#### LETTER FROM THE CHAIRMAN

The President, The Congress, and The Judicial Conference of the United States

I am pleased to transmit this report of the activities and accomplishments of the United States Sentencing Commission in 1992.

During the past few years, the Sentencing Commission has grown from an agency primarily focused on refining the sentencing guidelines to one with a multi-faceted responsibility to collect and analyze data and conduct substantive criminal justice research.

As we look to the future, the Commission is committed to fulfilling its statutory mandate to serve as a clearinghouse for federal sentencing information. We look forward to expanding our role as a primary resource to all branches of government in the development and implementation of sound federal sentencing practices.

Respectfully,

William W. Wilkins, Jr. Judge, U.S. Court of Appeals for the Fourth Circuit

# Introduction

 ${
m T}_{
m he}$  United States Sentencing Commission, an independent agency in the judicial branch of government, is responsible for developing and monitoring sentencing policies and practices for the federal courts. The Commission promulgates sentencing guidelines, subject to congressional review, that prescribe the appropriate form and severity of punishment for offenders convicted of federal crimes. The agency's activities are directed by seven voting members appointed by the President and confirmed by the Senate and two non-voting, ex-officio members. The sentencing reform provisions of the Comprehensive Crime Control Act, Pub. L. No. 98-473 (1984), established the Commission. Its authority and duties are set out in chapter 58 of title 28, United States Code, with procedures for implementing guideline sentencing prescribed in chapter 227 of title 18.

The Commission's sentencing guidelines, as specified in 28 U.S.C. § 991(b)(1), are designed:

- To effectuate the sentencing purposes enumerated in 18 U.S.C. § 3553(a)(2). In brief, those purposes are just punishment, deterrence, incapacitation, and rehabilitation;
- To provide certainty and fairness in meeting these purposes by avoiding unwarranted sentencing disparity among offenders with similar characteristics convicted of similar criminal conduct while permitting sufficient judicial flexibility to account for relevant aggravating and mitigating factors; and
- To reflect, to the extent practicable, advancement in the knowledge of human behavior as it relates to the criminal justice process.

In addition, the Commission is directed by 28 U.S.C. § 991(b)(2) to "develop means of measuring the degree to which the sentencing, penal, and correctional practices are effective in meeting the purposes of sentencing...."

Organized in October 1985, the Commission submitted to Congress on April 13, 1987, its initial Sentencing Guidelines and Policy Statements. Prior to this initial submission, the Commission held 13 public hearings, published two drafts for public comment, and received more than 1,000 letters and position papers from hundreds of individuals and organizations. The guidelines became effective November 1, 1987, following the requisite period of congressional review; they apply to all offenses committed on or after that date.

Shortly after implementation of the guidelines, defendants throughout the country challenged the constitutionality of the Commission and the Sentencing Reform Act on the basis of improper legislative delegation and violation of the separation of powers doctrine. The U.S. Supreme Court rejected these challenges in <u>Mistretta v. United States</u>, January 18, 1989, and upheld the constitutionality of the Commission as an independent judicial branch agency. This decision cleared the way for nationwide implementation of the guidelines.

Since <u>Mistretta</u>, the Commission has continued to address its significant ongoing responsibilities in the research, sentence monitoring, evaluation, and training areas, as well as serving as a clearinghouse of sentencing information for Congress, criminal justice practitioners, and the public. Since nationwide implementation in January 1989, federal judges have sentenced more than 123,000 defendants under the guidelines.

i

The Commission's comprehensive data collection system tracks application of the guidelines and provides support for other Commission activities. Staff members routinely extract, code, and enter data from judgment of conviction orders, presentence reports, statements of reasons, and written plea agreements for all cases sentenced under the guidelines. Research continues on such subjects as offense severity, plea practices, prison impact, recidivism, and just punishment. The Commission also responds to requests from the Congress and the courts for sentencing data and analyses. In 1992, the Commission arranged with the Government Printing Office to place copies of all basic Sentencing Commission publications in more than 50 depository libraries across the nation.

In 1992, the Commission began preparations for a research conference and a national symposium on drugs and violence in furtherance of the directive contained in 28 U.S.C. § 991(b)(2) that the Commission develop means of measuring the degree to which practices are effective in meeting the purposes of sentencing. The research conference will examine such topics as: (1) the role of empirical research in sentencing, (2) the methodology of sentencing research, (3) available sentencing data sources, and (4) the utilization of sentencing data for policy analysis and applied research by Congress, the courts, and the Commission. The Commission sees this conference as a useful first step in stimulating individual research efforts that will assist the Commission and policymakers in assessing the effectiveness of various sentencing and penal practices.

The national symposium will assemble policymakers from the highest levels of federal and state government to focus on the problems of drug abuse and violence in the United States. It will offer an exchange of information and ideas on causation, prevention, and treatment of drug abuse and violence.

# Chapter One Commission Overview

The Sentencing Commission's seven voting members — three of whom must be federal judges — are appointed to staggered six-year terms by the President with the advice and consent of the Senate. By statute, Commissioners hold full-time positions until November 1, 1993, at which time all Commissioners except the Chairman convert to part-time status.

## Organization

The Commission staff of approximately 100 employees, headed by a Staff Director, is organized into five main offices: General Counsel, Monitoring, Policy Analysis, Training and Technical Assistance, and Administration (see Figure A). The **Staff Director** is responsible for planning, coordinating, directing, and allocating resources for all staff activities and special projects. In addition, the Staff Director's office directs the public information functions of the Commission through the Office of Communications.

The Office of General Counsel provides support to the Commission on a variety of legal issues, including the formulation and application of guidelines and guideline amendments, legislative proposals, and statutory interpretations. Legal staff members monitor district and circuit court application and interpretation of the guidelines and advise Commissioners about statutes and legislation affecting the Commission's work. In addition, the legal staff operate a "hotline" on guideline application issues for assistant U.S. attorneys and defense attorneys.

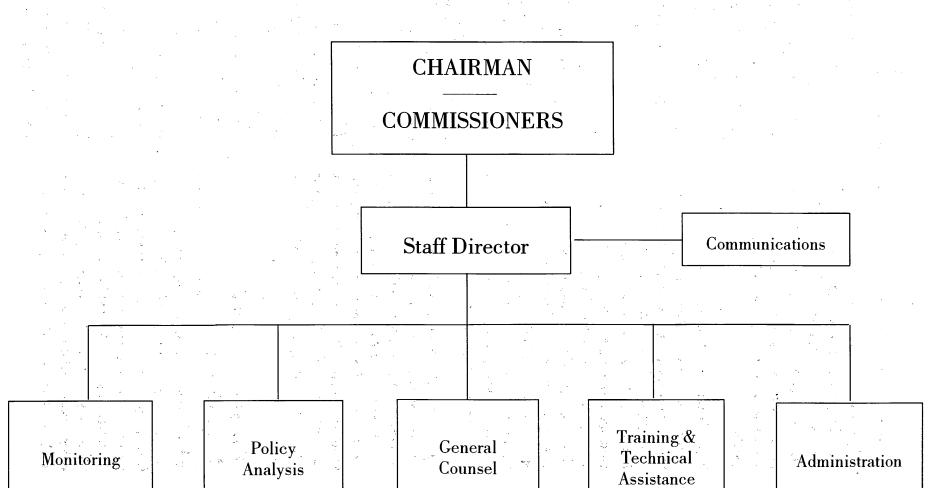

In May 1992, the Commission reorganized its monitoring and research functions, consolidating three offices into two. The staffs of the Research Studies and Evaluation Offices combined with analytical staff from the Monitoring Office to form a new Office of Policy Analysis. The result of this reorganization was a reduction in management positions and more effective use of research staff resources. The realignment allows the Office of Monitoring to concentrate its resources on the short- and long-term tasks associated with data-gathering and dissemination.

The Office of Monitoring maintains a comprehensive computerized data collection system to report on federal sentencing practices and track application of the guidelines for individual cases. The staff receive and input case data and produce periodic reports about guideline implementation. These data and reports provide significant information for Commission review as it monitors the national implementation process or considers amending individual guidelines. Additional applications under development include an appeals database, a real offense database, and a probation revocation/violation of supervised release database. The office updates a master file of guideline sentencing data, available to the public through the Inter-University Consortium for Political and Social Research at the University of Michigan. In addition, this staff provides the Commission with automated data processing support.

The Office of Policy Analysis, working with the Commission's comprehensive sentencing database, provides short- and long-term guideline and sentencing-related research support to the Commission. The offices's efforts focus on a variety of topics including broad criminal justice issues such as deterrence, recidivism, and just

# UNITED STATES SENTENCING COMMISSION

.

in the second second

punishment; the effect of proposed guideline amendments on projections of the federal prisonpopulation; and sentencing practices related to organizational defendants. In addition, the office provides data and analyses on specific criminal justice issues at the request of Congress and the courts.

The Office of Training and Technical Assistance teaches guideline application to judges, probation officers, prosecuting and defense attorneys, and other criminal justice professionals. The staff develop training materials, participate in the sentencing guideline portions of training programs sponsored by other agencies, and provide substantive input in the amendment process by informing the Commission of current guideline application practices. In addition, the office operates a "hotline" to respond to guideline application questions from judges and probation officers.

The Office of Administration provides general administrative support to Commissioners and staff regarding budget and finance, contracting, personnel management, library, facilities, and a variety of other office services. The office provides support to the Staff Director and senior managers in accomplishing project planning and budget forecasting on a short- and long-term basis.

# Management and Administration

During 1992, Commission staff devoted extensive time to planning and implementing the Commission's move from commercial office space to the new Thurgood Marshall Federal Judiciary Building. These efforts included identifying tasks and timelines; preparing individual office layouts and floor plans taking into account cabling, telephone, and electrical needs; designing and installing a new computer network while protecting databases; acquiring and installing computer equipment, a telephone system, a high-density file system, furniture, and fixtures; sorting and inventorying files, publications, and library materials; coordinating with other agencies, tenants, and vendors about required services during or after the move; setting up procedures for administrative, facility, and office support services in the new environment; and inventorying and moving furniture, equipment, files, and library and other office materials.

The Commission improved employee benefits and the functioning of operations by (1) implementing a commuting subsidy program; (2) documenting equal employment opportunity, a new employee probationary period, and other personnel policies and procedures; (3) drafting guidelines for staff representing the Commission at meetings and conferences; and (4) increasing opportunities for staff participation in training outside the agency.

# Staffing

During fiscal year 1992, the Commission used staff resources totaling 100 workyears. Approximately 32 percent of staff resources was spent in various aspects of sentence monitoring efforts, 16 percent in research and analysis, 10 percent in technical assistance and training, and 15 percent in legal activities. The Commissioners' offices, the Staff Director's office, the Communication's office, and the Administrative Office accounted for the remaining 27 percent of staff resources.

## Budget and Expenditures

In fiscal year 1992, Public Law 102-140 provided 108 full-time permanent workyears and an appropriation of \$9,000,000 for the Commission's salaries and expenses. The Commission expended \$8,950,000 from its fiscal year 1992 appropriation. For fiscal year 1993, the Commission was granted 108 full-time permanent workyears and an appropriation of \$9,000,000

.

under Public Law 102-39 (see Table 1). Expenditure of remaining carryover funds from previous supplemental and startup appropriations is planned during fiscal years 1993 and 1994.

1.4

# Chapter Two Guideline Amendments

Legislation creating the Sentencing Commission envisioned that the guidelines would be modified and refined over time. Congress provided that "[t]he Commission periodically shall review and revise, in consideration of comments and data coming to its attention, the guidelines promulgated pursuant to the provisions of this section." 28 U.S.C. § 994(o).

The Commission adopted an iterative approach to guideline development, stating in the <u>Guidelines Manual</u> that the initial draft was "but the first step in an evolutionary process." Accordingly, the Commission refines and modifies the guidelines in light of district and appellate court consideration of the guidelines, research, congressional enactment of new statutes, and input from federal criminal justice practitioners.

## Amendment Authority

By statute, the Commission may transmit amendments to the Congress annually on or after the beginning of a regular session of Congress but not later than the first day of May. Such guideline amendments become effective automatically after the expiration of a 180-day congressional review period, or at a later date set by the Commission, unless the Congress provides otherwise by enactment of law.

## Amendments Promulgated

In 1992, the Commission continued its efforts to clarify and improve the <u>Guidelines Manual</u>, publishing proposed amendments for public comment in the <u>Federal Register</u> on January 2 and 22, 1992. The Commission received extensive written and oral comment on the proposed

amendments in connection with a public hearing held in Washington, D.C., February 25, 1992 (see Table 2). After review of this comment and hearing testimony, the Commission adopted 31 amendments to the sentencing guidelines, policy statements, and official commentary which, along with accompanying reasons, it reported to Congress on April 30, 1992. Congress took no action to delay or revise the amendments during the review period, and they became effective November 1, 1992. An additional eight amendments to clarify commentary to the guidelines did not require submission to Congress and also became effective at that time. Because some of the 31 amendments published in the Federal Register of May 11, 1992, and the eight in the Federal Register of September 16, 1992, were consolidated, the final number listed in the Guidelines Manual is 36.

A number of the amendments promulgated by the Commission in 1992 were substantive and derived primarily from work by interdisciplinary staff working groups. Most amendments were intended to clarify existing guidelines, policy statements, and commentary. Some of the more significant amendments involved the following guidelines:

§1B1.3 (Relevant Conduct) — The amendment clarified and more fully illustrated the operation of this guideline. The amendment included a clearer statement of the principles and limits of accountability under this guideline, clarification of the scope of the defendant's accountability for the conduct of others, and definitions for "same course of conduct" and "common scheme or plan."

- §1B1.11 (Use of Guidelines Manual in Effect on Date of Sentencing) — This amendment created a new policy statement to address the use of the <u>Guidelines Manual</u> when it has been amended between the date the offense was committed and the date of sentencing.
- §2D1.8 (Renting or Managing a Drug Establishment) — The amendment to this section requires consideration of the scale of the underlying controlled substance offense in determining the offense level.
- §2L1.1 (Smuggling, Transporting, or Harboring an Unlawful Alien) — The amendment to this section provided a more direct measure of the scope of the offense through a table with various enhancements based on the number of aliens smuggled, transported, or harbored.
- §3E1.1 (Acceptance of Responsibility) The amendment to this guideline provided that certain defendants with an offense level of 16 or above may qualify for an additional one-level downward adjustment.
- Chapter Five, Part A (Sentencing Table) The amendment to this section expanded the number of offense level categories in Criminal History Category I of the Sentencing Table under which the court has discretion to impose a sentence without imprisonment or confinement conditions.
- §5C1.1 (Imposition of a Term of Imprisonment) — The amendment to this section removed the requirement for some offenders that a "split sentence" include a term of imprisonment of at least one-half the minimum of the guideline range. The revised guideline substituted a requirement that such term of imprisonment be at least one month.

## Working Groups

In June 1992, the Commission convened interdisciplinary staff working groups to study specific guideline areas in detail for consideration during the 1992-93 amendment cycle. Issues for working group study included: money laundering, violent crimes, drugs and role in the offense, white collar offenses, environmental offenses, Sentencing Reform Act prison issues, and juvenile offenders.

Staff working groups typically study a specific guideline issue, profile relevant sentencing practices, identify areas of concern, and recommend options for Commission action. During the process, each group reviews the following information as it pertains to the respective guideline area under scrutiny: Technical Assistance Service and legal section reports of frequent questions ("hotline calls") from probation officers, judges, and attorneys about guideline application; monitoring data regarding sentencing practices and departures; case files of sentenced defendants; previously considered draft amendment proposals; relevant court decisions; public comment; and legislative history and recent legislative enactments. The groups also solicit input from the Commission's Judicial Working Group, the Probation Officers' Advisory Group, and subcommittees of the Practitioners' Advisory Group and the American Bar Association Sentencing Guidelines Committee.

#### Money Laundering

The primary issue addressed by the Money Laundering Working Group was whether the money laundering guidelines — particularly §§2S1.1 and 2S1.2 — appropriately reflect offense seriousness. Public comment submitted to the Commission suggested that because the statutory offense of conviction covered by §2S1.1 (18 U.S.C. § 1956) includes such a broad range of conduct, it may label as "money laundering" conduct that is either directly related to or a part of the underlying crime. For example, a person who knowingly deposits in a bank account the profits of a fraudulent scheme could receive different sentences depending upon whether the conviction was for the underlying crime (fraud) or for the "money laundering" conduct (depositing the proceeds in a bank).

As part of its information gathering, the working group held numerous meetings with practitioners and analyzed computer data drawn from actual case files. The data indicated that offense levels for money laundering counts varied significantly from the offense levels for the underlying counts that formed the basis of the money laundering activity. Specifically, in 93.6 percent of the relevant cases (i.e., in cases not involving sting operations in which there is no underlying conduct), defendants convicted of money laundering also were involved in the underlying crime (i.e., paying off a drug supplier or depositing the proceeds of a white collar crime into a bank). This suggests that the money laundering conduct was incidental to the underlying conduct; however, the offense level for money laundering exceeded that for the underlying conduct 52.5 percent of the time in drug cases and 96.0 percent of the time in non-drug cases. The working group analyzed methods of aligning the money laundering guideline more closely with the underlying conduct.

#### Violent Crimes

During 1992, the Congress, the Attorney General, and the public expressed concern about violent crime. In response, the Commission directed this working group to examine relevant guidelines to determine if they adequately sanction violent crime. More specifically, the group's mandate was not only violent crimes, but also firearms and gang-related criminal activity. The examination of violent crime and firearms focused on (1) whether or not present guideline penalties for these offense types were adequate and (2) specific application problems associated with these guidelines. The purpose of the gang activity study was to lay the groundwork for an examination of whether gang membership and gang crime should be incorporated into the guidelines as sentencing factors.

The working group conducted a systematic study of Chapter Two, Part A guidelines (Offenses Against the Person) and the revised firearm guidelines. The study included computer analyses of data drawn from case files, an analysis of published court opinions dealing with the Chapter Two, Part A guidelines and the revised firearm guidelines, an examination of emerging questions directed to the Commission's Technical Assistance Service, and a solicitation of input from practitioners and probation officers.

To lay the foundation for future research about gangs and gang-related crime, the working group: (1) conducted a literature review of academic and applied journal studies on gangs, (2) surveyed by telephone 21 state sentencing commissions or their counterparts, (3) reviewed pertinent case law, and (4) sought the expert assistance of Department of Justice personnel.

#### Drugs and Role in the Offense

In 1991, the Commission began an in-depth study of the drug guidelines, focusing primarily on the relationship between drug offenses and role in the offense. The Drugs and Role Working Group concentrated that year on guideline sentences for defendants who play a minimal or minor role in offenses involving large quantities of a controlled substance. The working group explored how the drug and/or role guidelines might be modified to reflect the lesser culpability of certain defendants while retaining higher sentences up to and including life imprisonment for the most culpable defendants.

