed for two primary purposes: to study and profile drug defendants and the sentences received for drug offenses; and to explore the relationship between relevant conduct, the Chapter Two drug guidelines, and the role in the offense provisions (primarily mitigating role adjustments under §3B1.2 of the guidelines).

During the summer and fall of 1991, the Working Group conducted extensive in-person interviews with numerous criminal justice practitioners throughout the country, including federal district court judges, assistant federal defenders, assistant U.S. attorneys, and probation officers, as well as policy makers and field agents from the Drug Enforcement Agency and the U.S. Customs Service. These practitioners provided detailed, practical input on the current relevant conduct, role in the offense, and Chapter Two drug guidelines. Throughout the amendment cycle, practitioners continued to provide information as the working group developed profiles of drug offenses and proposals for guideline amendments.

Additionally, the working group undertook an extensive review of appellate case law to identify offense conduct and offender characteristics that courts typically consider in determining whether a mitigating role adjustment is warranted.

Finally, using findings from the case law review, the working group studied almost 1,500 drug case files. The group examined more than a dozen characteristics of individual drug offenders (e.g., the quantity of drugs for which a defendant was held accountable and the defendant's role in selling, owning, or transporting drugs), computerized the resulting data, generated profiles of drug defendants, and analyzed the role adjustments applied and offense and offender conduct.

#### Criminal History Working Group

The criminal history working group examined two issues: possible modification of criminal history categories by adding a Category 0 and/or Category VII; and consideration of factors to narrow or expand the applicability of the career offender guideline.

The group explored various ways of defining a "first offender" (the criterion for criminal history Category 0). Definitions examined included an offender with no criminal history of any kind, an offender with a record of only arrests, and an offender with no countable convictions under Chapter Four of the guidelines. The group also conducted an analysis of the ways of determining the criminal history point boundary for Category VI in order to define eligibility for a new Category VII.

The working group studied factors that would narrow application of the career offender guideline by re-examining definitions of "predicate crime of violence." The group studied factors that would broaden application of the guideline by exploring an option that would count all predicate prior convictions irrespective of when they occurred.

The working group conducted in-depth reviews of case files, surveyed pertinent case law and appellate decisions, and conducted empirical research on these issues using the Commission's Monitoring database.

#### Child Sex Offense Working Group

The 101st Congress directed the Sentencing Commission to amend existing guidelines for offenses involving sexual crimes against children if the Commission determines current penalties to be inadequate. In response to this mandate, the child sex offense working group conducted a study of sentences in sexual abuse, kidnapping, and pornography cases. The working group concentrated on three issues: adequacy of the current two-level enhancement in §2A3.1, when the victim is a corrections employee; the scope of the enhancement when a custodial relationship exists between the defendant and victim; and the possibility of moving toward more of a real-offense system for the sexual assault guidelines, §§2A3.2 and 2A3.4, through cross references. The working group reviewed case files from the Commission's monitoring office, literature on child pornography and child sexual abuse, appellate case law, legislative history, previous amendments to the guidelines, Commission hotline data, and evaluation interview data.

#### Summary

Working group reports are due for Commission consideration in December 1991, allowing

Public Law 101-647, § 321.

sufficient time for inclusion in the 1992 proposed amendment submission to Congress. Working group activities related to departures and environmental offenses were held over for the 1993 amendment cycle.

#### Chapter Three

# Legal Issues

#### Introduction

A large body of case law on federal sentencing has developed since the Supreme Court's 1989 decision rejecting constitutional challenges to the Sentencing Reform Act (SRA) and the creation of the U.S. Sentencing Commission.<sup>2</sup> In fiscal year 1991, the federal courts issued hundreds of opinions interpreting key provisions of the sentencing guidelines and the SRA. For example, the federal appellate courts explored the parameters of relevant conduct, 3 examined the significance of guideline commentary, discussed the interaction of the substantial assistance departure with 18 U.S.C. § 3553(e), and considered the application of the confrontation clause to sentencing.<sup>6</sup> The following overview highlights a number of the most significant legal developments.

#### Supreme Court Review

In 1991, the Supreme Court issued its first opinions on guideline issues since <u>Mistretta</u>. In <u>Chapman v. United States</u>, 111 S. Ct. 1919

(1991), the Supreme Court held that the statutory construction of 21 U.S.C. § 841(b)(1)(B)(v) requires that the carrier weight be included in determining the length of sentences for trafficking in LSD, and that this construction neither violates due process nor is unconstitutionally vague. In a 7-2 opinion, the Court concluded that "Congress knew how to indicate that the weight of the pure drug was to be used to determine the sentence, and did not make that distinction with respect to LSD."

In Burns v. United States, 111 S. Ct. 2182 (1991), the Supreme Court, in a 5-4 decision, held that "before a district court can depart on a ground not identified as a ground for upward departure either in the presentence report or in a prehearing submission by the Government, Rule 32 requires that the district court give the parties reasonable notice that it is contemplating such a ruling." The Court left the timing of the notice to the lower courts, indicating that they are free to adopt appropriate local rules. Under Rule 32, both the defendant and the government enjoy equal procedural entitlements.

<sup>2</sup> United States v. Mistretta, 488 U.S. 361 (1989).

<sup>3</sup> See, e.g., U.S. v. Wood, 924 F.2d 399 (1st Cir. 1991); U.S. v. Joyner, 924 F.2d 454 (2d Cir. 1991).

<sup>4</sup> See, e.g., U.S. v. Anderson, 942 F.2d 606 (9th Cir. 1991) (en banc).

<sup>5</sup> See, e.g., U.S. v. Keene, 933 F.2d 711 (9th Cir. 1991); U.S. v. Dumas, 921 F.2d 650 (6th Cir. 1990).

<sup>6 &</sup>lt;u>U.S. v. Cammisano</u>, 917 F.2d 1057 (8th Cir. 1990).

The Supreme Court also granted certiorari in two cases involving the guidelines. <u>U.S. v. RLC</u>, 915 F.2d 320 (7th Cir. 1990), cert. granted, 111 S. Ct. 2850 (1991) (Whether the sentencing guidelines for adults limit the sentence for juveniles sentenced under the Federal Juvenile Delinquency Act); <u>U.S. v. Williams</u>, 910 F.2d 1574 (7th Cir. 1990), cert. granted, 111 S. Ct. 1305 (1991) (Whether a departure based on both proper and improper reasons can be upheld).

<sup>8 111</sup> S. Ct. at 1924.

In Braxton v. United States, 111 S. Ct. 1854 (1991), the Supreme Court declined to resolve a conflict among the circuits over the meaning of U.S.S.G. §1B1.2 because the Sentencing Commission already had undertaken an amendment proceeding to eliminate the conflict. The Court observed that the initial and primary task of eliminating conflicts among the circuit courts with respect to the interpretation of the guidelines lies with the Commission. According to the Supreme Court, "... in charging the Commission 'periodically [to] review and revise' the Guidelines, Congress necessarily contemplated that the Commission would periodically review the work of the courts, and would make whatever clarifying revisions to the Guidelines conflicting judicial decisions might suggest."9

## Illegally Seized Evidence, Acquitted Conduct, Standard of Proof

Several circuits in 1991 approved the use of illegally seized evidence in calculating the defendant's sentence under the guidelines. In addition, several circuit courts joined the ranks of circuits that allow the use of acquitted conduct in calculating a guideline sentence. In The Ninth Circuit has held, however, that acquitted conduct cannot be used as the basis for an upward departure.

By the end of 1990, all 12 circuits had held that a preponderance of the evidence is generally sufficient to support factual determinations under the guidelines. The Third Circuit, however, in <u>U.S. v. Kikumura</u>, 918 F.2d 1084 (3d Cir. 1990), held that "when the magnitude of a proposed departure dwarfs the guideline range applicable to the substantive offenses of conviction," the facts must be established by at least clear and convincing evidence.

#### Relevant Conduct

"Relevant Conduct" (U.S.S.G. §1B1.3) defines the scope of the "acts and omissions" of a defendant and his accomplices for which the defendant will be held accountable for sentencing purposes. The appellate courts have held that quantities of drugs possessed or distributed by co-conspirators in furtherance of jointly undertaken criminal activity that are known or reasonably foreseeable by the defendant may be included as relevant conduct, not just amounts in the offense of conviction or quantities charged in the indictment. 14 However, if a defendant joins a conspiracy near its end for only one transaction, he cannot be held accountable for the entire quantity of drugs distributed during the conspiracy without the court first making a finding that the defendant knew or should have

<sup>9 111</sup> S. Ct. at 1857-58.

<sup>10 &</sup>lt;u>See U.S. v. McCrory</u>, 930 F.2d 63 (D.C. Cir. 1991); <u>U.S. v. Torres</u>, 926 F.2d 321 (3d Cir. 1991); <u>U.S. v. Lynch</u>, 934 F.2d 1226 (11th Cir. 1991).

<sup>11 &</sup>lt;u>U.S. v. Allibhai</u>, 939 F.2d 244 (5th Cir. 1991); <u>U.S. v. Moreno</u>, 933 F.2d 362 (6th Cir. 1991); <u>U.S. v. Averi</u>, 922 F.2d 765 (11th Cir. 1991).

<sup>12</sup> See U.S. v. Brady, 928 F.2d 844 (9th Cir. 1991).

The Commission noted its agreement with the appropriateness of the preponderance of evidence standard in commentary effective November 1, 1991. <u>See</u> U.S.S.G. §6A1.3, App. C, Amend. No. 387.

See U.S. v. Paulino, 935 F.2d 739 (6th Cir. 1991); U.S. v. Wood, 924 F.2d 399 (1st Cir. 1991); U.S. v. Joyner,
 924 F.2d 454 (2d Cir. 1991); U.S. v. Richardson, 939 F.2d 135 (4th Cir. 1991). But cf. U.S. v. Davern, 937 F.2d

known of the quantities of drugs distributed before he joined the conspiracy. <sup>15</sup> The Seventh Circuit has held that a district court must make an individualized determination of the quantities of cocaine to be distributed that was reasonably foreseeable by the defendant. The court held that it is erroneous to assume that because the total amount of drugs identified in the conspiracy exceeded a certain quantity that each defendant should be held accountable for that amount. The district court must determine the scope of each defendant's agreement as the guidelines require. <sup>16</sup>

## Obstruction of Justice, Acceptance of Responsibility

The guidelines provide a two-level upward adjustment to the offense level if the defendant "willfully obstructed or impeded, or attempted to obstruct or impede the administration of justice during the investigation, prosecution, or sentencing of the instant offense." In 1991, the Fourth Circuit held that the rigidity of the guidelines' obstruction of justice adjustment for a disbelieved denial of guilt under oath places an intolerable burden upon the defendant's right

to testify. 18 Other circuits, however, have not found the adjustment to be so inflexible, holding that the obstruction of justice adjustment is not automatic when a defendant testifies and a jury finds him guilty. 19 According to the First Circuit, the sentencing court must make factual findings on this issue and is not required to apply the obstruction enhancement based solely on the fact that the jury's verdict is inconsistent with the defendant's trial testimony. 20

The guidelines grant district courts broad discretion to make a two-level downward adjustment "[i]f the defendant clearly demonstrates a recognition and affirmative acceptance of personal responsibility for his criminal conduct."<sup>21</sup> In 1991, the appellate courts upheld denials of the acceptance of responsibility adjustment in several cases in which the defendant continued a course of illegal conduct after arrest. 22 The denial of the adjustment for acceptance of responsibility also was upheld in a case in which the defendant was apprehended only after having "been chased down in the middle of a snowstorm with guns,"23 and in a case in which the defendant claimed she never had any criminal intent and blamed all her problems on other people.24

<sup>1041 (6</sup>th Cir. 1991), vacated by order of court September 26, 1991, ("uncharged conduct that amounts to a conceptually different offense from the offense of conviction — in the instant case attempt to purchase 500 grams of cocaine was not charged and defendant was convicted of 85 grams — was not adequately considered by the Sentencing Commission and may only be used in sentencing via departure)."

#### Adequacy of Criminal History

Guideline 4A1.3 permits a departure if the court finds that "reliable information indicates that the criminal history category does not adequately reflect the seriousness of the defendant's past criminal conduct or the likelihood the defendant will commit future crimes." Several circuit courts have upheld downward departures from the career offender guideline, finding that the career offender enhancement overstated the seriousness of the defendant's past conduct. 25 According to the Fourth Circuit, "At bottom, 'career offender' is a type of, not an alternative to, criminal history."26 The Third Circuit, however, found that the circumstances relied upon by the district court in making a downward departure from the career offender guideline had been adequately considered by the Sentencing Commission.<sup>27</sup> The Ninth Circuit reversed an upward departure to the career offender guideline range in a case in which the defendant had not been convicted of the two required offenses. The appellate court distinguished a departure based on U.S.S.G. §4A1.3, which allows guided departures when other information provides a reliable substitute for a conviction, and the career offender guideline, which requires certain convictions before enactment. The court viewed the career offender provisions as too blunt an instrument to serve as an analogy for a §4A1.3 upward departure. <sup>28</sup>

The Sixth Circuit found that an upward departure from Criminal History Category II to Criminal History Category VI was improper, stating that the degree of the departure was unjustified. According to the appellate court, the district court must "adequately link its departure to the structure of the guidelines" to ensure a reasonable degree of departure and to further the goal of uniformity. 29

#### Offender Characteristics

The guidelines provide that offender characteristics such as age, <sup>30</sup> education and vocational skills, <sup>31</sup> mental and emotional conditions, <sup>32</sup> physical condition, <sup>33</sup> previous employment record, <sup>34</sup> and family ties and responsibilities and community ties, <sup>35</sup> are not ordinarily relevant in determining whether to sentence outside of the guideline range. In 1991, several courts identified atypical circumstances and departed based

<sup>29 &</sup>lt;u>U.S. v. Lassiter</u>, 929 F.2d 267 (6th Cir. 1991).

<sup>30</sup> U.S.S.G. §5H1.1.

<sup>31</sup> U.S.S.G. §5H1.2.

<sup>32</sup> U.S.S.G. §5H1.3.

<sup>33</sup> U.S.S.G. §5H1.4.

<sup>34</sup> U.S.S.G. §5H1.5.

<sup>35</sup> U.S.S.G. §5H1.6.

on such offender characteristics. In one case, the circuit court affirmed a downward departure based on the defendant's "unique family responsibility" and other circumstances. The defendant was a single mother who provided the sole support for herself and her two-month-old child. She had been steadily employed for years and was providing financial support for her 16-year-old daughter, who herself was a single mother of a two-month-old child. 36 Similarly, the Sixth Circuit affirmed a downward departure in a case in which the defendant, the leader of an illegal gambling operation, was considered "an exemplary citizen," and the extent of his involvement in civic and community activities "transform[ed] this case from an ordinary to an atypical one."37 In other cases, the appellate courts have upheld downward departures based on a first offender's aberrant behavior, <sup>38</sup> a defendant's "youthful lack of guidance," <sup>39</sup> a defendant's physical handicap, 40 and a determination that a defendant's diminished capacity was a contributing factor to the commission of the offense.41

The appellate courts have reversed downward departures in cases in which the district court impermissibly considered the defendant's socioeconomic status, <sup>42</sup> the defendant's alcohol or drug abuse. <sup>43</sup> and the defendant's post-arrest rehabilitation efforts. <sup>44</sup> The D.C. Circuit, however, remanded for resentencing a case in which the district court refused to make a downward departure on the basis of the defendant's personal background. The circuit court found that the sentencing judge had defined "socio-economic status" too broadly and had incorrectly concluded that U.S.S.G. §5H1.10 left him no discretion to consider the defendant's special circumstances. According to the D.C. Circuit, "Violence among family members and its attendant dislocations do not follow class lines, nor should class lines determine whether a sentencing judge may consider them."45

<sup>36</sup> U.S. v. Pena, 930 F.2d 1486 (10th Cir. 1991).

<sup>37 &</sup>lt;u>U.S. v. Turner</u>, 915 F.2d 1574 (6th Cir. 1990). The Commission has amended the guidelines to indicate that military, civic, charitable, or public service, employment-related contributions, and similar prior good works are not ordinarily relevant in determining whether a departure is appropriate. <u>See</u> U.S.S.G. §5H1.11, App. C, Amend. No. 386.

<sup>38 &</sup>lt;u>U.S. v. Dickey</u>, 924 F.2d 836 (9th Cir. 1991); <u>U.S. v. Takai</u>, 941 F.2d 738 (9th Cir. 1991); <u>U.S. v. Pena</u>, 930 F.2d 1486 (10th Cir. 1991).

<sup>39 &</sup>lt;u>U.S. v. Floyd</u>, 945 F.2d 1096 (9th Cir. 1991).

<sup>40 &</sup>lt;u>U.S. v. Greenwood</u>, 928 F.2d 645 (4th Cir. 1991).

<sup>41 &</sup>lt;u>U.S. v. Lauzon</u>, 938 F.2d 326 (1st Cir. 1991).

<sup>42 &</sup>lt;u>U.S. v. Hatchett</u>, 923 F.2d 369 (5th Cir. 1991) (The district court erred in making an upward departure based on the defendant's socio-economic status, educational opportunities, and youthfulness).

<sup>43</sup> See e.g., U.S. v. Rushby, 936 F.2d 41 (1st Cir. 1991).

<sup>44</sup> See e.g., U.S. v. Sklar, 920 F.2d 107 (1st Cir. 1990); U.S. v. Pharr, 916 F.2d 129 (3d Cir. 1990).

<sup>45 &</sup>lt;u>U.S. v. Lopez</u>, 938 F.2d 1293, 1298 (D.C. Cir. 1991). The circuit court also concluded that it lacked authority to review the adequacy of the Commission's statement of reasons in support of its conclusion that age is not ordinarily relevant to sentencing outside the guideline range. The circuit court stated, "That by subjecting the promulgation of the guidelines to . . . one section of the APA, Congress affirmed that the Commission's rulemaking was not subject to

## Substantial Assistance, Aggravating and Mitigating Factors

The guidelines allow a district court to depart downward in cases in which the defendant "has provided substantial assistance [to the government] in the investigation or prosecution of another person who has committed an offense."46 However, the court may not depart under this provision unless the government makes the requisite motion. 47 The appellate courts have upheld the district court's determination not to review the government's refusal to make a motion pursuant to U.S.S.G. §5K1.1 in cases in which the defendant failed to make an allegation of bad faith, <sup>48</sup> as well as the district court's refusal to make a departure for substantial assistance based on the defendant's motion. 49 The Second Circuit, however, has upheld a downward departure based on the defendant's "activities facilitating the proper administration of justice in the district court." Although the government did not make a motion for substantial assistance, the district court found that the defendant's decision to plead guilty and cooperate caused his two co-defendants to also plead guilty. The court determined that the defendants' cooperation helped alleviate the "seriously overclogged dockets of the District Courts of the United States." The appellate court found assistance in

the administration of justice to be different from "substantial assistance to the authorities" and thus is a proper basis for a downward departure. 50 The Ninth Circuit held that once the government has filed a motion for a substantial assistance departure under U.S.S.G. §5K1.1, it is within the district court's authority to exercise its discretion in determining the appropriate sentence. The appellate court rejected the argument that a motion pursuant to U.S.S.G. §5K1.1 limits the extent of departure to a sentence below the guideline range and that the district court cannot depart below the statutory mandatory minimum absent a government motion under 18 U.S.C. § 3553(e). <sup>51</sup> The Sixth Circuit, on the other hand, held that "section 5K1.1 does not apply to a sentence under section 924(c) since section 5K1.1 applies only to departures from guideline sentences, not from statutory mandatory sentences."52

The guidelines and the underlying statute allow a district court to impose a sentence outside the applicable range if the court finds an "aggravating or mitigating circumstance of a kind, or to a degree, not adequately taken into consideration by the Sentencing Commission in formulating the guidelines that should result in a sentence different from that described." In 1991, appellate courts continued to affirm upward depar-

any other provision of the APA, including those for judicial review." Id. at 1297.

