

***UNITED STATES SENTENCING COMMISSION***

**VARIABLE CODEBOOK FOR  
*FEDERAL SENTENCING OF CHILD PORNOGRAPHY:  
PRODUCTION OFFENSES***

## INTRODUCTION

In October 2021, the Commission published, “Federal Sentencing of Child Pornography: Production Offenses.” That report updates and expands upon the Commission's 2012 *Report to the Congress: Federal Child Pornography Offenses*. It provides the Commission’s most in-depth study of child pornography production offenses to date through an analysis of three primary factors that the Commission has identified as relevant to sentencing child pornography production offenders. Focusing on data related to child pornography production offenders’ proximity to the victim, participation in production, and propensity to engage in other abusive behaviors, this report provides insight into how offenders exploit victims and technology to produce child pornography and the factors courts consider in fashioning sentences for these offenses.

This codebook is for the Commission’s analysis datafile used for that publication. All data comes from the Child Pornography Production Report coding project. This coding project collected information on offenders sentenced for production of Child Pornography, under §2G2.1. The datafile includes only those variables used for the analyses in the publication. Some of the data in this report are analysis variables from the Commission’s individual offender datafile for fiscal year 2019. Additional information for those variables can be found in the Commission’s Variable Codebook for Individual Offenders: Standardized Research Data Documentation for Fiscal Years 1999-2021 at [www.ussc.gov/research/datafiles/commission-datafiles#individual](http://www.ussc.gov/research/datafiles/commission-datafiles#individual).

## **HOW TO USE THE VARIABLE CODEBOOK**

The first column in the codebook, NAME, lists the name of each variable in alphabetical order.

The second column, ORIGIN, lists the source of the variable. All the variables in this codebook are from the special coding project datafile. See the Commission's Variable Codebook for Individual Offenders: Standardized Research Data Documentation for Fiscal Years 1999-2021 for information on additional variables on datafile.

The third column, FORM, describes whether the variable is coded as numeric (NUM) or character (CHAR).

The fourth column, CODES, lists all the values for each variable and describes what those values mean.

The final column, DESCRIPTION, describes the uses and creation of each variable.