The 1992-93 Drug/Role Working Group built on these earlier efforts by broadening the examination of the quantity-driven drug guidelines. Its principal task was to explore alternative methods of distinguishing among drug offenses and offenders on bases other than drug quantity. In addition, the working group examined the language and legislative history of the 1986 and 1988 Anti-Drug Abuse Acts (which established many of the current mandatory minimum penalties for drug-trafficking offenses), conducted emresearch using the Commission's pirical monitoring database, examined Technical Assistance Service (hotline) data, and reviewed methods used in state guideline systems in sentencing drug trafficking offenders.

In the summer of 1992, the Commission formed a Judicial Working Group composed of one Article III judge from each circuit and the Chairman of the Judicial Conference Committee on Criminal Law. This group's purpose was to examine the operation of the drug guidelines, determine if problems exist, and seek viable solutions given the reality of mandatory minimums. The Judicial Working Group met twice at the Sentencing Commission during 1992 to report on experiences with the sentencing of drug traffickers and to explore alternative guideline strategies. The meetings produced an array of comments for the Drug/Role Working Group to consider in developing proposals.

#### White Collar Crime

The White Collar Crime Working Group, formed to consider guideline issues governing various economic offenses, examined the guidelines for property (Chapter Two, Part B), fraud (Chapter Two, Part F), antitrust (Chapter Two, Part R), and tax (Chapter Two, Part T) offenses. The group omitted certain violent property offense guidelines but considered theft, fraud, and tax guidelines issues that had been raised and deferred during the previous amendment cycle as well as a number of new issues.

The group's research included an evaluation of monitoring data regarding economic offenses; analyses of pertinent case law, information from its coding of a sample of 191 fraud and theft cases, and hotline calls about the theft, fraud, and tax guidelines; and consideration of comment from outside groups such as the Probation Officers' Advisory Group.

The group focused principally on theft and fraud offense and on tax issues. The theft and fraud inquiry included reliance on loss as a primary determinant of offense severity, the guideline definition of loss, calibration of the loss tables, consolidation of the theft and fraud guidelines, enhancement for more than minimal planning, and the abuse of trust adjustment. The tax issues included: the impact of the expanded availability of non-prison sentences on tax offenses, simplification of the tax guidelines, tax offenses involving illegally derived income, and redefining "tax loss."

#### Environmental Offenses

The Advisory Working Group on Environmental Sanctions was formed in 1992 to assist the Commission with the development of sanctions for organizations convicted of environmental offenses. The group is composed of representatives from the Environmental Protection Agency, the Department of Justice, public interest environmental groups, corporations, the private defense bar, and academia. During 1992, the advisory working group conducted a series of informational meetings at which it heard presentations on theories of sentencing, the existing sanctions for organizations, environmental enforcement, and other relevant topics. In late 1992, the working group began to draft a set of organizational guidelines for environmental offenses. The group plans to submit its final recommendations to the Commission in 1993.

#### SRA Prison Issues

The SRA Prison Issues Working Group was formed (1) to examine the penal and correctional provisions of the Sentencing Reform Act of 1984 and determine which provisions require or allow Commission action and (2) to develop and suggest appropriate methods for discharging these statutory obligations.

The working group identified three groups of statutory provisions that either specifically direct or authorize the Commission to take certain actions relating to penal or correctional matters:

(1) Several provisions authorize the Commission to draft policy statements regarding penal or correctional matters. <u>See</u> 18 U.S.C. §§3582(a), 3582(c)(1)(A), 3621(b)(5), 3622, and 28 U.S.C. § 944(a)(2)(F);

(2) Several provisions authorize or direct specific reports or recommendations to Congress for legislative action based on an analysis of the operation of the Bureau of Prisons and general correctional practices. See 28 U.S.C.  $\S$  994(g), 994(q), and 995(a)(20); and

(3) One provision establishes as a purpose of the Commission the development of "means of measuring the degree to which the sentencing, penal, and correctional practices are effective in meeting the purposes of sentencing." <u>See</u> 28 U.S.C. § 991(b)(2).

The working group consulted closely with the Federal Bureau of Prisons and, with its cooperation, studied the Bureau's goals, policies, and  practices regarding the areas in which Congress authorized or directed a Commission response. Specifically, the working group analyzed designation, classification, site, and population data from the Bureau to determine whether the Commission should promulgate policy statements or recommend that Congress undertake legislative action with respect to any of the Commission obligations under the Sentencing Reform Act. The group will continue to monitor these goals, policies, and practices, and will evaluate future corrections issues that impact Commission functions.

#### Juvenile Offenders

The Juvenile Offenders Working Group addressed the Commission's statutory directive at 28 U.S.C. § 995(a)(19) to "study the feasibility of developing guidelines for the disposition of juvenile delinquents." After completing a preliminary analysis of available data, the group began to gather and analyze source documents regarding current sentencing practices under the Juvenile Delinquency Act and initiated a review of literature on theories of juvenile sentencing. During the 1992 amendment cycle, the group prepared a memorandum for the Commission highlighting the significance of <u>United States v.</u> <u>R.L.C.</u>, 112 S. Ct. 1329 (1992), and proposed a guideline that set forth the holding in the case.

12

# Chapter Three Legal Issues

#### Introduction

A large body of case law on federal sentencing has developed since the Supreme Court's 1989 decision rejecting constitutional challenges to the Sentencing Reform Act (SRA) and the creation of the U.S. Sentencing Commission.<sup>1</sup> In fiscal year 1991, the federal courts issued hundreds of opinions interpreting key provisions of the sentencing guidelines and the SRA. For example, the federal appellate courts explored the parameters of relevant conduct,<sup>2</sup> examined the significance of guideline commentary,<sup>3</sup> discussed the interaction of the substantial assistance departure with 18 U.S.C. § 3553(e),<sup>4</sup> and considered the application of the confrontation clause to sentencing.<sup>5</sup> The following overview highlights a number of the most significant legal developments.

#### Supreme Court Review

In 1991, the Supreme Court issued its first opinions on guideline issues since <u>Mistretta</u>.<sup>6</sup> In <u>Chapman v. United States</u>, 111 S. Ct. 1919 (1991), the Supreme Court held that the statutory construction of 21 U.S.C. § 841(b)(1)(B)(v) requires that the carrier weight be included in determining the length of sentences for trafficking in LSD, and that this construction neither violates due process nor is unconstitutionally vague. In a 7-2 opinion, the Court concluded that "Congress knew how to indicate that the weight of the pure drug was to be used to determine the sentence, and did not make that distinction with respect to LSD."<sup>7</sup>

In <u>Burns v. United States</u>, 111 S. Ct. 2182 (1991), the Supreme Court, in a 5-4 decision, held that "before a district court can depart on a ground not identified as a ground for upward departure either in the presentence report or in a prehearing submission by the Government, Rule 32 requires that the district court give the parties reasonable notice that it is contemplating such a ruling." The Court left the timing of the notice to the lower courts, indicating that they are free to adopt appropriate local rules. Under Rule 32, both the defendant and the government enjoy equal procedural entitlements.

In <u>Braxton v. United States</u>, 111 S. Ct. 1854 (1991), the Supreme Court declined to resolve a conflict among the circuits over the meaning of U.S.S.G. §1B1.2 because the Sentencing Com-

<sup>1 &</sup>lt;u>United States v. Mistretta</u>, 488 U.S. 361 (1989).

<sup>2</sup> See, e.g., U.S. v. Wood, 924 F.2d 399 (1st Cir. 1991); U.S. v. Joyner, 924 F.2d 454 (2d Cir. 1991).

<sup>3 &</sup>lt;u>See, e.g.</u>, <u>U.S. v. Anderson</u>, 942 F.2d 606 (9th Cir. 1991) (en banc).

<sup>4</sup> See, e.g., U.S. v. Keene, 933 F.2d 711 (9th Cir. 1991); U.S. v. Dumas, 921 F.2d 650 (6th Cir. 1990).

<sup>5 &</sup>lt;u>U.S. v. Cammisano</u>, 917 F.2d 1057 (8th Cir. 1990).

<sup>6</sup> The Supreme Court also granted certiorari in two cases involving the guidelines. <u>U.S. v. RLC</u>, 915 F.2d 320 (7th Cir. 1990), cert. granted, 111 S. Ct. 2850 (1991) (Whether the sentencing guidelines for adults limit the sentence for juveniles sentenced under the Federal Juvenile Delinquency Act); <u>U.S. v.Williams</u>, 910 F.2d 1574 (7th Cir. 1990), cert. granted, 111 S. Ct. 1305 (1991) (Whether a departure based on both proper and improper reasons can be upheld).

<sup>7 1111</sup> S. Ct. at 1924.

mission already had undertaken an amendment proceeding to eliminate the conflict. The Court observed that the initial and primary task of eliminating conflicts among the circuit courts with respect to the interpretation of the guidelines lies with the Commission. According to the Supreme Court, "... [I]n charging the Commission 'periodically [to] review and revise' the Guidelines, Congress necessarily contemplated that the Commission would periodically review the work of the courts, and would make whatever clarifying revisions to the Guidelines conflicting judicial decisions might suggest."<sup>8</sup>

#### Illegally Seized Evidence, Acquitted Conduct, Standard of Proof

Several circuits in 1991 approved the use of illegally seized evidence in calculating the defendant's sentence under the guidelines.<sup>9</sup> In addition, several circuit courts joined the ranks of circuits that allow the use of acquitted conduct in calculating a guideline sentence.<sup>10</sup> The Ninth Circuit has held, however, that acquitted conduct cannot be used as the basis for an upward departure.<sup>11</sup>

By the end of 1990, all 12 circuits had held that a preponderance of the evidence is generally sufficient to support factual determinations under the guidelines.<sup>12</sup> The Third Circuit, however, in <u>U.S. v. Kikumura</u>, 918 F.2d 1084 (3d Cir. 1990), held that "when the magnitude of a proposed departure dwarfs the guideline range applicable to the substantive offenses of conviction," the facts must be established by at least clear and convincing evidence.

#### **Relevant Conduct**

"Relevant Conduct" (U.S.S.G. §1B1.3) defines the scope of the "acts and omissions" of a defendant and his accomplices for which the defendant will be held accountable for sentencing purposes. The appellate courts have held that quantities of drugs possessed or distributed by co-conspirators in furtherance of jointly undertaken criminal activity that are known or reasonably foreseeable by the defendant may be included as relevant conduct, not just amounts in the offense of conviction or quantities charged in the indictment.<sup>13</sup> However, if a defendant joins a conspiracy near its end for only one transaction, he cannot be held accountable for the entire quantity of drugs distributed during the conspiracy without the court first making a finding that the defendant knew or should have known of the quantities of drugs distributed before he joined the conspiracy.<sup>14</sup> The Seventh Circuit has held

8 111 S. Ct. at 1857-58.

9 <u>See U.S. v. McCrory</u>, 930 F.2d 63 (D.C. Cir. 1991); <u>U.S. v. Torres</u>, 926 F.2d 321 (3d Cir. 1991); <u>U.S. v. Lynch</u>, 934 F.2d 1226 (11th Cir. 1991).

11 See U.S. v. Brady, 928 F.2d 844 (9th Cir. 1991).

12 The Commission noted its agreement with the appropriateness of the preponderance of evidence standard in commentary effective November 1, 1991. See U.S.S.G. §6A1.3, App. C, Amend. No. 387.

13 See U.S. v. Paulino, 935 F.2d 739 (6th Cir. 1991); U.S. v. Wood, 924 F.2d 399 (1st Cir. 1991); U.S. v. Joyner, 924 F.2d 454 (2d Cir. 1991); U.S. v. Richardson, 939 F.2d 135 (4th Cir. 1991). But cf. U.S. v. Davern, 937 F.2d 1041 (6th Cir. 1991), vacated by order of court September 26, 1991, ("uncharged conduct that amounts to a conceptually different offense from the offense of conviction — in the instant case attempt to purchase 500 grams of cocaine was not charged and defendant was convicted of 85 grams — was not adequately considered by the Sentencing Commission and may only be used in sentencing via departure)."

<sup>10 &</sup>lt;u>U.S. v. Allibhai</u>, 939 F.2d 244 (5th Cir. 1991); <u>U.S. v. Moreno</u>, 933 F.2d 362 (6th Cir. 1991); <u>U.S. v. Averi</u>, 922 F.2d 765 (11th Cir. 1991).

that a district court must make an individualized determination of the quantities of cocaine to be distributed that was reasonably foreseeable by the defendant. The court held that it is erroneous to assume that because the total amount of drugs identified in the conspiracy exceeded a certain quantity that each defendant should be held accountable for that amount. The district court must determine the scope of each defendant's agreement as the guidelines require.<sup>15</sup>

# Obstruction of Justice, Acceptance of Responsibility

The guidelines provide a two-level upward adjustment to the offense level if the defendant "willfully obstructed or impeded, or attempted to obstruct or impede the administration of justice during the investigation, prosecution, or sentencing of the instant offense."<sup>16</sup> In 1991, the Fourth Circuit held that the rigidity of the guidelines' obstruction of justice adjustment for a disbelieved denial of guilt under oath places an intolerable burden upon the defendant's right to testify.<sup>17</sup> Other circuits, however, have not found the adjustment to be so inflexible, holding that the obstruction of justice adjustment is not automatic when a defendant testifies and a jury finds him guilty.<sup>18</sup> According to the First Circuit, the sentencing court must make factual findings on this

issue and is not required to apply the obstruction enhancement based solely on the fact that the jury's verdict is inconsistent with the defendant's trial testimony.<sup>19</sup>

The guidelines grant district courts broad discretion to make a two-level downward adjustment [i]f the defendant clearly demonstrates a recognition and affirmative acceptance of personal responsibility for his criminal conduct."<sup>20</sup> In 1991, the appellate courts upheld denials of the acceptance of responsibility adjustment in several cases in which the defendant continued a course of illegal conduct after arrest.<sup>21</sup> The denial of the adjustment for acceptance of responsibility also was upheld in a case in which the defendant was apprehended only after having "been chased down in the middle of a snowstorm with guns,"22 and in a case in which the defendant claimed she never had any criminal intent and blamed all her problems on other people.<sup>23</sup>

#### Adequacy of Criminal History

Guideline 4A1.3 permits a departure if the court finds that "reliable information indicates that the criminal history category does not adequately reflect the seriousness of the defendant's past criminal conduct or the likelihood the defendant will commit future crimes." Several circuit courts

<sup>15 &</sup>lt;u>U.S. v. Thompson</u>, 944 F.2d 1331 (7th Cir. 1991).

<sup>16</sup> U.S.S.G. §3C1.1.

have upheld downward departures from the career offender guideline, finding that the career offender enhancement overstated the seriousness of the defendant's past conduct.<sup>24</sup> According to the Fourth Circuit, "At bottom, 'career offender' is a type of, not an alternative to, criminal history."25 The Third Circuit, however, found that the circumstances relied upon by the district court in making a downward departure from the career offender guideline had been adequately considered by the Sentencing Commission.<sup>26</sup> The Ninth Circuit reversed an upward departure to the career offender guideline range in a case in which the defendant had not been convicted of the two required offenses. The appellate court distinguished a departure based on U.S.S.G. §4A1.3, which allows guided departures when other information provides a reliable substitute for a conviction, and the career offender guideline, which requires certain convictions before enactment. The court viewed the career offender provisions as too blunt an instrument to serve as an analogy for a §4A1.3 upward departure.<sup>27</sup>

The Sixth Circuit found that an upward departure from Criminal History Category II to Criminal History Category VI was improper, stating that the degree of the departure was unjustified. According to the appellate court, the district court must "adequately link its departure to the structure of the guidelines" to ensure a reasonable degree of departure and to further the goal of uniformity.<sup>28</sup>

#### Offender Characteristics

The guidelines provide that offender characteristics such as age,<sup>29</sup> education and vocational skills,<sup>30</sup> mental and emotional conditions,<sup>31</sup> physical condition,<sup>32</sup> previous employment record,<sup>33</sup> and family ties and responsibilities and community ties,<sup>34</sup> are not ordinarily relevant in determining whether to sentence outside of the guideline range. In 1991, several courts identified atypical circumstances and departed based on such offender characteristics. In one case, the circuit court affirmed a downward departure based on the defendant's "unique family responsibility" and other circumstances. The defendant was a single mother who provided the sole support for herself and her two-month-old child. She had been steadily employed for years and was providing financial support for her 16-year-old daughter, who herself was a single mother of a two-month-old child.<sup>35</sup> Similarly, the Sixth Circuit affirmed a downward departure in a case in which the defendant, the leader of an illegal

- 33 U.S.S.G. §5H1.5.
- 34 U.S.S.C. §5H1.6.
- 35 U.S. v. Pena, 930 F.2d 1486 (10th Cir. 1991).

gambling operation, was considered "an exemplary citizen," and the extent of his involvement in civic and community activities "transform[ed] this case from an ordinary to an atypical one."<sup>36</sup> In other cases, the appellate courts have upheld downward departures based on a first offender's aberrant behavior,<sup>37</sup> a defendant's "youthful lack of guidance,"<sup>38</sup> a defendant's physical handicap,<sup>39</sup> and a determination that a defendant's diminished capacity was a contributing factor to the commission of the offense.<sup>40</sup>

The appellate courts have reversed downward departures in cases in which the district court impermissibly considered the defendant's socioeconomic status,<sup>41</sup> the defendant's alcohol or drug abuse,<sup>42</sup> and the defendant's post-arrest rehabilitation efforts.<sup>43</sup> The D.C. Circuit, however, remanded for resentencing a case in which the district court refused to make a downward departure on the basis of the defendant's personal background. The circuit court found that Annual Report 1992

the sentencing judge had defined "socio-economic status" too broadly and had incorrectly concluded that U.S.S.G. §5H1.10 left him no discretion to consider the defendant's special circumstances. According to the D.C. Circuit, "Violence among family members and its attendant dislocations do not follow class lines, nor should class lines determine whether a sentencing judge may consider them."<sup>44</sup>

#### Substantial Assistance, Aggravating and Mitigating Factors

The guidelines allow a district court to depart downward in cases in which the defendant "has provided substantial assistance [to the government] in the investigation or prosecution of another person who has committed an offense."<sup>45</sup> However, the court may not depart under this provision unless the government makes the requisite motion.<sup>46</sup> The appellate courts have upheld the district court's determination not to review the government's refusal to make a motion

- 40 <u>U.S. v. Lauzon</u>, 938 F.2d 326 (1st Cir. 1991).
- 41 <u>U.S. v. Hatchett</u>, 923 F.2d 369 (5th Cir. 1991)(The district court erred in making an upward departure based on the defendant's socio-economic status, educational opportunities, and youthfulness).
- 42 See e.g., U.S. v. Rushby, 936 F.2d 41 (1st Cir. 1991).
- 43 See e.g., U.S. v. Sklar, 920 F.2d 107 (1st Cir. 1990); U.S. v. Pharr, 916 F.2d 129 (3d Cir. 1990).

<sup>36 &</sup>lt;u>U.S. v. Turner</u>, 915 F.2d 1574 (6th Cir. 1990). The Commission has amended the guidelines to indicate that military, civic, charitable, or public service, employment-related contributions, and similar prior good works are not ordinarily relevant in determining whether a departure is appropriate. <u>See</u> U.S.S.G. §5H1.11, App. C, Amend. No. 386.