<sup>46</sup> U.S.S.G. §5K1.1.

<sup>47 &</sup>lt;u>See e.g., U.S. v. Harrison</u>, 918 F.2d 30 (5th Cir. 1990); <u>U.S. v. Deases</u>, 918 F.2d 118 (10th Cir. 1990); <u>U.S. v. Santos</u>, 932 F.2d 244 (3d Cir. 1991).

<sup>48</sup> See e.g., U.S. v. Khan, 920 F.2d 1100 (2d Cir. 1990).

<sup>49</sup> See e.g., U.S. v. Wade, 936 F.2d 169 (4th Cir.), cert. granted, 112 S. Ct. 635 (1991).

<sup>50 &</sup>lt;u>U.S. v. Garcia</u>, 926 F.2d 125 (2d Cir. 1991).

<sup>51 &</sup>lt;u>U.S. v. Keene</u>, 933 F.2d 711 (9th Cir. 1991).

<sup>52 &</sup>lt;u>U.S. v. Dumas</u>, 921 F.2d at 652.

<sup>53</sup> U.S.S.G. §5K2.0, 18 U.S.C. § 3553(b).

tures in cases in which district courts found that the guideline sentence did not reflect the seriousness of the offense conduct. Examples include a defendant who assaulted a large number of victims, <sup>54</sup> the potential for tragic consequences and reckless endangerment of human lives in an illegal smuggling case, <sup>55</sup> and a local sheriff who caused a significant disruption of a government function by eroding public confidence in law enforcement by his conviction for mail fraud. <sup>56</sup>

During the same period, appellate courts have reversed upward departures based on a high level of drug purity, <sup>57</sup> extreme psychological injury to a murder victim's family, <sup>58</sup> and numerous falsehoods in the defendant's testimony. <sup>59</sup> In addition, the Ninth Circuit has held that charges dismissed or not charged as part of a plea bargain may not be the basis for an upward departure. <sup>60</sup> According to the Ninth Circuit, "... to let the defendant plead to certain charges and then be penalized on charges that have, by agreement, been dismissed is not only unfair, it violates the spirit if not the letter of the agreement. <sup>61</sup>

Appellate courts have reversed downward departures that were intended to equalize a perceived disparity between a defendant and his co-defendants.<sup>62</sup> According to the Second Circuit, "... the Congressional objective was to eliminate unwarranted disparities nationwide. An applicable guideline range may seem harsh (or lenient) when compared to that of a co-defendant, but it is the same range applicable throughout the country for all offenders with the same combination of offense conduct and prior record."<sup>63</sup>

A categorization of the principal departure factors decided by the appellate courts during fiscal year 1991 is set forth below in Tables 4 to 7. Table 4 lists factors that appellate courts have determined warrant downward departure. Table 5, in contrast, lists factors that appellate courts have determined do not warrant downward departure. Tables 6 and 7 continue this pattern for upward departures.

#### Chapter Four

# Training & Technical Assistance

The Technical Assistance Service Office continued to provide guideline application assistance to federal judges and probation officers in 1991. In addition, the unit supported the Commission on guideline application issues through its daily contact with criminal justice personnel applying the guidelines.

The Technical Assistance Service (TAS) has three primary responsibilities, each of which provides a different service to judges and practitioners: the hotline service, coordination of all training efforts, and the ongoing case review project. TAS staff perform several additional tasks including reviewing and commenting on proposed amendments, participating in staff working groups, and organizing probation officer working groups in conjunction with various Commission projects.

#### A. Hotline

Information provided through the TAS hotline assists U.S. probation officers and judges and their law clerks in applying the sentencing guidelines. TAS staff readily answer questions that do not involve subjective judgments. Questions that involve a subjective determination by the judge, such as whether a defendant should receive an adjustment for acceptance of responsibility are answered by directing the caller's attention to pertinent guidelines, commentary,

or policy statements. Where debatable questions or interpretations of correct application arise, TAS staff assist the caller in understanding the alternative approaches while emphasizing that such decisions are left to the courts.

The hotline is operational from Monday through Friday between the hours of 8:30 a.m. and 5:30 p.m. (Eastern Standard Time).

#### Calls Received in 1991

The Technical Assistance Service responded to 2,230 questions in fiscal year 1991, an average of 186 questions per month. Since the hotline's inception on November 1, 1987, TAS has responded to more than 8,000 questions from probation officers and judges.

Table 8 shows the number of questions received in 1991 by guideline section. The greatest number of questions (281) related to the criminal history guidelines. Questions regarding probation and supervised release violations ranked second (251), followed by multiple counts (131), drug offenses (129), career offenders and criminal livelihood (110), and relevant conduct (109).

Table 9 shows the number of calls received by individual districts. The distribution provides a national breakdown of TAS use and in no way is indicative of any district's level guideline application proficiency.

#### Hotline Quality Control

In responding to hotline questions, TAS staff regularly consult with the legal and guideline drafting staffs in order to ensure that questions are fully researched and accurately answered. To assist with quality control, TAS staff maintain a log of each call received and the response provided.

In 1988, TAS began maintaining these logs through a computer program specifically developed to document the hotline calls. The program provides an easily accessible database that allows staff to check whether a similar question has been asked previously, thereby speeding research efforts and enabling more consistent and accurate responses. In response to requests from probation officers on temporary assignment at the Commission, a similar computer program has been developed for use in probation offices across the nation. Called "SC HELP" (Sentencing Commission Hotline Extended Library Program), the program was field tested in 1991 and is scheduled for distribution early in 1992. SC\_HELP will allow probation officers to develop their own database of questions and answers on a variety of topics (e.g., guideline application, procedural issues, local rules). The program also will include Volume V of the Commission's "Questions Most Frequently Asked About the Sentencing Guidelines."

#### Most Frequently Asked Questions

The Commission published Volume IV of the popular publication, "Questions Most Frequently Asked About the Sentencing Guide-

lines" in December 1990. The publication addresses substantive areas of concern in guideline application that have been identified through hotline calls and Commission training seminars.

#### Assistance in the Amendment Process

Calls to the hotline provide practical feedback to the Commission about implementation of the guidelines. For example, probation officers frequently raise issues regarding clarity of language and guideline application. TAS apprises the Commission of such issues, thus assisting in the drafting of more effective and understandable guidelines. TAS also participates in the amendment process through membership in staff working groups that focus on a particular issue or guideline (e.g., organizational sanctions, criminal history).

In March 1991, when the Commission was developing guidelines for organizational defendants, TAS organized a group of U.S. probation officers and staff from the Administrative Office of the U.S. Courts to test the draft guidelines by applying them to organizational defendants. The comments and recommendations of this group were shared with the Commission and many of their suggestions were incorporated into the Chapter Eight guidelines.

Later in 1991, TAS developed worksheets designed to assist probation officers and practitioners in applying the organizational guidelines. Field testing sessions to refine the worksheets were conducted with 13 U.S. probation officers in La Jolla, California, 11 U.S. probation officers in Chicago, Illinois, and 15 U.S. probation officers in Washington, D.C.

#### Probation Officers on Temporary Assignment

The Commission's temporary assignment program for probation officers, now in its fourth year, has proven successful in promoting guideline application training and providing a link between the Commission and field officers. The temporary duty consists of a six-week assignment during which officers help staff the hotline, become involved in the amendment process, and assist in various case review projects. The Commission bears the cost of the officer's travel, per diem, and living expenses during the temporary assignment.

In fiscal year 1991, 22 probation officers representing 17 districts participated in the program. The participants' home districts represent a diverse geographical constituency and provide the Commission with broad insight into sentencing

#### The following United States Probation Officers participated in the Commission's temporary assignment program in 1991:

#### **Officer**

Debra Speas Michael Curtis Tim Kozak John Burns

Mark Hengemuhle

Bea Jones Danny Sorey Charles Harris Walt Myers Mike Nissen Stephen Ward Gary Yazalina John Skozilas Tim McTighe Wendy White Leslie Cory

Newark, NJ (New Jersey)

Mobile, AL (Southern Alabama)

Lake Charles, LA (Western Louisiana)

Tulsa, OK (Northern Oklahoma) Seattle, WA (Western Washington) Grand Rapids, MI (Western Michigan)

Las Vegas, NV (Nevada)

San Jose, CA (Northern California)

Baltimore, MD (Maryland)

Seattle, WA (Western Washington)

Salt Lake City, UT (Utah)

Chattanooga, TN (Eastern Tennessee)

Baltimore, MD (Maryland)

Washington, D.C. (Washington D.C.)

Laredo, TX (Southern Texas)

Charleston, WV (Southern West Virginia)

Baltimore, MD (Maryland) Detroit, MI (Eastern Michigan) practices in various regions. Since the program's inception, 35 districts have been represented. Six additional districts are scheduled to send staff during the 1992 program, increasing the number of participating districts to 41.

Both probation officers and the Commission benefit from the temporary assignment program. During their tenure at the Commission, officers quickly become expert in guideline application and return to their districts as valuable resource persons. Several chief probation officers recently have made participation in the Commission's temporary assignment program a requirement for guideline specialists on their staffs. The Commission benefits from this program through interaction with officers who daily apply the guidelines. Through this contact, the Commission acquires a better understanding of the practical concerns confronting probation officers and establishes an important communications link with the field.

#### B. Training

Congress authorized the Commission to "devise and conduct periodic training programs of instruction in sentencing techniques for judicial and probation personnel and other persons connected with the sentencing process." 28 U.S.C. § 995(a)(17) and (18). The Commission recognizes that an evolving guideline system, along with the steady influx of new practitioners, creates an ongoing need for effective training programs and materials. In 1991, the Commission provided training to approximately 4,570 individuals at 98 training sessions across the country; participants included circuit and district court judges, probation officers, prosecuting attorneys, defense attorneys, investigative case agents, congressional staff members, law clerks, and staff of other government agencies. The Commission continued its collaborative training efforts with the Federal Judicial Center, Department of Justice, and Department of Treasury to develop and refine permanent, academy-based guideline education programs. In early 1992, the Commission plans to conduct two week-long national training seminars for probation officers that will focus on the significant guideline amendments of the last two years, the developing case law, ASSYST (see discussion below), organizational guidelines, policy statements for revocation of probation and supervised release, and other Commission projects.

#### Court Personnel

Commission trainers and attorneys from the General Counsel's Office continue to provide guideline application training to newly appointed judges at orientation programs sponsored by the Federal Judicial Center. Judges of the Ninth Circuit had an opportunity to discuss guideline sentencing issues with Commissioners and staff at a Sentencing Institute held in Dana Point, California, in September 1991.

The number of probation officers hired in 1991 increased dramatically compared to previous years. The Commission delivered three days of guideline training to approximately 610 new officers during eight orientation programs at the National Probation and Pretrial Services Academy in Baltimore, Maryland. As an additional component of their orientation program, new officers met with Commissioners and staff at Commission offices in Washington, D.C., for Leadership Day programs.

In conjunction with the Department of Justice's Advocacy Institute, the Commission in 1991 provided guideline training to more than 700 newly

appointed assistant U.S. attorneys who attended either the Basic Criminal Trial Advocacy Program in Washington, D.C., or the Federal Practice Skills Seminar held in various cities across the country.

#### Local Training

The Commission's training staff conducted 38 local training programs in 1991 with an approximate attendance of 1,900. The majority of these requests came from probation officers, but training requests also came from judges, defense attorneys, prosecutors, and appellate court staff attorneys. All chief probation officers, including those who had never requested Commission training, were encouraged to contact the Commission to discuss their training needs. Throughout 1991, Commissioners and staff lectured widely on sentencing issues at training sessions, academic seminars, judges' meetings, and professional conferences. L. Russell Burress, U.S. probation officer from South Carolina on assignment to the Commission, continued in his role as the Commission's primary trainer in guideline application.

#### Investigative Agents

In 1991, the Commission responded to requests from the Department of Treasury for guideline training for Alcohol, Tobacco, and Firearms senior investigative agents at the Federal Law Enforcement Training Center in Glynco, Georgia. Additional training for case agents was provided

through a collaborative program with the Financial Fraud Institute at the Federal Law Enforcement Training Center. Drug Enforcement Administration agents also received guideline training from the Commission during 1991.

#### C. Case Review

#### Introduction

The Case Review Project responds to one of the Commission's statutorily authorized monitoring functions by providing an in-depth analysis of guideline application for a randomly selected set of case files. The analysis consists of a thorough review of all documents submitted to the Commission's Monitoring Unit, including the presentence report and addendum, worksheets, plea agreement, statement of reasons, and the judgmentof conviction order.

The Case Review Project is a valuable resource for the Commission, providing input to the Commission's evaluation study, amendment process, and development of training materials. The following provides a brief overview of the project's methodology and preliminary findings.

#### Project Methodology

TAS staff and U.S. probation officers on temporary assignment to the Commission reviewed a randomly selected sample of 996 cases, which represent approximately four percent of all cases sentenced under the guidelines between August 1, 1989, and July 31, 1990. Table 10 provides

Congress authorized the Commission to "monitor the performance of probation officers with regard to sentencing recommendations, including application of the Sentencing Commission guidelines and policy statements;" and to "issue instructions to probation officers concerning application of Commission guidelines and policy statements" (28 U.S.C. § 995(a)(9), (10)).

the distribution of cases reviewed by district, while Table 11 provides descriptive information on mode of conviction and availability of documents for review. Figures B and C illustrate the primary offense category and class of offense for the sample reviewed.

As with all monitoring functions, the review only can be as complete as the information available. For many case files, information important to the resolution of particular issues is missing and the court may base its findings on information presented at the sentencing hearing that does not appear in the case file. For example, the criminal history section of a presentence report may assign a single point for a sentence of 60 days imprisonment. Because §4A1.1(b) would assign two criminal history points to a sentence of 60 days imprisonment, TAS would note this as a discrepancy. However, TAS has no way of knowing whether at sentencing the probation officer informed the court that this sentence was "suspended," in which case the defendant would correctly receive one criminal history point under  $\S4A1.2(a)(3)$ .

Case review, therefore, cannot make definitive assessments regarding whether guideline application is "correct" in individual cases. Rather, it illustrates general trends and highlights possible problem areas across the sample.

TAS staff reviewed all documents in each case file within six months of sentencing and assessed the appropriate guideline range based on the information available. Each section of the guidelines was reviewed (e.g., the base offense level, specific offense characteristics, Chapter Three adjustments, criminal history). This assessment was compared with the calculation in the presentence report.

If a discrepancy was identified, it was coded as a potential problem in guideline application. Possible reasons for the inconsistency were also recorded (e.g., misinterpretation of guideline language, stipulations in the plea agreement). Specific guideline sections were recorded as having "no problems" if, based upon review of the available information, the guidelines appear to have been applied appropriately.

#### Analysis and Observations

Quantitative data compiled in the case review process indicates that probation officers have demonstrated a high level of proficiency in guideline application. Accuracy rates based on a review of the available documentation in 15 important areas of guideline application reveal that probation officers demonstrated an accuracy rate above 95 percent in most areas that directly impact the sentencing range (see Table 12). For example, in determining victim-related adjustments, probation officers appeared to be accurate in 100 percent of the cases reviewed. In choosing the correct guideline, they appeared accurate in 99.1 percent of the cases reviewed.

Guideline calculations that appeared to be most problematic are criminal history (93.3% accuracy), supervised release terms (89.2% accuracy), and the fine range (84.3% accuracy).

The case review project's findings have influenced the guideline amendment process. For example, the commentary to the criminal history guidelines was amended in 1990 and 1991 to clarify application. In 1991, the Commission amended §5E1.2 (Fines for Individual Defendants) to eliminate the determination of gain and loss as it relates to the fine range. Consequently, the fine range will be determined by consulting the fine table, subject to statutory maximum

limits. Problems in determining the correct term of supervised release were due in part to officers using outdated guideline worksheets. The worksheets have since been revised and distributed to probation officers across the country.

## D. ASSYST

The Staff Director's Office coordinated improvements and modifications to the ASSYST software used by probation officers as an aid to guideline application. These improvements included the incorporation of recent guideline amendments, the addition of applicable case law by individual guideline section, ex post facto considerations, and a presentence report "shell." In addition, function keys were updated to include 1991 guideline text and commentary. The updated software was made available to U.S. probation offices, the Executive Office of U.S. Attorneys, federal public defenders, and the National Association of Criminal Defense Lawyers during the fall.

In order to determine if there was sufficient interest in the field to warrant continued efforts to update and improve the ASSYST software, the Commission, in 1991, surveyed chief probation officers about their officers' experiences with ASSYST. Eighty-two percent of the chiefs responding indicated that the Commission should continue to update and provide ASSYST to practitioners. In addition, the Commission recently conducted an initial feasibility study to determine whether using ASSYST as an electronic data collection and transmission tool would be compatible with the Office of Monitoring's datasets. The Commission hopes to use ASSYST as an electronic data collection tool in the future.

## A. MONITORING

# Background and Data Collection Activities

### Statutory Requirements

The Monitoring Unit collects, prepares, and analyzes data on guideline sentences to support the Commission's varied activities. As authorized by Congress, the Commission has numerous research responsibilities, including:

- the establishment of a research and development program within the Commission to serve as a clearinghouse and information center for the collection, preparation, and dissemination of information on federal sentencing practices (28 U.S.C. § 995(a)(12));
- the publication of data concerning the sentencing process (28 U.S.C. § 995(a)(14));
- the systematic collection and dissemination of information concerning sentences actually imposed and the relationship of such sentences to the factors set forth in section 3553(a) of title 18, United States Code (28 U.S.C. § 995(a)(15)); and
- the systematic collection and dissemination of information regarding the effectiveness of sentences imposed (28 U.S.C. § 995 (a)(16)).

In large part, the Commission's systematic collection and reporting of information on guideline cases drives the agency's research mission. As required by Congress:

The appropriate judge or officer shall submit to the Commission in connection with each sentence imposed (other than a sentence imposed for a petty offense, as defined in title 18, for which there is no applicable sentencing guideline) a written report of the sentence, the offense for which it is imposed, the age, race, and sex of the offender, information regarding factors made relevant by the guidelines, and such other information as the Commission finds appropriate. The Commission shall submit to Congress at least annually an analysis of these reports and any recommendations for legislation that the Commission concludes is warranted by that analysis (28 U.S.C. § 994(w)).