<sup>37 &</sup>lt;u>U.S. v. Dickey</u>, 924 F.2d 836 (9th Cir. 1991); <u>U.S. v. Takai</u>, 941 F.2d 738 (9th Cir. 1991); <u>U.S. v. Pena</u>, 930 F.2d 1486 (10th Cir. 1991).

<sup>38 &</sup>lt;u>U.S. v. Floyd</u>, 945 F.2d 1096 (9th Cir. 1991).

<sup>39 &</sup>lt;u>U.S. v. Greenwood</u>, 928 F.2d 645 (4th Cir. 1991).

<sup>44</sup> U.S. v. Lopez, 938 F.2d 1293, 1298 (D.C. Cir. 1991). The circuit court also concluded that it lacked authority to review the adequacy of the Commission's statement of reasons in support of its conclusion that age is not ordinarily relevant to sentencing outside the guideline range. The circuit court stated, "That by subjecting the promulgation of the guidelines to . . . one section of the APA, Congress affirmed that the Commission's rulemaking was not subject to any other provision of the APA, including those for judicial review." Id. at 1297.

<sup>45</sup> U.S.S.G. §5K1.1.

<sup>46 &</sup>lt;u>See e.g.</u>, <u>U.S. v. Harrison</u>, 918 F.2d 30 (5th Cir. 1990); <u>U.S. v. Deases</u>, 918 F.2d 118 (10th Cir. 1990); <u>U.S. v.</u> <u>Santos</u>, 932 F.2d 244 (3d Cir. 1991).

pursuant to U.S.S.G. §5K1.1 in cases in which the defendant failed to make an allegation of bad faith.<sup>47</sup> as well as the district court's refusal to make a departure for substantial assistance based on the defendant's motion.<sup>48</sup> The Second Circuit, however, has upheld a downward departure based on the defendant's "activities facilitating the proper administration of justice in the district court." Although the government did not make a motion for substantial assistance, the district court found that the defendant's decision to plead guilty and cooperate caused his two co-defendants to also plead guilty. The court determined that the defendants' cooperation helped alleviate the "seriously overclogged dockets of the District Courts of the United States." The appellate court found assistance in the administration of justice to be different from "substantial assistance to the authorities" and thus is a proper basis for a downward departure.<sup>49</sup> The Ninth Circuit held that once the government has filed a motion for a substantial assistance departure under U.S.S.C. §5K1.1, it is within the district court's authority to exercise its discretion in determining the appropriate sentence. The appellate court rejected the argument that a motion pursuant to U.S.S.G. §5K1.1 limits the extent of departure to a sentence below the guideline range and that the district court cannot depart below the statutory mandatory minimum absent a government motion under 18 U.S.C. § 3553(e)<sup>50</sup> <u>The Sixth Circuit, on the other hand, held that</u> <u>"section 5K1.1 does not apply to a sentence under</u> section 924(c) since section 5K1.1 applies only to departures from guideline sentences, not from statutory mandatory sentences."<sup>51</sup>

The guidelines and the underlying statute allow a district court to impose a sentence outside the applicable range if the court finds an "aggravating or mitigating circumstance of a kind, or to a degree, not adequately taken into consideration by the Sentencing Commission in formulating the guidelines that should result in a sentence different from that described."52 In 1991, appellate courts continued to affirm upward departures in cases in which district courts found that the guideline sentence did not reflect the seriousness of the offense conduct. Examples include a defendant who assaulted a large number of victims,<sup>53</sup> the potential for tragic consequences and reckless endangerment of human lives in an illegal smuggling case,<sup>54</sup> and a local sheriff who caused a significant disruption of a government function by eroding public confidence in law enforcement by his conviction for mail fraud.<sup>55</sup>

During the same period, appellate courts have reversed upward departures based on a high level of drug purity,<sup>56</sup> extreme psychological in-

- 53 U.S. v. Johnson, 931 F.2d 238 (3d Cir. 1991).
- 54 <u>U.S. v. Reyes</u>, 927 F.2d 48 (1st Cir. 1991).

<sup>52</sup> U.S.S.G. §5K2.0, 18 U.S.C. § 3553(b).

jury to a murder victim's family,<sup>57</sup> and numerous falsehoods in the defendant's testimony.<sup>58</sup> In addition, the Ninth Circuit has held that charges dismissed or not charged as part of a plea bargain may not be the basis for an upward departure.<sup>59</sup> According to the Ninth Circuit, ". . . [T]o let the defendant plead to certain charges and then be penalized on charges that have, by agreement, been dismissed is not only unfair, it violates the spirit if not the letter of the agreement."<sup>60</sup>

Appellate courts have reversed downward departures that were intended to equalize a perceived disparity between a defendant and his co-defendants.<sup>61</sup> According to the Second Circuit, ". . . [T]he Congressional objective was to eliminate unwarranted disparities nationwide. An applicable guideline range may seem harsh (or lenient) when compared to that of a co-defendant, but it is the same range applicable throughout the country for all offenders with the same combination of offense conduct and prior record."<sup>62</sup>

A categorization of the principal departure factors decided by the appellate courts during fiscal year 1991 is set forth below in Tables 3 to 6. Table 3 lists factors that appellate courts have determined warrant downward departure. Table 4, in contrast, lists factors that appellate courts have determined do not warrant downward departure. Tables 5 and 6 continue this pattern for upward departures.

Defendant's extreme conduct in abusing a four-year- old child	<u>United States v. Phillip</u> , 948 F.2d 241 (6th Cir. 1991) cert. denied, 112 S.Ct. 1994 (1992)	
Pattern of uncharged conduct	<u>United States v. DeFelippis</u> , 950 F.2d 444 (7th Cir. 1991) <u>United States v. O'Dell</u> , 965 F.2d 937 (10th Cir. 1992)	
Defendant's terroristic purpose; extreme conduct	<u>United States v. Johnson</u> , 952 F.2d 565 (1st Cir. 1991) <i>cert. denied</i> , 113 S.Ct. 58 (1992)	
Remoteness of past convictions not included in defendant's criminal history score	United States v. Fields, 963 F.2d 105 (6th Cir. 1992)	
Excessive criminal history points	<u>United States v. Lewis</u> , 954 F.2d 1386 (7th Cir. 1992) <u>United States v. Davila</u> , 964 F.2d 778 (8th Cir.) <i>cert. denied</i> , 113 S.Ct. 438 (1992)	
Defendant's increasing the security risk of a prison by selling drugs while on duty	United States v. Siciliano, 953 F.2d 939 (5th Cir. 1992)	
Defendant's continuous scheme of deceit, sexual and forced drug abuse, and "virtual enslavement" of the victim and defrauding her family	<u>United States v. Newman</u> , 965 F.2d 206 (7th Cir.) <i>cert. denied</i> , 113 S.Ct. 470 (1992)	
Defendant's continuous course of criminal conduct; past leniency	<u>United States v. Saunders</u> , 957 F.2d 1488 (8th Cir.) cert. denied, 113 S.Ct. 256 (1992)	
Large quantities of drugs involved	<u>United States v. St. Julian</u> , 966 F.2d 564 (10th Cir.) cert. denied, 113 S.Ct. 348 (1992)	·

FACTORS	CASES
Defendant's possession of drugs with intent to distribute while incarcerated	United States v. Ponder, 963 F.2d 1506 (11th Cir. 1992)
The indiscriminate and uniquely dangerous nature of weapons the defendant possessed	<u>United States v. Dempsey</u> , 957 F.2d 831 (11th Cir.) cert. denied, 113 S.Ct. 241 (1992)
Victim's death	United States v. Ihegworo, 959 F.2d 26 (5th Cir. 1992)
Defendant made death threats against co-defendant and family	<u>United States v. Wint</u> , 974 F.2d 961 (8th Cir. 1992) cert. denied, 61 U.S.L.W. 3479 (1993)
Drug-house guard facilitated management of drug house	United States v. Thomas, 956 F.2d 165 (7th Cir. 1992)
Defendant's extortionate acts disrupted city's public works bidding process	United States v. Sarault, 975 F.2d 17 (1st Cir. 1992)
Three-hour high-speed chase while transporting illegal aliens	United States v. Hernandez-Rodriguez, 975 F.2d 622 (9th Cir. 1992)

## UPWARD DEPARTURE FACTORS DISAPPROVED BY APPELLATE COURTS (October 1, 1991 through September 30, 1992)

FACTORS	CASES
Defendant's juvenile convictions for dissimilar conduct; likelihood of recidivism; parole revocations	United States v. Thomas, 961 F.2d 1110 (3d Cir. 1992)
Concerns for national security where the defendant was convicted of violating the Arms Export Control Act	<u>United States v. Tsai</u> , 954 F.2d 934 (3d Cir.) cert. denied, 113 S.Ct. 93 (1992)
Defendant's "special skill" in manufacturing methamphetamine	United States v. Eagan, 965 F.2d 887 (10th Cir. 1992)

# Chapter Four Guideline Training and Education

In 1992, the Commission provided guideline application assistance in a variety of forms for those involved in the sentencing process:

**Training**. During the year, the Commission coordinated and participated in training sessions across the country on guideline application and sentencing-related matters for judges, probation officers, prosecutors, defense attorneys, and others.

Hotlines. Commission staff responded to telephone inquiries about application of the sentencing guidelines from judges and their staffs, probation officers, assistant U.S. attorneys, and defense attorneys.

**Publications and Training Materials.** During 1992, the Commission published resource materials and prepared a number of training and educational materials in response to requests from criminal justice practitioners.

# Training

Gongress authorized the Commission to "devise and conduct periodic training programs of instruction in sentencing techniques for judicial and probation personnel and other persons connected with the sentencing process." 28 U.S.C. § 995(a)(17) and (18). The Commission recognized that an evolving guideline system along with the steady influx of new practitioners creates a continuing need for effective training programs and materials. In 1992, the Commission provided training to 4,400 individuals at more than 100 training sessions across the country. Participants included circuit and district court judges, probation officers, prosecuting and defense attorneys, investigative case agents, congressional staff members, law clerks, and other government agency personnel. The Commission continued its collaborative training efforts with The Federal Judicial Center and the Departments of Justice and the Treasury to develop and refine permanent, academy-based guideline education programs.

In early 1992, the Commission conducted two week-long national training seminars for probation officers, the first in San Diego, California, February 9-14, and the second in Tampa, Florida, March 8-13. In addition to the 200 attending probation officers, 16 district court judges participated.

At the seminars, Commission faculty provided intensive training on selected guidelines, guidelines for organizational defendants, and significant amendments. Participants also received instruction on developing case law and related sentencing issues, ASSYST (see discussion below), and policy statements for revocation of probation and supervised release. At the Commission's invitation, the Probation Division of the Administrative Office of the U.S. Courts presented a half-day seminar on preparing the presentence report for organizational defendants.

The Commission is grateful to the following probation officers who served as faculty for the Commission's training on organizational guidelines:

#### United States Sentencing Commission

JoAnn Coates Harold Greenberg	Eastern Wisconsin Southern New York
Renee Herriott	Southern California
Paul Larned	Eastern Michigan
Jay Meyer	Minnesota
Paul Michener	Eastern Pennsylvania
Craig Saigh	Nebraska
Kenneth Young	Northern California

In addition to Probation Division staff members Magdeline Jensen and Kim Whatley, the following probation officers served as faculty members presenting the presentence report material:

Michael Berg	Southern Florida	
Michael Higgins	New Jersey	
Kevin Lyons	Western New York	
James Lyons	Southern Florida	
Paul Michener	Eastern Pennsylvania	

#### Court Personnel

The Commission continued to participate in The Federal Judicial Center's orientation program for newly appointed judges, providing two days of training to 68 judges at five programs.<sup>63</sup> In addition, Judges of the Second and Eighth Circuits discussed guideline sentencing issues with Commissioners and staff at a Sentencing Institute held in Lexington, Kentucky, in March 1992, sponsored by The Federal Judicial Center and the Federal Bureau of Prisons.

In 1992 the Commission presented three days of guideline application training to 550 new probation officers during six orientation programs at the National Probation and Pretrial Services Academy near Baltimore, Maryland. Additionally, a new one-day workshop on Chapter Seven of the <u>Guidelines Manual</u> (Violations of Probation and Supervised Release), specifically designed for new officers, was offered during the program.

In conjunction with the Department of Justice's Advocacy Institute, the Commission in 1992 provided guideline training to approximately 350 newly appointed assistant U.S. attorneys at the Basic Criminal Trial Advocacy Program in Washington, D.C., and the Federal Practice Skills Seminars held in various cities across the country.

Working together, the Department of Justice and the Commission designed a 20-hour video series on advanced guideline application issues. Lectures and case scenarios highlighted the series, focusing on such issues as relevant conduct, multiple counts, and sentencing of organizations. The package of nine cassettes with accompanying training materials is distributed to U.S. Attorney offices throughout the country.

During 1992, the Commission responded to the need for increased defense attorney training by organizing an informal task force of representatives from the Commission, the Administrative Office of the U.S. Courts, and The Federal Judicial Center, and the Federal Defenders office. The task force goal is to enhance training opportunities for defense attorneys across the nation, particularly Criminal Justice Act panel attorneys.

#### Local Training

In 1992 the Commission responded to requests for training by conducting training programs in 40 localities with an approximate combined attendance of 1,700. A majority of the requests for training came from probation officers, but many

63 Two of these programs were held in Atlanta, Ga., two in Denver, Co., and one in Richmond, Va.

came from judges, defense attorneys, prosecutors, and appellate court staff attorneys. Throughout the year, Commissioners and staff lectured widely on sentencing issues at training sessions, academic seminars, judges' meetings, and professional conferences. In addition, Commission staff made eight presentations about the organizational sentencing guidelines to groups of prosecuting and defense attorneys and business officials.

#### Investigative Agents

The Commission responded to Treasury Department requests for guideline training of senior investigative agents from the Bureau of Alcohol, Tobacco, and Firearms conducted at the Federal Law Enforcement Training Center (FLETC) in Glynco, Georgia. A collaborative program with the Financial Fraud Institute provided additional training for case agents. In the fall of 1992, the Commission staff and FLETC representatives successfully transferred this training responsibility to several experienced U.S. probation officers:

Robert C. Hughes, Jr.	Georgia Middle
Robert P. Longshore	Alabama Middle
Jay Meyer	Minnesota
Paul Michener	Eastern Pennsylvania
Michael A. Nissen	Western Michigan
Franklin J. Olvera	Western Texas
Oscar Stephenson, Jr.	Northern Alabama
Thomas N. Whiteside	South Carolina

# Hotlines

I he Commission's judge and probation officer hotline and attorney hotline continued to assist federal judges, probation officers, assistant U.S. attorneys, and defense attorneys with guideline application. Initially envisioned as temporary services, the hotlines have become invaluable sources of continuing education for both practitioners and Commission staff and prompted the decision to make them permanent components of the Commission's guideline education and training efforts. The hotlines are open to callers Monday through Friday between 8:30 a.m. and 5:30 p.m., EST.

In an advisory capacity, the hotlines assist callers in applying the sentencing guidelines. Subject to the caution given all callers that hotline advice is neither binding on the court nor to be represented as the official position of the Sentencing Commission, staff answer questions not involving subjective judgments. Those questions involving a subjective determination by the judge, such as whether a defendant should receive an adjustment for acceptance of responsibility, are answered by reference to pertinent guidelines, commentary, or policy statements. For debatable questions or interpretations of correct application, staff assist the caller in understanding alternative approaches, emphasizing that such decisions are left to the courts.

#### Calls Received in 1992

The judge and probation officer hotline responded to 2,036 questions in 1992, an average of 170 questions per month. Since its inception, this hotline has responded to more than 10,000 questions from probation officers, judges, and law clerks.

Table 7 organizes by guideline section the questions received by this hotline in 1992. The greatest number of questions (200) related to the criminal history guidelines. Inquiries regarding probation and supervised release violations and questions regarding drugs ranked second, each with 136, followed by multiple counts (124), relevant conduct (112), and career offenders and armed career criminals (110).

Table 8 shows the number of calls made from each district to the judge and probation officer hotline in 1992. The table provides a national breakdown of hotline use by probation offices; it should not be interpreted as indicating any district's level of guideline application proficiency.

During 1992, the attorney hotline responded to several hundred guideline application questions from assistant U.S. attorneys and defense attorneys.

#### Hotline Quality Control

In the process of responding to hotline questions, Commission training and legal staff regularly consult with each other to ensure that questions are fully researched and accurately answered. To assist with quality control, staff maintain a log of calls received and the responses provided. The Commission began this log in 1988 using a computer program specifically developed to document hotline calls. The program provides an easily accessible database that allows staff to check whether a similar question has been asked previously, thereby speeding research efforts and enabling more consistent and accurate responses.

In response to requests from probation officers, the Commission developed a similar computer program for use in probation offices across the nation. Called "SC\_HELP" (Sentencing Commission Hotline Extended Library Program), the program was field tested in 1991 and distributed early in 1992. SC\_HELP allows probation officers to develop their own database of questions and answers on a variety of topics (<u>e.g.</u>, guideline application, procedural issues, local rules). The program also includes Volume V of the Commission's <u>Most Frequently Asked Questions About</u> the Sentencing Guidelines.

#### Temporary Assignment Program

The Commission's temporary assignment program for probation officers, assistant U.S. attorneys, and assistant federal defenders has proven successful in promoting guideline application training and in providing a link between the Commission and practitioners. Temporary duty for probation officers consists of a six-week assignment. The average attorney detail lasts six months. While at the Commission, participants help staff the hotlines, become involved in the amendment process, and assist with various projects. The Commission bears the cost of the participants's travel, per diem, and living expenses during the temporary assignment.

Twenty-one probation officers representing 16 districts and 20 different offices participated in the Commission's temporary assignment program in 1992. The home districts of these officers represent a diverse geographical constituency and provide the Commission with broad insight into sentencing practices in various regions. Since the program's inception, 79 officers representing 39 districts have participated. Probation officers from nine additional districts have been scheduled for 1993-94. Since it began in 1988, five assistant federal defenders and seven assistant U.S. attorneys have participated in the visiting attorney temporary assignment program.

Both those on temporary assignment and the Commission benefit from this program. During their tenure at the Commission, program participants become proficient in guideline application and gain exposure to the many different types of cases sentenced in the federal system. They also acquire a broader perspective of the criminal justice system through observation of Commission operations and guideline development and refinement. These probation officers and attorneys return to their districts as valuable resource

#### United States Sentencing Commission

persons. Through interaction with officers and attorneys who apply the guidelines on a regular basis, the Commission benefits by acquiring a better understanding of the practical concerns confronting practitioners.