Pursuant to its authority under 28 U.S.C. §§ 994(w) and 995(a)(8), and after discussions with the Judicial Conference Committee on Criminal Law and the Administrative Office of the U.S. Courts (AO), the Commission requested that probation offices in each judicial district submit the following documents on every case sentenced under the guidelines:

- Presentence Report (PSR)
- Guideline Worksheets
- Report on the Sentencing Hearing (statement of reasons for imposing sentence as required by 18 U.S.C. § 3553(c))

- Written Plea Agreement (if applicable)
- Judgment of Conviction

#### USSC Data Collection

Throughout fiscal year 1991 (October 1, 1990, through September 30, 1991, hereinafter "1991"), the Monitoring Unit progressed substantially in its development of a comprehensive computerized data file on defendants sentenced under the guidelines. Data collection is proceeding on the three major data collection modules that have been fully implemented. A fourth data collection module monitoring court decisions regarding probation and supervised release violations has been developed and implemented.

Module I, Receipt Control, is a document control system that provides a mechanism for identifying cases. Data collection activities in this module were enhanced to capture information no longer available from the AO's Federal Probation Sentencing and Supervision Information System (FPSSIS). Module II, Basic Sentencing Information, collects sentencing information on each case as documented in the Judgment of Conviction order, as well as statutory and guideline provisions from the Presentence Report and Report on the Sentencing Hearing. Module III, Guideline Application and Departures, captures the complete range of guideline decisions made by the court and departure information on each case. The Probation and Supervised Release Violation Module monitors court decisions and implementation of the Commission's violation policy statements.

The Commission will implement several additional modules for research purposes to capture additional information on real offense behavior, plea agreements, factual disputes, criminal history, and offender characteristics. Data collection for these modules will involve a sampling of cases rather than the entire population.

The Monitoring Unit data file for 1991 provides the Commission and the public with frequencies and descriptive statistics on all guideline cases sentenced within the year. This file, with individual identifiers deleted, is available through the Inter-University Consortium for Political and Social Research at the University of Michigan. The Commission will forward additional data files to the Consortium on a regular basis.

In 1991, Monitoring participated in several Commission-wide research activities, including the Evaluation and Mandatory Minimum projects. The Unit provided research and data analysis for requests from Congress, judges, and probation offices, as well as its standard support of Commission working group and amendment activities.

#### Data Collection Issues

The Commission received documentation on 33,419 cases sentenced under the Sentencing Reform Act between October 1, 1990, and September 30, 1991.<sup>65</sup> As used in this report, a "case" is defined as a single sentencing event (even if it includes multiple indictments or multiple convictions consolidated for sentencing).

Reported figures exclude cases involving solely petty offenses, organizational defendants, or diversionary sentences.

The USSC Monitoring data file used for this report, MONFY91, includes cases sentenced during fiscal year 1991

With the elimination of sentencing factors from the AO's FPSSIS data entry system, the Monitoring Unit has no direct way to ascertain, as in previous years, the ratio of guideline to preguideline cases or the rate in which guideline cases are reported to the Commission. However, information available from the AO's Criminal Masterfile can provide a close approximation of the ratio of guideline to pre-guideline cases in the system, a ratio that has been steadily increasing since 1987. By June 1991, approximately 74 percent of the cases reported to the AO were sentenced under the guidelines (see Figure D). <sup>66</sup>

Despite possible reporting problems experienced by the Monitoring data system, differences in general characteristics or descriptive statistics about the national population of defendants sentenced pursuant to the guidelines are expected to be minor. However, reporting problems specific to individual districts or offices may result in more substantial difficulties if generalizations are made to the actual district populations. It is important to note that all data collected and analyzed by the Commission reflect only reported populations (i.e., cases in which appropriate documentation was forwarded to the Commission).

While the degree of potential non-reporting is estimated to be small, further study would be required to uncover any biases associated with non-reporting. For example, one known reporting bias arising from fewer reported magistrate cases is the potential for slightly higher rates of imprisonment, longer average prison terms, and fewer cases among less serious crimes. Other unknown reporting biases could enhance or counteract these biases.

As noted previously, the Commission should receive up to five documents on each case sentenced pursuant to the guidelines. See Table 13 for the document submission rate by circuit and district. In 1991, the Commission received Presentence Reports (PSR) for 96.9 percent of the cases (in an additional 2.4% of the cases the PSR was known to have been waived) and Judgment of Conviction Orders for 99.5 percent of the cases. Guideline Worksheets were received for 91.1 percent of the cases, and Written Plea Agreements or other comparable documents for 58.5 percent of the cases.

The submission rate for the Report on the Sentencing Hearing (statement of reasons) has increased significantly during the past four years, rising to 92.4 percent for cases sentenced in FY1991 compared to 79.1 percent in FY1990,

that were received by the Commission as of January 17, 1992.

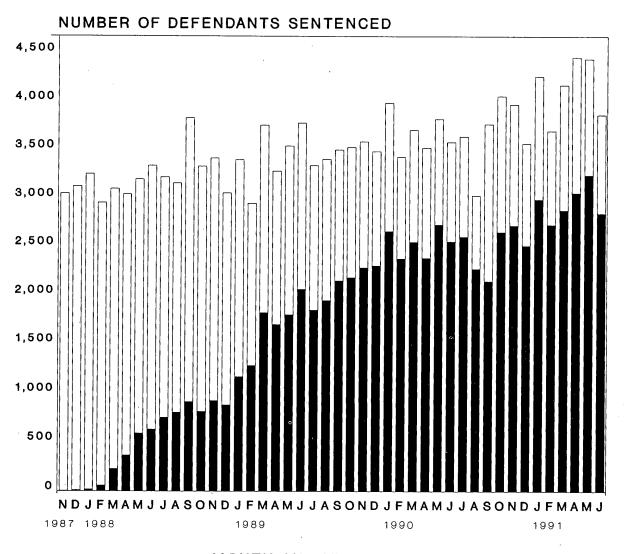

In previous years, guideline and pre-guideline comparisons were available from the Administrative Office of the U.S. Court's FPSSIS data system. (See FY90 Annual Report.) Due to the termination of sentencing elements from this data collection system, approximations for more recent months have been developed using the Administrative Office of the U.S. Court's Criminal Masterfile in comparison to the Sentencing Commission's Monitoring system. Because the Criminal Masterfile does not provide guideline and pre-guideline indicators and the data reported in Figure D come from different data sources, the guideline/pre-guideline numbers are estimates only. Thus, no monthly figures are included in Appendix C.

Table 13 does not report the submission rate of written plea agreements by circuit and district. Because the Commission cannot always determine the applicability of a written plea agreement in a particular case, it is difficult to establish a base line of what should be received.

65.0 percent in 1989, and 40.0 percent in 1988. The incorporation of the Report on the Sentencing Hearing within the Judgment of Conviction Order (AO 245 S, Rev. 7/90) has enhanced both the submission and uniformity of this information.

Figure D

GUIDELINE VS. PRE-GUIDELINE DEFENDANTS SENTENCED
(November 1987 through June 1991)

### MONTH AND YEAR SENTENCED

GUIDELINE PRE-GUIDELINE

SOURCE: Information through August 1990 from the Administrative Office of the U.S. Courts' FPSSIS Data System. Due to the termination of FPSSIS Data collection, information obtained after August of 1990 is derived from the AO's Criminal Masterfile and USSC Data.

# Descriptive Statistics

### Implementation of the Guidelines

By statute, the Commission receives information only on defendants sentenced pursuant to the Sentencing Reform Act of 1984 (SRA). Information about defendants sentenced under pre-guideline law is reported through the AO's data systems.

As stated earlier, the Commission received 33,419 cases sentenced under the SRA in 1991. Six districts (with more than one thousand cases each) were responsible for 25.1 percent of the cases received: Southern Texas, Western Texas, Southern California, Central California, Southern Florida, and Eastern New York. The Fifth and Ninth Circuits accounted for 34.2 percent of all guideline cases. Table 14 depicts the distribution of guideline cases across the 94 judicial districts and 12 judicial circuits.

A "case" or "defendant" as discussed in this report is defined in the USSC data collection system as a single sentencing event for a single defendant. Multiple defendants in a single sentencing event are treated as separate cases. If an individual defendant is sentenced more than once during the time period of interest, each sentencing event is identified as a separate case.

Descriptions of variables used in this table are provided in Appendix A.

# Primary Offense and Demographic Characteristics of Guideline Offenders

## Primary Offense Type

Forty-five percent of all defendants sentenced under the SRA in 1991 were convicted of drug offenses. Other frequent offenses of conviction included fraud (10.5% of all cases), firearms (7.5%), larceny (7.4%), and immigration (7.0%). Offenses that typically take extended time to detect, investigate, and prosecute (e.g., tax offenses and money laundering) are likely to be underrepresented in the guideline distribution. Figure E and Table 15 display the distribution and frequency of guideline cases across the primary offense categories.

#### Race

Of all defendants sentenced under the guidelines during 1991, 44.1 percent were identified as White, 27.3 percent as Black, 24.4 percent as Hispanic, and 4.2 percent as "Other" (American Indian, Alaskan Native, Asian or Pacific Islander). Table 16 displays the distribution of these racial and ethnic groups within primary offense categories. In offense categories such as arson, auto theft, tax violations, and gambling, whites constituted more than 70 percent of the offender population. Black defendants were proportionately overrepresented in robbery, larceny, and firearms violations, while Hispanics were overrepresented in the categories of immigration, drug trafficking, and simple drug possession.

#### Gender

Males comprised 83.3 percent of all defendants sentenced under the guidelines, while females comprised the remaining 16.7 percent. Examining gender within the primary offense categories shows less dramatic differences between male and female rates within embezzlement (in which 60.9% of those sentenced were female), larceny (31.1% female), and use of a communication facility in a drug offense (28.6% female). Table 17 displays the distribution of cases by gender within each primary offense category.

### Age

The average age for all defendants sentenced under the guidelines in 1991 (as measured by the mean and median) was 34 and 32 years. respectively. Defendants sentenced within the following offense categories were most likely to be 25 years of age or younger: murder (51.9% of all cases), manslaughter (37.3%), kidnapping (36.2%), burglary or breaking and entering (52.0%), simple drug possession (32.4%), and immigration violations (32.2%). In contrast, the majority of defendants sentenced for gambling and lottery offenses, tax offenses, bribery, pornography or prostitution, and antitrust offenses were 41 years and older. Table 18 displays the distribution cases by defendant's age for each primary offense category.

# Citizenship

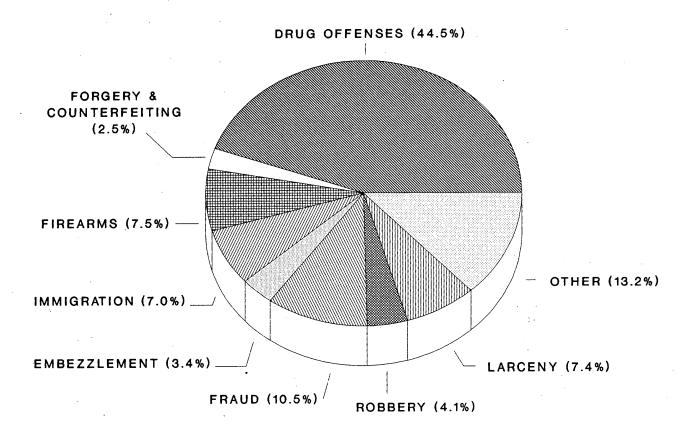

Seventy-seven percent of offenders sentenced under the guidelines in 1991 were citizens of the United States while nearly one-fourth (23%) were not. 69 As reported in Table 19, this percentage varied considerably by primary offense type, with the highest rate of non-citizens sen-

tenced for immigration (88.2%), national defense (55.9%), and money laundering violations (35.2%). Table 20 provides a listing of the countries of origin of non-citizens sentenced under the guidelines in 1991.

Note that this figure includes both legal and illegal aliens.

Figure E

## DISTRIBUTION OF GUIDELINE DEFENDANTS SENTENCED BY PRIMARY OFFENSE CATEGORY\* (October 1, 1990 through September 30, 1991)

Of the 33,419 guideline cases, 324 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 89 cases were excluded due to missing information on primary offense category. Descriptions of variables used in this figure are provided in Appendix A.

Of the 33,419 guideline cases, 324 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 526 cases were excluded due to one or both of the following conditions: missing primary offense category (89) or missing date of birth (466). Descriptions of variables used in this table are provided in Appendix A.

Guyana	50	0.7
Other	931	13.2

Only countries with 50 or more cases are listed here. Descriptions of variables used in this table are provided in Appendix A.

# Mode of Conviction

Monitoring data show that 85.4 percent of all defendants sentenced under the guidelines in 1991 pleaded guilty, while 14.6 percent of all guideline defendants were convicted at trial. With the termination of the sentencing component of FPSSIS in August 1990, FPSSIS information on mode of conviction — the data used by the Commission to compile these statistics in previous years — is no longer available. As noted in the 1990 Annual Report, the AO has reported problems concerning plea/trial information it had been receiving prior to the termination of FPSSIS, anticipating at the time that such problems masked a lower plea rate for both guideline and pre-guideline cases. A preliminary analysis comparing FPSSIS data to documents received by the USSC in 1990 suggested that the plea rate as reported to the AO may be up to two percent lower than FPSSIS data suggested. The Commission is confident that the shift to a data collection system that uses source documents (e.g., the Judgment of Conviction Order) provides a much more accurate picture of national and district plea/trial rates than in past years. Table 21 shows the rates of conviction by plea and trial for guideline defendants by circuit and district.

Considerable variation exists in the rate of guilty pleas versus trials from district to district. The District of Columbia, Eastern Oklahoma, and Southern Alabama reported the lowest plea rates (61.8%, 62.5%, and 67.0% respectively), while Colorado, New Jersey and Southern Illinois reported the highest (96.2%, 95.6%, and 94.2% respectively).

An analysis of the mode of conviction by primary offense category (see Table 22) indicates that in

certain offense categories such as murder, kidnapping, or national defense, defendants are more likely to go to trial than in other offense categories such as immigration, fraud, or embezzlement.

Of the 33,419 guideline cases, 324 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 231 cases were excluded due to one or both of the following conditions: missing primary offense category (89) or missing information on mode of conviction (177).

# Sentencing Information on Guideline Cases

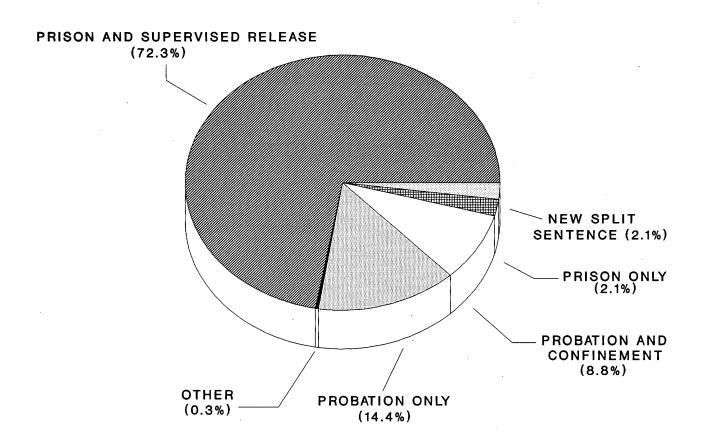

## Type of Sentence

 ${f T}$ he majority of guideline defendants (72.3%) received a sentence of imprisonment followed by a term of supervised release. Another 2.1 percent received imprisonment with no post-release supervision. Approximately 2.1 percent received the split sentence option under the guidelines (a term of imprisonment followed by supervised release with a condition of community confinement or home detention). Probation with a condition of community confinement, intermittent confinément, or home detention was imposed in 8.8 percent of the cases and 14.4 percent of guideline defendants received sentences of "straight" probation (i.e., no confinement conditions). No supervision (i.e., probation, community confinement, or imprisonment) was ordered in less than 1 percent of all cases. Figure F displays the distribution of guideline cases by type of sentence.

Predictably, the type of sentence most frequently imposed by the court varied by offense type. Defendants convicted of murder, kidnapping, sexual abuse or robbery, drug trafficking, and prison offenses were imprisoned at the highest rates (all more than 90%). Defendants convicted of larceny, embezzlement, tax offenses, gambling and lottery, and environmental or food and drug regulatory violations were least likely to receive sentences of imprisonment — the majority of defendants in these categories received probation or probation with some form of confinement. Table 23 shows the distribution of type of sentence imposed within primary offense categories.

Figure F

TYPE OF GUIDELINE SENTENCE IMPOSED \*
(October 1, 1990 through September 30, 1991)

Of the 33,419 guideline cases, 324 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 290 cases were excluded due to missing sentencing information. The number of cases represented in each category is reflected in Appendix C, Table C-2. Descriptions of variables used in this figure are provided in Appendix A.

Of the 33,419 guideline cases, 324 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 348 cases were excluded due to one or both of the following conditions: missing primary offense category (89) or missing sentencing information (290). Descriptions of variables used in this table are provided in Appendix A.

#### Average Length of Imprisonment

While the average (mean) term of imprisonment for all defendants sentenced to prison in 1991 was 62.2 months with a median of 33 months, defendants sentenced for murder, kidnapping, robbery, and drug trafficking received the longest average terms under the guidelines (all 87 months or longer). In comparison, the shortest average prison sentences were imposed for embezzlement, immigration, gambling and lottery, simple possession of drugs, environmental, and antitrust offenses (all less than 13 months). The first column of Table 24 provides the average sentence for defendants sentenced to imprisonment for each primary offense category.

Table 24 also reports average prison sentences for offenders by criminal history categories. Due to the fact that all defendants qualifying for a career offender enhancement are included in Category VI, cases in that category are presented in two groups. The average and median prison terms for non-career offenders in Category VI were 63.5 and 30 months, respectively, significantly lower than the 202.7 and 189 months for career offenders.

#### Fines and Restitution

A fine, restitution, or both were ordered in 34.3 percent of all cases sentenced under the guidelines. Neither sanction was ordered in the remaining 65.7 percent of the cases, primarily due to findings by the court of an inability to pay or burden on the defendant's family. The frequency with which fines and/or restitution were ordered

as part of guideline sentences is reported in Table 25.

The imposition of fines and restitution orders varied greatly by offense category. Financial sanctions of some type were most common in convictions for larceny, embezzlement, fraud, bribery, antitrust, environmental, and food and drug regulatory offenses (approximately 60-70% of such cases). Fines were imposed in more than 50 percent of the gambling and lottery, antitrust, environmental, and food and drug violation cases; restitution orders were most common for burglary, robbery, embezzlement, and fraud.

Drug trafficking, immigration, and prison offenses result in financial sanctions least frequently. This finding is not surprising given the high incarceration rates for these offenses and the alien status and possible deportation of defendants in immigration cases.

Table 25 also provides the mean, median, and total payments ordered. In general, the median fine is a better indicator of the "average fine" imposed because it is not affected by unusually high or low fines that may skew the mean. The median represents the amount at which 50 percent of the fines are higher and 50 percent are lower. The greatest median payments were ordered for antitrust cases (\$25,000), arson (\$15,000), racketeering (\$10,000), and fraud (\$6,361). The total of all payments ordered was close to \$365 million, with 62 percent of this amount ordered in fraud and drug trafficking cases.