The following probation officers participated in the Commission's temporary assignment program in 1992:

<b>Probation</b> Officer	<u>City (District)</u>
Todd Sanders	Seattle, WA (Western Washington)
Shari McCoy	Washington, DC (Washington, DC)
Rodger Brisko	Houston, TX (Southern Texas)
Belinda English	Detroit, MI (Eastern Michigan)
Dee Howard	Austin, TX (Western Texas)
Julie Belt	Minneapolis, MN (Minnesota)
Henry Enrique Saldana	McAllen, TX (Southern Texas)
Billy Maples	Shreveport, LA (Western Louisiana)
Kristine Disney	Oklahoma, OK (Western Oklahoma)
Phillip L. Kirk	Durant, OK (Eastern Oklahoma)
Beth Ault	Richmond, VA (Eastern Virginia)
Gloria Garber	Miami, FL (Southern Florida)
Mike Pascarella	Philadelphia, PA (Eastern Pennsylvania)
Frank Olvera	San Antonio, TX (Western Texas)
Ed Cottrell	Alexandria, VA (Eastern Virginia)
Tom Goleman	Shreveport, LA (Western Louisiana)
Mary Frances Barnes	Anchorage, AK (Alaska)
Bill Cazales	Corpus Christi, TX (Southern Texas)
Jim Schloetter	San Francisco, CA (Northern California)
Donna Bailey	Honolulu, HI (Hawaii)
Jim Dier	Wichita, KS (Kansas)

The following assistant U.S. attorneys and assistant federal public defenders participated in the Commission's temporary assignment program in 1992:

<u>Assist. U.S. Attorney</u> Dan Bach Deborah Dealy-Browning <u>City (District)</u> Madison, WI (Western Wisconsin) Eugene, OR (Oregon)

Assist. Federal Defender Michael Dwyer Jackie Rubin <u>City (District)</u> East St. Louis, IL (Eastern Missouri, Western Illinois) Miami, FL (Southern Florida)

Annual Report 1992

# Publications and Training Materials

The Commission published in March 1992 Volume V of <u>Most Frequently Asked Questions About</u> the Sentencing Guidelines, which comprises 125 questions and answers that address substantive areas of concern in guideline application identified through hotline calls and Commission training seminars. The Commission also publishes annually a summary entitled <u>Amendment Highlights</u>, which offers a synopsis of new substantive and clarifying amendments. The Commission's biannual Selected Guideline Application Decisions, organized by pertinent guideline section and judicial circuit, summarizes selected cases involving application of the guidelines or related sentencing issues.

# ASSYST

 $T_{
m he}$  Commission coordinated improvements and modifications to the ASSYST software used by probation officers and others as an aid to guideline application. In its most recent version (ASSYST 1.3), improvements included the incorporation of guideline amendments, 42months of applicable case law by individual guideline section, and several additional elements for the presentence report "shell." In addition, function keys were updated to include 1992 guideline text and commentary. This version of ASSYST incorporates four editions of the Guidelines Manual to assist with ex post facto considerations. The updated software was made available during the fall to U.S. probation offices, the Executive Office of U.S. Attorneys, federal public defenders, the American Bar Association, and the National Association of Criminal Defense Lawyers.

# Chapter Five Research

# A. MONITORING

# Background and Data Collection Activities

## Statutory Requirements

The Commission collects, prepares, and analyzes data on guideline sentences to support its varied activities. As authorized by Congress, the Commission has numerous research responsibilities, including:

- the establishment of a research and development program to serve as a clearinghouse and information center for the collection, preparation, and dissemination of information on federal sentencing practices (28 U.S.C. § 995(a)(12));
- the publication of data concerning the sentencing process (28 U.S.C. § 995(a)(14));
- the systematic collection and dissemination of information concerning sentences actually imposed and the relationship of such sentences to the factors set forth in section 3553(a) of title 18, United States Code (28 U.S.C. § 995(a)(15)); and
- the systematic collection and dissemination of information regarding the effectiveness of sentences imposed (28 U.S.C. § 995 (a)(16)).

In large part, the Commission's systematic collection and reporting of information on guideline cases drives the agency's research mission. As required by Congress: The appropriate judge or officer shall submit to the Commission in connection with each sentence imposed (other than a sentence imposed for a petty offense, as defined in title 18, for which there is no applicable sentencing guideline) a written report of the sentence, the offense for which it is imposed, the age, race, and gender of the offender, information regarding factors made relevant by the guidelines, and such other information as the Commission finds appropriate. The Commission shall submit to Congress at least annually an analysis of these reports and any recommendations for legislation that the Commission concludes is warranted by that analysis (28 U.S.C. § 994(w)).

Pursuant to its authority under 28 U.S.C. §§ 994(w) and 995(a)(8), and after discussions with the Judicial Conference Committee on Criminal Law and the Administrative Office of the U.S. Courts (AO), the Commission requested that probation offices in each judicial district submit the following documents on every defendant sentenced under the guidelines:

- Presentence Report (PSR)
- Guideline Worksheets
- Report on the Sentencing Hearing (statement of reasons for imposing sentence as required by 18 U.S.C. § 3553(c))
- Written Plea Agreement (if applicable)
- Judgment of Conviction

#### USSC Data Collection

Throughout fiscal year 1992 (October 1, 1991, through September 30, 1992, hereinafter "1992"), the Commission continued to expand the scope of its computerized data file on defendants sentenced under the guidelines. On an ongoing basis, the Commission collects data in three major modules:

Module I, Receipt Control, is a document control system that provides a mechanism for identifying cases. Module II, Basic Sentencing Information, collects sentencing information on each defendant as documented in the Judgment of Conviction order, as well as statutory and guideline provisions from the Presentence Report and Report on the Sentencing Hearing. Module III, Guideline Application and Departures, captures the complete range of guideline decisions made by the court and departure information on each case.

A fourth data collection module, the **Probation** and **Supervised Release Violation Module**, monitors court decisions regarding probation and supervised release violations; however, due to conflicting interpretations of the statute, some circuits do not use the Commission's Chapter Seven policy statements on revocations, biasing current data collection efforts.

A new data collection system to track appeals has been developed and pretested, and work is progressing on additional modules that will record real offense factors, detailed criminal history characteristics, and sentencing data for organizational defendants.

The Monitoring data file for 1992 provides the Commission and the public with frequencies and descriptive statistics on all guideline cases sentenced within the past fiscal year. This file, with individual identifiers deleted, is available through the Inter-University Consortium for Political and Social Research at the University of Michigan. The Commission makes additional datasets available to the Consortium on a regular basis.

#### Data Collection Issues

The Commission received documentation on 38,258 cases sentenced under the Sentencing Reform Act between October 1, 1991, and September 30, 1992.<sup>64</sup> As used in this report, a "case" is defined as a single sentencing event for a single defendant (even if it includes multiple indictments or multiple convictions consolidated for sentencing).

With the elimination of sentencing factors from the AO's Federal Probation Sentencing and Supervision Information System (FPSSIS) data entry system, the Commission has no direct way to ascertain the ratio of guideline to pre-guideline cases or the rate in which guideline cases are reported to the Commission. Despite possible reporting problems experienced by the Monitoring data system, however, differences in general characteristics or descriptive statistics about the national population of defendants sentenced pursuant to the guidelines are expected to be minor. However, reporting problems specific to individual districts or offices may result in more substantial difficulties if generalizations are made to the actual district populations. It is important to note that all data collected and analyzed by the Commission reflect only reported populations (i.e., cases in which appropriate documentation was forwarded to the Commission).

While the degree of potential non-reporting is estimated to be small, further study would be

<sup>64</sup> Reported figures exclude cases involving solely petty offenses, organizational defendants, or diversionary sentences. The USSC Monitoring data file used for this report, MONFY92, includes defendants sentenced during fiscal year 1992 for which information was received by the Commission as of January 26, 1993.

required to uncover any biases associated with non-reporting. For example, one known reporting bias arising from fewer reported magistrate cases is the potential for slightly higher rates of imprisonment, longer average prison terms, and fewer cases among less serious crimes. Other unknown reporting biases could enhance or counteract these biases.

As noted previously, the Commission should receive up to five documents on each case sentenced pursuant to the guidelines. In 1992, the Commission received Presentence Reports (PSR) for 97.1 percent of the cases (in an additional 1.5% of the cases the PSR was known to have been waived) and Judgment of Conviction Orders for 99.4 percent of the cases.

The submission rate for the Report on the Sentencing Hearing (statement of reasons) has increased significantly during the past five years, rising to 94.0 percent for cases sentenced in FY1992 compared to 92.4 percent in FY1991, 79.1 percent in FY1990, 65.0 percent in 1989, and 40.0 percent in 1988. The incorporation of the Report on the Sentencing Hearing within the Judgment of Conviction Order (AO 245 S, Rev. 7/90) has enhanced both the submission and uniformity of this information. See Table 9 for the submission rate of documents by circuit and district. Guideline Worksheets were received for 85.9 percent of the cases, and Written Plea Agreements or other comparable documents for 62.3 percent of the cases.<sup>65</sup>

<sup>65</sup> Table 9 does not report the submission rate of written plea agreements by circuit and district. Because the Commission cannot always determine the applicability of a written plea agreement in a particular case, it is difficult to establish a baseline of what should be received. Table 9 also does not include the submission rate of worksheets.

\*Descriptions of variables used in this table are provided in Appendix A.

# **Descriptive Statistics**

#### Implementation of the Guidelines

By statute, the Commission receives information only on defendants sentenced pursuant to the Sentencing Reform Act of 1984 (SRA).<sup>66</sup> Information about defendants sentenced under pre-guideline law is reported through the AO's data collection systems.

As stated earlier, the Commission received 38,258 cases sentenced under the SRA in 1992. Seven districts (with more than 1,100 cases each) were responsible for 25.2 percent of the cases received: Southern Texas, Western Texas, Southern California, Eastern New York, Southern Florida, Central California, and Eastern Virginia. The Fifth and Ninth Circuits accounted for 32.2 percent of all guideline cases. Table 10 depicts the distribution of guideline cases across the 94 judicial districts and 12 judicial circuits.

# Primary Offense and Demographic Characteristics

#### Primary Offense Type

 $\mathbf{F}$  orty-four percent of all defendants sentenced under the guidelines in 1992 were convicted of drug offenses (<u>i.e.</u>, either drug trafficking, use of a communication facility in a drug offense, or simple possession). Of the drug violations, the largest number involved cocaine, followed by marihuana and crack cocaine. Other frequent offenses of conviction included fraud (11.8% of all cases), firearms (8.2%), larceny (7.2%), and immigration (5.1%). Figure B and Table 11 display the distribution and frequency of guideline cases across the primary offense categories. Figure B also displays the primary drug type involved for the 16,746 defendants convicted of drug offenses for which such information was available.

#### Race and Ethnicity

As Table 12 illustrates, 45.4 percent of all defendants sentenced under the guidelines in 1992 were identified as White, 28.3 percent as Black, 22.9 percent as Hispanic, and 3.4 percent as Other (Native American, Alaskan Native, Asian or Pacific Islander).<sup>67</sup> Table 12 also displays the distribution of these racial and ethnic groups within primary offense categories. In offense categories such as arson, gambling, civil rights, pornography and antitrust violations, Whites constituted more than 80 percent of the offender population. Black defendants were proportionately overrepresented in robbery, larceny, and firearms violations (more than 35% in each of these categories), while Hispanics were overrepresented in immigration and national defense violations. In drug trafficking offenses, White defendants were underrepresented, Black defendants slightly overrepresented, and Hispanic defendants significantly overrepresented compared to their proportions in the overall defendant population.

While "Black," "White," and "Other" refer to race categories, "Hispanic" refers to ethnic origin irrespective of race.

<sup>66</sup> A "case" or "defendant" as discussed in this report is defined in the USSC data collection system as a single sentencing event for a single defendant. Multiple defendants in a single sentencing event are treated as separate cases. If an individual defendant is sentenced more than once during the time period of interest, each sentencing event is identified as a separate case.

<sup>67</sup>

#### **Figure B**

# DISTRIBUTION OF GUIDELINE DEFENDANTS SENTENCED BY PRIMARY OFFENSE CATEGORY (October 1, 1991 through September 30, 1992)

\*Of the 38,258 guideline cases, 177 were excluded due to missing primary offense category. The number of cases in each category is reflected in Table 11. Of the 16,834 drug cases (including trafficking, use of a communication facility, and simple possession), 88 cases were excluded from the bar chart due to missing drug type. Descriptions of variables used in this figure are provided in Appendix A.

### DISTRIBUTION OF GUIDELINE DEFENDANTS SENTENCED BY PRIMARY OFFENSE CATEGORY<sup>\*</sup> (October 1, 1991 through September 30, 1992)

PRIMARY OFFENSE	Number	Percent

Other Miscellaneous Offenses	662	450	68.0	117	17.7	44	6.6	51	7.7	

'Of the 38,258 guideline cases, 752 cases were excluded due to one or both of the following conditions: missing primary offense category (177) or missing race (636). Descriptions of variables used in this table are provided in Appendix A.

Gender

Males comprised 83.6 percent of all defendants sentenced under the guidelines, while females comprised the remaining 16.4 percent. Table 13 displays the distribution of cases by gender within each primary offense category, with most offenses predominantly male. Examining gender within the primary offense categories shows less dramatic differences between the rate of male and female defendants within embezzlement (in which 58.6% of those sentenced were female), larceny (32.8% female), fraud (26.2% female), and use of a communication facility in a drug offense (25.5% female).

#### Age

The average age for all defendants sentenced under the guidelines in 1992 (as measured by the mean and median) was 34.5 and 33 years, respectively (see Table 14). Defendants sentenced within the following offense categories were most likely to be 25 years of age or younger: burglary (48.5% of defendants 25 years old or younger), murder (46.6%), simple possession of drugs (36.9%), manslaughter (35.2%), and kidnapping (34.0%). In contrast, more than 50 percent of all defendants sentenced for gambling and lottery offenses, tax offenses, bribery, pornography or prostitution, antitrust, and food and drug offenses were 41 years of age or older. Table 14 displays the distribution of cases by defendant's age for each primary offense category.

Table 15 provides a demographic profile of all defendants sentenced in 1992 by age, race, and gender.

#### Citizenship

Seventy-eight percent of defendants sentenced under the guidelines in 1992 were citizens of the United States, while nearly one-fourth (21.6%) were not.<sup>68</sup> As reported in Table 16, this percentage varied considerably by primary offense type, with the highest rate of non-citizens sentenced for immigration (87.5%), national defense (63.0%), money laundering (30.6%), simple possession of drugs (28.9%), and drug trafficking (28.2%).

Table 17 lists the country of citizenship for non-U.S. citizens sentenced under the guidelines in 1992. Mexican citizens comprised 45.5 percent of the total population of non-U.S. citizens sentenced under the guidelines in 1992.

68

Note that this "non-U.S. citizen" figure includes both legal and illegal aliens.

## COUNTRY OF CITIZENSHIP FOR NON-U.S. CITIZENS\* (October 1, 1991 through September 30, 1992)

<sup>•</sup>Only countries with 50 or more cases are listed here. Descriptions of variables used in this table are provided in Appendix A.

### Figure C

# MODE OF CONVICTION BY SENTENCING YEAR<sup>\*</sup> (January 19, 1989 through September 30, 1992)

\*Information provided through August 1990 is imported from the AO's FPSSIS Data Files. Information provided after August 1990 is derived from the Commission's Monitoring Data Files. Additionally, information presented from 1989 is based on a calendar year (1/19/89 - 12/31/89). The Commission changed reporting practices to a fiscal year format beginning in 1990. This change in reporting practice results in an overlap of case reporting from October 1989 through December 1989. Descriptions of variables used in this figure are provided in Appendix A.

Source: U.S. Sentencing Commission, Monitoring Data Files.

#### Mode of Conviction

Monitoring data show that 87.0 percent of all defendants sentenced under the guidelines in 1992 pleaded guilty, while 13.0 percent were convicted at trial. During the past four years of guideline application (since the <u>Mistretta</u> decision in January 1989), the plea/trial rate has remained relatively constant at between 85-89 percent pleas to 11-15 percent trials. Figure C displays the national plea/trial rates under the guidelines since January 1989. Table 18 shows the rates of conviction by plea and trial in 1992 for guideline defendants by circuit and district.

Considerable variation exists in the rate of guilty pleas versus trials from district to district. The District of Columbia, Idaho, and the Middle District of North Carolina reported the highest trial rates (30.8%, 30.3%, and 28.6% respectively), while Colorado, Eastern Louisiana, and Eastern California reported the highest plea rates (95.1%, 95.0%, and 94.5% respectively). Case load, offense type and seriousness, and policies of individual U.S. attorney's offices might explain some of this variation.

Excluding the District of Columbia Circuit, the Second Circuit reported the highest guilty plea rate of any circuit at 90.9 percent of all guideline cases. Conversely, the Eleventh Circuit reported the highest trial rate — more than double the Second Circuit's — at 20.3 percent of all cases. It is interesting to note that the Eleventh Circuit sentenced 1,472 more defendants in 1992 than the Second Circuit.

An analysis of the mode of conviction by primary offense category (see Table 19) indicates that in certain offense categories, such as murder, kidnapping, arson, or racketeering, defendants were substantially more likely to go to trial than the national average for all offenses, no doubt due to the severe penalties accompanying convictions for these offenses. The trial rate for drug trafficking offenses, which constitute 41 percent of all guideline cases sentenced in 1992, is more than five percent higher than the national average for all offenses (18.7% trial rate for drug trafficking compared to the national rate of 13.0% for all offenses). Note that the trial rates for less serious drug offenses — use of a communication facility and simple possession — are significantly below the national average. Offense categories such as burglary, use of a communication facility in drug trafficking, embezzlement, or auto theft had the lowest trial rates. At least in the case of use of a communication facility, the count of conviction may represent a plea agreement reducing charges or the scope of relevant conduct (e.g., lesser drug amounts).

# Sentencing Information on Guideline Cases

### Type of Sentence

 ${f M}$  ore than three-fourths of all guideline defendants sentenced in 1992 received a sentence that included a term of incarceration (see Table 20 and Figure D). The majority of all defendants (71.2%) received a sentence of imprisonment followed by a term of supervised release. Another 1.9 percent received imprisonment with no post-release supervision. Approximately 3.1 percent received the "prison/community split sentence" option under the guidelines (a term of imprisonment followed by supervised release with a condition of community confinement or home detention). The rate of imprisonment has remained virtually the same for the past three years: 76.9% in 1990, 76.5% in 1991, and 76.2% in 1992.

Conversely, almost one-quarter of all guideline defendants sentenced in 1992 received a sentence of probation. Probation with a condition of community confinement, intermittent confinement, or home detention was imposed in 9.8 percent of the cases, while 14.0 percent of guideline defendants received sentences of "straight" probation (<u>i.e.</u>, no confinement conditions).

Table 20 shows the distribution of type of sentence imposed within primary offense categories. Predictably, the type of sentence most frequently imposed by the court varied by offense type. Defendants convicted of murder, kidnapping, sexual abuse, arson, robbery, burglary, drug trafficking, national defense, and prison offenses were imprisoned at the highest rates (all more than 90%). Defendants convicted of simple drug possession, larceny, embezzlement, tax offenses, bribery, gambling and lottery, civil rights, antitrust, environmental, or food and drug violations were least likely to receive sentences of imprisonment — the majority of defendants in these categories received probation or probation with some form of confinement.

# MODE OF CONVICTION BY CIRCUIT AND DISTRICT<sup>\*</sup> (October 1, 1991 through September 30, 1992)

<sup>•</sup>Of the 38,258 guideline cases, 514 cases were excluded due to one or both of the following conditions: missing primary offense category (177), missing sentencing information (234), or cases in which defendant received no imprisonment or probation (143). Descriptions of variables used in this table are provided in Appendix A.

### Figure D

# TYPE OF GUIDELINE SENTENCE IMPOSED<sup>\*</sup> (October 1, 1991 through September 30, 1992)

#### PRISON AND SUPERVISED RELEASE (71.2%)

\*Of the 38,258 guideline cases, 377 cases were excluded due to one or both of the following conditions: missing sentencing information (234) or cases in which defendant received no prison or probation (143). The number of cases in each category is reflected in Table 20. Descriptions of variables used in this figure are provided in Appendix A.

#### Average Length of Imprisonment

Table 21 reports average term of imprisonment by both offense type and criminal history categories. In general, the median term better represents the "average length of imprisonment" because it is not affected by unusually lengthy sentences (often caused by mandatory minimum sentencing statutes) that may skew the mean. The median represents the amount (in months) at which 50 percent of defendants received longer sentences and 50 percent received shorter sentences.

The median term of imprisonment for all defendants sentenced to prison in 1992 was 36 months, while the mean term for all defendants was 66.7 months. Defendants sentenced for murder, kidnapping, robbery, drug trafficking, and racketeering received the longest median terms under the guidelines (all 50 months or longer). In comparison, the shortest median prison sentences were imposed for simple drug possession, embezzlement, antitrust, environmental, and food and drug violations (all six months or less).

The first two columns of Table 21 provide the mean and median sentence for defendants sentenced to imprisonment for each primary offense category. In comparing the two measures, the mean was higher for all offenses except use of a communications facility (mean 32.9, median 33 months), and gambling/lottery (mean and median sentences both 12 months). The closer the median is to the mean, the less the number of lengthy sentences in each category that inflate the mean but not the median. For example, note "Firearms": 50 percent of defendants sentenced in this category received a prison sentence of 27

months or less (the median sentence). However, the mean prison sentence for firearms defendants was 60.8 months, reflecting a significant number of lengthy sentences.

Table 21 also reports average prison sentences for offenders by criminal history categories. Independent of offense type, average terms of incarceration increase progressively to reflect the seriousness of a defendant's prior criminal record. Not surprisingly, mean imprisonment lengths change more drastically than medians, with the mean for all offenses increasing from 56.5 months in Criminal History Category I to 84.3 months in Category VI (for non-career offenders) compared to the median increasing from 33 to 37 months. Because all defendants classified as career offenders are included in Criminal History Category VI, cases in that category are presented in two groups: the mean and median prison terms for Category VI non-career offenders is 84.3 and 37 months, respectively, significantly lower than the 205.6 and 188 months for career offenders.<sup>69</sup>

<sup>69</sup> Career offenders, as directed by 28 U.S.C. § 994(h) and defined by guideline 4B1.1, are defendants at least 18 years old, with an instant conviction for a controlled substance offense or crime of violence, and with at least two prior felony convictions for either a crime of violence or a controlled substance offense.

Other Miscellaneous Offenses														

<sup>•</sup>Of the 38,258 guideline cases, 9,159 cases with zero months prison ordered were excluded. In addition, 1,801 cases were excluded due to one or more of the following conditions: missing primary offense category (136), missing criminal history category (540), missing career offender information (786), or missing or indeterminable sentencing information (624). Descriptions of variables used in this table are provided in Appendix A.

<sup>\*\*</sup>Information on career offender provided in this table is based on the recommendation of the probation officer in the PSR if information from the sentencing court was missing or unavailable. As a result, the number of career offenders represented here will be higher than the number reported on Tables 27 and 28.

### Fines and Restitution

Defendants were ordered to pay a fine, make restitution, or both in 33.7 percent of all cases sentenced under the guidelines. Neither sanction was ordered in the remaining 66.3 percent of the cases, primarily due to findings by the court of an inability to pay or a burden on the defendant's family. The frequency with which fines and/or restitution were ordered as part of guideline sentences is reported in Table 22.

The imposition of fines and restitution orders varied greatly by offense category.<sup>70</sup> Financial sanctions of some type were most common in convictions for larceny, embezzlement, fraud, antitrust, environmental, and food and drug offenses. Fines were imposed in more than 40 percent of the tax, gambling and lottery, antitrust, environmental, and food and drug violation cases; restitution orders were most common (more than 40%) for arson, burglary, robbery, embezzlement, and fraud.

Drug trafficking, immigration, and prison offenses resulted in financial sanctions least frequently. This finding is not surprising given the high incarceration rates for these offenses and the alien status and possible deportation of defendants in immigration cases.

Table 22 also provides the mean, median, and total payments ordered. In general, the median fine better represents the "average fine" imposed because it is not affected by unusually high or low fines that may skew the mean. The median represents the amount at which 50 percent of the fines are higher and 50 percent are lower. The greatest median payments were ordered for antitrust cases (\$25,000), racketeering (\$10,000), arson (\$7,855) and fraud (\$7,722). The total of all payments ordered was more than \$634 million, with more than 40 percent of this amount ordered in fraud cases.

70 Restitution guidelines are in Chapter Five, Part E of the <u>Guidelines Manual</u>.

\*Of the 38,258 guideline cases, 356 cases were excluded due to one or both of the following conditions: missing primary offense category (177), or missing information on type of economic sanction for cases in which orders were made (220). The total number of cases (12,185) used to calculate amounts of payment ordered is less than the total number of cases receiving fines and/or restitution (12,793). The difference is due to the exclusion of cases for which a fine and/or restitution was ordered but the amount was not specified. Descriptions of variables used in this table are provided in Appendix A.

### Annual Report 1992

#### Sentencing Alternatives

The guidelines provide a variety of alternatives to imprisonment for less serious offenses at lower offense levels (see §5C1.1). If the minimum of the applicable guideline range is zero months, a sentence of imprisonment is not required ("straight" probation is available). If the minimum of the guideline range is one to seven months, probation with a condition of community confinement, intermittent confinement, or home detention is available. Finally, if the minimum of the range is eight to ten months, a "split" sentence may be imposed, requiring a sentence of imprisonment for at least one-half of the minimum followed by a term of supervised release with a condition of community confinement or home detention to satisfy the remainder of the term.

Table 23 presents the distribution of sentences imposed in cases falling within guideline ranges for which alternatives to imprisonment are generally available. (Imprisonment is the only sanction available at higher offense levels.) In 78.8 percent of the cases with a guideline range of zero to six months, the sentence imposed was probation only or probation with community confinement, intermittent confinement, or home detention. In the next five guideline ranges where the minimum of the range was one to six months, probation plus confinement was ordered in 48.9 percent of the cases, while a split sentence was ordered in 5.7 percent. In the three final guideline ranges in which alternatives were available (cases in which the minimum of the guideline ranges was eight to ten months), the prison/community split sentence was ordered 25.7 percent of the time. Finally, 95.3 percent of the cases in which the minimum of the guideline range was 12 months or greater (and for which non-imprisonment alternatives are not available under the guidelines) received a term of imprisonment.

Figure E represents the frequency with which defendants eligible for alternatives to imprisonment in various offense categories received incarcerative sentences. Of those eligible for alternative sentences, larceny offenders were the least likely (20.0%) to be incarcerated and immigration violators the most likely (66.0%). This is not surprising given that a large proportion of immigration violators with relatively low guideline ranges receive imprisonment sentences, principally because immigration offenders tend to be non-U.S. citizens who receive short prison sentences prior to deportation. Consequently, they may be treated somewhat differently than offenders at similar offense levels convicted of other offenses.

### GUIDELINE RANGES WITH SENTENCING ALTERNATIVES BY TYPE OF SENTENCE IMPOSED\* (October 1, 1991 through September 30, 1992)

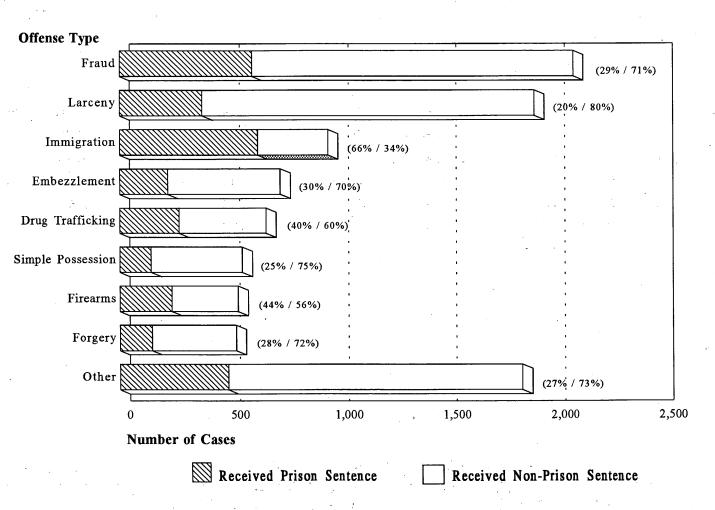

GUIDELINE		Priso	n	Prison/Con Split Se			ion and ement	Probati	on Only

Higher Ranges	21,876	20,859	95.3	155	0.7	307	1.4	555	2.5

Of the 38,258 guideline cases, the Commission received Reports on the Sentencing Hearing for 35,958 (94.0%). Of the 35,958 cases with such reports, 1,806 cases were excluded due to one or more of the following conditions: missing guideline range (1,428), missing sentencing information (121), cases with no analogous guideline (183), or cases in which defendant received no imprisonment or probation (118). The guideline ranges indicated above correspond to the offense levels and criminal history categories established by the court and do not indicate the impact of mandatory minimums or statutory maximums constricting the sentence. Descriptions of variables used in this table are provided in Appendix A.

### Figure E

# INCARCERATION RATE OF DEFENDANTS ELIGIBLE FOR NON-PRISON SENTENCES BY PRIMARY OFFENSE TYPE\*

(October 1, 1991 through September 30, 1992)

\*Of the 38,258 guideline cases, the Commission received Reports of the Sentencing Hearing for 35,958 (94.0%). Of the 35,958 cases with such reports, 26,077 cases ineligible for non-prison sentences and 68 cases missing information on type of sentence were excluded. Non-prison sentences include probation with conditions of confinement as defined in section 5C1.1 of the USSC Guidelines Manual. Descriptions of variables used in this figure are provided in Appendix A.

# Guideline Application

**Overview** 

Data coded in the Commission's Guidelines Application Module reflect specific guideline application factors determined by the court, such as base offense level, specific offense characteristics, victim, role, and acceptance of responsibility adjustments, criminal history points and category, and guideline range.

The Report on the Sentencing Hearing plays a crucial role in determining a court's guideline application decisions (see discussion under Data Collection Issues). In 1992, the Commission received complete reports in 94.0 percent of all cases submitted. Of the reports submitted, adequate information to determine the relevant guideline factors was available in 31,347 cases. Starting with Table 25, fewer cases are reflected in the tables in this section of the report than in previous sections in order to provide a detailed description of guideline application factors.

#### Chapter Two Guideline Application

The first step in applying sentencing guidelines involves a determination of the appropriate Chapter Two guideline based on the count(s) of conviction.<sup>71</sup> Table 24 provides the distribution of Chapter Two guidelines applied in single and multiple count cases. Given the predominance of drug offenses in the federal system (see Figure B), it is not surprising that the most frequently applied Chapter Two guideline in single and multiple count cases was the primary drug guideline, §2D1.1 (Unlawful Manufacturing, Importing, Exporting, or Trafficking, including Possession with Intent to Commit These Offenses). This guideline was applied in 40.2 percent of all single count cases and 51.3 percent of all multiple count cases. Other Chapter Two guidelines applied frequently in both single and multiple count cases were §2F1.1 (Fraud and Deceit), 13.1 and 15.9 percent, respectively; §2B1.1 (Larceny, Embezzlement, and Other Forms of Theft), 10.9 percent and 4.7 percent; and §2K2.1 (Unlawful Receipt, Possession, or Transportation of Firearms or Ammunition), 6.4 and 8.3 percent.

After determining the relevant guideline and assigning a base offense level, the court decides whether certain attributes common to that offense are present in the case. These "specific offense characteristics" are enumerated in the applicable Chapter Two guidelines and help establish the seriousness of a particular offense. Offense characteristics such as the quantity of drugs imported, the use of a firearm, and the amount of property loss require an adjustment in the base offense level.

Sheer numbers prevent the presentation of a complete picture of the interaction among base offense levels and specific offense characteristics applied. Each Chapter Two guideline provides a unique set of specific offense characteristics tailored to each specific offense. Subsequent sections of this report provide detailed profiles of the sentencing process for three of the most frequently applied Chapter Two guidelines: drug trafficking, firearms violations, and fraud.

<sup>71</sup> Federal law contains more than 2,000 separate criminal offenses. Rather than construct a complex system of guidelines for each federal criminal violation, the Commission created a set of generic guidelines that group offenses by crime type. The guidelines rank these offense types according to severity by assigning them "base offense levels" from 4 to 43.

<sup>\*</sup>Of the 38,258 guideline cases, 1,694 cases were excluded due to one or both of the following conditions: missing guideline applied (1,694) or missing number of counts (45). The totals can add to more than 100% because a single case may reference several different guidelines. A number of Chapter Two guidelines list possible cross-references, which resulted in multiple counting of cases applying both the original and cross-referenced guideline(s). In cases in which application of a specific cross-reference was required, only the original guideline was used to avoid double-counting for these cases. Descriptions of variables used in this table are provided in Appendix A.

<sup>&</sup>quot;Numbers listed in parentheses are provided for reference only and represent cases in which application of another guideline was indicated; such cases are counted both numerically and proportionately in the referenced guideline.

### Chapter Three Adjustments

Once the court establishes a base offense level and applies all appropriate specific offense characteristics, it considers whether certain generic adjustments to the offense level apply. These Chapter Three adjustments, which may be made to any offense at any offense level, refer to general factors relating to the victim(s) of the offense, the defendant's role in the offense, acts that constitute an obstruction of justice, and the defendant's acceptance of responsibility.

Table 25 provides a description of the various Chapter Three adjustments applied by the courts for all 1992 guideline cases for which a complete Report on the Sentencing Hearing was available.

An upward adjustment for victim related factors, such as vulnerable victim, official victim, or restraint of victim (§§3A1.1, 3A1.2, 3A1.3) was imposed in less than one percent of the cases. A reduction for a mitigating role was given in 9.1 percent of the cases (§3B1.2). The offense level was increased in 7.5 percent of the cases due to the defendant's aggravating role (§3B1.1) and in 2.8 percent for an abuse of the defendant's position of trust or use of special skill (§3B1.3).

More than four percent of all cases received the enhancement for obstruction of justice (§3C1.1), while reckless endangerment during flight, an adjustment added to the guidelines in November 1990, applied to 0.3 percent of the cases (§3C1.2).

Finally, the court may reduce a defendant's offense level if the defendant "demonstrates a recognition and affirmative acceptance of personal responsibility for his criminal conduct" (§3E1.1). In 1992, 82.3 percent of all defendants received a downward adjustment for acceptance of responsibility. According to Table 26, acceptance was granted less frequently in

### Annual Report 1992

violent crimes such as murder, kidnapping, arson, sexual abuse and racketeering, and more frequently in offenses such as embezzlement, gambling and lottery, and food and drug. This relationship between offense type and acceptance of responsibility resembles the relationship between offense type and plea rates and implies that higher plea rates correlate with higher rates of acceptance of responsibility (see Table 19).

Chapter Three also contains guidelines for determining the combined offense seriousness for multiple count cases (§§3D1.1 - 3D1.5). Approximately 26 percent of all cases in 1992 included more than one count of conviction. Table 24, referenced earlier, lists the Chapter Two guidelines applied in multiple count cases. Several guidelines, such as §2B3.1 (Robbery), §2S1.1 (Money Laundering), and §2T1.1 (Tax Evasion), were applied more in multiple count than single count cases.

# CHAPTER THREE GUIDELINE APPLICATION INFORMATION\* (October 1, 1991 through September 30, 1992)

<sup>\*</sup>Of the 38,258 guideline cases, the Commission received complete guideline application information for 31,347. Of the 31,347 cases with such information, 50 cases were excluded due to one or both of the following conditions: missing primary offense category (47) or missing information on acceptance of responsibility (3). Descriptions of variables used in this table are provided in Appendix A.

#### Chapter Four Assessment of Criminal History

The introduction to Chapter Four of the <u>Guide-lines Manual</u> states that a defendant's prior record is relevant to such important sentencing goals as general deterrence, just punishment, and protection of the public. Under the guidelines, points are assigned to sentences imposed for prior adult convictions to account for the frequency and severity of past criminal conduct. Additional points are assigned if the defendant committed the offense within two years after release from imprisonment or while under any criminal justice sentence, including probation, work release, or escape status.

Table 27 reports Chapter Four guideline application.<sup>72</sup> When examining past criminal conduct taken into consideration under the guidelines (§4A1.1), 19.3 percent of all defendants had one or more convictions resulting in a sentence of imprisonment of 13 months or longer; 14.4 percent had one or more convictions with a sentence of 60 days or longer; and 37.8 percent had one or more prior convictions that received either an imprisonment sentence of less than 60 days or a non-imprisonment sanction. It should be noted that the preceding groupings overlap, and a defendant can receive sentences — and therefore criminal history points — under one or more of these categories.

Additional points were imposed in 21.3 percent of all cases because the defendant committed the instant offense while under another sentence, and in 11.5 percent of the cases because the defendant committed the instant offense within two years of a prior conviction. Composite scores, reflecting the frequency, gravity, and recency of a defendant's prior criminal conduct, show that just over half (50.9%) of the population sentenced in 1992 had no "countable" guideline criminal history. Another 10.8 percent of all defendants received a single criminal history point under Chapter Four rules.

Pursuant to statute, the guidelines account for patterns of prior criminal conduct that Congress has determined warrant especially serious treatment. When a defendant who is at least 18 years old commits a crime of violence or a controlled substance offense, and the defendant has at least two prior felony convictions involving crimes of violence or controlled substance offenses, the defendant qualifies as a "career offender" (§4B1.1). The guidelines establish a special set of offense levels for career offenders that are calibrated, in conjunction with the most serious criminal history category, to approach the maximum sentences authorized by statute for the instant offense. A similar statutory mandate is addressed in the Armed Career Criminal guideline (§4B1.4).<sup>73</sup>

Courts found defendants to be career offenders in 2.2 percent of the cases and armed career criminals in 0.7 percent of the cases (see Table 27). A closer look at the career offender adjustment by primary offense category shows that while more defendants convicted of drug trafficking offenses received the career offender adjustment than any

<sup>72</sup> According to documents received by the Commission, 31.0 percent of all defendants sentenced in 1992 had no prior criminal history of any kind. In calculating that figure, criminal history refers to any criminal conduct recounted in the presentence report, regardless of its applicability in calculating the guideline criminal history score. It includes prior adult or juvenile convictions, prior uncounseled misdemeanor convictions that did not result in incarceration, and prior unadjudicated criminal conduct.