The career offender enhancement is applied to defendants sentenced for a violent crime or serious drug offense who have two prior convictions for violent crimes or serious drug offenses. The guidelines provide a sentence at or near the statutory maximum penalty allowed for such offenders.

Of the 33,419 guideline cases, 7,776 cases with zero months prison ordered and 324 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 1,051 cases were excluded due to one or more of the following conditions: missing primary offense category (89), missing criminal history category (487), or missing or indeterminable sentencing information (643). Descriptions of variables used in this table are provided in Appendix A.

<sup>&</sup>quot;Information on career offender provided in this table is based on the recommendation of the probation officer in the PSR if information from the sentencing court was missing or unavailable. As a result, the number of career offenders represented here will be higher than the number reported on Tables 34 and 35.

Of the 33,419 guideline cases, 324 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 228 cases were excluded due to one or both of the following conditions: missing primary offense category (89) or missing information on type of economic sanction for cases in which orders were made (170). The total number of cases (10,803) used to calculate amounts of payment ordered is less than the total number of cases receiving fines and/or restitution (11,289). The difference is due to the exclusion of cases for which a fine and/or restitution was ordered but the amount was not specified. Descriptions of variables used in this table are provided in Appendix A.

#### Sentencing Alternatives

The guidelines provide for a variety of alternatives to imprisonment for less serious offenses at lower offense levels (see §5C1.1). If the minimum of the applicable guideline range is zero months, a sentence of imprisonment is not required ("straight" probation is available). If the minimum of the guideline range is one to six months, probation with a condition of community confinement, intermittent confinement, or home detention is available. Finally, if the minimum of the range is eight to ten months, a "split" sentence may be imposed, requiring a sentence of imprisonment for at least one half of the minimum followed by a term of supervised release with a condition of community confinement or home detention to satisfy the remainder of the term.

Table 26 presents the distribution of sentencing alternatives imposed in cases falling within guideline ranges from the Guidelines Manual's sentencing table where alternatives are generally available. In 76.0 percent of the cases with a guideline range of zero to six months, the sentence imposed was probation only or probation with community confinement, intermittent confinement, or home detention. When the minimum of the guideline range was one to six months, probation plus confinement was ordered in 43.8 percent of the cases, while the new split sentence was ordered in 2.9 percent. For cases in which the minimum of the guideline range was eight to ten months, the new split sentence was ordered 16.7 percent of the time. Finally, 96.4 percent of the cases in which the minimum of the guideline range was 12 months or greater (for which non-imprisonment alternatives are not available under the guidelines) received a term of imprisonment.

Figure G represents the frequency with which defendants eligible for alternatives in various offense categories received incarcerative sentences. Of those eligible for alternative sentences, embezzlers were the least likely (11%) to be incarcerated and immigration violators the most likely (66%). It should not be surprising that a large proportion of immigration violators tend to be non-U.S. citizens. Consequently, they may be treated somewhat differently than offenders convicted of different offense types at similar offense levels. That is, these offenders are more likely to receive short prison terms followed by deportation.

Table 27 provides more detailed information on the sentence imposed for cases eligible for straight probation by primary offense of conviction. Probation was imposed at the highest rate (89.1%) in embezzlement cases and at the lowest rate (46.7%) in bribery cases. For offense categories with reasonable sample sizes, defendants eligible for "straight" probation who were convicted of immigration offenses (37%) and drug possession (35.7%) were most likely to receive imprisonment sentences. Table 28 presents the type of sentence imposed for the same probationeligible group of defendants by select demographic variables. Of defendants eligible for straight probation, older, white, and female defendants received probation more frequently, while those 22 to 25 years of age, Hispanic and male were incarcerated more frequently. Corresponding to this finding is the fact that whites and females are overrepresented in offense types (e.g., embezzlement and tax violations) that are more likely to result in probation. Hispanics and males are overrepresented in offense types (e.g., immigration, drug trafficking, and simple possession) that lead to a prison sentence even when probation is an alternative.

Table 29 provides the sanctions imposed on defendants eligible for probation with conditions of confinement (guideline minimum ranges between one and six months) by primary offense categories. While more than 39 percent of this entire group was sentenced to prison, this proportion was considerably higher for cases involving sexual abuse, arson, simple drug possession, immigration offenses, and prison violations. The proportions were much lower for embezzlement, money laundering, and gambling and lottery offenses. Finally, Table 30 provides the demographic breakdown for defendants eligible for probation with conditions of confinement. Although age appears to have little relationship to whether these defendants received sentences of straight probation, whites and females were more likely to receive straight probation than males and defendants of color. Younger, Hispanic, and male defendants in this category were more likely to be incarcerated. Some of the explanation, as before, may be tied to the different offense patterns of these groups and the concomitant variation in the probability of confinement.

Table 26

TOTAL	28,396	21,240	74.8	620	2.2	2,577	9.1	3,879	13.7	80	0.3		

Of the 33,419 guideline cases, the Commission received Reports on the Sentencing Hearing for 30,876 (92.4%). Of the 30,876 cases with such reports, 296 mixed law cases (both guideline and pre-guideline counts) were excluded. In addition, 2,184 cases were excluded due to one or more of the following conditions: missing guideline range (2,003), missing sentencing information (213), or cases with no analogous guideline (369). The guideline ranges indicated above correspond to the offense levels and criminal history categories established by the court and do not indicate the impact of mandatory minimums or statutory maximums constricting the sentence. Descriptions of variables used in this table are provided in Appendix A.

Figure G
INCARCERATION RATE OF DEFENDANTS ELIGIBLE FOR A
NON-PRISON SENTENCE BY PRIMARY OFFENSE TYPE
(October 1, 1990 through September 30, 1991)

Of the 33,419 guideline cases, the Commission received Reports on the Sentencing Hearing for 30,876 (92.4%). Of the 30,876 cases with such reports, 296 mixed law cases (both guideline and pre-guideline counts) and 22,011 cases ineligible for a non-prison sentence were excluded. Additionally, 101 cases missing information on sentence type or offense type were excluded. Non-prison sentences include probation with conditions of confinement as defined in \$5C1.1 of the USSC Guidelines Manual.

Of the 4,700 guideline cases eligible for a sentence of probation with conditions of confinement, 42 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 57 cases were excluded due to one or more of the following conditions: missing age (27), missing gender (33), or missing sentencing information (24). The numbers given may not add up to the totals due to the exclusion of missing information. Descriptions of variables used in this table are provided in Appendix A.

### Guideline Application

#### Overview

In 1991, the Monitoring Unit expanded its data analysis capabilities with the full implementation of the Guidelines Application Module. Data coded in this module reflect specific guideline application factors determined by the court, such as base offense level, specific offense characteristics, victim, role, and acceptance of responsibility adjustments, criminal history points and category, and guideline range.

The Report on the Sentencing Hearing plays a crucial role in determining a court's guideline application decisions (see discussion under Data Collection Issues). In 1991, the Commission received complete reports in 92.4 percent of all cases submitted. Of the reports submitted, adequate information to determine the relevant guideline factors was unavailable in another 13.1 percent of the cases. As a result, fewer cases are reflected in the tables in this section of the report than in previous sections.

Sentencing under the guidelines is a multi-step process that correlates an assessment of the individual's offense conduct and criminal history to produce a guideline sentencing range (expressed in months). In most cases, the court chooses a point within the appropriate guideline range and imposes sentence. However, if the court identifies a factor that the Sentencing Commission failed to consider that should result in a different sentence, the court may depart from the

guideline range and impose a different sentence. In such cases, the court is required to state its reasons for departing on the record and these reasons are subject to review by the courts of appeals.

#### Chapter Two Guideline Application

The first step in determining a defendant's sentencing range is identifying the Chapter Two guideline applicable to the count(s) of conviction. Table 31 provides the distribution of Chapter Two guidelines applied in single and multiple count cases. The Chapter Two guideline most often used in both single and multiple count cases is the primary drug guideline, §2D1.1 (Unlawful Manufacturing, Importing, Exporting, or Trafficking, including Possession with Intent to Commit These Offenses). This guideline was applied in 39.1 percent of all single count cases and 50.6 percent of all multiple count cases. Other Chapter Two guidelines applied frequently in both single and multiple count cases are §2B1.1 (Larceny, Embezzlement, and Other Forms of Theft), 11.3 percent and 5.3 percent, respectively; §2F1.1 (Fraud and Deceit), 11.8 and 16.0 percent, respectively; §2B3.1 (Robbery, Extortion, and Blackmail), 3.4 and 19.2 percent, respectively; and §2K2.1 (Unlawful Receipt, Possession, or Transportation of Firearms or Ammunition), 5.5 and 7.4 percent, respectively.

After determining the relevant guideline and base offense level, the court decides whether certain attributes common to that type of offense

Federal law contains more than 2,000 separate criminal offenses. Rather than construct a complex system of guidelines for each federal criminal violation, the Commission created a set of generic guidelines that group offenses by crime type. The guidelines rank these offense types according to severity by assigning them "base offense levels" from 4 to 43, to express the proportionate relationship among offenses.

are present in the case. These "specific offense characteristics" are enumerated in the applicable Chapter Two guidelines and help establish the seriousness of a particular offense. Offense characteristics such as the quantity of drugs imported, the use of a firearm, and the amount of property loss require an adjustment in the base offense level.

It is not possible to provide a complete picture in the aggregate of the interaction of base offense levels and specific offense characteristics applied, due to the fact that Chapter Two guidelines are unique to select offense types and contain specific offense characteristics tailored to those offenses. Instead, subsequent sections of this report provide detailed profiles of the sentencing process for three of the most frequently applied Chapter Two guidelines: robbery, drug trafficking, and fraud.

#### Chapter Three Adjustments

Once the court establishes a base offense level and applies any appropriate specific offense characteristics, it considers whether certain generic adjustments to the offense level apply. These Chapter Three adjustments refer to general factors relating to the victims of the offense, the defendant's role in the offense, acts that constitute an obstruction of justice, and the defendant's acceptance of responsibility and may apply to all offense categories.

Table 32 provides a description of the various Chapter Three adjustments applied by the courts for all 1991 guideline cases for which a complete Report on the Sentencing Hearing was available. 72

An upward adjustment for victim related factors, such as vulnerable victim, official victim, or restraint of victim (§§3A1.1, 3A1.2, 3A1.3) was imposed in only about one percent of the cases. A reduction for a mitigating role was given in 8.3 percent of the cases (§3B1.2). The offense level was increased in 7.8 percent of the cases due to the defendant's aggravating role (§3B1.1) and in 2.6 percent for an abuse of the defendant's position of trust or use of special skill (§3B1.3).

Close to five percent of all cases received the enhancement for obstruction of justice (§3C1.1), while reckless endangerment during flight, a new adjustment added to the guidelines in November 1990, applied to 0.2 percent of the cases (§3C1.2).

Finally, the court may reduce a defendant's offense level if the defendant "demonstrates a recognition and affirmative acceptance of personal responsibility for his criminal conduct" (§3E1.1). In 1991, 80.1 percent of all defendants received a downward adjustment for acceptance of responsibility. According to Table 33, some variation exists in the rate of acceptance of responsibility by offense type: acceptance was granted less frequently in violent crimes such as murder, kidnapping, arson, and sexual abuse (crimes that also have lower plea rates), and higher for offenses such as embezzlement, gambling and lottery, forgery, and antitrust.

The text and tables identify each adjustment by the chapter and guideline number referenced in the 1990 Guidelines Manual, effective November 1, 1990.

Chapter Three also contains guidelines for determining the combined offense seriousness for multiple count cases (§§3D1.1 - 3D1.5). When several counts reflect multiple harms, the guidelines direct incremental increases in the adjusted offense level corresponding to the most serious offense in the group. In other cases, multiple counts of conviction do not particularly reflect the presence of multiple harms. In such cases, the guidelines group the offenses and apply the offense level for the most serious offense without adding levels for the other, closelyrelated ones. Finally, in cases driven primarily by quantity (such as the quantity of drugs distributed or amount of money embezzled), the quantity, as determined through application of relevant conduct (§1B1.3), affects the sentence more than the number of counts.

Approximately 25 percent of all cases in 1991 included more than one count of conviction. Table 31, referenced earlier, lists the Chapter Two guidelines applied in multiple count cases. In most multiple count cases, similar offense behavior is aggregated under one guideline with overall behavior accounted for through one primary guideline. However, in 3.4 percent of the cases, multiple count adjustments were used to increase offense levels. The final offense levels and frequencies presented in Table 36 reflect the multiple count adjustment, if any, in applicable cases.

	Tot	al number	of guidelines	applied:	34,954	24,008	68.7	10,946	31.3
Ų.			otal number		32,019	23,844	74.5	8,175	25.5

Of the 33,419 guideline cases, 1,400 cases were excluded due to one or both of the following conditions: missing guideline applied (1,399) or missing number of counts (47). The totals can add to more than 100% because a single case may reference several different guidelines. A number of Chapter Two guidelines list possible cross-references, which resulted in multiple counting of cases applying both the original and cross-referenced guideline(s). In cases in which application of a specific cross-reference was required, only the original guideline was used to avoid double-counting for these cases. Descriptions of variables used in this table are provided in Appendix A.

<sup>&</sup>quot;Cases listed in parentheses are provided for reference only and represent cases in which application of another guideline was indicated; such cases are counted both numerically and proportionately in the referenced guideline.

Table 32

CHAPTER THREE GUIDELINE APPLICATION INFORMATION (October 1, 1990 through September 30, 1991)

#### All Cases

VICTIM-RELATED		Number	Percent
Vulnerable Victim (§3A1.1)

Of the 33,419 guideline cases, the Commission received complete guideline application information for 26,820. Of the 26,820 cases with such information, 46 cases were excluded due to one or both of the following conditions: missing primary offense category (44) or missing information on acceptance of responsibility (2). Descriptions of variables used in this table are provided in Appendix A.

### Assessment of Criminal History -Chapter Four

The introduction to Chapter Four of the Guidelines Manual states that a defendant's prior record is relevant to such important sentencing goals as general deterrence, just punishment, and protection of the public. Under the guidelines, points are assigned to sentences imposed for adult convictions to account for the frequency and severity of prior criminal conduct. Additional points are assigned if the defendant committed the offense within two years after release from imprisonment or while under any criminal justice sentence, including probation, work release, or escape status.

Table 34 reports components of prior criminality considered under Chapter Four. According to documents received by the Commission, 31.1 percent of all defendants sentenced in 1991 had no prior criminal history. When examining past criminal conduct taken into consideration under the guidelines (§4A1.1), 19.4 percent of all defendants had one or more convictions resulting in a sentence of imprisonment of 13 months or longer; 14.5 percent had one or more convictions with a sentence of 60 days or longer; while 36.8 percent had one or more prior convictions that received either an imprisonment sentence of less than 60 days or another sanction.

Additional points were imposed in 20.4 percent of the cases for committing the instant offense while under another sentence, and in 11.7 percent of the cases for committing the instant offense within two years of a prior conviction. Composite scores, reflecting the frequency, gravity, and recency of a defendant's prior criminal conduct, show that more than half of the federal guideline population in 1991 had no "countable" criminal history points. Another 10.7 percent of all defendants received one criminal history point under Chapter Four's rules.

Pursuant to statute, the guidelines account for patterns of prior criminal conduct that Congress has determined warrant especially serious treatment. When a defendant who is at least 18 years old commits a crime of violence or a controlled substance offense, and the defendant has at least two prior felony convictions involving crime of violence or controlled substance offenses, the defendant qualifies as a "career offender" (§4B1.1). The guidelines establish a special set of offense levels for career offenders that are calibrated, in conjunction with the most serious criminal history category, to approach the maximum sentences authorized by statute for the instant offense. A similar statutory mandate is addressed in the new Armed Career Criminal guideline (§4B1.4).<sup>74</sup>

Courts found defendants to be career offenders in 2.3 percent of the cases and armed career criminals in 0.1 percent of the cases (see Table 34). While a conviction for drug trafficking trig-

As reported here, criminal history refers to any criminal conduct as reported in the Presentence Report, regardless of the applicability in calculating guideline criminal history score, including prior adult or juvenile convictions, prior uncounseled misdemeanor convictions that did not result in incarceration, and prior unadjudicated criminal conduct.

<sup>74</sup> The career offender and armed career criminal guidelines implement congressional directives embodied in 28 U.S.C. § 994(h) (U.S.S.G. §4B1.1), and 28 U.S.C. § 924(e) (U.S.S.G. §4B1.4).

gered the career offender guideline for the majority of career offenders (350 of 621 defendants), offenders convicted of robbery had the highest probability of being classified as career offenders (17.3%). See Table 35.

Prison Offenses	217	1	0.5	216	99.5
Other Miscellaneous Offenses	383	. 1	0.3	382	99.7

Of the 33,419 guideline cases, the Commission received complete guideline application information for 26,820. Of the 26,820 cases with such information, the career offender provision is not applicable in 10,670 cases. Additionally, 107 cases were excluded due to one or both of the following conditions: missing primary offense category (44) or missing information on career offender (64). Descriptions of variables used in this table are provided in Appendix A.

### Determining the Applicable Sentencing Range - Chapter Five

After the defendant's prior criminal record has been examined and the appropriate criminal history points assigned, the defendant is placed into one of six criminal history categories. The career offender automatically receives the highest criminal history category, Category VI. Table 36 presents the distribution of all cases by their final offense level and criminal history category, as determined by the court. More than half (52%) of the cases resulted in an offense level of 14 or less, and almost 62 percent of all defendants were placed in Criminal History Category I.

The sentencing table in Chapter Five is composed of offense levels set out in the vertical column of the table and criminal history categories in the horizontal columns. The judge determines the applicable guideline sentencing range by matching the applicable offense level and criminal history category. The court has discretion to impose a sentence from any point within the range, or to depart above or below it in unusual cases.

Table 37 describes the guideline ranges determined by the court within primary offense categories of conviction for all 1991 cases. As would be expected, defendants sentenced for robbery, homicide, and drug trafficking were placed in considerably higher guideline ranges

than defendants convicted of non-violent or nondrug offenses. In contrast, more than 40 percent of the larceny, food and drug, environmental, and simple drug possession cases had guideline ranges of zero to six months.

The guideline range may be further limited, or "trumped," by statutory maximum, mandatory minimum, and mandatory consecutive penalties.

<sup>76</sup> Due to departures and statutory "trumps," not all cases were necessarily sentenced within the ranges reported here.

Of the 33,419 guideline cases, the Commission received Reports on the Sentencing Hearing for 30,876 (92.4%). Of the 30,876 cases with such reports, 296 mixed law cases (both guideline and pre-guideline counts) were excluded. In addition, 2,074 cases were excluded due to one or more of the following conditions: missing guideline range (1,634), missing primary offense category (83), or cases with no analogous guideline (369). The guideline ranges indicated above correspond to the offense levels and criminal history categories established by the court and do not indicate the impact of mandatory minimums or statutory maximums constricting the sentence. Descriptions of variables used in this table are provided in Appendix A.

# Guideline Application for Select Offenses

The following sections provide detailed application information on three of the most commonly used Chapter Two guidelines: §2B3.1 (Robbery), §2D1.1 (Drug Trafficking), and §2F1.1 (Fraud).