<sup>73</sup> The career offender and armed career criminal guidelines implement congressional directives embodied in 28 U.S.C. § 994(h) and 18 U.S.C. § 924(e).

other offense type (347 of the 684 career offenders in 1992), offenders convicted of robbery had the highest probability of being classified a career offender. Fifteen percent of all robbery defendants were sentenced as career offenders by the courts, compared with 2.6 percent of all drug traffickers (see Table 28).

#### Determining the Applicable Sentencing Range -Chapter Five

The sentencing table in Chapter Five is composed of offense levels set out in the vertical column of the table and criminal history categories in the horizontal columns. The offense levels result from application of Chapters Two and Three of the <u>Guidelines Manual</u> and the criminal history categories from Chapter Four. The judge determines the guideline sentencing range by matching the applicable offense level and criminal history category. The court has discretion to impose a sentence at any point within the range, or to depart above or below it in unusual cases.<sup>74</sup>

Table 29 presents the distribution of all cases by final offense level and criminal history category, as determined by the court. More than half (53.2%) of all guideline cases resulted in an offense level of 16 or less, and almost 62 percent of all defendants were placed in Criminal History Category I. Some defendants in Category VI receive the highest criminal history score as part of an automatic enhancement based on their classification as career offenders, while other defendants are placed there due to the number, seriousness, and recency of their prior criminal conduct. For either reason, 6.5 percent of all guideline defendants in 1992 were placed in Criminal History Category VI by the courts.

Table 30 presents final guideline ranges for all cases, with 51.4 percent of the defendants placed at or below the 24-30 months range, and 0-6 months being the single range with the highest proportion of cases (12.9%).

74 The guideline range may be further limited, or "trumped," by statutory maximum, mandatory minimum, and mandatory consecutive penalties.

### United States Sentencing Commission

#### Guideline Application for Select Offenses

The following sections provide detailed application information on three of the most commonly used Chapter Two guidelines: §2D1.1 (Drug Trafficking), §2K2.1 (Firearms), and §2F1.1 (Fraud).<sup>75</sup>

#### Guideline §2D1.1 - Drug Trafficking

The main penalty statute regulating illegal drug trafficking, 21 U.S.C. § 841(b), specifies appropriate penalty levels based on the amount and type of drug. This statutory directive serves as the framework for the drug trafficking guideline, around which seriousness levels are developed proportionate to the levels set by Congress.<sup>76</sup>

In 1992, §2D1.1 was the primary guideline applied in the sentencing of 13,511 cases. Of the cases in which drug type was known, 43.3 percent involved cocaine, followed by marihuana in 25.0 percent, and crack cocaine in 15.5 percent (see Table 31).<sup>77</sup>

Distributions of drug type by defendant race and gender are presented in Tables 31 and 32, respectively. Perhaps the strongest relationship between race and drug type involved crack cocaine and methamphetamine. The majority of crack cocaine cases involved Black defendants (91.5%), while White defendants constituted 85.8 percent of all methamphetamine cases. Black and Hispanic defendants were more likely than Whites to be involved in heroin cases, while Hispanics and Whites were more likely than Blacks to be involved in marihuana cases. Female defendants were least likely to be involved in marihuana cases (9.5%), while their highest probability of involvement came in heroin cases (18.6%). Almost half of those female defendants were non-U.S. citizens, most likely transporting heroin into the U.S. In general, females were proportionately less involved than males in drug trafficking (11.6%).

Table 33 reports base offense levels under §2D1.1 as determined by the quantity and type of drugs involved in the offense. The largest number of cases had guideline offense levels of 26 and 32. These levels correspond to the fiveand ten-year mandatory minimum penalties set by statute for certain drugs. More than 50 percent of drug offenders sentenced under §2D1.1 had base offense levels of 26 or less.

Judges provided an enhancement for presence of a firearm in 9.6 percent of the cases. An additional 963 cases (7.1%), convicted under the firearms statute 18 U.S.C. § 924(c), received a mandatory consecutive sentence of five years and therefore did not receive a guideline enhancement for possession of a firearm. Together these figures suggest that approximately 17 percent of all drug trafficking cases received some sanction for firearms. Aircraft were involved in less than 0.1 percent of all drug trafficking cases.

Victim adjustments were almost non-existent in drug cases. However, 26.6 percent of the drug defendants received adjustments to reflect their

<sup>75</sup> Cases may involve the application of more than one Chapter Two guideline. For this analysis, cases were included if the drug trafficking, firearms, or fraud guidelines were the only guideline applied in the case, or were the guideline resulting in the highest offense level for the case.

<sup>76</sup> Chapter Two, Part D of the <u>Guidelines Manual</u> provides Drug Equivalency Tables and a Drug Quantity Table with base offense levels determined by both drug type and amount.

<sup>77</sup> In cases involving more than one drug type, the drug yielding the higher base offense level under §2D1.1 is reported in the drug type tables.

aggravating or mitigating roles in the offense. Almost five percent were found to obstruct justice; 77.8 percent accepted responsibility for their offense (see Table 34).

As reported in Table 35, 50.6 percent of all defendants convicted of drug trafficking offenses had no convictions that received criminal history points under the guidelines. Only 15.8 percent received points for past sentences of 13 months or longer, while 2.6 percent qualified for career offender status.

Table 36 shows the distribution of drug cases by offense level and criminal history category, with the highest overall percentages centered around the offense levels that include the five- and tenyear mandatory minimums (levels 26 and 32) or mandatory minimums less two levels for acceptance of responsibility (levels 24 and 30). A guideline range of 51-63 months (corresponding to offense level 24 and Criminal History Category I), found in 8.9 percent of the cases, was the most common final guideline range for offenders convicted of drug trafficking (see Table 37).

87

# RACE OF DEFENDANT BY DRUG TYPE\* (October 1, 1991 through September 30, 1992)

		WH	ITE	BLA	CK	HISPA	ANIC	OTH	ER

#### Guideline §2K2.1

The primary guideline for firearms violations, §2K2.1, has been amended three times and consolidated, effective November 1, 1991, with guidelines §§2K2.2 and 2K2.3 to encompass a wider range of offense behaviors and adjust penalty levels accordingly. In 1992, §2K2.1 was the primary guideline used to sentence 1,964 defendants. However, due to <u>ex post facto</u> considerations, 123 of these cases (6.3%) were sentenced under the original 1987-88 guideline, 304 cases (15.4%) under the 1989 amendment, 1,025 cases (52.2%) under the 1990 version and, finally, 512 cases (26.1%) were sentenced under the 1991 amendment.

Table 38 describes the base offense level assigned to cases sentenced under the four versions of the firearms guideline, with level 12 being the most common across all cases sentenced under the 1989-1991 amendments. These levels are further adjusted up or down based on a number of specific offense characteristics. More than 17 percent of all cases involved stolen firearms and received a two-level enhancement; 3.9 percent of the defendants received a reduction to level 6 for possessing firearms solely for sport or recreation. The majority of the 512 cases sentenced under the 1991 version of §2K2.1 involved less than three firearms, but 32.3 percent were given oneto six-level enhancements based on the large numbers of firearms (three or more) in the offense. Of the 512 cases, 2.4 percent involved a destructive device.

Table 39 reports the application of Chapter Three guidelines. Very few firearms cases involved victim adjustments, while only 1.8 percent of the defendants sentenced under §2K2.1 received a downward adjustment for mitigating role in the offense, and 1.4 percent had an aggravating role. Four percent of the defendants were found to obstruct justice, while 80.1 percent accepted responsibility.

Table 40 presents the criminal history of firearms defendants. More than 50 percent of the defendants had one or more prior sentences of 13 months or greater, 34.5 percent had one or more sentences of 60 days or greater, and 60.3 percent had one or more other countable sentences. Forty percent of the defendants committed their instant offense while under criminal justice sentence, 28.4 percent within two years of their prior conviction. Not surprisingly, the median criminal history score for firearms of six criminal history points exceeds the median of zero points for all defendants in 1992, because part of what brings a firearm offense into the federal system is prior record. More than three percent of the firearms defendants were sentenced as career offenders, and 10.2 percent were found to be armed career criminals.

Table 41 describes the distribution of §2K2.1 cases by offense level and criminal history category. The median offense level for firearms defendants was 12, with almost as many of the defendants in Criminal History Category VI (21.0%) as in Category I (23.6%). Table 42 presents final guideline ranges for firearms offenses. The 21- to 27-months sentence range includes the largest number of firearms defendants, as well as the median range.

<sup>\*</sup>Of the 38,258 cases, the Commission received complete guideline application information on 31,347. Of the 31,347 cases with such information, the highest combined adjusted offense level was derived from the firearms guideline (§2K2.1) in 1,964 cases. One case was excluded due to missing guideline range.

### Guideline §2F1.1 - Fraud and Deceit

Almost 12 percent of all defendants sentenced under the guidelines in 1992 were sentenced for fraud offenses. The fraud guideline contains a base offense level of 6 and is adjusted by a series of specific offense characteristics. Because loss tables in the fraud guideline were amended in 1989, pre- and post-amendment loss tables are reported in Table 43. Most cases (3,618) were sentenced under the 1989-91 version of the guideline. Using this version, the most common loss category was \$2,000 or less (24% of the cases). Based on offense characteristics specific to the fraud guideline (e.g., more than minimal planning, multiple victims, victimizing government or certain types of organizations, or violating a judicial order), an additional increase was given in 71.2 percent of 1989-91 fraud cases. Adjustments for misrepresentation, reckless risk of injury, use of foreign bank accounts, and jeopardizing the soundness of financial institutions applied in only 1.5 percent of these cases.

Table 44 shows that Chapter Three adjustments for victim related factors applied in 1.6 percent of the cases. Almost five percent of the defendants received a mitigating role reduction; 8.9 percent received an aggravating role enhancement. Close to eight percent of the cases involved defendants who abused their position of trust in committing the fraud. Obstruction of justice was found in 4.9 percent of the cases, while a reduction for acceptance of responsibility was granted in 88.2 percent, considerably higher than the 77.8 percent granted in drug trafficking cases, or the 80.1 percent in firearms offenses.

As shown in Table 45, only 12.9 percent of the defendants had one or more prior sentences of 13 months or longer, 11.3 percent had prior sentences of 60 days or longer, and 33.0 percent had other countable sentences. As a result, 70.3 percent of the fraud defendants received the lowest

criminal history category, and more than half were assigned offense levels of nine or less (see Table 46). The low criminal history category and offense levels led to a concentration of 54.8 percent of fraud cases in sentencing ranges with minimums of six months or less (see Table 47).

<sup>•</sup>Of the 38,258 cases, the Commission received complete guideline application information on 31,347. Of the 31,347 cases with such information, the highest combined adjusted offense level was derived from the fraud guideline (§2F1.1) in 4,072 cases. Two (2) cases were excluded due to missing guideline range.

# Departures and Sentences Within the Guideline Range

The Sentencing Reform Act of 1984 authorizes departures from the applicable guideline range subject to review by appellate courts. The Reports on the Sentencing Hearing are used to assess guideline sentencing trends and to determine the rate at which defendants are sentenced within, above, or below the guideline range as established by the court. In this section, the Commission reports on the frequency of departures on the national, circuit, and district levels, and the reasons provided by the courts for such departures.

The Commission reviewed all case files to determine departure status and reasons for departure as indicated in the Report on the Sentencing Hearing. The case was determined to involve no departure if the sentence imposed was within the guideline range established by the court and set out in the Report on the Sentencing Hearing. If the sentence fell outside the guideline range established by the court, it was determined that a departure had occurred and the applicable reasons were noted.

If a Report on the Sentencing Hearing was not provided or if the information contained in it was insufficient to permit a departure determination, the sentence from the Judgment of Conviction was compared to the guideline range recommended by the probation officer in the presentence report. No departure was assumed when the sentence imposed by the court fell within the range recommended by the probation officer.<sup>78</sup>

A departure could not be assumed if the sentence from the Judgment of Conviction did not correspond to the guideline range recommended by the probation officer. A court, through the fact finding process, may determine a different guideline range to be correct and sentence within that range. Thus, a discrepancy between the sentence and the range indicated in the presentence report does not necessarily indicate a departure. Departure determination for cases in which Reports on the Sentencing Hearing were absent or inadequate were coded as missing.<sup>79</sup>

### Departure Rates

Sentences were within the guideline range established by the court in 77.4 percent (28,032) of the 36,229 cases for which a departure determination could be made.<sup>80</sup>

In 15.1 percent of the cases (5,478), courts departed downward based on a motion by the government for a reduced sentence due to the

<sup>78</sup> This assumption was tested in a previous USSC departure study analyzing a sample of cases sentenced between November 1, 1987, and March 31, 1989. A random 25-percent sample of cases for which no Report on the Sentencing Hearing was available, but for which the sentence fell within the range recommended by the probation officer, was further investigated by placing telephone calls to probation offices across the country. Of the 196 cases for which calls were made, none involved a departure from the guideline range. As a result, all such cases were considered within-range sentences for the purposes of that study as well as for the present report.

<sup>79</sup> In 1,517 of the 38,258 cases in 1992, no departure determination could be made due to absent or inadequate information. In 512 cases, departure determinations were not applicable because the cases had no analogous guidelines. Therefore, departure status was assessed in 36,229 cases.

<sup>80</sup> The departure analysis employed here considers the probation, imprisonment, and confinement alternatives in relation to the guideline range established in Part A of Chapter Five. This analysis does not involve an assessment of the fine range established in Part E of Chapter Five. In addition, no assessment is made regarding terms of supervised release as established by Part D of Chapter Five.

defendant's substantial assistance to authorities. In another six percent of the cases (2,175), the court departed downward for other reasons. In 1.5 percent of the cases (544), the court departed upward, sentencing above the applicable guideline range.

To understand the departure rate, it is important to note the effect of two particular statutes on guideline sentencing patterns. Congress, in 18 U.S.C. § 3553(e), authorized the court to impose a sentence below that required by a mandatory minimum statute "to reflect a defendant's substantial assistance in the investigation or prosecution of another person who has committed an offense." In addition, the Commission was instructed in 28 U.S.C. § 994(n) to "assure that the guidelines reflect the general appropriateness of imposing a lower sentence than would otherwise be imposed" for substantial assistance to authorities. Consequently, the Commission specifically addressed such sentence reductions in §5K1.1 of the guidelines.

The 1992 data show that the rate of departures for substantial assistance, varying markedly by judicial district, has increased nationally by more than three percent since 1991. This change accounts for the overall increase in the departure rate (<u>i.e.</u>, upward, downward, substantial assistance departures) from 19.4 percent in 1991 to 22.6 percent in 1992.

Examination of national departure statistics during the four years since the <u>Mistretta</u> decision depict a system in which roughly four out of every five defendants received within-guideline sentences. Both upward and non-substantial assistance downward departures have declined during the past four years, with upward departures decreasing by half (a high of 3.5% in 1989 to 1.5% in 1992) and downward departures decreasing by one quarter (a high of 8.7 in 1989 to 6.0% in 1992).

The most dramatic change in the national departure rate during this four-year period is in the rate of downward departures for substantial assistance to the government. Representing 5.8 percent of all cases in 1989, the departure rate for substantial assistance has steadily risen each of the past four years to 15.1 percent of all cases in 1992.

With the rate of upward and non-substantial assistance downward departures changing little during the past four years, the increase in substantial assistance departures has affected most significantly the rate of within guideline sentences. Figure F displays the departure rates for the four reporting years since <u>Mistretta</u>.

### United States Sentencing Commission

Tables 48 and 49 provide reasons given by district courts for upward and downward departures. The most frequently cited reasons for departing upward included adequacy of criminal history (48.5%), general aggravating circumstances (9.0%), and pursuant to a plea agreement (7.0%).

Substantial assistance upon motion of the government was a reason cited in 71.6 percent of the downward departures. Other reasons for downward departures included: pursuant to a plea agreement (7.9.%), general mitigating circumstances (3.5%), and adequacy of criminal history (3.0%).

### Figure F

## TYPE OF DEPARTURE BY SENTENCING YEAR<sup>\*</sup> (January 19, 1989 through September 30, 1992)

\*Information provided for 1989 and 1990 is derived from a 25 percent random sample of cases. For 1991 and 1992, departure information represents all guideline cases for which complete court data is available. Additionally, information presented from 1989 is based on a calendar year (1/19/89 -12/31/89). The Commission changed reporting practices to a fiscal year format beginning in 1990. This change in reporting practice results in an overlap of case reporting from October 1989 through December 1989. Descriptions of variables used in this figure are provided in Appendix A.

\*Based on 7,653 downward departure cases for which Reports on the Sentencing Hearing were available. Information on reasons was unavailable in 67 cases involving downward departures. Courts often provided more than one reason for departure; consequently, the percentage across all reasons for departure adds up to more than 100%. The "Other" category includes all reasons given less than four times among relevant cases.

### Within Guideline Range Sentences and Departures by Circuit and District

In 1992, the departure rate varied significantly among the 12 judicial circuits. The District of Columbia Circuit had the lowest aggregate departure rate at 12.1 percent, while the Third Circuit showed the highest departure rate at 38.2 percent. However, the Third Circuit's departure rate was influenced heavily by the Eastern District of Pennsylvania, which had the highest departure rate of any of the 94 judicial districts at 52.7 percent of all cases. It is noteworthy that 48.8 percent of Eastern Pennsylvania's departures came from downward departures based on a government motion that the defendant had substantially assisted in the investigation or prosecution of another criminally responsible individual. Arizona and the Western District of North Carolina also had departure rates above 40 percent. Conversely, Eastern Virginia, Western Arkansas, and Eastern Oklahoma had departure rates below seven percent. Table 50 indicates the within-guideline range sentence and departure rates by circuit and district.

<sup>\*</sup> Of the 38,258 guideline cases, 512 were not applicable (i.e. no analogous guidelines) and 1,517 were missing departure information. Districts for which the departure information is missing in 5 percent or more of the cases received included: Central California (22.8%), Eastern New York (10.2%), Southern New York (7.6%), Southern California (6.5%), and Eastern Virginia (6.1%). Descriptions of variables used in this table are provided in Appendix A.

### United States Sentencing Commission

### Departures and Within Guideline Range Sentences by Primary Offense

Departure rates varied substantially by offense type: offenses involving drug trafficking, racketeering and extortion, bribery, gambling and lottery, and money laundering had a high rate of departure due to substantial assistance compared to other offenses. Simple drug possession, larceny, burglary, immigration, and food and drug violations had relatively lower rates of departure. (See Table 51.)

### Judicial Discretion Under the Guidelines

The guidelines provide for the exercise of judicial discretion at numerous points in the sentencing process, from deciding facts to accepting plea agreements to selecting the guideline sentence. Departing from the guideline range or selecting a particular point within the applicable range provides empirical examples of judicial discretion under the guidelines.