## Guideline §2B3.1 - Robbery, Extortion, and Blackmail

Tables 38-42 describe the guideline factors applied to robbery cases sentenced under §2B3.1. Note that the cases discussed, though all sentenced in FY1991, had either 1988, 1989, or 1990 versions of the robbery guideline applied (based on the date of the commission of the offense) due to court rulings on the *ex post facto* question. The base offense level of 18 for robbery in 1988 was increased to 20 in the 1989 edition of the guidelines.

Robbery of a financial institution or post office enhances the offense by two levels; threat or use of a dangerous weapon increases the offense seriousness by two to five levels; the type and degree of injury to a victim results in an increase of two to six levels; and additional offense characteristics include increases for the theft of firearms or drugs during the robbery, the dollar loss in excess of a set amount (\$2,500 in 1988, \$10,000 in 1989/90), and victim restraint or abduction.

The 1,144 robberies in 1991 almost exclusively involved financial institutions (see Tables 38

and 39). Guideline enhancements for a weapon (or threat) were present in 43.6 percent of the cases. An additional 225 cases convicted under 18 U.S.C. § 924(c) received a mandatory consecutive penalty of five years and therefore received no guideline enhancement for a dangerous weapon. In 96.1 percent of the robberies no harm was caused to victims and in the majority the amount of financial loss was \$10,000 or less. More than five percent of the robbery offenders were found to obstruct justice, while 81.1 percent were found to have accepted responsibility for their offenses.

Robbery defendants, as a group, appeared more likely to recidivate than the federal defendant population as a whole (see Table 40), with 91 percent having some criminal history. Approximately half (49.5 percent) had one or more prior sentences of 13 months or longer. More than 43 percent committed the instant offense while under a criminal justice sentence, 33.5 percent within two years of a prior countable conviction. Finally, 17.1 percent of all offenders sentenced for robbery were found to be career offenders.

More than 62 percent of the robbery defendants received final offense levels between 20 and 25, and 59.3 percent were placed in Criminal History Category III or above (see Table 41). The final guideline ranges for approximately half of all robbery defendants were clustered between 33-41 months and 70-87 months (see table 42).

<sup>77</sup> Cases may involve the application of more than one Chapter Two guideline. For this analysis, cases were included if the robbery, drug trafficking, or fraud guidelines were applied to any count of conviction.

Of the 33,419 guideline cases, the Commission received complete guideline application information for 26,820. Of the 26,820 cases with such information, 1,144 cases involved the application of the robbery guideline (§2B3.1). Two of the 1,144 cases were excluded due to missing information on criminal history or final offense level. Additional descriptions of each guideline adjustment can be found in the USSC Guidelines Manual.

### Guideline §2D1.1 - Drug Trafficking

As described in Table 43, 11,258 defendants were sentenced under the drug trafficking guideline in 1991. Base offense levels under §2D1.1 are determined by the quantity and type of drugs involved in the offense. The largest number of cases had guideline offense levels of 26 and 32. An enhancement for possession of a firearm was applied in 9.6 percent of the cases. An additional 670 cases (6.0%), convicted under 18 U.S.C. § 924(c) and receiving a mandatory consecutive penalty of five years, received no guideline enhancement for possession of a firearm. Involvement of an aircraft in the offense was found in 0.3 percent of the cases.

Victim adjustments were almost non-existent in drug cases. However, 25 percent of the drug defendants received adjustments to reflect their aggravating or mitigating role in the offense. Five percent were found to obstruct justice and 75 percent accepted responsibility for their offense (see Table 44).

As reported in Table 45, 71.3 percent of the drug cases involved defendants with some criminal history. However, 51.8 percent had no convictions that received criminal history points under the guidelines. Only 16 percent received points for past sentences of 13 months or longer, while 3.1 percent qualified for career offender status.

Table 46 shows the distribution of drug cases by offense level and criminal history category, with the highest overall percentages centered around the offense levels that include the five- and tenyear mandatory minimums (levels 26 and 32) or

mandatory minimums less two levels for acceptance of responsibility (levels 24 and 30). A guideline range of 51-63 months, found in 9.4 percent of the cases, was the most common final guideline range for offenders convicted of drug trafficking (see Table 47).

<sup>78</sup> These levels correspond to the five- and ten-year mandatory minimum penalties set by statute for certain drug offenses.

TOTAL	11,258	100.0

Of the 33,419 guideline cases, the Commission received complete guideline application information for 26,820. Of the 26,820 cases with such information, 11,258 cases involved the application of the drug guideline (§2D1.1). Additional descriptions of each guideline adjustment can be found in the USSC Guidelines Manual.

#### Guideline §2F1.1 - Fraud and Deceit

The fraud guideline provides a base offense level of 6 and adjustments to reflect the amount of dollar loss caused by the offense. 79 As Table 48 shows, most cases were sentenced under the 1989/90 version of the guideline; using this version, the most common loss category was \$2,000 or less. Based on offense characteristics specific to the fraud guideline (e.g., more than minimal planning, multiple victims, victimizing government or certain types of organizations, or violating a judicial order), an additional increase was given in 66 percent of the cases. Adjustments for reckless risk of injury, use of foreign bank accounts, and jeopardizing the soundness of financial institutions applied in only 0.3 percent of the cases.

Table 49 shows that Chapter Three adjustments for victim-related factors applied in 1.5 percent of the cases. Slightly more than six percent of the cases involved defendants who abused their position of trust in committing the fraud. Obstruction of justice was found in 5.7 percent of the cases, while a reduction for acceptance of responsibility was granted in 85.3 percent.

As shown in Table 50, 62.8 percent of the defendants reported past criminal conduct. Only 14.1 percent had one or more prior countable sentence of 13 months or longer, 12.1 percent had prior countable sentences of 60 days or longer, and 33.6 percent had other countable sentences. As a result, 69.3 percent of the fraud defendants were placed by the court in the lowest criminal

history category, and more than half had an offense level of nine or less (see Table 51). These two factors led to a concentration of 56.5 percent of fraud cases in sentencing ranges with a minimum of six months or less (see Table 52).

<sup>79</sup> The loss tables in the fraud guideline were amended effective November 1, 1989.

Additional descriptions of each guideline adjustment can be found in the USSC Guidelines Manual.

# Departures and Sentences Within the Guideline Range

In promulgating the Sentencing Reform Act of 1984, Congress authorized departures from the applicable guideline range subject to review by appellate courts. The Reports on the Sentencing Hearing are used to assess guideline sentencing trends and to determine the rate at which defendants are sentenced within the guideline range as established by the court, and the rates and reasons for departures from that range. In this section, the Commission reports on the frequency of departures on the national, circuit, and district levels, and the reasons provided by the courts for such departures.

For the past three years the Commission has reported national estimates on departures and sentences within the guideline range using an in-depth study of 25 percent of all cases. (See United States Sentencing Commission Annual

Report 1988, 1989, 1990.) Because the submission rate for the Report on the Sentencing Hearing has risen to 92.4 percent in fiscal year 1991, the Commission is providing, for the first time, departure rates for all cases received.

Staff reviewed all case files to determine departure status and reasons for departure as indicated in the Report on the Sentencing Hearing. The case was determined to involve no departure if the sentence imposed was within the guideline range established by the court and set out in the Report on the Sentencing Hearing. If the sentence fell outside the guideline range established by the court, it was determined that a departure had occurred and the applicable reasons were noted.

If a Report on the Sentencing Hearing was not provided or if the information contained in it was insufficient to permit a departure determination, the sentence from the Judgment of Conviction

### **Departure Rate**

80.6% • Sentences Within Guideline Range

11.9% • Sentences Below Guideline Range for Substantial Assistance on Motion of Government

5.8% • Sentences Below Guideline Range

1.7% • Sentences Above Guideline Range

A comparison of the 1991 figures for a 25 percent sample and total population showed differences of less than one percent in all national categories.

was compared to the guideline range recommended by the probation officer in the presentence report. No departure was assumed when the sentence fell within the range recommended by the probation officer. 81

A departure could not be assumed if the sentence from the Judgment of Conviction did not correspond to the guideline range recommended by the probation officer. A court, through the factfinding process, may determine a different guideline range to be correct and sentence within that range. Thus, a discrepancy between the sentence and the range indicated in the presentence report does not necessarily indicate a departure. In order to determine the presence or absence of a departure in cases that fell into this category, telephone calls were made to probation officers or the courts for cases included in the 25-percent random sample. If the case involved a departure, staff requested the reasons for that departure given by the court. Calls also were made in cases in which a comparison between the Judgment of Conviction and probation officer's recommendation could not be made due to the absence or inadequacy of the relevant documents.

Departure determination in cases in the 100percent study in which Reports on the Sentencing Hearing were absent or inadequate were coded as missing. In 1,099 of the 33,419 cases in fiscal year 1991, no departure determination could be made due to absent or inadequate information. In 535 of the 33,419 cases departure determinations were not applicable because the cases had no analogous guidelines. Departure status was assessed in the remaining 31,785 of the 33,419 cases sentenced in fiscal year 1991.

#### Results

Sentences were within the guideline range established by the court in 80.6 percent (25,608) of the 31,785 cases for which a departure determination could be made. <sup>82</sup> In 11.9 percent of the cases (3,786), courts departed downward based on a motion by the government for a reduced sentence due to the defendant's substantial assistance to authorities. In another 5.8 percent of the cases (1,839), the court departed downward for other reasons. In 1.7 percent of the cases (552), the court departed upward, sentencing above the applicable guideline range.

The 1991 data show that the rate of departures for substantial assistance, varying markedly by judicial district, has increased more than four percent since 1990.

To understand the departure rate, it is important to note the effect of two particular statutes on

This assumption was tested in a previous USSC departure study analyzing a sample of cases sentenced between November 1, 1987, and March 31, 1989. A random 25-percent sample of cases for which no Report on the Sentencing Hearing was available, but for which the sentence fell within the range recommended by the probation officer, was further investigated by placing telephone calls to the field. Of the 196 cases for which calls were made, none involved a departure from the guideline range. As a result, all such cases were considered within-range sentences for the purposes of that study as well as for the present report.

The departure analysis employed here considers the probation, imprisonment, and confinement alternatives in relation to the guideline range established in Part A of Chapter Five. This analysis does not involve an assessment of the fine range established in Part E of Chapter Five. In addition, no assessment is made regarding terms of supervised release as established by Part D of Chapter Five.

guideline sentencing patterns. Congress, in 18 U.S.C. § 3553(e), authorized the court to impose a sentence below that required by a mandatory minimum statute "to reflect a defendant's substantial assistance in the investigation or prosecution of another person who has committed an offense." In addition, the Commission was instructed in 28 U.S.C. § 994(n) to "assure that the guidelines reflect the general appropriateness of imposing a lower sentence than would otherwise be imposed" for substantial assistance to authorities. Consequently, the Commission specifically addressed such sentence reductions in §5K1.1 of the guidelines.

Tables 53 and 54 provide reasons given by the courts for upward and downward departures. The most frequently cited reasons for departing upward included adequacy of criminal history (57.2%), drug amount (9.1%), high speed chase (8.4%), weapons and dangerous instrumentalities (6.0%), and pursuant to a plea agreement (5.6%).

Substantial assistance upon motion of the government was a reason cited in 68.7 percent of the downward departures. Other reasons for downward departures included: pursuant to a plea agreement (9.5%), adequacy of criminal history (3.1%), a general mitigating circumstance (3.1%), physical condition of the defendant (2.4%), and family ties and responsibilities (2.0%).

#### Table 53

Other	73	13.6

Based on 538 upward departure cases for which Reports on the Sentencing Hearing were available. Information on reasons was unavailable in 14 cases involving upward departures. Courts often provided more than one reason for departure; consequently, the percentage across all reasons for departure adds up to more than 100%. The "Other" category includes all reasons given between one and three times among relevant cases.

## Departures and Within Guideline Sentences by Primary Offense

Departure rates varied substantially by offense category. Offenses involving drug trafficking, racketeering and extortion, bribery, and money laundering had a higher rate of departure due to substantial assistance compared to other offenses. Simple drug possession, larceny, immigration, embezzlement, environmental/wildlife violations, and antitrust violations had relatively lower rates of departure. Table 55 provides departure rates by primary offense categories.

## Departures and Within Guideline Range Sentences by Circuit and District

The departure rate varied significantly for the twelve judicial circuits. The District of Columbia reflected the lowest departure rate at 11.7 percent, while the Third Circuit showed the highest departure rate at 30.7 percent. However, the Third Circuit's departure rate was influenced heavily by the Eastern District of Pennsylvania, which had the highest departure rate of any of the 94 judicial districts at 46.0 percent. It is noteworthy that 41.0 percent of Eastern Pennsylvania's 46.0 percent departure rate comes from downward departures based on a government motion that the defendant has substantially assisted in the investigation or prosecution of another criminally responsible individual. The Western District of North Carolina and Arizona also had departure rates above 40 percent. Conversely, Maine, Rhode Island, Virgin Islands, Eastern District of Virginia, Western District of Kentucky, and New Mexico had departure rates below seven percent. Table 56 indicates the within-guideline range sentence and departure rates by circuit and district.

Of the 33,419 guideline cases, 535 were not applicable (i.e., no analogous guidelines) and 1,099 were missing departure information. Districts for which the departure information is missing in five percent or more of the cases received included: Central California (26.4%), Southern New York (11.6%), Southern Texas (8.7%), Virgin Islands (7.4%), Middle Tennessee (7.3%), Southern California (6.0%), Eastern Wisconsin (5.8%), Eastern Missouri (5.7%), and Eastern North Carolina (5.7%). Descriptions of variables used in this table are provided in Appendix A.

## **B. EVALUATION**

The Sentencing Reform Act of 1984 requires the Commission to:

[S]ubmit a report to the General Accounting Office, all appropriate Courts, the Department of Justice, and Congress detailing the operation of the sentencing guideline system and discussing any problems with the system or reforms needed. The report shall include an evaluation of the impact of the sentencing guidelines on prosecutorial discretion, plea bargaining, disparities in sentencing, and the use of incarceration, and shall be issued by affirmative vote of a majority of the voting members of the Commission.

In response to its statutory evaluation mandate, the Commission designed studies in four major areas: implementation of the guidelines, disparity in sentencing, use of incarceration, and prosecutorial discretion and plea bargaining. Because of delays in nationwide implementation of the guidelines until Supreme Court resolution of numerous constitutional challenges, the evaluation study focused primarily on the short and medium-range impacts of the Sentencing Reform Act.

# *Implementation*

The Commission conducted a process evaluation to describe the implementation of sentencing guidelines in the federal courts. For this part of the evaluation, the Commission visited 11 randomly selected districts and a twelfth supplemental district during late 1990 and early 1991.

During these site visits, staff members interviewed and surveyed district judges, U.S. attorneys, assistant U.S. attorneys, probation officers, federal and community defenders (including the chief defender), and private defense attorneys about a variety of issues concerning their work and the processing of cases under the guidelines system. These topics included: 1) guideline training; 2) guideline knowledge and application; 3) the roles of judges and court practitioners; 4) factors affecting the sentencing process; and 5) charging and plea negotiation practices.

Guideline sentencing is now the norm in federal courts, with more than three-fourths of the fiscal year 1991 defendants subject to the new law. Preliminary findings of the implementation study suggest that the process of guideline implementation is moving steadily forward. While the site interviews illustrate occasional difficulties and unevenness among jurisdictions, there are clear indications of increasing acceptance and successful implementation of the guidelines.

Congress directed the Commission to establish a system of guideline sentencing that would be honest, ensure reasonable uniformity in sentencing by narrowing wide disparity, and that would impose appropriately different sentences for criminal conduct of differing severity. The site interviews indicate that judges, prosecutors, and probation officers perceive that the Commission's guidelines have been generally successful in meeting these goals. It is important to note that among those interviewed, a sizable

<sup>83</sup> Pub. L. No. 98-473, § 236, 98 Stat. 1837, 2033 (1984).

<sup>84</sup> The twelfth district was selected because the random sample underrepresented large districts and districts with high departure rates.

majority of the judges (30 or 65%), federal prosecutors (39 or 83%), and probation officers (31 or 69%) reported that guideline sentences are "mostly appropriate" in response to the question of whether the guidelines generally fit into the respondents' sense of what is an appropriate sentence. In addition, large numbers of judges (25 or 50%), prosecutors (57 or 76%), and probation officers (39 or 59%) interviewed commented that they felt the guidelines have reduced sentencing disparity.

In contrast, federal defenders and private defense attorneys were generally negative in their assessments of the guidelines. Only about one-third of the private attorneys (11 or 31%) and none of the ten assistant federal defenders interviewed said that sentences under the guidelines are generally appropriate. Defense attorneys (public and private) also were less likely to say that the guidelines have decreased sentencing disparity.

The study asked all respondents in non-supervisory positions to assess the level of guidelines knowledge of judges and practitioners. Most respondents rated the guidelines knowledge of others from fair to excellent. Probation officers were rated highest by all groups, while private defense counsel were given the lowest ratings by judges, probation officers, and assistant U.S. attorneys.

The study found that assistant U.S. attorneys, defense attorneys, probation officers, and judges are all viewed as possessing some degree of influence over the sentencing process. Prosecutors generally are perceived to influence sentencing through charging, plea negotiations,

advocacy of guidelines calculations, sentencing recommendations, and motions for substantial assistance. Defense attorneys are seen to be most influential in the areas of plea negotiations and advocacy for reductions in guideline calculations. However, defense attorneys' self-assessments indicate that they feel most powerless at the sentencing stage. Probation officers are perceived to be most influential in conducting the presentence investigation, providing information to the court, determining the appropriate guideline range, and making sentencing recommendations. Judges exercise the most control in guideline application, fact-finding, dispute resolution, selecting a sentence within the range, departing, and acceptance of plea agreements.

# Disparity in Sentencing

The Commission's initial study of sentencing disparity focuses on the question: "Does the range of sentences meted out for defendants with similar criminal records convicted of similar criminal conduct narrow as a result of guideline implementation?" To address this question, the Commission examined sentences imposed and time served for offenders convicted of bank robbery, embezzlement, heroin distribution, and cocaine distribution using the definition of disparity provided by Congress. That is, disparity exists when defendants with similar criminal records found guilty of similar criminal conduct receive dissimilar sentences. For each of these offense categories, groups of offenders who re-

ceived pre-guideline sentences in 1984 and 1985 were matched on offense and criminal history characteristics with groups of offenders who received guideline sentences during 1990 and 1991.<sup>87</sup>

As an example of these analyses, the bank robbery data show that pre-guideline sentences imposed on offenders with little or no criminal history who committed the robbery without a weapon range from zero months (probation) to 120 months in prison. On the other hand, sentences imposed for similar offenders under the guidelines range from zero to 60 months in prison. Further examination of pre-guideline sentences shows that the middle 80 percent of offenders received sentences between four and 120 months. Examination of guideline sentences shows that the middle 80 percent of offenders received sentences between 21 and 42 months. The data indicate a decrease in the range of sentences imposed for the middle 80 percent of offenders from a spread of 116 months pre-guidelines to a spread of only 21 months under the guidelines.