Table 52 presents departures and relative sentence location for defendants sentenced within the guideline range by offense.<sup>81</sup> For most offense categories, the largest proportion of cases received a sentence at the lowest quarter of their available ranges, while the smallest proportion of cases were placed in the third quarter. The somewhat higher proportion of cases in the fourth quarter of the range most likely reflect mandatory minimum and career offender considerations.

Different discretionary patterns emerge from the review of sentence location for specific offense types. Drug trafficking offenses, for example, had one of the highest downward departure rates due to substantial assistance (28.3%), and a high concentration of cases sentenced within the first quarter of the range (45.0%). Firearms offenses had low downward departure and substantial assistance rates (6.7% and 7.1%, respectively), with only 37.5 percent of the cases placed in the first quarter of the guideline range, and 22.3 percent in the fourth quarter. Gambling and lottery defendants, in comparison, received downward departures in 8.5 percent and substantial assistance departures in another 31.6 percent of the cases, with 46.3 percent sentenced in the lowest quarter of the guideline range, only 3.4 percent in the highest quarter, and with none receiving an upward departure.

Further research is indicated, beyond these initial descriptive statistics, in order to arrive at an exploration and understanding of judicial discretion, and its impact on sentencing and departures.

81 Figures in this section are based on a smaller number of cases than in the previous departure tables, because only cases with available information on guideline ranges, as determined by the court, are included in the analysis. Guideline ranges reflect adjustments to the range based on mandatory minimums and statutory maximums applicable to the case.

Of the 38,258 guideline cases, the Commission received complete guideline application information for 31,347. Of the 31,347 cases with such information, 2,104 cases were excluded due to one or more of the following conditions: missing primary offense category (47), missing guideline range information (42), missing sentencing information (340), missing departure information (64), or missing statutory information (427). Additionally, among the 2,104 excluded cases, 1,406 were excluded for the purposes of statistical analysis due to several logical criteria other than missing information. These criteria and general descriptions of variables used in this table are provided in Appendix A.

# **B. RESEARCH STUDIES**

# Changing Composition of Offenses and Offenders

The Commission's study of the use of incarceration in the 1991 congressionally mandated evaluation found significant increases both in the use and the average length of prison sentences. The Commission recognized a need for additional research analyzing the composition of offenses and offenders over time to identify changes in those populations and possible factors influencing the changes.

To address these concerns, the Commission will analyze sentencing patterns of various offenses and offenders using empirical data, documents, and reports from criminal justice agencies. The study also will note increased public concern as reflected by news coverage as well as political reactions of executive and legislative branches in the form of laws and policies. The study proposes a four-part project: 1) comparing several disparate measures of severity trends in official crime data; 2) interviewing criminal justice professionals knowledgeable about changes in crime laws, policies, and offenses/offenders; 3) evaluating official government documents and reports and various opinion polls relating to perceptions of the severity of crime; and 4) performing computerized content analyses of crime coverage in newspapers.

The goal of this research study is to provide a comprehensive description of the empirical data and the context of changes in the population of offenders and offenses. The study will attempt to answer the following question:"Does the fact that more offenders are being sent to prison for longer sentences reflect an increase in serious crimes or an increase in punitive sentences imposed on a stable composition of offenders and offenses?" The study plans a multi-method approach to address differences among multiple data sources on the issue of changes in the composition and seriousness of offenses or offenders. An extensive review of academic literature revealed little theoretical contribution or empirical investigation into such changes.Official government reports, however, document growth in the absolute numbers and the escalating severity of crime. Examples of specific offense/offender characteristics to be examined include:

- type and quantity of drug offenses;
- weapon use;
- proportions of violent crime;
- dollar amounts of fraud convictions;
- level of violence associated with bank robbery;
- nature of money laundering and tax offenses;
- presence of drug involvement;
- nature of environmental offenses;
- crimes involving strangers; and
- criminal histories of offenders.

Several criminal justice databases measure offenses and offenders over time. While no single database answers all questions about changing composition, a combination of these empirical data may provide a more comprehensive understanding of what changes have occurred. Data sources will include the Commission's monitoring database, the Federal Probation Sentencing and Supervision Information System of the Administrative Office of the U.S. Courts (FPSSIS), and data from the U.S. Parole Commission and the Federal Bureau of Prisons.

FPSSIS data, available from 1984 through 1990, can provide information on general trends in offender mix as well as certain offense and offender characteristics. Although FPSSIS data lack the degree of consistency and detail over time to answer all pertinent questions, they are nonetheless valuable for overall trends. U.S. Parole Commission data also provide long-term information for the period 1972-1993, and although the only variables of interest to this study are indices of criminal history and offense severity, they add another dimension to the research question. Commission monitoring data and a set of augmented FPSSIS data are more detailed and will allow in-depth understanding of the change in composition of offenses and offenders, but they exist only for pre-post comparisons for 1984-85 and 1989-90. Further, changes in composition are available only for certain crimes: bank robbery, embezzlement, and drug offenses involving cocaine and heroin. The study also will explore data of the Federal Bureau of Prisons. All of these datasets will contribute to a complete analysis of the question of the changing composition of offenses and offenders.

# Prosecutorial Outcomes: A District-Based Analysis

In December 1991, the Sentencing Commission submitted its evaluation report to Congress as mandated by the Comprehensive Crime Control Act of 1984.<sup>82</sup> Included in the report were analyses of longitudinal data describing prosecutorial behavior in the federal court system. These analyses addressed the extent of court processing change in response to policy and legislative changes (i.e., the enactment of anti-drug legislation in 1986 and 1988, introduction of the sentencing guidelines, the U.S. Supreme Court's 1989 affirmation of the guidelines' constitutionality, and Justice Department policy statements regarding charging and plea practices under the guidelines). Overall report results showed that during the period under study none of these events affected case processing in the federal courts.

Building on this four-year evaluation effort, additional Commission analyses addressed further questions about the impact of the sentencing guidelines on case processing. The earlier analyses had not been sensitive to local conditions such as differences in caseload composition and size, the number of court personnel, and the effects of these factors on court operations and the flow of cases. Therefore, the follow-up analyses address these questions:

- Is the lack of impact from implementation of the guidelines, the <u>Mistretta</u> decision by the Supreme Court, the Anti-Drug Abuse Acts of 1986 and 1988, and the Thornburgh memo — replicated when variation across individual districts is taken into account?
- Irrespective of whether those null findings are replicated, what is the nature of the variation in case filings and guilty pleas across the various judicial districts?
- What is the impact on case processing of district characteristics such as the number of personnel (<u>e.g.</u>, judges, probation officers, assistant U.S. attorneys), crime rates (drawn from the FBI's Uniform Crime Reports), and caseload characteristics?

To answer these questions, the Commission estimated regression models for the number of cases filed and the number of guilty pleas. Data from a variety of sources for these analyses fell into three categories: prosecutorial outcomes, district-level measures of the court environment, and district-level measures of serious crime.

<sup>82 &</sup>lt;u>The Federal Sentencing Guidelines: A Report on the Operation of the Guidelines System and Short-Term Impacts</u> on Disparity in Sentencing, Use of Incarceration, and Prosecutorial Discretion and Plea Bargaining

Prosecutorial outcomes are taken from the Criminal Master File prepared for the federal system by the Executive Office of U.S. Attorneys.Constructed from these data, monthly totals for fiscal years 1986-1990 for the outcomes reported in the evaluation report included, for each federal court district, the number of matters initiated, the number of cases filed, and the number of guilty pleas.

Explanatory variables, included in these models to control for systematic variation within and across districts, are of two types: those descriptive of the court setting and those descriptive of the more general environment. The former type includes the numbers of various district court personnel and guideline cases sentenced each month. The latter type includes population data and monthly Uniform Crime Report (UCR) data from the FBI, aggregated by federal court district.

The results of these analyses, which focus on the 34-month period from December 1986 through September 1989, are rather straightforward. First, a moderate amount of variation across districts is demonstrated in the numbers of cases processed. In general, all 94 districts show little change in number of cases filed or guilty pleas. Figures G and H show the number of cases filed and the number of guilty pleas per month for Oregon, a typical medium-sized district. The four vertical lines represent the effective dates of the four policy initiatives listed above. Note that none of these initiatives is associated with changes in either graph.In fact, the numbers of cases filed and guilty pleas remain relatively constant during the time period studied.

Second, the regression findings replicate this result for all districts when estimated as a set.<sup>83</sup> The number of cases filed and the number of guilty pleas apparently were not affected in any systematic fashion by the policy initiatives cited above. These results confirm findings in the Commission's four-year evaluation report for the federal court system overall.

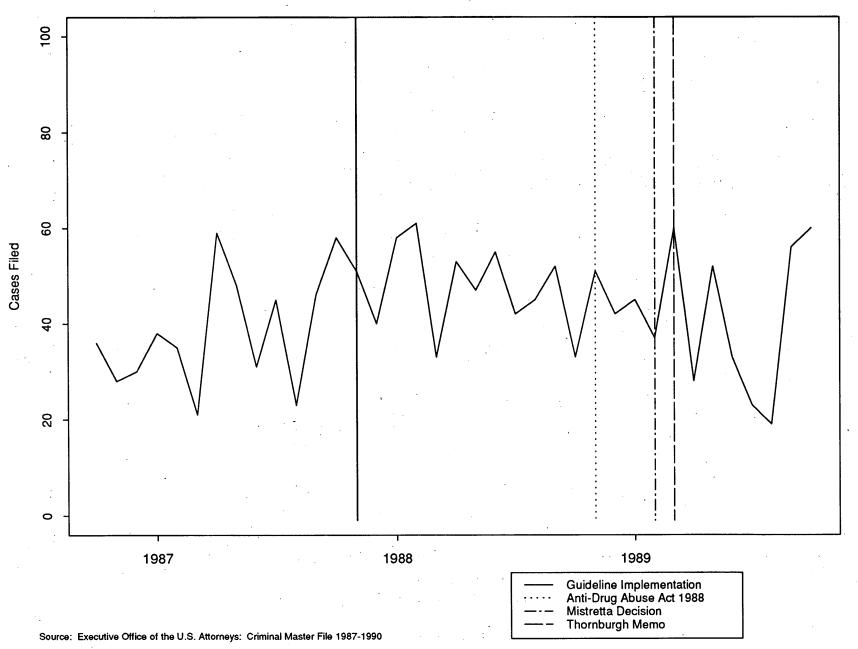

# Prison Impact Assessment

I he Commission continued its research on improving the methods for predicting the changes in imprisonment that arise from changes in the sentencing guidelines. Using a new prison impact model, the Commission made change estimates for five of the 1992 guideline amendments, namely 1) §§2L1.1, 2L2.1 and 2L2.3 (Offenses Involving Immigration, Naturalization and Passports); 2) §2A3.2 (Criminal Sexual Abuse of a Minor); 3) Chapter 5, Alternatives to Incarceration; 4) §3E1.1 (Acceptance of Responsibility); and 5) §2N2.1 (Food and Drug Act violations). Of these five amendments, the largest projected change was for an additional one-level reduction in Acceptance of Responsibility, with the model predicting a decrease of 4.2 percent in the prison population.

The basic premise of the prison impact model is that a reasonable estimate of the changes in prison population is represented by the total amount of prison time defendants received during a calendar year. Using fiscal 1991 data, the Commission calculated that 31,979 defendants were sentenced to a total of 111,981 person years of imprisonment. Thus, the projected estimate for the prison population is 111,981 defendants (about 36,000 more than are currently incarcerated in

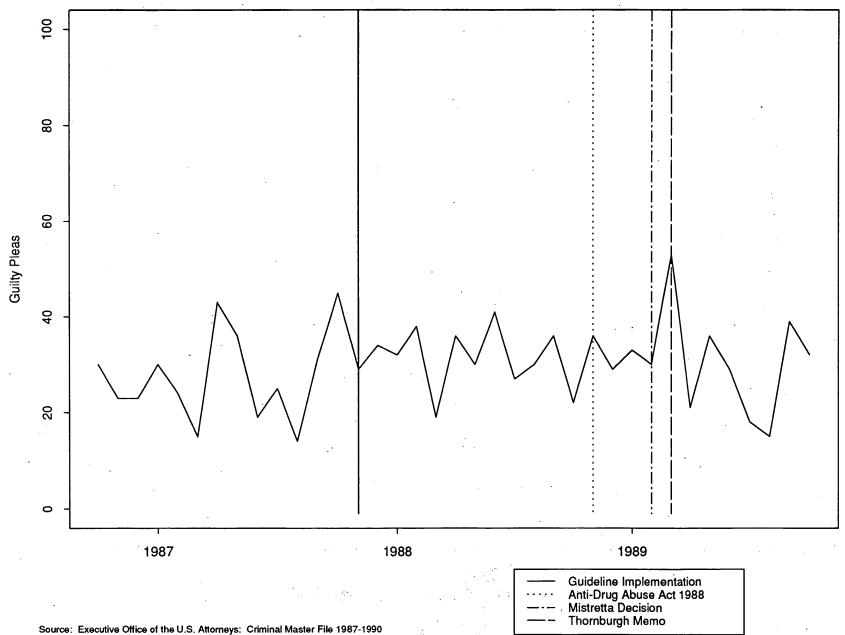

83 This type of analysis is referred to as a pooled cross-sectional and time series analysis because time series for multiple cross-sections (districts) are analyzed as a single dataset.

Cases Filed: October 1986 to December 1989 District of Oregon

# Figure H

Guilty Pleas: October 1986 to December 1989 District of Oregon

federal prisons). This constitutes the baseline against which the amendments are measured.

The prison impact model based its estimates on the fiscal 1991 population of 31,979 defendants, calculating how sentences for those defendants would have differed had the new guideline amendments been in place at the time of sentencing. As the amendments changed certain sentences, the total person years of imprisonment also would change. The difference between those two numbers constitutes an estimate for absolute change in the size of the long-term prison population; the ratio represents the percentage change. For example, projected changes to §3E1.1, Acceptance of Responsibility, would have resulted in 107,331 person years of imprisonment, reducing the total person years by 4,650, or a decrease of 4.2 percent (4650/111,981). This long-term change in the size of the prison population can be compared to the size of that population if the amendment had not passed.

The basis of the model is the resentencing algorithm. Each defendant's presentence report is examined to determine whether the imposed sentence would have been different under a proposed guideline amendment. If that is the case, the "position" of the imposed sentence is first computed.<sup>84</sup> Then the hypothetical new sentence is computed by moving the defendant to the new guideline range and imposing a new sentence at exactly the same position as before. If the guideline increases, the sentence increases proportionately. Thus, defendants with sentences imposed at the bottom of the guideline range would likewise be sentenced at the bottom of the new guideline range.

Sometimes actual sentencing practices required modifications to the assumption that sentencing under proposed amendments would be to the same position prior to the amendment. For example, assumptions are made that defendants are not resentenced above statutory maximums or below statutory minimums (except in cases of departures for substantial assistance under §5K1.1), or that sentence enhancements such as those found in 18 U.S.C. § 924(c) are not reduced. If a defendant was sentenced for multiple counts, the change in the guidelines involves reapplying the Chapter Three multiple count rules to determine the final offense level. Defendants whose sentence represented a departure from the guidelines are resentenced to a new value at exactly the same position unless the sentence would be below statutory minimums or above statutory maximums.

After computing the new sentence for each defendant, the model estimates the length of the defendant's likely prison term by 1) discounting the sentence for good conduct time and 2) calculating average life expectancy. The new estimates for the size of the prison population are achieved by totaling all the estimated prison terms.

In addition to projecting the 4.2 percent decrease in the size of the prison population for the amendment to Acceptance of Responsibility, the Commission projected a change in the size of the prison population for amendments to §§2L1.1, 2L2.1, 2L2.3, 2A3.2, 2N2.1, and amendments to the sentencing table expanding alternatives to incarceration. In all cases, the projected changes were less than 0.2 percent.

84 The "position" is defined as the proportion above or below the minimum of the applicable guideline range.

# **Description of Datafiles, Variables, and Footnotes**

## Introduction

Federal courts are required to forward sentencing information to the Commission on all defendants sentenced under the Sentencing Reform Act of 1984 (SRA), except in cases that solely involve petty offenses. Standard information on each case is computerized for analysis using data from case files received.

Tables in this report use the Commission's data file, MONFY92, which includes information on the 38,258 defendants sentenced under the SRA during fiscal year 1992 (October 1, 1991, through September 30, 1992) for whom data were received as of January 28, 1993. Given the nature of the data file and reporting requirements, the following are not included: cases initiated but for which no convictions were obtained; defendants convicted for whom no sentences were yet issued; and defendants sentenced but for whom no data were submitted to the Commission.

Because the Commission collects information only on cases sentenced under the guidelines, information on cases sentenced under prior law (pre-guidelines) during FY1992 is not available in this data set.

## Variables

The following section describes the variables used in this report.

#### Age

The Age of the defendant on the day of sentencing is calculated using the date of birth of the defendant as reported in the Presentence Report and the date of sentencing as reported in the Judgment of Conviction Order.

#### **Average Length of Imprisonment**

Using sentencing information obtained from the Judgment of Conviction Order, Average Months *Prison* is reported as the mean and median terms of imprisonment ordered for cases committed to the Bureau of Prisons. Cases that received no term of imprisonment are not included in the average. Cases for which a term of imprisonment was ordered but the length was indeterminable also are excluded. In most cases for which the exact term is unknown, the Judgment of Conviction Order merely specified a sentence of *Time Served*. Life sentences are treated in the calculation as 360 months.

#### **Cases Received by the Commission**

Each *Case* as recorded by the Commission involves a single sentencing event for a single defendant. Multiple counts, and even multiple indictments, are considered a single sentencing event if sentenced at the same time by the same judge. A single defendant may appear in more than one case if involved in more than one sentencing event. Multiple codefendants in the same sentencing each appear as a separate case.

#### **Chapter Two Guideline Applied**

*Chapter Two Guideline Applied* represents the Chapter Two (offense specific) guidelines applied in single and multiple count cases. Because a single case may reference several different guidelines, totals may equal more than 100 percent. For Chapter Two guidelines that list possible cross-references resulting in application of multiple guidelines, both the original and cross-referenced guideline(s) are included. However, if application of a specific cross-reference is required, only the original guideline is coded to avoid double-counting for these cases.

#### Circuit

Information on judicial *Circuit* is generated by computer using the location of the judicial district in which the defendant was sentenced.

#### **Citizenship Status**

Information on the *Citizenship Status* of defendants is obtained from the Presentence Report. Defendants are categorized as "U.S. citizen," "resident alien," "illegal alien," and "non-U.S. citizen, alien status unknown." The latter three categories are collapsed into the category of "non-U.S. citizen."

## **Country of Citizenship**

Information on the *Country of Citizenship* for non-U.S. citizen defendants is obtained from the Presentence Report and includes the most frequently occurring countries of origin for non-U.S. citizens. Countries appearing less than 50 times are collapsed into the "other" category.

#### Criminal History Category

Criminal History Category is derived from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 94.0 percent of cases for which the Commission has received such documents.