The study also analyzes "estimated time to be served." The bank robbery data shows that among offenders with little or no criminal history who committed bank robberies without a weapon, the time to be served by pre-guideline offenders ranges from zero to 40 months. Guidelines offenders' time to be served, on the other

hand, ranges from zero to 52.3 months, an apparent widening of the range under the guidelines. However, the middle 80 percent of pre-guideline offenders' time to be served ranges from four to 40 months. The middle 80 percent of guideline offenders' time ranges from 21 to 38 months. This represents a decrease in the range of time to be served for the middle 80 percent from a spread of 36 months pre-guidelines to a spread of 17 months under the guidelines, a substantial reduction in the middle 80-percent range of time to be served. See Figure H.

For robbery offenses in which a weapon was possessed or brandished, sentences imposed pre-guidelines range from zero to 216 months, while sentences imposed for guideline offenders range from 24 to 84 months. The middle 80 percent of pre-guideline offenders received sentences ranging from zero to 180 months. Sentences imposed for the middle 80 percent of guideline offenders range from 27 to 51 months. As before, this represents a substantial decrease in the spread of sentences for the middle 80 percent, from a spread of 180 months pre-guidelines to a spread of only 24 months under the guidelines.

A comparison of time to be served tells a similar story, with spreads decreasing considerably following guideline implementation. Time to be served for pre-guideline offenders ranges from zero to 72 months, while time to be served for

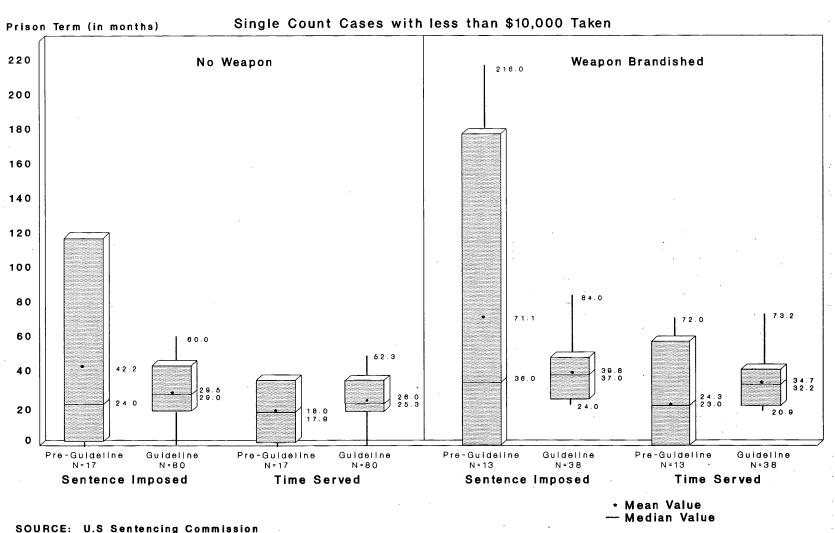

Data for these analyses were drawn from FPSSIS (Federal Probation Sentencing and Supervision Information System of the Administrative Office of the U.S. Courts), an augmented FPSSIS dataset constructed by the Commission representing offenders sentenced in 1985, the Commission's guidelines sentence monitoring system, and the Federal Bureau of Prisons. Each case represented a single sentencing event for a single defendant. Multiple defendants in a single sentencing event were treated as separate cases. Within each of these offense categories, the distributions of sentences imposed and expected time to be served in prison were compared for different levels of criminal history. Expected time to be served takes into account reductions in the imposed sentence for good conduct in prison and, for pre-guideline sentences, reductions that may be granted by the Parole Commission.

guideline offenders ranges from 20.9 to 73.2 months. The middle 80 percent of pre-guideline offenders' time to be served ranges from zero to 60 months. The middle 80 percent of time to be served for guideline offenders ranges from 23.5 to 44.2 months. Again, this represents a substantial decrease in the range for the middle 80 percent, from a spread of 60 months pre-guidelines to a spread of 21 months under the guidelines. See Figure H.

In summary, for offenders with little or no criminal history convicted of similar bank robberies, the data show that not only have the ranges of sentences imposed under the guidelines narrowed sharply following guideline implementation, but the ranges of time to be served have narrowed considerably as well.

The study found similar reductions in disparity under the guidelines for bank embezzlers and drug dealers.

Offenders in Criminal History Category I

## Use of Incarceration

The Commission's study of the use of incarceration focused on a number of questions, including: 1) To what extent has the proportion of defendants sentenced to prison and/or probation changed during the period 1984-1990?; 2) How has the length of imprisonment sentences changed during the period 1984-1990?; and 3) To what extent are changes in the rate of imprisonment sentences and the length of imprisonment attributable to the imposition of statutory changes, mandatory minimum sentencing statutes, sentencing guidelines, or other legislative and policy initiatives?

To answer such questions, monthly measures of the use of incarceration were constructed from data obtained through the Administrative Office of the U.S. Courts, the United States Parole Commission, and the Federal Bureau of Prisons. These over-time data were constructed for all offenses and for subsets of offenders convicted of drug, bank robbery, and economic offenses, and included the number of convicted offenders receiving prison sentences and the average time to be served by convicted offenders.

These monthly measures were analyzed for the impact of various policy and legislative changes that could be expected to affect prison use in the federal system. Specifically, the Anti-Drug Abuse Acts of 1986 and 1988, the implementation of the sentencing guidelines in late 1987, and the Supreme Court's <u>Mistretta</u> decision were examined for their possible effect on the use of incarceration.

In general terms, this study found a system that, between 1984 and 1990, experienced significant increases both in the use of incarcerative sentences and in the average length of prison sentences.

Due to considerable changes that occurred not only in legislation and sentencing policy but also in the volume, seriousness, and composition of the criminal behavior they seek to regulate, any causal influences are too confounded and close in proximity to be separately assessed and evaluated. The Commission anticipates conducting additional research to disentangle the causal relationships between the interventions and the systemic changes.

Figure I shows average time to be served for all offenses and separately for drug, bank robbery, and economic offenses. As can be seen in Figure I, the mean imprisonment time to be served across all offenses during this period nearly doubled, increasing from 24 months in July 1984 to 46 months in June 1990. This increase in the average terms of imprisonment points to the impact of three major interventions — the Anti-Drug Abuse Act of 1986, the initial implementation of the guidelines, and the Mistretta decision.

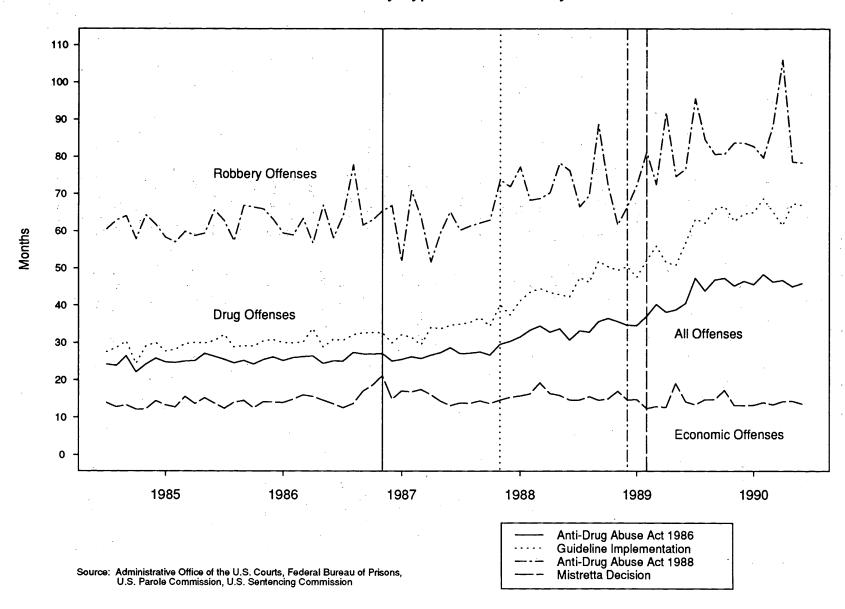

Mean time to be served for drug offenders increased from 27 months in July 1984 to 67 months in June 1990, an increase of 148 percent. Drug sentences increased significantly at each intervention point except the 1988 Drug Act. Figure I also shows that average prison terms for robbery offenders increased during the study period. Mean sentences for robbery offenses were 60 months in July 1984 and rose to 78 months in June 1990. Increases primarily occurred after initial guideline implementation and the Mistretta decision. However, most of this increase occurred among cases involving mandatory minimum firearms charges.

Finally, Figure I shows that average time served for economic offenses remained relatively stable. Because alternatives to imprisonment (commu-

nity confinement, intermittent confinement, and home detention) are frequently available within the guideline ranges for offenders convicted of economic crimes, sentences to these alternatives have been included as prison equivalents in the mean values in Figure I. While the average prison term for offenders convicted of economic crimes has decreased slightly, the proportion receiving some type of confinement has increased under guideline sentencing.

Figure I

Mean Prison Sentence by Type of Offense: July 1984 to June 1990

# Prosecutorial Discretion and Plea Bargaining

Several obstacles inhibit the design of a straightforward quantitative study of the impact of sentencing guidelines on prosecutorial discretion and plea bargaining. Primarily, much of the plea negotiation process involves "behind the scenes" discussions between prosecutors and defense attorneys that generally are not memorialized. Evidentiary problems and defendant cooperation may affect the outcome of a plea negotiation (i.e., the sentence), but often there is little record of how this outcome evolved. Without data on specific decision points in this plea process, quantitative analysis cannot be performed.

In recognition of these obstacles to quantitative analysis, the Commission focused a significant portion of the interviews with judges and court practitioners in the implementation study on plea bargaining and prosecutorial discretion. Through examples and open-ended questions, the Commission attempted to examine the plea negotiation processes at work within the federal court system.

In addition to the qualitative research, the Commission examined the issue of whether and how the guidelines might impact on the use of prosecutorial discretion. Two different methodologies were used in analyzing the available quantitative data. The first study employs an over-time analysis that deals most directly with the issue outlined by Congress (i.e., the impact of the guidelines on prosecutorial behavior.) The second impact study describes a variety of plea negotiation strategies possible under the guide-

lines, and examines a 25-percent sample of all guidelines cases sentenced between July 1, 1990, and September 30, 1990, as a measure of the impact of negotiated pleas on guideline sentences.

### Qualitative Research

The implementation study of charging and plea practices portrays a system in transition. Judges, prosecutors, and defense attorneys are experimenting with methods of operating within the structure of sentencing guidelines. The interview data suggest that judges and attorneys attempt to make charging and plea practices under the guidelines reflect similar practices under the pre-guidelines system. However, the study found that rather than relying exclusively on tools available under the guidelines system (e.g., a motion for substantial assistance), judges and court practitioners sometimes rely on tactics that pre-date the guidelines. For example, both groups may limit available information so as to constrain sentencing exposure under the guidelines for cooperating offenders.

In terms of the interaction between sentencing guidelines and plea negotiations, two of the most important issues are the incentives to plead, and whether the plea agreement adequately reflects the seriousness of the actual offense behavior. Concerning the incentive to negotiate a plea, at least one-third of the prosecutors interviewed identified either a motion for a departure based upon substantial assistance, a recommendation for awarding acceptance of responsibility, or a recommendation for a sentence at the low end of the guideline range (or, less often, a specific sentence) as the most important incentives they can offer in negotiating a plea. For the most part,

defense attorneys agree with this assessment, although they place more emphasis on dismissing counts or being allowed to plead to a reduced charge and are less likely to see acceptance of responsibility as an incentive.

The issue of whether negotiated pleas reflect the total offense behavior is difficult to assess. The interview data provide respondents' perceptions as to estimates of the number or proportion of pleas that fail to reflect all readily provable offense conduct. The most that can be said is that some prosecutors in some situations will accept a plea to less than the total offense behavior. Evidentiary problems aside, about one-fourth of prosecutors interviewed indicate they sometimes will not charge all known criminal behavior if the offender is cooperating with authorities in the investigation of other offenders or if the resulting guideline range appears to over-sanction the offense conduct (e.g., offenders with a limited role in the offense).

## Quantitative Research

The study of the guidelines' impact on prosecutorial outcomes addresses a variety of questions, including: 1) Has the incidence of various prosecutorial outcomes, such as the filing of charges and the acceptance of guilty pleas, changed over time?; and 2) Has the likelihood of these prosecutorial outcomes changed as a result of the guidelines or a series of other legislative and policy interventions?

Monthly measures of prosecutorial outcomes were constructed for the period 1984 to 1990 from data obtained through the Executive Office of the U.S. Attorneys. <sup>88</sup> Utilizing a multivariate time series method, the study analyzes the impact of the guidelines by providing an aggregate portrait of changes and trends in prosecutorial outcomes occurring before and after the implementation of the guidelines while controlling for other possible competing influences such as changes in legislation and policy.

The results indicate an overall upward trend in the number of investigative matters initiated, cases filed, and cases resolved. However, it appears that none of the legislative or policy changes studied from 1984 to 1990 created a significant change in prosecutorial case processing. Of particular interest in this context is the lack of effect of the guidelines on the proportion of guilty pleas among cases filed in the criminal justice system. Figure J shows that the ratio of guilty pleas to all cases resolved monthly between October 1986 and March 1990 has remained fairly constant.

The fact that a number of important interventions occurred in close temporal proximity to each other and to the gradual phasing in of guideline sentencing, however, suggests that more time

These monthly measures describe different stages of prosecution in the federal court system: 1) the number of matters (investigations) initiated each month; 2) the number of cases filed each month; 3) the number of cases resolved each month, either through negotiated pleas or through trials; 4) the number and proportion of cases resolved each month through negotiated pleas; and 5) the number and proportion of cases resolved each month through trials. These measures were analyzed for the impact of the same legislative and policy changes examined in the use of incarceration study.

may be needed to disentangle and assess the individual impact of these interventions, as well as their interaction with the guidelines in order to determine the isolated effects of each on prosecutorial practices.

The second quantitative study examined a number of plea negotiation strategies possible under the guidelines and the direct impact these strategies may have on sentencing.

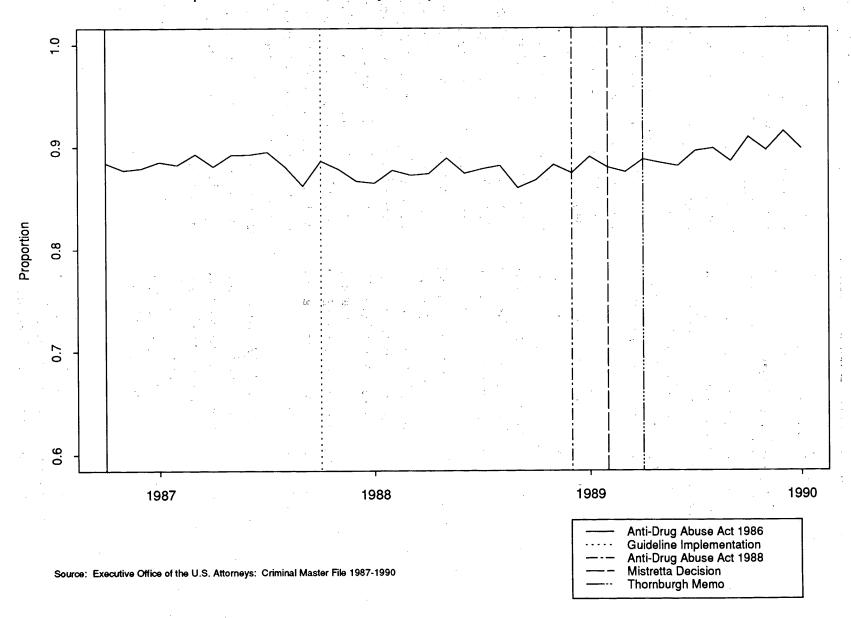

The study reviewed and analyzed a 25-percent random sample of guideline cases convicted as a result of a guilty plea and sentenced between July 1, 1990 and September 30, 1990. A variety of plea agreement scenarios were identified, such as stipulations to guideline-relevant facts, dismissed counts, reduction to less serious counts, and motions for substantial assistance.

In 17 percent of the cases examined, the plea agreement appeared to have some impact on sentencing; in 10.5 percent of the cases, the plea resulted in a lower guideline range; in 14 percent of the cases, the plea led to a reduced sentence (i.e., below the minimum of the original guideline range); and in 7.8 percent of the cases, both the guideline range and sentence were impacted.

The impact of the plea agreement appeared to vary by type of offense, having the most noticeable effect in drug trafficking cases.

The evaluation report, to be titled, The Federal Sentencing Guidelines: A Report on the Operation of the Guidelines System and Short-Term Impacts on Disparity in Sentencing, Use of Incarceration, and Prosecutorial Discretion and Plea Bargaining, will be submitted to Congressman in December 1991.

Proportion of Convictions by Guilty Plea: October 1986 to December 1989

## C. RESEARCH STUDIES

# Organizational Sanctions

In 1991, the Commission continued its empirical examination of organizations sentenced in federal courts. This research expands the scope of the Commission's original study of organizations sentenced during the period 1984-87 and augments its ongoing review of organizational sentencing practices.

In this most recent study, the Commission identified 446 organizations sentenced during the period January 1, 1989, through June 30, 1990. Using documents supplied by the U.S. probation offices, the Commission compiled a dataset of offender, offense, and sentencing characteristics for the organizational defendants. The dataset, "Organizations Sentenced in Federal Criminal Courts, 1989-90," is archived at the National Archive of Criminal Justice Data at the University of Michigan's Inter-University Consortium for Political and Social Research (ICPSR) and is available to member universities and research scholars. Also archived at the University of Michigan is the dataset compiled on organizations sentenced during 1988.

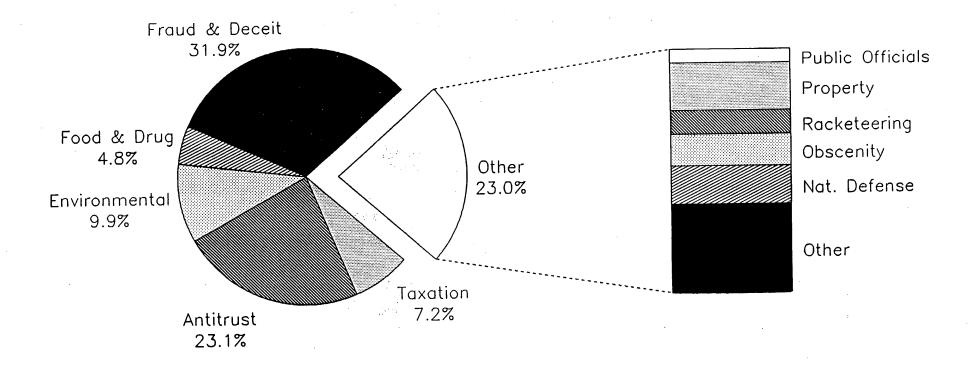

Data from both the 1988 and 1989-90 data collection efforts were used in the development of the sentencing guidelines for organizations that became effective on November 1, 1991. Detailed analyses of the data are provided in the Commission's Supplementary Report on Sentencing Guidelines for Organizations, published August 30, 1991.