When the criminal history category is not specified in the Report on the Sentencing Hearing, the computer calculates the criminal history category based on several logical criteria, if available. For example, if the number of criminal history points is known or the guideline range and offense level are available from the Report on the Sentencing Hearing, criminal history category is calculated by reference to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing, but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the Presentence Report.

For Table 21 only, criminal history category is taken from the Presentence Report when the Report on the Sentencing Hearing is not available. While the court may disagree with Presentence Report information, the criminal history category is the same in more than 95 percent of cases for which both documents were received.

#### District

Information on judicial *District* in which sentencing occurred is obtained from the Judgment of Conviction Order.

#### **Document Submission Rates**

Three documents are represented in Table 9: Judgment of Conviction Order (J&C), Presentence Report (PSR), and Report on the Sentencing Hearing. The J&C and PSR are generally submitted in a standardized format. PSRs waived by the court are indicated in a separate column. Sealed PSRs are included as *Not Received*. Standardized forms for the Report on the Sentencing Hearing are most frequently submitted; however, transcripts or partial transcripts from the sentencing hearing are also included as *Received*.

#### Drug Type

Information on *Drug Type* is obtained from the Judgment of Conviction Order and the Presentence Report. It is only recorded if at least one of the statutes of conviction is a title 21 U.S. Code offense. Two different types of drugs are recorded if applicable, with the type that produces the highest base offense level coded as the primary drug type. Information about type of drug in this report is derived from the primary drug type. The category *Marihuana* includes Hashish and Hashish oil. The category *Methamphetamine* includes Methamphetamine precursors. All other drug types not listed separately in this report are collapsed into the *Other* category.

#### **Fines and Restitution**

Fines and Restitution information is obtained from the Judgment of Conviction Order. The Total Receiving Fines and Restitution includes the number of cases ordered to pay a fine, make restitution, or both. Cases involving fines and restitution overlap with other sentencing categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

The Average Dollar Amount of payment ordered, presented both as the Mean and the Median, is the dollar amount of the fine and the restitution ordered for cases involving economic sanctions. Cases that received no fine or restitution are not included in the calculation of the average. The number of cases upon which the average is based may not equal the Total Receiving Fines and Restitution. This is due to the failure of some Judgment of Conviction Orders to specify the dollar amount ordered. The Sum of payment ordered reflects the total dollar amount of fines and restitution ordered, excluding cases in which the amount was indeterminable. The median of payments ordered reflects the amount located at the fiftieth percentile of all amounts ordered, excluding cases in which the amount was indeterminable.

#### Gender

*Gender* of the defendant is obtained from the Presentence Report or through contact with the probation office.

### **Guideline Defendants Sentenced**

Each Guideline Defendant Sentenced, or Case, as recorded by the USSC, involves a single sentencing event for a single defendant. Multiple counts, and even multiple indictments, are considered a single sentencing event if sentenced at the same time by the same judge. A single defendant may appear in more than one case if involved in more than one sentencing event. Multiple codefendants in the same sentencing will each appear as separate cases.

## **Guideline Departure Rate**

Information on *Departures* is obtained primarily from the Report on the Sentencing Hearing. A case is determined to involve no departure if the sentence imposed is within the guideline range established by the court. If the sentence falls outside this range, the case is coded as a departure, and the applicable reasons given by the court are noted.

For cases in which no Report on the Sentencing Hearing is provided or the information contained in it is insufficient, the sentence from the Judgment of Conviction Order is compared to the guideline range recommended in the Presentence Report. *No Departure* is assumed if the sentence imposed falls within the recommended range. However, a determination of *Departure* is <u>not</u> assumed if the sentence falls outside the guideline range recommended by the probation officer, due to possible changes in that range based on court findings. For these cases departure status is coded as missing.

#### **Guideline Sentencing Range**

The *Guideline Sentencing Range* is taken from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 94.0 percent of cases for which the Commission has received such documents. When the guideline sentencing range is not specified in the Report on the Sentencing Hearing, the computer calculates the guideline sentencing range based on several logical criteria, if available. For example, if the criminal history category and offense level are available from the Report on the Sentencing Hearing, the guideline sentencing range is calculated by reference to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing, but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the Presentence Report.

In cases for which a guideline sentencing range is trumped by a statutory maximum or mandatory minimum, the original (pre-trumped) guideline sentencing range is reported.

#### Income

The Commission codes *Income* to represent monthly income to the nearest dollar and includes sources other than traditional employment, such as welfare payments or unemployment compensation. Zero dollars are entered for persons with no income (whether unemployed, student, etc.). This variable is coded as missing or inapplicable when the Presentence Report indicates erratic or sporadic employment that might make an income value potentially misleading.

#### Length of Imprisonment

Using sentencing information obtained from the Judgment of Conviction Order, Length of Imprisonment is provided only for cases committed to the Bureau of Prisons. Life sentences are included in the category Over 60 months. Sentences of a partial month have been rounded to the next month. Differences between the number of cases included and the total number of defendants sentenced to a term of imprisonment are due to missing information on the exact length of the term ordered. In most cases for which the exact term is unknown, the Judgment of Conviction Order merely specifies a sentence to Time Served.

## **Mode of Conviction**

Information on *Mode of Conviction* is obtained from the Judgment of Conviction Order. Defendants sentenced subsequent to a plea of guilty or <u>nolo contendere</u> are included in the *Plea* category. Defendants sentenced subsequent to a trial by judge or jury are included in the *Trial* category. For the purposes of statistical analysis, cases sentenced pursuant to both a plea and a trial are excluded.

## **Offense Level**

The final *Offense Level* used in these tables is taken from the Report on the Sentencing Hearing provided by the sentencing court. Tables involving the Report on the Sentencing Hearing are based on the 94.0 percent of cases for which the Commission has received such documents.

When the final offense level is not specified in the Report on the Sentencing Hearing, the computer calculates the offense level based on several logical criteria, if available. For example, if the guideline sentencing range and criminal history category are available from the Report on the Sentencing Hearing, final offense level is calculated by referring to the guideline sentencing table. Additionally, if the three main guideline factors were not provided on the Report on the Sentencing Hearing, but the court indicated that it accepted the values contained in the Presentence Report, the guideline factors are taken from the Presentence Report.

#### **Position of Sentence**

Departure information is given in more detail by describing the group of cases sentenced within the guideline sentencing range in terms of their relative position within the range. Only cases with complete information from the Report on the Sentencing Hearing are used in this table. The *Position of Sentence* relative to the guideline sentencing range is determined by dividing the available range (after accounting for statutory restrictions on either or both ends of the range) into four quarters and locating the position of the sentence relative to these four quarters. For cases in which the sentence is located outside the guideline sentencing range, departure information as reported by the sentencing court is provided. Differences in the number and percentage of cases in each location may differ from tables that report the Commission's standardized departure information due to the exclusion of any case missing complete information from the Report on the Sentencing Hearing and information on statutory minima and maxima.

## Primary Offense Category

Information on *Primary Offense Category* is obtained from the Judgment of Conviction Order. An offense code was derived for each of up to four counts of conviction in every case, based on the statute(s) and elements of conviction. The "primary" offense code for the case was determined to be the offense code applicable for the count with the highest statutory maximum. If two or more counts were found to have the same statutory maximum, "primary" offense was selected according to the following (diminishing) order:

a) violent offenses (including burglary of a residence)

Ę

- b) drug offenses
- c) firearm offenses
- d) property offenses
- e) moral turpitude offenses
- f) other offenses

In cases involving different offense codes that were similar under this second criterion as well (e.g., two different property offenses with the same statutory maximum), statutory maximum fines were used as tie-breakers. Finally, in the small number of cases unresolved, the offense type that best represented the nature of the criminal behavior was chosen.

For convenience in analysis, a summary variable describing "primary offense category" was derived. This code was generated by grouping similar primary offense codes into a smaller set of categories.

Listed below are the offense types that were grouped into each of the primary offense categories used in this report.

Murder includes first degree murder, felony with death resulting, second degree murder, and conspiracy to murder (with death resulting).

Manslaughter includes involuntary manslaughter and voluntary manslaughter.

Kidnapping/Hostage includes ransom taking and hostage/kidnapping.

Sexual Abuse includes sexual abuse of a minor, sexual abuse of a ward, criminal sexual abuse, and abusive sexual contact.

Assault includes attempt to commit murder, assault with intent to murder, threatening communication, aggravated assault, conspiracy with attempt to murder, obstructing or impeding officers, minor assault, and conspiracy that includes assault with attempt to murder.

Robbery includes bank robbery, aggravated bank robbery, Hobbs Act robbery, other robbery, and mail robbery.

Arson includes arson and damage by explosives.

Drugs: Trafficking includes drug distribution/manufacture, drug distribution/manufacture — conspiracy, continuing criminal enterprise, drug distribution — employee under 21, drug distribution near school, drug import/export, drug distribution to person under 21, and establish/rent drug operation.

Drugs: Communication Facility includes use of a communication facility in a drug trafficking offense.

Drugs: Simple Possession includes not only simple possession of drugs but also distribution of a small amount of marihuana.

*Firearms* include unlawful possession/transportation of firearms or ammunition; possession of guns/explosives on aircraft; unlawful trafficking, etc. in explosives; possession of guns/explosives in federal facility/schools; use of fire or explosives to commit felony; and use of firearms or ammunition during crime.

Burglary/Breaking & Entry includes post office burglary, burglary of DEA premises (pharmacy), burglary of other structure, bank burglary, and burglary of a residence.

Auto Theft includes auto theft (including parts), receipt/possession of stolen auto or parts, and altered identification numbers/trafficking in altered (auto).

*Larceny* includes bank larceny, theft from benefit plans, other theft — mail/post office, receipt/possession of stolen property (not auto), other theft — property, larceny/theft-mail/post office, larceny/theft — property (not auto), and theft from labor union.

Fraud includes odometer laws and regulations, insider trading, and fraud and deceit.

*Embezzlement* includes embezzlement — property, embezzlement from labor unions, embezzlement — mail/post office, embezzlement from benefit plans, and bank embezzlement.

Forgery/Counterfeiting includes counterfeit bearer obligations and forgery/counterfeit (non-bearer obligations).

*Bribery* includes payment to obtain office, bribes involving officials, bribery — bank loan/commercial, loan or gratuity to bank examiner, etc., gratuity involving officials, and bribe or gratuity affecting employee plan.

Tax Offenses include receipt/trafficking in smuggled property; aid, etc., in tax fraud; fraud — tax returns, statements, etc.; fraud, false statement — perjury; failure to file or pay; tax evasion; evading import duties (smuggle); failure to collect or account for taxes; regulatory offenses —

taxes; failure to deposit taxes in trust account; non-payment of taxes; conspiracy to avoid taxes; and offenses relating to withholding statements.

Money Laundering includes laundering of monetary instruments, monetary transaction from unlawful activity, failure to file currency report, and failure to report monetary transactions.

*Extortion/Racketeering* includes extortionate extension of credit, blackmail, extortion by force or threat, Hobbs Act extortion, travel in aid of racketeering, crime relating to racketeering, and violent crimes in aid of racketeering.

*Gambling/Lottery* includes engaging in a gambling business, transmission of wagering information, obstruction to facilitate gambling, and interstate transportation of wagering paraphernalia.

*Civil Rights* include interference with rights under color of law; force or threats to deny benefits or rights; obstructing an election or registration; manufacture, etc. eavesdropping device; other deprivations/discrimination; obstructing correspondence; peonage, servitude, and slave trade; intercept communication or eavesdropping; and conspiracy to deprive individual of civil rights.

*Immigration* includes trafficking in U.S. passports; trafficking in entry documents; failure to surrender naturalization certificate; fraudulently acquiring U.S. passports; smuggling, etc.; unlawful alien; fraudulently acquiring entry documents; and unlawfully entering U.S.

*Pornography, Prostitution* includes dealing in obscene matter, transportation of minor for prostitution/sex, transportation for prostitution/sex (adult), sexual exploitation of minors, materials involving sexual exploitation of minors, obscene telephone or broadcasting, and selling or buying children for pornography.

Offenses in Prisons include contraband in prison, riots in federal facilities, and escape.

Administration of Justice includes commission of offense while on release, bribery of a witness, failure to appear by defendant, contempt, failure to appear by material witness, obstruction of justice, payment to witness, perjury or subornation of perjury, misprision of a felony, and accessory after the fact.

Environmental/Fish and Wildlife includes specially protected fish, wildlife, plants.

National Defense includes evasion of export controls and exportation of arms, etc., without license.

Antitrust includes bid-rigging, price-fixing, and market allocation agreement.

Food and Drug includes false information or tampering with products, tampering to injure business, tampering with risk of death or injury, and violation of regulations involving food, drugs, etc.

Other Miscellaneous Offenses include illegal use of registration number — drugs; illegal transfer of drugs; illegal regulatory number to get drugs; drug paraphernalia; forgery/fraud for drugs; dangerous devices to protect drugs; manufacture drugs against quota; endangering life while manufacturing drugs; operate carrier under drugs; endangerment from hazardous/toxic substances; mishandling substances, records, etc.; threat of tampering with public water system; tampering with public water system; hazardous devices of federal lands; mishandling other pollutants, records, etc.; improper storage of explosives; recordkeeping violation — explosives; possession of other weapon — on aircraft, in federal facility; failure to report theft of explosives; feloniously mailing injurious articles; transport of hazardous material in commerce; interference with flight crew, other offense — aboard aircraft; criminal infringement of copyright; conflict of interest; unauthorized payment; non-drug forfeiture; impersonation; false statement to Employee Act; reporting offenses — labor related; criminal infringement of trademark; unlawful conduct relating to control/cigarettes; trespass; destruction of property; destruction of mail; aircraft piracy; conspiracy to murder (no death, assault, or attempt); conspiracy to commit murder; and all other miscellaneous offenses not previously listed in any of the other categories.

#### Race

Information on *Race* of the defendant is obtained from the Presentence Report. Due to new instructions issued by the Administrative Office of the U.S. Courts, the reporting of defendant race in the Presentence Report is separated into race and ethnicity. The categories for race include *White*, *Black*, *Native American or Alaskan Native*, and *Asian or Pacific Islander*. The additional field of ethnicity indicates whether a defendant is of Hispanic origin. For purposes of this report, defendants whose ethnic background is designated as Hispanic are shown as Hispanic regardless of racial background. The Other category includes defendants of Native American, Alaskan Native, and Asian or Pacific Islander origin.

## **Reasons for Departure**

*Reasons for Departure* as given by the sentencing judge are coded for cases involving departures. This information is obtained from the Report on the Sentencing Hearing when available. Courts often provide more than one reason for departure; consequently, on departure tables the percentages across all reasons for departure add up to more than 100 percent. Reasons listed are those given more than three times. The "Other" category includes any other, less frequently given reason.

#### Single and Multiple Count Cases

Information on *Number of Counts* of conviction is obtained from the Judgment of Conviction Order and verified with the Presentence Report. Cases with more than one count of conviction are included in the *Multiple Count* category.

## **Type of Guideline Sentence Imposed**

Using sentencing information obtained from the Judgment of Conviction Order, the Total Receiving Prison includes the number of defendants sentenced (and percent of Total Cases) who received a commitment to the Bureau of Prisons. This column includes those receiving Prison, and the Prison/Community Split Sentence.

The Prison category includes defendants sentenced to a term of imprisonment only, with no condition of post-release supervision, as well as defendants sentenced to a term of imprisonment followed by a term of supervised release with no conditions of community confinement or home detention. The Prison/Community Split Sentence is a term used for a new sentence under the Sentencing Reform Act and guidelines. This involves a term of imprisonment followed by a term of supervised release that includes a condition of community confinement or home detention. These conditions added together must comprise at least the minimum guideline sentence established by the sentencing court.

The *Total Receiving Probation* column includes the number of defendants sentenced (and the percent of *Total Cases*) who received a term of probation with or without a condition of community confinement, intermittent confinement, or home detention. This column also represents the total of the *Probation Only* and *Probation and Confinement* columns.

The *Probation Only* column includes the number of defendants who received a term of probation without a condition of community confinement, intermittent confinement, or home detention.

*Probation and Confinement* includes the number of defendants who received a term of probation with a condition of community confinement, intermittent confinement, or home detention.

Cases Involving Fines and Restitution overlap with the other categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

## Footnotes

The following footnotes pertain to the "Fiscal Year 1992 Guideline Sentences" tables provided in Appendix B. Actual figures provided in these footnotes apply only to the national data table. Additional information describing variables and data used are provided earlier in this appendix.

- <sup>1</sup> Table-wide deletion is used to exclude cases missing information on any or all of the following defendant characteristics: Gender, Race, or Age. Nationally, this involves the exclusion of 1,835 cases because of missing information on Gender (9), Race (636), or Age (348). Additionally 6,861 cases missing information on the income of the defendant were excluded from the calculation of average monthly income.
- <sup>2</sup> Cases with missing or indeterminable information on Mode of Conviction (59) are excluded. In addition, 143 cases coded with a value of *Both Plea and Trial* are excluded.
- <sup>3</sup> The *Total Cases* column includes all cases with information available on type of sentence, economic sanction, and primary offense. Table-wide deletion results in the exclusion of cases missing any or all of these indicators. Nationally, 533 cases missing any or all of these indicators have been excluded: primary offense (177), type of sentence imposed (234), and economic sanction type (605).
  - Cases in the *Total Receiving Prison*, *Total Receiving Probation*, and *Other Cases* categories total 100 percent of all cases; however, *Cases Involving Fines and Restitution* will overlap with the other categories because fines and restitution may be ordered in conjunction with the imposition of other sanctions.

- Cases involving no term of imprisonment and cases with indeterminable terms are excluded from the calculation of the *Average Months Prison*. Any sentence of days is rounded up to the nearest month. Life sentences are included in these calculations as 360 months. Of the 37,725 cases included in the *Total Cases* column, 9,159 cases involving no term of imprisonment and 642 cases with an unspecified length are excluded from calculation of the average.
- <sup>5</sup> Cases involving no term of imprisonment and cases with indeterminable terms are excluded from the category *Length of Prison Term*. Any sentence of days is rounded up to the nearest month. Life sentences are included in the category *Over 60*. Of the 37,725 cases included in the *Total Cases* column, 9,159 cases involving no term of imprisonment and 642 cases with an unspecified length are excluded from this category.
- Cases receiving no order of fine or restitution are excluded from the calculation of the *Total Receiving Fines and Restitution*. The number of cases upon which the average is based may not equal the *Total Receiving Fines and Restitution* due to the failure of some Judgment of Conviction Orders to specify the dollar amount ordered. Of the 37,725 cases included in the *Total Cases* column, 25,084 cases involving no order of fine or restitution and 605 cases with an indeterminable dollar amount ordered are excluded from these calculations.

6

3

Of the 38,258 guideline cases, 2,029 cases with missing or incomplete departure information were excluded.

The following information corresponds to footnotes in the "Selected Federal Criminal Justice Indicators," "Crimes Reported To Police," and "Selected Demographic Indicators" tables in Appendix B.

<sup>1</sup> Cities are listed, in decending order, according to the amount of sentencing guideline documentation submitted to the Commission.