The Commission's research indicates that a large number of interrelated factors have influenced past organizational sentencing practices. For example, an organization's ability to pay a criminal fine appears to be related to both its ownership structure and net worth. In addition, the research found that several factors were associated with the magnitude of the fines imposed. These factors include the organization's volume of commerce (for antitrust offenses), the guideline offense level and the pecuniary loss (for non-antitrust offenses), and the organization's ability to pay. The research demonstrated that courts tended to impose more severe sanctions in cases in which the organization's high-level executives were knowledgeable about or involved in the offense.

Figure K depicts the distribution of cases by offense type for all cases (N=774) sentenced during the period January 1, 1988, through June 30, 1990. As the figure indicates, the most common offense category was fraud and deceit (31.9%, n=247). Antitrust violations (23.1%, n=247). n=179) were the second most common offense (see also Table C-3). Figure L depicts the relationship between organization net worth and the median criminal fine imposed. The figure indicates that the magnitude of criminal fines is associated with organizations' increasing net worth (see also Table C-4). Finally, Figure M depicts the distribution of criminal fines imposed for organizations sentenced during this same period. Criminal fines imposed ranged from \$0 to \$7,600,000, with an average fine imposed of \$167,214 and a median of \$20,000 (see also Table C-5).

# Prison Impact Assessment

The Sentencing Reform Act of 1984 requires the Commission to "take into account the nature and capacity of the penal, correctional and other facilities and services available...." when drafting its guidelines. The Commission's adherence to this requirement has been twofold. First, the Commission has worked closely with the Federal Bureau of Prisons to provide the most current data for the Bureau's prison population projection model (PRISM). Second, as part of the guideline amendment process, the Commission has produced estimates of the change in the size of the prison population resulting from proposed amendments.

During 1991, the Commission developed a new methodology for projecting the impact of guideline amendments on the federal prison population. The new methodology identifies the cases sentenced during the most recent fiscal year that would have been affected by each of the proposed amendments and then "resentences" each case using the proposed changes in the guidelines. The resentencing process employs an averaging procedure that allocates sentences that were previously within the guideline range to the midpoint of the newly calculated range. For those cases identified as departures, the hypothetical sentence is determined to be the same as the sentence imposed under the existing guidelines. Therefore, some departure cases ultimately become guideline sentences. Once the hypothetical resentencing operation is complete, the change in person months of prison attributable to a proposed amendment can be determined for each case identified. The final step in the analysis is to aggregate the change in person months for all cases.

This new methodology was employed in 1991 to estimate the potential change in the size of the prison population for amendments to the bank robbery, extortion, explosives and firearms guidelines. 91 Using monitoring data for individuals sentenced in 1990, the analysis predicted that of the 28,131 sentences imposed, 1,774 would change as a result of implementation of the proposed guidelines, resulting in an increase of 2.5 percent in the size of the prison population.

## Recidivism Research

During 1991, the Commission continued research into one of the statutory purposes of sentencing, namely the "need to afford adequate deterrence to criminal conduct and to protect the public from further crimes of the defendant."

The primary objective of the research is to assess the predictive power of the Commission's criminal history categories (i.e., the ability of the guidelines' criminal history score to predict recidivism).

The research has been envisioned as a three-part program involving analyses of three different datasets. These datasets include: (1) the 1978 federal prison release cohort, (2) the 1985 sen-

<sup>89 28</sup> U.S.C. § 994(g).

This quantity approximates the long-term change in the size of the prison population attributable to a particular amendment.

<sup>91</sup> See Amendment Nos. 365, 366, 373, 374, and 404.

<sup>92 18</sup> U.S.C. 3553(a)(2).

tence cohort and (3) the 1989 sentence cohort. Because a minimum five-year follow-up period is usually necessary for such studies (especially to track individuals with lengthy prison sentences), only the 1978 releases are available at this time for complete study. Preliminary work has begun on the 1985 sentencing cohort, while data collection on the 1989 sentencing cohort is likely to begin in 1993, but may not be complete until several years later. This last study will be the first such recidivism study on individuals sentenced under the guidelines.

The Commissions' study will employ multivariate models to analyze the time from release from custody to reconviction. <sup>95</sup> Use of these models permits testing of the association between the guidelines' criminal history score and the time before an individual defendant is arrested for committing another crime. The models also allow determination of the effect of age, gender, type of release, education and substance dependence on recidivism rates.

The Research Studies Office completed its preliminary analysis of the 1978 release cohort during 1991. The study involved the analysis of 2,268 individuals released from federal prisons in 1978. This sample, originally developed to test the U.S. Parole Commission's revised Salient Factor Score, was subsequently supplemented with rearrest and reimprisonment records from the National Crime Information Center of the FBI. The preliminary analysis consisted of bivariate studies of the relationship between the percent of individuals recidivating with age and with length of time served. The results suggest a gradual decrease in both arrest and imprisonment recidivism with increasing age.<sup>96</sup>

The Research Studies Office is currently analyzing the second dataset, the 1985 sentence cohort. In order to develop a follow-up period of sufficient length, this study has been separated into two phases. The first phase uses data on 5,100 individuals sentenced to one year or less, and the second employs data on the 5,000 remaining

<sup>93</sup> The term "cohort" generally refers to individuals who experience a common event at some fixed point in time. The 1978 release cohort consists of individuals released from federal prisons during 1978. These individuals may have been sentenced at any point before 1978, and the cohort may include some cases sentenced during the 1950's and 1960's. The 1985 and 1989 sentence cohorts consist of individuals sentenced during either of these two periods. The dates of release for individuals in the 1985 sentence cohort begin in 1985, but some individuals may still be serving sentences at the present time.

Recidivism studies need to measure the time that elapses before individuals are exposed to rearrest or reconviction. Time in prison cannot be considered as exposed time. For that reason, the follow-up period is extended by the amount of time an individual spends in prison. Thus, an individual who receives a ten-year sentence under the guidelines typically will not be released until almost nine years after sentencing. For this reason, the 1989 study probably will not have complete data on individuals with long sentences until approximately 2002. This provides for a nine-year period after sentencing (1997) and a five-year follow-up period. It is expected that the second half of the 1985 sentence cohort will not be available until approximately 1998.

Examples of these models are found in P. Schmidt and A. D. Witte, <u>Predicting Recidivism Using Survival Models</u>, Springer-Verlag, New York, 1988, and M. D. Maltz, <u>Recidivism</u>, Academic Press, New York, 1984.

<sup>96</sup> Two limitations of the 1978 dataset should be noted. First, it excludes individuals with sentences of less than one year. Second, and perhaps more importantly, the sample tends to be quite dated; some of the defendants in the dataset were sentenced 15 or more years ago.

defendants who were sentenced to longer terms of imprisonment. Research on the first phase began during 1991 and will continue during 1992, while the second phase will be deferred until an adequate follow-up period has elapsed.

The primary source of the 1985 data is an augmented version of the Administrative Office of the U.S. Court's Federal Probation Sentencing Supervision Information System (FPSSIS). These data were used in earlier research to estimate the length of time served by defendants sentenced before the development of the guidelines. This dataset also served as the pre-guideline dataset for the congressionally mandated four-year evaluation of the sentencing guidelines. Two potential secondary sources of criminal history data for the offenders in this sample are FBI Criminal History records and the Bureau of Prisons presentence reports.

Table 57 depicts the distribution of all cases in the 1985 sentence cohort by offense type. This figure shows the most common offense category in this cohort is embezzlement/fraud (33%) followed by drug offenses (19.2%).

Table 57

1985 SENTENCE COHORT BY PRIMARY OFFENSE TYPE

OFFENSE TYPE	FREQUENCY	PERCENT	CUMULATIVE FREQUENCY	CUMULATIVE PERCENT	
Homicide	28	0.5	28	0.5	
Robbery	127	2.5	155	3.0	
Assault	151	2.9	306	5.9	
Burglary/B&E	171	1.4	377	7.3	
Embezzlement/Fraud	1733	33.5	2261	43.7	
Auto Theft	108	2.1	2369	45.8

Drug Offenses	995	19.2	3740	72.2	
General Offenses	591	11.4	4331	83.6	
Immigration	185	3.6	4516	87.2	
Other Federal Statutes	637 <sup>′</sup>	12.2	5133	99.4	
Not Classified	34	0.6	5187	100.0	

NOTE: Included in this table are all cases in the 1985 Sentence Cohort which is comprised of offenders sentenced between October 1, 1984, and September 30, 1985, to a year or less of prison or probation. There are two "general" categories which group together several offense types which have few offenders. For the "GENERAL OFFENSES" categories, offense types such as, kidnapping, perjury and gambling are grouped together. In the "OTHER FEDERAL STATUTES" category, offenses such as civil rights violations and customs laws are included. The "NOT CLASSIFIED" category includes all offenders whose offense type is "missing."

# D. MANDATORY MINIMUM STUDY

In August 1991, pursuant to a directive contained in the 1990 omnibus crime legislation, 97 the Commission submitted an extensive report to Congress on statutory mandatory minimum sentencing provisions. 98 The statutory directive mandating the report called for a variety of empirical and policy analyses on the relationship between mandatory minimums and sentencing guidelines. In response, the Commission produced a 400-page report that included: 1) an historical overview of the use of mandatory minimum provisions in federal sentencing; 2) an analysis of the policy rationales that have led to enactment of mandatory minimum sentencing laws; 3) a comparison of how sentencing guidelines and mandatory minimums function; 4) an extensive empirical study of the operation and impact of mandatory minimum sentencing provisions in the federal criminal justice system; 5) the results of confidential surveys of judges, attorneys, and probation officers regarding mandatory minimum sentencing laws; and 6) an assessment of alternative methods by which Congress can influence sentencing policy other than through mandatory minimums.

Based on the extensive research and analysis detailed in the report, the Commission set forth its principal findings. Among these findings are the following:

 There are over 60 criminal statutes that contain mandatory minimum penalties applicable to federal offenses in the federal criminal code today. Only four of these sixty statutes, however, frequently result in convictions; the four relate to drug and weapons offenses.

- The available data suggest that mandatory minimum sentences are not applied to all cases that meet the statutory criteria of eligibility. This lack of uniform application creates unwarranted disparity in sentencing and compromises the potential for the guidelines sentencing system to reduce disparity.
- The structure of the federal sentencing guidelines distinguishes defendants convicted of the same offense by a variety of aggravating and mitigating factors, the consideration of which is meant to provide just punishment and proportional sentences. Mandatory minimums, on the other hand, lack these distinguishing characteristics and group together dissimilar defendants. It appears that an unintended effect of mandatory minimums is <u>unwarranted</u> sentencing uniformity.
- Defendants plead guilty to offenses carrying non-mandatory minimum or reduced mandatory minimum provisions in 35 percent of the cases in which available data strongly suggest that the defendant's behavior warrants a sentence under a mandatory minimum stat-

<sup>97 (</sup>P.L. 101-647 § 1703).

<sup>98 &</sup>lt;u>United States Sentencing Commission Special Report to Congress: Mandatory Minimum Penalties in the Federal Criminal Justice System</u> (August 1991).

ute. Because the charging and plea negotiation processes are neither open to public review nor generally reviewable by the courts, the honesty and truth in sentencing intended by the guidelines system is compromised.

- Deterrence, a primary goal of the Sentencing Reform Act, is dependent on certainty and appropriate severity of punishment. While mandatory minimum sentences may increase severity, the data suggest that uneven application may dramatically reduce certainty.
- The sentencing guidelines system is essentially a system of finely calibrated sentences. The guidelines provide each offense category with a base offense level that increases or decreases with the presence of specific offense characteristics. For example, the guidelines distinguish between a bank robbery in which a gun was merely possessed and one in which a gun was fired at a victim. In marked contrast, the mandatory minimums are essentially a flat, tariff-like approach to sentencing. Whereas guidelines seek a smooth continuum of punishment, mandatory minimums result in "cliffs." These cliffs compromise proportionality, a fundamental prerequisite of just punishment and a primary goal of the Sentencing Reform Act.

The Commission's report concludes that the "most efficient and effective way for Congress to exercise its powers to direct sentencing policy is through the established process of the sentenc-

ing guidelines. . . . There is every reason to expect that by so doing, Congress can achieve the purposes of mandatory minimums while not compromising other goals to which it is simultaneously committed."

# Appendix A

**Description of Datafiles, Variables, and Footnotes** 

#### Introduction

Pursuant to statute, courts are required to forward sentencing information to the Commission on all defendants sentenced under the Sentencing Reform Act of 1984, except in cases that solely involve petty offenses. Standard information on each case is computerized for analysis using data from case files received.

The tables included in the body of this report have been developed using the United States Sentencing Commission's data file, MONFY91. This data file includes information on all (33,419) defendants sentenced under the Sentencing Reform Act of 1984 during fiscal year 1991 (October 1, 1990, through September 30, 1991), for whom data were received by the Commission as of January 17, 1992. Given the nature of the data file and reporting requirements, the following types of cases are not included in the data presented here: cases initiated but for which no convictions were obtained; defendants convicted for whom no sentences were yet issued; and defendants sentenced but for whom no data were submitted to the Commission.

Due to the termination of the Administrative Office of the U.S. Court's Federal Probation Sentencing and Supervision Information System (FPSSIS) in September of 1990, the Commission now collects variables previously imported from the FPSSIS data collection system. Information appearing on tables previously derived from FPSSIS indicators may appear to have changed from 1990 to 1991. Any such changes should be interpreted with caution. Rather than actual changes occurring in the federal judicial system, these differences may be a function of different data collection methods or the result of having a centralized and strictly monitored data collection system.

Because the USSC collects information only on cases sentenced under the guidelines, and because of the termination of the FPSSIS data collection, sentencing information on cases sentenced under prior law (pre-guideline) during FY1991 is not available.

#### **Variables**

The following section describes, in alphabetic order, the variables used in the tables of the Monitoring section of this report (Part A of Chapter Five) and Appendices B and C.

#### Age

Age represents the age of the defendant on the day of sentencing, and is calculated utilizing the date of birth of the defendant as reported in the Presentence Report and the date of sentencing as reported in the Judgment of Conviction Order.

#### Average Length of Imprisonment

Sentencing information is obtained from the Judgment of Conviction Order. Average Months Prison is the mean term of imprisonment ordered for cases involving a commitment to the Bureau of Prisons; cases that received no term of imprisonment are not included in the calculation of the average. Cases for which a term of imprisonment was ordered but the length was indeterminable also are excluded from these calculations. In most cases for which the exact term is unknown, the Judgment of Conviction Order merely specified a sentence of time served. Life sentences are treated in the calculation as 360 months.

#### Cases Received by the USSC

Each Case as recorded by the USSC involves a single sentencing event for a single defendant. Multiple counts, and even multiple indictments, are considered a single sentencing event if sentenced at the same time by the same judge. A single defendant may appear in more than one case if involved in more than one sentencing event. Multiple codefendants in the same sentencing each appear as a separate case.

### **Chapter Two Guideline Applied**

Chapter Two Guideline Applied represents the Chapter Two (offense specific) guidelines applied in single and multiple count cases. Because a single case may reference several different guidelines, the total percent adds to more than 100 percent. For Chapter Two guidelines that list possible cross-references resulting in application of multiple guidelines, both the original and cross-referenced guideline(s) are included. However, if application of a specific cross-reference is required, only the original guideline is coded to avoid double-counting for these cases.

#### Circuit

Information on judicial *Circuit* is generated by computer using the location of the judicial district in which the defendant was sentenced.

#### Citizenship Status

Information on the *Citizenship Status* of defendants is obtained from the Presentence Report. Defendants are categorized as "U.S. citizen," "resident alien," "illegal alien," and "non-citizen, alien status unknown." The latter three categories are collapsed into the category of "non-citizen."

#### **Country of Citizenship**

Information on the *Country of Citizenship* for non-citizen defendants is obtained from the Presentence Report. The most frequently occurring countries of origin for non-citizens are presented in this report. Countries appearing less than fifty times are collapsed into the "other" category.

#### **Criminal History Category**

Criminal History Category is taken from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 92.4 percent of cases for which the Commission has received such documents.

When the criminal history category is not specified in the Report on the Sentencing Hearing, the computer calculates the criminal history category based on several logical criteria, if available. For instance, if the number of criminal history points is known, or the guideline range and offense level are available from the Report on the Sentencing Hearing, criminal history category is calculated by reference to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing, but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the PSR.

For Table 36 only, criminal history category has been taken from the Presentence Report when the Report on the Sentencing Hearing is not available. While the court may disagree with PSR information, the criminal history category is the same in more than 97 percent of cases for which both documents were received.

#### District

Information on judicial *District* in which sentencing occurred is obtained from the Judgment of Conviction Order.

#### **Document Submission Rates**

Three documents are represented on Table 13: Judgment of Conviction Order (J&C), Presentence Report (PSR), and Report on the Sentencing Hearing. The J&C and PSR are generally submitted in a standardized format. PSR's that are waived by the court are indicated in a separate column. Sealed PSR's are included as *Not Received*. Standardized forms for the Report on the Sentencing Hearing are most frequently submitted; however, transcripts or partial transcripts from the sentencing hearing are included as *Received*.

#### Fines and Restitution

Fine and Restitution information is obtained from the Judgment of Conviction Order. The *Total Receiving Fines and Restitution* includes the number of cases that were ordered to pay a fine, restitution, or both a fine and restitution. Cases involving fines and restitution overlap with other sentencing categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

The Average Dollar Amount of payment ordered, presented both as the Mean and the Median, is the dollar amount of the fine and the restitution ordered for cases involving economic sanctions. Cases that received no fine or restitution are not included in the calculation of the

average. The number of cases upon which the average is based may not equal the *Total Receiving Fines and Restitution*. This is due to the failure of some Judgment of Conviction Orders to specify the dollar amount ordered. The *Sum* of payment ordered reflects the total dollar amount of fines and restitution ordered, excluding cases in which the amount was indeterminable. The median of payments ordered reflects the amount located at the fiftieth percentile of all amounts ordered, excluding cases in which the amount was indeterminable.

#### Gender

Gender of the defendant is obtained from the Presentence Report or through contact with the probation office.

#### **Guideline Defendants Sentenced**

Each Guideline Defendant Sentenced, or Case, as recorded by the USSC, involves a single sentencing event for a single defendant. Multiple counts, and even multiple indictments, are considered a single sentencing event if sentenced at the same time by the same judge. A single defendant may appear in more than one case if involved in more than one sentencing event. Multiple codefendants in the same sentencing will each appear as separate cases.

#### Guideline Departure Rate

Information on *Departures* is obtained primarily from the Report on the Sentencing Hearing. A case is determined to involve no departure if the sentence imposed is within the guideline range established by the court. If the sentence falls outside the guideline range established by the court, the case is coded as a departure and the applicable reasons given by the court are noted.

For cases in which no Report on the Sentencing Hearing is provided or the information contained in it is insufficient, the sentence from the Judgment of Conviction Order is compared to the guideline range recommended in the Presentence Report. No departure is assumed if the sentence imposed falls within the recommended range. However, a determination of departure is not assumed if the sentence falls outside the guideline range recommended by the probation officer, due to possible changes in that range based on court findings. For these cases departure status is coded as missing, (except in the 25% sample, for which the field was contacted for the departure status of cases with no such determination).

#### **Guideline Sentencing Range**

The Guideline Sentencing Range is taken from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 92.4 percent of cases for which the Commission has received such documents.

When the guideline sentencing range is not specified in the Report on the Sentencing Hearing, the computer calculates the guideline sentencing range based on several logical criteria, if available. For instance, if the criminal history category and offense level are available from the Report on the Sentencing Hearing, the guideline sentencing range is calculated by reference to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing, but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the PSR.

In cases for which a guideline sentencing range is trumped by a statutory maximum or mandatory minimum, the original (pre-trumped) guideline sentencing range is reported.

#### Income

The Commission codes *Income* to represent monthly income to the nearest dollar and includes sources other than traditional employment such as welfare payments or unemployment compensation. Zero dollars are entered for persons with no income (whether unemployed, student, etc.). This variable is coded as missing or inapplicable when the Presentence Report indicates erratic or sporadic employment that might make an income value potentially misleading.

#### **Length of Imprisonment**

Sentencing information is obtained from the Judgment of Conviction Order. Length of imprisonment is provided only for cases involving a commitment to the Bureau of Prisons (including the options of home detention, intermittent confinement, and community confinement). Life sentences are included in the category over 60 months. Sentences of a partial month have been rounded to the next month. Differences between the number of cases included and the total number of defendants sentenced to a term of imprisonment are due to missing information on the exact length of the term ordered. In most cases for which the exact term is unknown, the Judgment of Conviction Order merely specifies a sentence to time served.

#### **Mode of Conviction**

Information on *Mode of Conviction* is obtained from the Judgment of Conviction Order. Defendants sentenced subsequent to a plea of guilty or <u>nolo contendere</u> are included in the *plea* category. Defendants sentenced subsequent to a trial by judge or jury are included in the *trial* category. For the purposes of statistical analysis, cases sentenced pursuant to both a plea and a trial are excluded.

#### Offense Level

The final Offense Level used in these tables is taken from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 92.4 percent of cases for which the Commission has received such documents.

When the final offense level is not specified in the Report on the Sentencing Hearing, the computer calculates the offense level based on several logical criteria, if available. For instance, if the guideline sentencing range and criminal history category are available from the Report on the Sentencing Hearing, final offense level is calculated by referring to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing, but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the PSR.

**Primary Offense Category** 

Information on *Primary Offense Category* is obtained from the Judgment of Conviction Order. An offense code was derived for each of up to four counts of conviction in every case, based on the statute(s) and elements of the conviction. The "primary" offense code for the case was determined to be the offense code applicable for the count with the highest statutory maximum. If two or more counts were found to have the same statutory maximum, "primary" offense was selected according to the following (diminishing) order:

- a) violent offenses (including burglary of a residence)
- b) drug offenses
- c) firearm offenses
- d) property offenses
- e) moral offenses
- f) other offenses

In cases involving different offense codes that were similar under this second criterion as well (e.g., two different property offenses with the same statutory maximum), statutory maximum fines were used as tie-breakers. Finally, in the small number of cases unresolved, the offense type that best represented the nature of the criminal behavior was chosen.

For convenience in analysis, a summary variable describing "primary offense category" was derived. This code was generated by grouping similar primary offense codes into a smaller set of categories.

Listed below are the offense types that were grouped into each of the primary offense categories used in this report.

Murder includes first degree murder, felony with death resulting, second degree murder, and conspiracy to murder (with death resulting).

Manslaughter includes involuntary manslaughter and voluntary manslaughter.

Kidnapping/hostage includes ransom taking and hostage/kidnapping.

Sexual Abuse includes sexual abuse of a minor, sexual abuse of ward, criminal sexual abuse, and abusive sexual contact.

Assault includes attempt to commit murder, assault with intent to murder, threatening communication, aggravated assault, conspiracy with attempt to murder, obstructing or impeding officers, minor assault, and conspiracy that includes assault with attempt to murder.

Robbery includes bank robbery, aggravated bank robbery, Hobbs Act robbery, other robbery, and mail robbery.

Arson includes arson and damage by explosives.

Drugs: Trafficking includes drug distribution/manufacture, drug distribution/manufacture — conspiracy, continuing criminal enterprise, drug distribution — employee under 21, drug

distribution near school, drug import/export, drug distribution to person under 21, and establish/rent drug operation.

Drugs: Communication Facility includes use of a communication facility in committing, causing, or facilitating an act that constitutes a drug felony.

Drugs: Simple Possession includes distribution of a small amount of marihuana and simple possession.

Firearms include unlawful possession/transportation of firearms or ammunition, possession of guns/explosives on aircraft, unlawful trafficking, etc. in explosives, possession of guns/explosives in federal facility/schools, use of fire or explosives to commit felony, and use of firearms or ammunition during crime.

Burglary/Breaking & Entry includes post office burglary, burglary of DEA premises (pharmacy), burglary of other structure, bank burglary, and burglary of a residence.

Auto Theft includes auto theft (including parts), receipt/possession of stolen auto or parts, and altered identification numbers/trafficking in altered (auto).

Larceny includes bank larceny, theft from benefit plans, other theft — mail/post office, receipt/possession of stolen property (not auto), other theft — property, larceny/theft-mail/post office, larceny/theft — property (not auto), and theft from labor union.

Fraud includes odometer laws and regulations, insider trading, and fraud and deceit.

Embezzlement includes embezzlement — property, embezzlement from labor unions, embezzlement — mail/post office, embezzlement from benefit plans, and bank embezzlement.

Forgery/Counterfeiting includes counterfeit bearer obligations, and forgery/counterfeit (non-bearer obligations).

Bribery includes payment to obtain office, bribes involving officials, bribery — bank loan/commercial, loan or gratuity to bank examiner, etc., gratuity involving officials, and bribe or gratuity affecting employee plan.

Tax Offenses include receipt/trafficking in smuggled property, aid, etc., in tax fraud, fraud--tax returns, statements, etc., fraud, false statement — perjury, failure to file or pay, tax evasion, evading import duties (smuggle), failure to collect or account for taxes, regulatory offenses — taxes, failure to deposit taxes in trust account, non-payment of taxes, conspiracy to avoid taxes, and offenses relating to withholding statements.

Money Laundering includes laundering of monetary instruments, monetary transaction from unlawful activity, failure to file currency report, and failure to report monetary transactions.

Extortion/Racketeering includes extortionate extension of credit, blackmail, extortion by force or threat, Hobbs Act extortion, travel in aid of racketeering, crime relating to racketeering, and violent crimes in aid of racketeering.

Gambling/Lottery includes engaging in a gambling business, transmission of wagering information, obstruction to facilitate gambling, and interstate transportation of wagering paraphernalia.

Civil Rights include interference with rights under color of law, force or threats to deny benefits or rights, obstructing an election or registration, manufacture, etc., eavesdropping device, other deprivations/discrimination, obstructing correspondence, peonage, servitude, slave trade, intercept communication or eavesdropping, and conspiracy to deprive individual of civil rights.

Immigration includes trafficking in U.S. passports, trafficking in entry documents, failure to surrender naturalization certificate, fraudulently acquiring U.S. passports, smuggling, etc., unlawful alien, fraudulently acquiring entry documents, and unlawfully entering U.S.

Pornography, Prostitution includes dealing in obscene matter, transportation of minor for prostitution/sex, transportation for prostitution/sex (adult), sexual exploitation of minors, materials involving sexual exploitation of minors, obscene telephone or broadcasting, and selling or buying children for pornography.

Offenses In Prisons include contraband in prison, riots in federal facilities, and escape.

Administration of Justice includes commission of offense while on release, bribery of a witness, failure to appear by defendant, contempt, failure to appear by material witness, obstruction of justice, payment to witness, perjury or subornation of perjury, misprision of a felony, and accessory after the fact.

Environmental/Fish And Wildlife includes specially protected fish, wildlife, plants.

National Defense includes evasion of export controls and exportation of arms, etc., without license.

Antitrust includes bid-rigging, price-fixing, and market allocation agreement.

Food and Drug includes false information or tampering with products, tampering to injure business, tampering with risk of death or injury, and violation of regulations involving food, drugs, etc.

Other Miscellaneous Offenses include illegal use of regulatory number — drugs, illegal transfer of drugs, illegal regulatory number to get drugs, drug paraphernalia, forgery/fraud for drugs, dangerous devices to protect drugs, manufacture drugs against quota, endangering life while manufacturing drugs, operate carrier under drugs, endangerment from hazardous/toxic substances, mishandling substances, records, etc., threat of tampering with public water system, tampering with public water system, hazardous devices of federal lands, mishandling other pollutants, records, etc., improper storage of explosives, recordkeeping violation — explosives, possession of other weapon — on aircraft, in federal facility, failure to report theft of explosives, feloniously mailing injurious articles, transport of hazardous material in commerce, interference with flight crew, other offense — aboard aircraft, criminal infringement of copyright, conflict of interest, unauthorized payment, non-drug forfeiture, impersonation, false statement to Employee Act, reporting offenses — labor related, criminal infringement of trademark, unlawful conduct relating to control/cigarettes, trespass, destruction of property, destruction of mail, aircraft piracy, conspiracy to murder (no death, assault, or attempt), conspiracy to commit murder, and all other miscellaneous offenses not previously listed in any of the other categories.

#### Race

Information on Race of the defendant is obtained from the Presentence Report. The categories for race include White, Black, White Hispanic, Black Hispanic, Hispanic, Race Unknown, American Indian or Alaskan Native, and Asian or Pacific Islander. For purposes of this report, the categories of White Hispanic, Black Hispanic, and Hispanic, Race Unknown have been combined into the Hispanic category; and as such the numbers reported may underrepresent Black defendants. As Hispanic is a designation of ethnicity rather than race, Presentence Reports that indicated white or black as the race of the defendant were checked again through contact with probation offices to identify those of Hispanic origin. The Other category includes defendants whose categories are American Indian or Alaskan Native or Asian or Pacific Islander.

### Reason for Departure

Reasons for Departure as given by the sentencing judge are coded for cases involving departures. This information is obtained from the Report on the Sentencing Hearing when available. Courts often provide more than one reason for departure; consequently, on departure tables the percentages across all reasons for departure add up to more than 100 percent. Reasons listed are those given more than three times. The "Other" category includes any other, less frequently given reason.

#### Single and Multiple Count Cases

Information on *Number of Counts* of conviction is obtained from the Judgment of Conviction Order and verified with the Presentence Report. Cases with more than one count of conviction are included in the *Multiple Count* category.

### Type of Guideline Sentence Imposed

Sentencing information is obtained from the Judgment of Conviction Order. The *Total Receiving Prison* includes the number of defendants sentenced (and percent of *Total Cases*) who received a commitment to the Bureau of Prisons. This column includes those receiving *Prison and Supervised Release*, *Prison Only*, and the *New Split Sentence*.

The Prison Only category includes those defendants sentenced to a term of imprisonment only, with no condition of post-release supervision. The Prison and Supervised Release category includes those defendants sentenced to a term of imprisonment followed by a term of supervised release with no conditions of community confinement or home detention. The New Split Sentence is a term used for a new sentence under the Sentencing Reform Act and guidelines. This involves a term of imprisonment followed by a term of supervised release that includes a condition of a term of community confinement or home detention that when added together comprise at least the minimum guideline sentence established by the sentencing court.

The *Total Receiving Probation* column includes the number of defendants sentenced (and the percent of *Total Cases*) who received a term of probation with or without a condition of community confinement, intermittent confinement, or home detention. This column also represents the total of the *Probation Only* and *Probation and Confinement* columns.

The *Probation Only* column includes the number of defendants who received a term of probation without a condition of community confinement, intermittent confinement, or home detention.

Probation and Confinement includes the number of defendants who received a term of probation with a condition of community confinement, intermittent confinement, or home detention.

Other Cases include cases that received an economic sanction only or supervised release only. Cases in the *Total Receiving Prison*, *Total Receiving Probation*, and *Other Cases* categories total 100 percent of cases.

Cases Involving Fines and Restitution overlap with the other categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

The following information corresponds to the footnotes contained in tables provided in Appendix B. Actual figures provided in these footnotes apply only to the national data table. Additional information describing variables and data used is provided earlier in this appendix.

- Table-wide deletion is used to exclude cases missing information on any or all of the following defendant characteristics: Gender, Race, Age, or Income. Nationally, this involves the exclusion of 6,255 cases because of missing information on the following characteristics: Gender (410), Race (730), Age (468), or Income (6,109).
- <sup>2</sup> Cases with missing or indeterminable information on Mode of Conviction (91) are excluded. In addition, 91 cases coded with a value of *both plea and trial* are excluded.
- The *Total Cases* column includes all cases with information available on type of sentence, economic sanction, and primary offense. Table-wide deletion results in the exclusion of cases missing any or all of these indicators. Nationally, 324 mixed law cases and 372 cases missing any or all of these indicators have been excluded: primary offense (89), sentencing alternative (290), and economic sanction type (170).

Cases in the *Total Receiving Prison*, *Total Receiving Probation*, and *Other Cases* categories total 100 percent of all cases; however, *Cases Involving Fines and Restitution* will overlap with the other categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

- Cases involving no term of imprisonment and cases with indeterminable terms are excluded from the calculation of the *Average Months Prison*. Any sentence of days is rounded up to the nearest month. Life sentences are included in these calculations as 360 months. Of the 32,723 cases included in the *Total Cases* column, 7,776 cases involving no term of imprisonment and 342 cases with an unspecified length are excluded from calculation of the average.
- <sup>5</sup> Cases involving no term of imprisonment and cases with indeterminable terms are excluded from the category *Length of Prison Term*. Any sentence of days is rounded up to the nearest month. Life sentences are included in the category *Over 60*. Of the 32,723 cases included

in the *Total Cases* column, 7,776 cases involving no term of imprisonment and 342 cases with an unspecified length are excluded from this category.

- For the purposes of these tables, Drugs Trafficking and Drugs Use of a Communication Facility are combined into Drug Offenses.
- Cases receiving no order of fine or restitution are excluded from the calculation of the *Total Receiving Fines and Restitution*. The number of cases upon which the average is based may not equal the *Total Receiving Fines and Restitution* due to the failure of some Judgment of Conviction Orders to specify the dollar amount ordered. Of the 32,273 cases included in the *Total Cases* column, 21,526 cases involving no order of fine or restitution and 335 cases with an indeterminable dollar amount ordered are excluded from these calculations.

The following information corresponds to the footnotes contained in the "Selected Federal Criminal Justice Indicators," "Crimes Reported To Police," and "Selected Demographic Indicators" tables in Appendix B.

- 1 Cities are listed by amount of sentencing guideline documentation submitted to the USSC.
- Source: Administrative Office of the U.S. Courts. <u>United States Court Directory</u> (Summer 1991). Includes active and senior district judges as of 7/1/91.
- Source: Administrative Office of the U.S. Courts. <u>Statistical Tables for the Twelve-Month Period Ended September 30, 1991</u>. Civil Cases Commenced, Terminated, and Pending During the Twelve Month Periods Ended September 30, 1990 and 1991. Table C. Filings for civil cases for period ended 9/30/91.
- Source: Executive Office for U.S. Attorneys, Evaluation and Review Staff. Represents all attorneys designated as of 10/91 as members of general criminal, organized crime drug enforcement task force, narcotics, financial institution fraud, and strike force units. The Executive Office estimates 70 percent of the attorneys' time is spent on criminal work. Therefore, the number of assistant U.S. attorneys listed for each district represents 70 percent of the total assistant U.S. attorneys allocated. Note: of the 285 assistant U.S. attorneys assigned to the District Court in the District of Columbia, 187 perform only Superior Court functions while the remaining 98 handle federal prosecutions.
- Source: Administrative Office of the U.S. Courts. <u>Statistical Tables for the Twelve-Month Period Ended September 30, 1991</u>. Criminal Cases Commenced, Terminated, and Pending in the District Courts During the Twelve Month Periods Ended September 30, 1990 and 1991. Table D. Filings for felony and misdemeanor cases for period ended 9/30/91.
- Source: Administrative Office of the U.S. Courts, Defender Services Division. Represents FY 1991 and includes members of community defender organizations. Several adjoining districts share assistant federal defenders. Therefore, in these specific cases the number of assistant federal defenders indicated is the total number shared. These districts include

Delaware and New Jersey which share 13 defenders; Southern and Central Illinois and Eastern Missouri which share eight; Eastern, Northern, and Southern New York which share 35; and Eastern, Northern, and Western Oklahoma which share eight.

Characteristics of the Population. 1980 Census of Population. "General Population Characteristics," Part 55, Vol.1, Chapter B, Table 14.
- Source for all federal judicial districts except Puerto Rico: U.S. Department of Commerce, Bureau of the Census. (1988). City County Data Book. Nonfarm employment estimated as the sum of the number of persons employed in private nonfarm establishments (excluding self-employed persons, domestic service workers, railroad workers jointly covered by Social Security and railroad retirement programs, workers on oceanborne vessels, and workers in foreign countries), 1985; the number of persons employed in local government, 1982; and the number of civilians employed in federal government, 1984. Source for Puerto Rico: U.S. Department of Commerce, Bureau of the Census. (September, 1984). Characteristics of the Population, 1980 Census of Population. "Detailed Population Characteristics," Part 53, Vol.1, Chapter D, Table 122 A, B, C.
- Covers support of and assistance to needy persons contingent upon their needs. Includes cash assistance, vendor payments made directly to private purveyors for commodities and services provided under welfare programs, welfare institutions, payments to other governments for welfare purposes, amounts for administration and support of private welfare agencies and other public welfare services.
- 17 Represents employees of financial, real estate, and insurance establishments.
- Represents 1982. Source: U.S. Department of Commerce, Bureau of the Census. (1988). City County Data Book. Data derived from U.S. Bureau of the Census, 1982 Census of Agriculture, State and County Data, Series AC82-A. The acreage designated as "land in farms" consists primarily of agricultural land used for crops, pasture, or grazing. It also includes woodland and wasteland not actually under cultivation or used for pasture or grazing, provided it was part of the farm operator's total operation. All land in Indian reservations used for growing crops or grazing livestock is included as land in farms.

Of the 33,419 guideline cases, 837 cases were excluded due to one or more of the following conditions: missing age (468), missing race (730), or missing gender (410). Descriptions of variables used in this table are provided in Appendix A.

SOURCE: U.S. Sentencing Commission, 1991 Data File, MONFY91.

Table C-2

# TYPE OF GUIDELINE SENTENCE IMPOSED (October 1, 1990 through September 30, 1991)

TYPE OF SENTENCE IMPOSED	NUMBER	PERCENT
Prison and Supervised Release	23,703	72.3
Prison Only	691	2.1
New Split Sentence	694	2.1
Probation and Confinement	2,872	8.8
Probation Only	4,737	14.4
Other	108	0.3
Total	32,805	100.0

Of the 33,419 guideline cases, 324 cases involving mixed law counts (both guideline and pre-guideline) were excluded. In addition, 290 cases were excluded due to missing sentencing information. Descriptions of variables used in this table are provided in Appendix A.

SOURCE: U.S. Sentencing Commission, 1991 Data File, MONFY91.
